Mr. George Allen, of Lexington, Neb., the noted Shropshire sheep and Short-horn cattle breeder, writes as follows: "My sheep are doing very well and I have a bunch of rams which I think are the best lot I ever owned. They are a lot of typical Shropshires and a great many of them suitable to head the choicest of herds. A gentleman from Illinois was looking at them the other day and he said they were without doubt the best bunch of rams in America and he doubted if there was any flock in England that could beat them. The Short-horns are all doing wonderfully well this year and I have some very good young Scotch bulls for sale that are suitable to head choice herds. The herd now numbers about eighty-five head and are mostly Scotch of Cruickshank, Marr, Campbell and Duthie breeding." Anyone wanting a good Shropshire ram or a good young Scotch bull should write Mr. Allen at once, and kindly mention The Homestead.

Mr. J. B. Turbett, of Hauna City, Ill., breeder of Poland China hogs and Short-horn cattle, has selected September 27th as the day on which he will hold his first annual sale. The offering of Poland Chinas is made up of forty head and consists of thirty-two spring pigs and eight tried brood sows. Mr. Turbett's herd boar is Woodview Keep On by Master Keep On by Keep On, and is the sire of most of the spring pigs. A litter by A. H. Sunshine, he by A. H. Perfection, should attract the attention of those in attendance sale day. A litter by Sunlight, he by Conqueror, is another of the good kind that will please discriminating buyers. On the same day Mr. Turbett will offer for sale seven head of horses, including one good brood mare, three yearlings and three sucklers. Mr. Turbett will be pleased to place the names of any breeders interested on his mailing list and will forward catalog promptly as soon as issued. Kindly mention The Homestead when writing and watch for particulars in later issues.

Mr. Roy West, of Bondurant, Iowa, has one of the coming Duroc herds of the West. A representative of The Homestead recently called on him and carefully inspected his crop of pigs. The herd boar now in use is known as Belle's Chief I Am by Belle's Chief, he by Red Chief I Am. In addition to him, Mr. West has secured a Kan't Be Beat boar. This certainly will place his Durocs on a high standard. About seventy head of the following strains are to be found at this place: Proud Orion, Arion's Type, Choice Goods, Advance and a number of Long John pigs sired by Belle's King, he by Echo King. Some very good sows are by King Perfection, dam being Maxwell Bell; also pigs by Malcom's Model out of a Billy K. sow. Mr. West will show some of his good ones at the coming state fair and Duroc breeders will not find them disappointing. At a future date Mr. West will have his regular card in these columns, and we take the opportunity at this time to say that his bred sow sale

will take place on February 4, 1907, at which time a choice lot of bred individuals will go under the hammer.

The Welles Safety Evener & Mfg. Co., of Allison, Iowa, extend a cordial invitation to readers of The Homestead to visit their exhibit at the Iowa State Fair, at Des Moines, Iowa, in their announcement on page 19 of this issue. Write them for catalog, kindly mentioning The Homestead.

DON'T FORGET.

Next Wednesday, August 15th, at Maple Hill farm near Osborn, Mo., Mr. H. C. Duncan, of Osborn, Mo., will hold his mid-summer sale of Short-horns. If you are in the market for good Short-horns this will not be a good sale to miss.

ROYAL PITLESS WAGON SCALE.

The wonder of the age is the Royal Pitless Wagon Scale, manufactured and sold by the Monarch Grubber Company, of Lone Tree, Iowa. How can so good a scale be sold on thirty days' free trial? Particulars may be had for the asking by addressing the Monarch Grubber Company, at Lone Tree, Iowa, mentioning The Homestead.

ONE MONTH FREE.

We again call attention to the announcement of Dr. Williams made on page 17. So confident is the doctor that he has a positive cure for catarrh that he offers all catarrh sufferers one month's catarrh treatment free. Those who visit Des Moines during the state fair can have an opportunity to receive a personal examination as well as one month's treatment free of charge. Whether you take treatment now or not, it will pay you to call and consult Dr. Williams if you are suffering from catarrh or any of its allied diseases.

CAUSTIC BALSAM CURES LUMP JAW.

Mr. Daniel Dupertuis, of Curtis, Wash., under date of July 24, 1906, writes the Lawrence-Williams Company, Cleveland, Ohio: "Among the many ailments which may be cured by Gombault's Caustic Balsam should be included lump jaw in cattle. One application will cure it. It is the best liniment I have ever seen or used and I would like to see it in the hands of every dairyman."

HARVEY & SON TO SELL POLAND CHINAS.

Mr. Jno. H. Harvey & Son, of Maryville, Mo., claim November 17th for the sale of Poland China boars and gilts. Messrs. Harvey breed a type of hog that meets the requirements of the pork raisers of the corn belt, and their November 17th sale will be a good one to attend. Future announcements will appear in due time. Watch for them.

F. A. KRUSE OFFERS GOOD DUROCS.

On page 26 of this issue you will find the advertisement of Mr. F. A. Kruse, of Waco, Neb. This gentleman is one of the young breeders that has made the hog business profitable. His herd is not as large as many, but where it loses in quantity it gains in quality. At the head of this herd we find the good son of Fashion Improver by Improver 2d and out of Fashion. Both dam and sire are show hogs and have won honors at the best shows of this breed. Mr. Kruse will price his hogs worth the money and anyone looking for some good Durocs should not forget to write him.

A GREAT SCHOOL FOR YOUNG MEN.

Young men who wish to gain a foothold in the business world must be prepared to do the work at the business office. This preparation can be made quickly, cheaply and effectively at the Capital City Commercial College at Des Moines, Iowa. This school has been in our midst for more than twenty years and in that time has established a most enviable record for thoroughness. Its graduates always secure good positions. The Homestead suggests that young men who are interested in securing a usable, money-making education should write to the president for a bulletin of information. See the advertisement on page 4.

THE CHAPMAN HERD OF POLANDS.

One of the oldest breeders of the Poland Chlue hog of Nebraska is Mr. H. Chapman, of Pawnee City. This gentleman has been raising good Poland for a number of years and each year finds him with a strong lot of pigs. The hog raised by Mr. Chapman is the large, roomy animal, with plenty of quality and easy feeding, as well as being ready for market at from six months to two years of age. At the head of this herd we find one of the strong breeding boars of the Poland China breed. King Do Do by Expansion has made good as a sire and his get are liked by all who see them. Mr. Chapman has shipped his type of hog to many states and his success in giving satisfaction is hard to excel. Look up his advertisement on page 16 and write him for prices.

VERY STRONG LOT OF SPRING PIGS.

Mr. T. Nelson, of Clay Center, Neb., has one of the growthiest lots of spring pigs the writer has looked over this season. The Nelson herd has some of the royal blood of the Duroc breed and the owner has never let the herd forget the value of the good blood lines. The crop of spring pigs will number about seventy-five in all and they are a very even lot to see. Mr. Nelson has given them the best of attention and with the strong ancestry back of them has made them what they now are. Several pigs sired by Improver Jr. are worthy of special note, as they are fit to go out and make a creditable showing. Improver Jr. is a very growthy hog with a good, strong back, very strong legs and plenty of bone as well. His get are very uniform in size and color and show signs of making animals as worthy as the sire. The sire is one of the very best sons of the old hog, Improver 2d. Mr. Nelson has decided to select a few of the spring pigs for showing this fall. They are very growthy and should prove strong in the best of shows. The other boar doing service in the herd is Gold Billy, sired by Golden Rule, a Choice Goods and Ohio Chief boar. This yearling is a very strong breeder and his get will bear out my statement. The two

Poland China Barrow. Age 18 months. Weight 1,035 pounds. Fed on Iowa Stock Food Bred and owned by Peter Houw, Orange City, Iowa.

FREE To any person who has never fed Iowa Worm Powder we will send a \$1.00 package FREE on receipt of 20 cents in stamps for postage and packing. Address Dept. A.

IOWA STOCK FOOD CO., JEFFERSON, IOWA

boars doing service in the herd should make a very good combination, as both represent the choicest blood of the day. This firm is reliable in all ways and they have the goods to back their assertions. Don't fail to look up their show herd at Nebraska State Fair.

A WELL-KNOWN DUROC FIRM.

On page 21 appears a fair likeness of Messrs. Sheldon Bros., of Shannon City, Iowa, well-known breeders of Duroc Jersey hogs. There are few herds better known throughout the middle West than that of Messrs. Sheldon Bros. Their father, Mr. H. C. Sheldon, was one of the best breeders of the West. He was a careful judge and a student of pedigree. From this herd came some of the best producing sows of the breed. With Proud Advance as herd boar and the extraordinary collection of sows to be found in this herd, the future of Messrs. Sheldon Bros. is assured. They will be pleased to show their herd to any reader of The Homestead and a cordial invitation is extended to all interested in Durocs to visit them. They are deserving of the support of every breeder and will make an offering in the fall that will please discriminating buyers. Plan to inspect their herd and kindly mention The Homestead when writing them. See advertisement on page 26.

A GOOD STOCK FARM FOR SALE.

We desire to call our readers' attention to the splendid stock farm offered for sale by Mr. L. Brodsky, of Plover, Iowa. It contains 320 acres with good improvements, very choice land and is right adjoining town. There are two silos in the barn that hold 100 tons each, and Mr. Brodsky has the necessary machinery for filling and a good sixteen-horse gas engine for running the same. The land is nearly all tiled out and the farm has been the home of the Ploverdale Short-horns for nearly eighteen years. One hundred steers have been fed on this farm, besides the herd of Short-horns, so it is rich in fertility and would make an ideal dairy farm, being located near one of the best creameries in Iowa. Mr. Brodsky is closing out and he will make good terms on the farm if taken within the next thirty days. This is an ideal stock or dairy farm, and as Mr. Brodsky wants to sell, it can therefore be bought right and on the best of terms. Write him at once about it and mention The Homestead.

THE ROLFE COMBINATION SHORT-HORN SALE.

The combination Short-horn sale at Rolfe, Iowa, on August 22d, promises to be one of the attractions of the season. This sale occurs the day before the Brodsky sale at Plover, Iowa, and all those who attend the latter can just as well arrange to be at the two sales. Messrs. M. P. Hancher, Claus Johnson & Son, T. H. Fisher and A. G. Hewlett have all drawn upon some of their best animals and have consigned them to this sale. Messrs. Johnson & Son are selling fifteen head, among which will be ten females and five bulls, including a richly-bred young Mysie bull, Mysie's Lad. They are also selling a nice lot of cows and heifers bred to Scotch bulls or will have calf at foot. Mr. A. G. Hewlett also sells fifteen head, among which will be three young bulls and twelve cows and heifers. Five of these heifers are sired by the well-known Scotch bull, Aberdeen Prince. Those old enough are bred to Baron Marr, a richly-bred Scotch Dorothy bull. Mr. T. H. Fisher will sell eight head, four of which will be young bulls. One of these will be a son of his former herd bull, Prince of Athens, and he will be one of the best bulls in the offering. Mr. Fisher will also sell some good cows and heifers well along in calf to his present Scotch bull, Prince of Rosebud. Mr. M. P. Hancher is consigning eighteen head, six of which are young bulls. Two of these young bulls are straight Scotch. One is Choice Goods Ury, a son of Carter's Choice Goods and a grandson of the \$5,500 bull, Choice Goods. His dam is Ury Lady of Roseneath and he is one of the best herd heading propositions in the sale. Mr. Hancher is also

selling a good Rosemary bull out of Imp. Rosemary and sired by Golden Lad, a Brawith Bud bull formerly used in his herd. He also contributes the splendid cow, Mina of Oak Ridge 2d, undoubtedly one of the very best Scotch cows that will be sold this season. She will have a calf at foot by Gloster Prince. A good Scotch heifer and some extra good Scotch-topped cows will also be contributed by him and these will all be bred or will have calf at foot by Scotch bulls. The entire offering is a very useful and well-bred lot of Short-horns and it is going to be a good place to buy. Send to Mr. M. P. Hancher, manager, Rolfe, Iowa, for catalog and kindly mention The Homestead.

GEO. KERR BUYS CHOICE OHIO CHIEF SPRING PIG.

The well-known breeder above named has made one of the good deals where he gets possession of one of the best sons of the great Ohio Chief. Mr. Kerr's crop of spring pigs will number around 200 and these represent the blood of some of the best families of the Duroc breed. The purchase of the Ohio Chief pig was made to add more royal blood to the herd. This young spring pig was purchased from Mr. Taylor, of Bethany, Neb. The pig was a very promising one and Mr. Kerr thinks him the best Ohio Chief pig he has seen anywhere. The pig was purchased at a long price and is cheap at \$500. The Kerr herd represents the blood of Crimson Wonder, Kansas Wonder, Orion, Kan't Be Beat, Choice Goods, Harding's Proud Advance and Tolstoi. The crop of spring pigs are coming along nicely and will be in good shape for the fall and winter buyers. Look up the advertisement in this paper and write Mr. Geo. Kerr at Sabetha, Kan.

TRONE'S DUROC JERSEY SALE—LAST CALL.

We wish to impress upon the readers of The Homestead interested in Duroc Jerseys the fact that Messrs. Geo. W. Trone & Sons, of Rushville, Ill., are offering a very select lot of sows and boars for their sale to be held on Tuesday, August 14th. The writer has inspected the offering and is pleased to recommend the stock to readers of The Homestead wanting something good. In both individuality and breeding there are few if any offerings that will compare with this one. The blood of such noted winners as Oom Paul, Gold Finch and Kruger is plentiful in the herd of Messrs. Trone. It is not necessary at this time to go into detail regarding the past history of this herd. The prominent place it has held in Duroc circles for many years is ample evidence of the quality and breeding of the herd. The offering is made up of fifty head of fall and summer boars and gilts and a few spring boars. The blood of such noted boars as Oom Paul, Gold Finch, King Morton, Milton Orion, Kruger and other noted sires is plentifully distributed. This week we wish to call attention to some of the individuals of the offering. No. 2 of the catalog is a yearling boar by Oom Paul and out of May Flower 53556 by Gold Finch. This combination of blood has never failed to produce something extra good, and in this yearling boar someone can find an extra good herd boar. Another fact which breeders should not overlook and which is one of the most important features of this sale, is that there are few boars in the country sired by Oom Paul, and since his death, which occurred a few weeks ago, there will be few opportunities to secure a son of this noted boar. Mr. Trone has selected none but boars which are of the herd header sorts and which will reflect credit upon their noted sire. Kruger Boy, another yearling by Kruger, is a nice, deep, mellow boar weighing between 400 and 500 pounds, has good length, straight, deep sides, fine head and ears, good shoulders, hammed down to hock, wide, arch back, straight, heavy bone and stands up on his toes. He has every appearance of a show hog and is a herd header of the first order. Onward is another yearling son of

Kruger that will attract attention on sale day. Monarch, Diploma and Pedro are three yearling sons of King Morton 14259 by Morton King 8725 and are out of Colonial Girl 44794 by Gold Finch. These hogs are large and growthy, yet have the quality and finish desired by discriminating breeders. One of the attractions of the sale is found in King Morton. He was sired by Morton's King 8725, dam Ohio Belle by Ohio Chief. This boar, is a far better breeder than he looks to be. A number of his get in the sale will give those in attendance an opportunity to see and judge for themselves something of his desirability as a breeder. The females which Messrs. Trone are offering for sale at this time are an exceptionally good lot. There are a number of summer and fall sows which are the get of the hogs mentioned above. They are a very uniform lot, both as regards size and quality, and any breeder expecting to hold a sale this fall or winter will find it to his interest to secure some of these richly-bred sows. Breeders especially who have hogs of note will find that these sows will cross well with their hogs. Messrs. Trone extend a cordial invitation to all those interested in Duroc Jerseys to be present sale day. To those who cannot attend we wish to state that bids sent to Mr. D. M. Pierce, representing The Homestead, in care of Messrs. Trone will be carefully handled. Write today for catalog and plan to be present sale day, as per the announcement on page 22 of this issue, kindly mentioning The Homestead.

SHORT-HORN SALE FRIDAY, AUGUST 24TH, AT WATSEKA, ILL.

Mr. C. E. Iliff, of Milford, Ill., will hold a public sale of his entire herd of Scotch and Scotch-topped registered Short-horn cattle on Friday, August 24th, at Watseka, Ill. Some choicely-bred individuals will go under the hammer at this sale, as may be noted by the grandly-bred Marr bull, Rustler 242648, an international winner and which now stands at the head of this herd. The offering will consist of sixty head from the leading Short-horn families. A number of splendid young bulls which will be ready for spring service will also go. Mr. Iliff is dispersing this Short-horn herd, having purchased it some time ago from Mr. J. G. Withers, of the Stony Creek Farm, at Milford, Ill. The sale will take place on the above date regardless of the weather. This will afford Short-horn breeders a splendid opportunity to secure choicely-bred individuals at their own prices. Watseka is a town easily reached, being only eighty miles south of Chicago on the Chicago & Eastern Illinois Railroad, and 100 miles east of Peoria on the T. P. & W. railroad. Splendid hotel accommodations are at hand, so that visitors will find the best of entertainment. Mr. Allie Powell will be the auctioneer. Catalogs may be had by addressing Mr. C. E. Iliff, Milford, Ill. We trust Short-horn admirers will send for one early. See the advertisement which appears on page 24.

THE FEMALE OFFERING IN THE BRODSKY SALE.

Rarely, and seldom ever, has it been the lot of one breeder to put in as many richly-bred Scotch cattle as will go into the Brodsky sale at Plover, Iowa, on August 23. This herd of Short-horn cattle has been one of the best known in northern Iowa, and has contained as many Mysies and more Dorothies than any other herd in America. Besides these two more prominent strains are also a goodly number of Miss Ramsdens, Airy Buckinghams, Lavinas and other Scotch sorts that will be valuable acquisitions to any herd. There will be about seventeen head of Mysies in the sale and sixteen Dorothies, and these should be sought after by the best breeders. There are so many good things in the sale that it would be impossible to enumerate all of them, but we desire to call the attention of our readers to 7th Mysie of Pleasant View, a daughter of Victor Mysie 2d, together with a splendid lot of heifers and a number of young bulls of this same strain. Many of the best heifers will be sired by his Cruickshank bull, McDiarmid, considered one of the most richly-bred Mysie bulls in the West, and he will also be included in the sale. The female portion of this sale will be largely sired by such well-known Scotch bulls as McDiarmid 168765, Baron Lavender 118001, Highland Chief 3d 150210, Highland Amburst 196938, Baron Secret 118020 and Imp. Fancy's Pride. The cows in this sale are a grand lot of breeders, are invariably good milkers and are the possessors of excellent udders. We might go on indefinitely and talk of the Dorothies and the Mysies, the Secrets and the Buckinghams that will be found in the sale, but the catalog tells the story so completely that we urge all Short-horn breeders to send for it and then go to the sale. It shows as well bred Short-horns as have ever passed through a western sale ring, and take our word for it there will be no disappointments when you see the cattle. He will also sell one imported Percheron stallion, four Percheron mares, bred and safe in foal and one stud colt. Write for catalog to Mr. L. Brodsky, Plover, Iowa, and mention The Homestead.

VERY SUCCESSFUL AUCTIONEER AND DUROC BREEDER.

Mr. Ray Page, of Friend, Neb., starts his advertisement with this issue and we can say that this gentleman is going at a stride that wins in any profession. Mr. Page has been crying pure-bred live stock sales for some time and has made a success of his endeavors. His handling of his crowds has won him much praise. Mr. Page has all marks of a good auctioneer. He has been breeding Duroc Jersey hogs for a number of years and today has one of the good herds of Nebraska. His knowledge of the different strains of blood, as well as his being able to select good animals for the breeders makes him a very desirable man to have around a sale. He was formerly employed by a live stock journal, which experience has been very beneficial to him, owing to the number of herds he visited and getting in touch with the breeders in general. This live auctioneer has built up a trade that is enlarging every season. At this writing he has several sales booked ahead and is still booking them. He is not only good on the block, but is as valuable in the ring. He has handled many bids and has given good satisfaction wherever he purchased animals. His judgment of the pure-bred busi-

ness has helped him wonderfully. His terms are very reasonable. You cannot go wrong on giving this gentleman a chance. He will refer you to some of the very best breeders for whom he has cried sales. The herd of hogs owned by this gentleman has always been classed among the tops. The crop of spring pigs are as strong a lot of Durocs as we have found this season. Look up his advertisement on page 24.

GILBERT VAN PATTEN SELLS A VERY PROMISING BOAR.

The Homestead was responsible for the sale of Bonnie K., by Billy K., to Mr. A. Wilson, of Bethany, Neb. Mr. Wilson is to be congratulated on securing one of the best sons of the great Billy K. hog. Mr. Van Patten received a very nice sum for the yearling boar above mentioned. A recent letter from Mr. Van Patten will give some information as to the boar's strength in the breeder's opinion: "I wish to report the sale of Bonnie K., by Billy K., to Mr. A. Wilson, of Bethany, Neb., for the sum of \$200. This is one of the best pigs I ever bred. You may know he is a good one, for when Mr. Wilson got me to price him he was taken at once. There isn't a single individual in his pedigree as far back as we can remember that was not a good one. It may be of interest to some to know how he was bred. He is sired by Billy K. by Duroc Challenger by Orion Chief by Orion. His dam is Lady Clay by Red Chief I Am by Protection, and second dam No. 28 by Higgins' Model. He is a great pig, without a single weak point, and with it all he possesses an abundance of stamina and vigor so necessary to make a great stock boar and characteristic of the Billy K. type. Golden Rod herd is coming along nicely, with several good males that will make good herd headers."

LAST CALL FOR WILLIAM SMILEY'S BIG SHORT-HORN SALE.

This is the last opportunity that The Homestead will have to direct the attention of its readers to the prominent sale of Short-horn cattle, Scotch and Scotch-topped, to be held by Mr. Wm. Smiley at Malcom, Iowa, August 17th. The initial mention of this sale explained that a large per cent of the offering were straight Scotch and the remainder richly Scotch-topped. There are only seven bulls included in the sale, several of which are herd headers. Mr. Smiley is not endeavoring to make any excuses for this sale, as he is putting in his best cattle. Inasmuch as his sons are in college he finds himself unable to give the cattle the proper attention that he deems necessary, hence he is practically going out of the Short-horn business, at least for the present, and will confine himself largely to steer feeding operations. The splendid bull to which most of the females are bred is Abbotsburn Marshal. He is a son of the noted prize-winning Sharon Marshal, whose sire, Young Marshal, had for dam the world's renowned Imp. Princess Alice, the best daughter of the invincible Field Marshal. Abbotsburn Marshal's dam was Carrie Abbotsburn, sired by the Cruickshank bull, Scotch Chief, her dam being the undefeated show cow, Mary Abbotsburn 7th, an own daughter of the undefeated Young Abbotsburn. A splendid imported cow listed in the sale is in Lot 1 of the catalog, Imp. Daybreak's Princess. This is only a five-year-old cow, right in the prime, and was bred November 17th to Prince Nonpareil. A beautiful daughter of hers is listed as Lot 2, called Princess "E." She was sired by Nonpareil Conqueror. He was sired by Imp. Nonpareil Victor, one of the greatest sires of show cattle that has been imported to America in many years. Following the two females described are the Cruickshank Floras or Narcissus, as was the name of the imported cow. There is a goodly number of this family, some eight all told, which have been the most profitable and useful of the Scotch families in Mr. Smiley's herd. Lot 7 is a beautiful Scotch cow, Lady Annie 16th. She was got by Imp. Red Light and out of Im. Lady Annie 14th, she by New Year's Gift. This beautiful young cow has a fine bull calf at foot dropped June 17th. Lot 8 is a daughter of hers, sired by that most excellent bull, Victorious Count. This is a J. Deane Willis-bred bull, sired by Collynie Favorite. Lot 9 is a full sister to Lot 8, but is one year younger. Lot 10 is a beautiful Scotch heifer called Sunny Blink 12th. She was sired by Imp. Fancy's Pride and out of Imp. Sunny Blink 9th by the Dutchie-bred bull, Abbotsford 2d. This splendid Scotch heifer was bred January 14th

to Bruce Nonpareil. This practically mentions all of the Scotch females. There is a choice line of Scotch-topped Loudon Duchesses, Miss Wylies, or as they are sometimes called, Miss Hudsons. The remainder of the offering are richly Scotch-topped American sorts, such as Young Marys, Floras, Rubies, Young Phyllises, and other standard American families. The bull proposition should not be overlooked, for there are a number of good Scotch bulls listed. The sale is held the day following the big Flynn farm sale at Des Moines, Iowa. Trains from the west reach Malcom at 9 a. m., and from the east at 8 a. m., leaving for west 6:40 p. m., east, 7:50 p. m.

LAST CALL FOR DUNCAN'S MID-SUMMER SALE OF SHORT-HORNS.

The last announcement before the sale of Short-horns to be held by Mr. H. C. Duncan, of Osborn, Mo., at his Maple Hill farm on August 15th will be found on page 16. Mr. Duncan is selling as good a lot of Short-horns as his herd affords, and few sales have given to the public more attractions than are to be sold on this occasion. The bull consignment mentioned in a previous issue is one that should appeal to bull buyers. As Mr. Duncan has listed three as good herd bulls as will be soon found going through one sale. These are Magnet, one of the Maple Hill herd bulls and a great sire that is sold for no fault, but Mr. Duncan retains so much of his get that to hold him in the herd would not be profitable. Scottish Victor, a roan yearling and a show bull, and Golden Headlight, a red son of 8th Linwood Golden Drop, a cow that has furnished as many herd bulls as any living Short-horn cow. The other bulls, while not in the same class as these, will be found valuable atock bulls and should be appreciated by many. The female consignment is strong, indeed. The followers of the pure Cruickshank trikes will find much that will please them, as Mr. Duncan is selling good ones exclusively. A number of these were mentioned last week, and we now wish to remind all lovers of good Short-horns that Mr. Duncan would like to entertain you at Maple Hill farm sale day, whether you buy or not, the trip will be worth the time and expense. Colonels Bellowa, Harriman and White will do the selling. Catalogs give time tables complete and all information.

THE MICKEY HERD OF DUROCS.

The writer had the pleasure of looking over a very strong lot of Durocs, owned by Governor Mickey & Son, of Osceola, Neb. This herd of hogs was founded on the same basis as the grand, good herd of cattle owned by this same firm, and so well known the country over. When they dispersed the herd of cattle, Mr. O. E. Mickey started in to buy a herd of Durocs that would be as well known as the cattle. One of the good purchases made by this firm was that of Homestead Gold Dust by the great Gold Dust Jim. This hog is one of the best sires found among our travels. His get are even in size, as well as carrying a very strong line of individuality with it. One yearling sow sired by this hog promises to make trouble in the yearling class at Iowa and Nebraska this fall. This sow is very even, with a good, strong back, good head and ear, good feet, good side lines and as smooth as you find them anywhere. Several of the spring pigs are showing up as well as the yearlings. The Homestead get are very easy feeders as a rule and you will notice in them a very strong feature, namely, strong back with good feet. Of the 125 pigs of spring farrow about seventy-five are sired by the hog above mentioned. The balance are sired by the great breeding boar, Belle's Echo, by Echo King and out of the great sow, Nebraska Bell. This hog needs no introduction, as he has won his spurs by being the sire of an offering where several of our best breeders purchased of his get, and the hog afterwards sold to Messrs. Mickey and Brown, of Osceola, for the reasonable sum of \$250. This grand sire attracted the attention of some very strong breeders and we will say that he is still breeding as of old. His get are very strong. The Mickey herd has possibly as many of his get as will be found and they are to be watched. This line of breeding is worth watching and you can feel safe in buying one of the Belle Echo pigs, as they have proven that they are not an experiment. We also found several pigs sired by the great sweepstakes boar, Red Knight. This hog has several close relatives located in the Mickey herd. Mr. Mickey was a good buyer at the former home

of Red Knight and secured some very good sows related to the great show hog. These sows are crossing nicely with the two boars mentioned. The herd of sows on this farm is very strong. We noticed several fall yearlings that will be retained for the spring sale. This sale promises to be one of the best held in Nebraska this year, as the owners have decided to offer only the choicest stock. The sows farrowed good, strong litters and were very fortunate in raising them. The advertisement of this firm appears on page 24. If you are ready to place an order for a spring boar you should write these gentlemen for prices.

LAST CALL FOR FLYNN FARM SHORT-HORN SALE.

This is our last opportunity to remind Short-horn breeders generally that the Flynn Farm Company, of Des Moines, Iowa, will hold another annual sale from Walnut Hill on August 16th at the Flynn farm. This sale was planned by the late Mr. Martin Flynn and the selection of the cattle to be sold was all made prior to his demise, hence all these plans will now be carried out to the letter and the Short-horn breeders of the middle West will have another opportunity to get some of the plums from Walnut Hill. Lot 1 of the sale catalog is a good Scotch cow called Rosamond of Clover Lawn. She was sired by Prince Gerald, a splendidly-bred Scotch bull. Her dam, Rosamond of Ashburn, was by the Scotch bull, Village Boy 3th. This is a very attractive young cow, a heavy milker, neat and effeminate, low and close to the ground. She is exceedingly valuable at this time, from the fact that she has a beautiful bull calf at foot, dropped June 27th, sired by Baron Violet, a choicely-bred Cruickshank bull. The cow herself belongs to Mr. Cruickshank's Bloom of Thessalonica family. Lot 2 is Buchan Princess and belongs to the famous Scotch Buchan Lassie family. She was sired by Lord Lassie 14th, he by Abbotsford. This is a splendid cow, with a beautiful red heifer calf at foot, sired by Mr. F. A. Edwards' famous bull, Duke of Oakland 2d. Buchan Princess is a cow, with plenty of scale and substance. She is an ideal representative of the modern Short-horn cow, being a heavy milker and thick flesher. Lot 3 is a Scotch Lady Mary, sired by Golden Lord and out of Imp. Lady Mary 16th by Maximus. This is a splendid heifer, possessed of show-yard character and is due to calve before sale day to the service of Victorious Archer, a splendid son of Scottish Victor. Lot 4 is Mina Lass 2d, a low, thick, blocky heifer sired by Scottish Victor and was bred October 29th to Victorious Archer. This is one of the good things of the offering and will doubtless be appreciated at sale time. Lot 5 is Lady Ellen 2d, a daughter of Golden Lord and traces to the Campbell cow, Imp. Margaret 3d. This is a fine young cow of the choicest breeding and individual excellence. She has a splendid bull calf at foot, dropped June 20th by Victorious Archer. The calf is red and a good one. Lot 6 is Mary Knight, a two-year-old heifer by Imp. Red Knight. She is only three removes from Imp. Rosemary by Breadalbane. This is another good-looking heifer with a splendid bull calf at foot and is re-bred to Lovat Champion. Her sire, Imp. Red Knight, was not only a champion show bull, but in 1903 at the Minnesota State Fair he was awarded first honors on get of sire. At the International at Chicago in 1903, the greatest Short-horn show that the world had then seen, Red Knight's get was awarded first, second and third, also first on young herd. The grand champion bull and grand champion cow at the Oregon State Fair in 1904 were sired by Red Knight, as was the grand champion cow at the Portland Exposition in 1905. Lot 7 is Sweet Briar "C." She is a daughter of Scottish Victor and is but four removes from Imp. Sweet Briar 7th, a daughter of the celebrated William of Orange. This is a family of Scotch cattle that have been very highly prized at Walnut Hill. In fact some of the best Scotch bulls used in modern times are in the top of this pedigree. Lot 8 is a choicely-bred Cruickshank Lavender, sired by the famous J. I. Marengo, bred by Mr. Philo L. Mills. The Lavenders are conceded to be one of the very best families propagated by the sage of Sittytton. Perhaps the greatest Scotch cow ever owned by Col. W. A. Harris, of Linwood fame, was Imp. Lavender 36th. This Lavender is particularly attractive from the fact that her dam is a very heavy milker and the heifer herself was bred October 26th. There are thirteen of these choicely-bred Scotch females which are followed by a choice string of Bates Kirkieington Wild Eyes, Lady Liverpools, Rose of Sharons, Azaleas, Duchess of Thorndales, Duchess of Oxfords, Barringtons, Miss Wylies or Miss Hudsons, Waterloos and a few American families. The bulls run largely of the same families as the cows. The offering may be rated as a desirable one from start to finish: in fact, Walnut Hill does not set forth any other kind. We predict for this sale the success that it justly merits and can assure our readers that some very useful and practical cattle will be offered. The sale catalog is now ready for distribution and will be cheerfully sent free to all readers of this paper who apply to the Flynn Farm Company, Rural Route 5, Des Moines, Iowa. Parties can attend this sale, returning to Des Moines in the evening, stay all night and reach Mr. Wm. Smiley's Short-horn sale at Malcom, Iowa, the morning of the 17th at 9 o'clock.

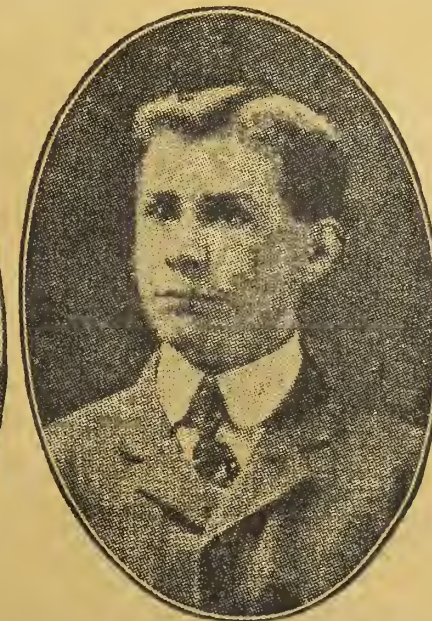

LYNDALE HERDS OF SHORT-HORNS AND POLAND CHINAS.

It is seldom that one meets with a couple where the interests of both in their live stock is more keen than at Lyndale farm, owned by Mr. and Mrs. A. F. Graves, of King City, Mo. Lyndale is naturally beautiful, being one of those fine upland farms, such as are found in northern Missouri. Its 200, and over, acres lie beautifully, the slopes being such as drain to best advantage the knoll where Mr. and Mrs. Graves are building their home and working together for the interests of their herds. These young people are enthusiastic, are lovers of good stock and are people that, when they decided to engage in the breeding and developing of fine stock, realized that a home for these must be provided. Before

CLIFFORD SHELTON

Messrs. Sheldon Bros., of Shannon City, Iowa, successors to Mr. H. C. Sheldon, two of Iowa's most promising Duroc breeders. See field notes.

GLEN SHELTON

the larger purchases were made Mr. Graves had erected a model stock barn for cattle, one of the best hog houses in America, horse barn, bull barn and a most complete work shop, and all watered by a most satisfactory and complete water system. Everywhere and on every side one sees that Mr. Graves has planned for the health and comfort of his stock. By the time the barns were completed he had laid the foundation of two herds—a herd of Short-horns and a herd of Poland China hogs. The same desire to have and to own stock worthy to grace the Lyndale pastures and barns exerted itself and Mr. Graves bought the best to be found of the type he had set out to breed and develop. He attended some of the better sales, was a liberal bidder on the better things and at the Bellows Bros. sale in June Mr. Graves topped the sale by buying Royal Hampton at \$1,025. Royal Hampton was considered by Messrs. Bellows to be the best Scotch bull ever sired by Hampton's Best. He is a beautiful red, and has the thickness and wealth of flesh so essential in a herd bull. In his pedigree is found a grand array of celebrated bulls produced by Mr. Amos Cruickshank and Royal Hampton promises much in the Lyndale herd. When buying females Mr. Graves bought individuals that promised to reproduce and in most cases cows well along in calf were bought; several with calves at foot, also found a good home at Lyndale. Among these was a Young Mary cow that carries four Scotch tops and all good. With this young cow was a white bull calf got by Invincible Hampton, and a calf that is destined to stay at Lyndale for some time to come. He has in the hands of Mr. Geo. Mason, herdsman at Lyndale, developed into a show bull that will, if shown, be one with which every junior yearling will have to reckon and when they have beaten him they will realize that they have been to the show. The best description of him is—a snow-white bull, and every inch a show bull, with no holes that need covering. Thus it may be seen that Lyndale has two good herd bulls. The female end of the herd has not been neglected and both Scotch and Scotch-topped sorts roam over the pastures. The pure Scotch tribes represent such families as Queen of Beauty, Orange Blossom, Butterfly, Clipper, and Victoria. The Scotch-topped sorts are the reliable Young Mary and Rose of Sharon. Some desirable young bulls are now ready for the trade, among which are some pure Scotch and some good, useful Scotch-topped fellows just ready for service. The herd of Poland Chinas was founded along practical lines, as Mr. Graves believes in only such stock as is practical. Size and quality are the requirements in the Poland herd at Lyndale. Sunshine King is at the head of the herd. He was got by I Am Sunshine and out of a daughter of Allerton's Tecumseh. The sows throughout the herd are rich in the blood of Tecumseh and Perfection. Some rattling good fall boars are for sale. These are big, strong fellows from big litters and some herd headers among them. The crop of spring pigs, numbering over 100 head, are an ideal lot, growthy, strong and vigorous. From these many high-class boars and sows can be had. Mr. Graves invites inspection of his herds and he offers only the best. The advertisement of the Lyndale herds will be found regularly from now on in our advertising columns. This week on page 24.

GARDNER'S ANGUS SALE.

The dispersion of the Champion Baby Beef Herd of Aberdeen Angus cattle owned by Mr. Chas. H. Gardner, of Blandinsville, Ill., which will take place at Galesburg, Ill., on Tuesday, August 14th, is one of the most important Angus dispersions of past years. The phenomenal show record made by this herd in recent years, the individual excellence of the offering, should both appeal to the Angus breeders of the central West. The bull consignment is without doubt the strongest of recent years. It includes Vala's Rosegay, the second-prize calf at five months of age at the American Royal, first as junior yearling, junior champion and reserve grand champion at the World's Fair at St. Louis, and first in two-year-old class at the International in 1905. This remarkable bull is by the champion, Rosegay, and from the champion cow, Vala, conceded to be the greatest female production of the breed. This bull should be a winner at all of the big shows of the season. Key 2d, second in calf class at World's Fair, and second as yearling at 1905 International, and Rose's Errol, fourth-prize winner as get of sire at same show, together with Rosegay 2d, a full brother to Rosegay, offer to the breeders unequalled opportunities to secure show-yard bulls to head herds or for show purposes. Concerning his dispersion sale Mr. Gardner in his announcement of catalog says: "I will absolutely disperse this high-class herd of cattle at Galesburg, Ill., on Tuesday, August 14th. One excuse for an auction is as good as another, and as so many reasons for dispersions are often given, the insincerity and untruthfulness of which are often easily apparent, I take it for granted that nothing of the kind is necessary here. I will, however, state as a general proposition that I am not dispersing this herd because I have failed to produce the type or ideal desired. I believe I can say without boasting that my success in the Aberdeen Angus business has been almost phenomenal. From the very outset I produced the type that was popular in the fat cattle markets of this country, and marketed at an early age such well-matured youngsters of such outstanding excellence that my herd was christened the 'Baby Beef Herd.' In 1899 at Evans' dispersion I purchased Rosegay, he being the first sire that I selected for the herd, the Second Duke of Epsill, my stock bull at that time, having been bought with the herd from Mr. Harvey. I secured with Rosegay his dam, Rose of Emerson 3d, that has since become one of the greatest breeding cows of the breed. In 1900 I exhibited Rosegay at the state fairs and the International Exposition at Chicago, winning first and junior championship just about as easy as though there were no other entries. From that time down to the present I have each year exhibited a first-prize or a champion bull at leading shows, and during these years I have sometimes furnished both of the winners of bull cham-

pionships. It is with Rosegay and his sons and grandsons that I have done it. He represented the early-maturing baby beef ideas to perfection, and as my herd at the present day is largely composed of animals carrying the blood of this the most popular of all Aberdeen Angus champion bulls, I believe it might with more propriety be called the Rosegay herd. Every animal cataloged is either related to this bull, has calf at foot or is in calf to a son or grandson. Never before in the history of American Aberdeen Angus auctions have so many outstanding show bulls been offered in one sale, and each one is descended from the renowned Rosegay. I believe they will furnish the first-prize and champion bulls in 1906 and I sell the cows that have produced them and they will continue to do it. In January, 1904, I sold my show cattle at Chicago, and in September of that year, without special fitting, I took two youngsters to St. Louis and one of them was placed second in his class and the other was awarded first and crowned champion of all the juniors there. I have succeeded in breeding and exhibiting prize winners. In 1903 at the American Royal at Kansas City my herd won nineteen out of a possible twenty-one first and championship prizes. I was showing cattle there then, but last year at the same show at Kansas City thirteen cattle of my breeding were within the prize money, including the junior champion bull. I would call special attention to the magnificent group of Trojan-Ericas herein cataloged, consisting of eleven head of superior finish and individuality. The Western-town Roses are a wonderful quartet and the Prides and Barbaras are represented by their best. Standing alone as a representative of a family is Vala's Rosegay, the son of Rosegay, the most popular of champions, and Vala, the recent queen of the beef breeds. His pedigree contains, we believe, the names of more champions and great breeding animals than can be found in the tabulation of any other pedigree in the herd book. The herd is prolific and has been a profitable and paying investment for me, and I offer it to the public at its own price, without protection of any kind. I ask Angus admirers generally to come and see the best offering of Angus bulls they were ever permitted to view, and to value them and their sisters and the sires and dams that produced them." Further mention of this grand offering will appear in these columns in our next issue. We advise our readers to write for catalog to Mr. Gardner at once as per announcement, kindly mentioning this paper.

J. O. JAMES' POLAND CHINAS.

One hundred spring pigs is the sum total of this season's crop belonging to that enterprising young breeder, Mr. J. O. James, of Braddyville, Iowa. These are mostly sired by that grand old boar of his, Pawnee Lad, whose 900 pounds and general make-up has won for him a warm spot in the hearts of the Poland China men of southern Iowa and the West. This boar was bred by that old veteran breeder, Mr. John Blain, and was sired by Klever's Best, a son of Happy Perfection, and out of one of the most noted brood sows in the Blain herd, Big Mariah. This boar has done wonders in the James herd and his pigs are always in great demand by those who want size and quality combined. He is coming four years of age, but is right up on his pins, with a wonderful arch of back and a depth of body, with a bone that the most critical cannot complain of, and he never fails to transmit his best qualities to his offspring. His pigs this year show up well and the boys will have an opportunity on October 11th to pass upon them. One of his best litters this year is out of Rose Perfection, a daughter of Rose Allerton by Allerton's Tecumseh, and the pigs are by Pawnee Lad. This litter will be included in his forthcoming sale. Another choice litter is out of Lady Giant, a daughter of old Giantess, and there are also five sow pigs by Pawnee Lad. Miss Nemo L. by Nemo L's Dude, has another good litter by the same boar and she and her fall and spring litter go in, as do also May Price 2d and her crop of pigs. Pawnee Lad sired the sow that Mr. George White purchased last year and was considered the best sow in the sale. Mr. James has ten fall boars and a good herd boar for sale. The latter is Big Prospect and is a son of Blain's Tecumseh, out of Black Susie L. by Logan's Chief. The grand sires on both sire and dam's side were 1,000-pound hogs, and noted winners. Anyone wanting a tried herd boar should write Mr. James at once. He will make a public sale on October 11th, at which time he will sell fifty head of fall and spring boars, the choice of his spring gilts, and some matured sows.

RED KNIGHT AS STRONG AS EVER.

The Duroc men of the middle West will no doubt be glad to know that the great show and breeding boar, Red Knight, is as strong as ever, and the hog that won first and sweepstakes at Nebraska will again be out for the same honors this season. Red Knight was the undisputed winner and he has made good several times over by siring some of the good pigs of this breed. Mr. Brown, of Osceola, Neb., has wintered this grand hog very well and has him now in a fit condition to go into some of the best shows of the breed. Red Knight is a hog of good size, with a good, strong constitution; good back, good head and ear, with a good spring of rib, and a set of legs that are as good as you find, fitted out with the best kind of feet. The same strong features are noticeable in the get of this great show hog. Red Knight is in good condition at this writing and should make as good a showing as ever. He has grown to some extent and is as active as ever. Several very choice pigs and yearlings sired by this hog are showing up to good advantage. Red Knight was sired by B. Maubkeck by Duroc Challenger and out of Ceres IV. by Rajah Muda. The boar is very strong all over. His great depth, as

50 Tops of the Breed at Auction

Selections from the Willow Stock Farm

RUSHVILLE, ILL., TUESDAY, AUGUST 14TH, 1906.

Fifty head of fall and summer boars and gilts and a few spring boars. The breeding and the individuality of this offering cannot be excelled. The blood of Oom Paul, Gold Finch, King Morton, Milton Orion, Kruger and other sires equally as noted flows in their veins.

The sires used on the gilts are Toko Paul 37819, a son of Oom Paul, grandson of Jumbo Red, his dam Hallena, by Gold Finch, Hallena's dam being Washington-Kruger I. 44013, by Gold Finch 7549, his dam being a granddaughter of Washington 447—Ring Worm, by Milton Orion and he by Orion II., of World's Fair fame, his dam being Ohio Belle, by Ohio Chief 8727 (A.)—Ninety-mile, by Gold Finch 7549, his dam by Dewey 6975 (A.) and out of White Oak Belle III., she being sired by Trone's Hero.

No better or more popular breeding can be found anywhere. Come to the sale and see for yourself that the individuality is there, too. Parties from a distance can reach the sale either by going to Rushville or Frederick. You will be taken care of.

Send for catalog, mentioning The Homestead.

G. W. TRONE & SONS.

Col. Callahan, Col. Reppert, Aucts.

Send bids to D. M. Pierce, representing this paper.

well as side and underline, and easy-feeding qualities are other features not to be forgotten. The crop of spring pigs sired by Red Knight will number around seventy-five to 100. Another boar that has been doing great work in this herd is Belle's Echo by Echo King and out of the great sow, Nebraska Belle. This hog has the reputation of being one of the greatest sires of the Duroc breed. The get of this hog were ready sellers in the Fentress sale last fall. The boar was lately purchased to go at the head of two grand herds owned by Mr. E. J. Brown and Messrs. Mickey & Son, all of Osceola, Neb. Belle's Echo has crossed very well on the get of the great Red Knight, and the cross brings out a good line of breeding. His color is ideal and his get carry that same feature throughout. A pig sired by this hog should prove very valuable. Still another good animal has given good returns, Red Duster, by Homestead Gold Dust, by Gold Dust Jim. This yearling is a massive fellow, with a bone that many hogs of maturity can't show. He has made good as a sire, and we selected several good pigs that will make good. The crop of spring pigs will number around 165 in all. Among the good sows in the herd we find the show sow, Fancy Maid, Echo's Best and others sired by Jumbo Red, Morton Prince, Trone's Wonder, Improver 2d, Crimson Wonder, Star Jumbo and others as well bred. The entire herd represents some of the best families of this breed. Watch for the sale announcement later.

THE BEST WAY TO HANDLE CLOVER SEED.

Many years of experience have taught us that a mower or a harvester cannot be used to the best advantage for cutting clover for seed. We have tried all the known methods of cutting clover for seed and have found the American huncher, an attachment for a mower, the best thing yet. This machine is manufactured by the American

Buncher Manufacturing Company, of Indianapolis, Ind., and if there ever was a doubt as to the best way of handling clover, that doubt has been dispelled by those who have used this huncher. It is attached to the mower and when a bunch of cut clover has accumulated it is dropped by the operator and there is no raking, scraping, shattering the seed or loss in time or seed. There is another advantage in the buncher, it leaves the heads exposed to the wind and sun, where they become thoroughly dried and are all the more easily hulled. If our readers are interested in the best means of taking care of clover, let them put themselves in communication with the American Buncher Manufacturing Company, Indianapolis, Ind., mentioning The Homestead.

PAWNEE HERD DUROC JERSEYS.

On another page of this issue will be found a fair likeness of Mr. Ed A. Baxter, of Pawnee, Ill., proprietor of the Pawnee herd of Duroc Jerseys. To the breeders of the central West Mr. Baxter needs no introduction. During the past fifteen years he has been one of the prominent breeders of Illinois. He has always been willing to pay good prices for good stock and during the past season was one of the most liberal buyers of the tops at the numerous sales. Many sales have had his support, both in time and money, and his persistency in bidding is equaled by few breeders. At the head of his herd is Buddy K. IV. 20861. This boar was first in aged class and sweepstakes at Illinois State Fair last year and will be shown again this year. He has extra length, very good back, extra spring of rib, wide, full hams and stands on the best of feet and legs. During the past year he has developed wonderfully and it will be a hard matter to beat him this year. As a breeder he ranks with the best as is clearly seen by the spring pigs sired by him. He comes from a long line of prize-

winning ancestry and is producing the prize-winning kind. Through Mr. Baxter's continued buying he has some of the best herds represented. The spring boars which he is offering for sale at the present time are of show-yard quality. We wish to commend them to our readers. Red Rover, a daughter of Buddy K. IV., has a nice litter of pigs by Kruger Again, he by the World's Fair prize-winning boar, Kruger. This sow goes in fall sale and her litter will be offered for sale at the present time. Cosmopolitan 115402 by Gold Dust 23343 by Allison Jr. Perfection has a nice litter by He's Our Pride, the boar which now heads the well-known herd of Mr. T. E. Laurie, of Jacksonville, Ill. She also goes in fall sale. Zeda Bell 116538 by Ringleader 37891 by Nash's Model 21395 has a very fine litter by Prond Advance. A boar in this litter is fit to head any herd. He is large, growthy, smooth and has good bone and feet. Anyone wanting a herd boar will not go wrong on this pig. This sow is due to farrow soon to service of Buddy K. IV. and should produce something extra good. At the Fagan, Browning, Hess & McCabe sale this past winter Mr. Baxter secured Golden Queen 91608 by Hugh Idle 11217 by Top Notcher 8803 (A.), dam Queen Golden 64484 by M. D. Lafayette. This sow has a fine litter by Red Express, several boars of which are fit for herd headers. She will go into winter sale. At the Geo. W. Seckman sale Mr. Baxter secured Toppy S. 1st 114144. She was sired by the well-known boar, Major R. 29163, and her dam was Golden Knight 70586 by Tip Top Notcher. Her litter is by Earl of Shadeland and the boars in this litter are extra good ones. May Flower 115536 by Ohio 38157 by Kan't Be Beat 28067 (A.), dam Red Rose 78910 by Fruit's Corrector 8921 (A.), is safe in pig to Buddy K. IV. and goes in fall sale. Tip Top Notcher Baby 71202 by Tip Top Notcher, dam Perfect Gold Dust 22996 by M. D. Lafayette, has a good litter and will be consigned to winter sale. A litter by Major R. that will attract attention is out of Mortgage Lifter II. by A Top Notcher by Tip Top Notcher. Breeders will have an opportunity to bid on her in the fall sale. A litter by Roland is out of My Choice 105800, she by Buddy K. IV. A litter by Double Track, the boar used at the head of Messrs. E. H. Deal & Son's herd, is out of Switzer Case 114142, she by Fashion Boy 33029, he by Stoner's Improver 22611. This sow goes into fall sale and should be secured by some breeder who wishes to secure new blood or breed a good producing sow to some noted boar. The litter out of My Choice (mentioned above) by Roland includes four good boars. The sow is one of the best Mr. Baxter owns and the pigs are of the herd header sort. Tip Top Notcher Baby's litter is one of the best in the herd. Mr. Baxter has just shipped one of this litter to Messrs. Maupin & Applegate, at Shelbyville, Mo., who paid him \$100 and are very well pleased with their purchase. Golden Rod by Buddy K. IV. has a fine litter by Major A. that will please the most discriminating buyer. A litter out of Bianca by Buddy K. IV. is a strictly show-yard lot of pigs. In every way they will please breeders looking for herd boars. A few good pigs by Dumont, out of Red Carnation, the top sow in Deal & Schweizer's sale and others of note afford the buyer an unequalled opportunity to secure something good. Red Carnation now has a fine litter by Buddy K. IV. Mr. Baxter recently secured the boar Red Lad 31091 which he expects to breed to several sows. His sire was Red Hart 12439 and his dam Lady Cad 44892 by Comet 9483, an Illinois State Fair prize winner. Mr. Baxter also has fifteen fall boars which are extra good, strong, growthy fellows that are being priced at from \$40 to \$50. Among the lot are several which should head good herds. This herd numbers around 250 head and gives to the breeders and farmers of the middle West an exceptional opportunity to secure herd headers of the right sort at reasonable prices. We take pleasure in commending this herd to our readers and call their attention to advertisement on page 24. Write Mr. Baxter for prices and other information, kindly mentioning this paper.

NEW ENGLAND AND CANADIAN POINTS.

The Chicago Great Western Railway will sell round-trip tickets to the above points at very low rates on certain dates this summer. It will pay you to call on city ticket agent, 514 Walnut St., Des Moines, Iowa.

Cols. Bellows, Carey M. Jones and Mason, Auctioneers.

Duncan's Mid-Summer Sale of Short-horns

At Maple Hill Farm, Near Osborn, Mo., Wednesday, August 15, 1906, at 12:30 P. M.

10 BULLS, 7 PURE CRUICKSHANK. 10.

Among the bulls are my herd bulls, MAGNET 188058, an Orange Blossom, Golden Headlight 245876 and Scottish Victor 244264, three as great herd bulls as have gone through any sale this year. The remaining Scotch bulls, two Orange Blossoms, one Victoria and one Eliza, are exceedingly good and very promising.

40 FEMALES, 15 PURE CRUICKSHANK. 40.

The Cruickshank females consist of Victoria of Glenwood 14th and heifer calf, Ury of Maple Hill, her yearling heifer, Maple Hill Violet 16th, Maple Violet, China Rose, a Violet, and bull calf, Orange Blossom of Wildwood 5th, Maple Hill Orange Blossom and Gloster of Maple Hill, a Duchess of Gloster. The balance of the females are from seven-eighths to fifteen-sixteenths pure Cruickshank and of families that have been bred on my farm for thirty years.

I am selling as good cattle as I am retaining in my herd. Everything guaranteed. My illustrated catalogs give complete information regarding the offering, time tables and how to reach the farm. I would be pleased to mail one to all who are sufficiently interested to write.

H. C. DUNCAN,

OSBORN, MO.

Col. Geo. P. Bellows and Others, Auctioneers.

Wm. SMILEY'S SHORT-HORN SALE

To be held at MALCOM, IOWA, August 17th

About 50 Head. A choice line of Scotch and Scotch Topped Cattle.

Several Herd Bulls, Pure Scotch, including Bruce Nonpareil and Sheridan. Aside from the 8 head of Cruickshank Narcissus family are such Cows as Imp. Daybreak's Princess, Lady Ann 16th, and other noted celebrities. Beef and milk have been my specialties and this is practically a dispersion sale,

hence the tops go. A goodly number of the Cows have Calves at foot. Others are bred to the very select Bull, Abbotsburn Marshall, a grand son of Young Abbotsburn and the world's champion cow, Mary Abbotsburn 7th.

THIS SALE WILL BE HELD THE DAY FOLLOWING THE FLYNN FARM SALE AT DES MOINES and is only 45 MILES FROM DES MOINES.

Catalogs mailed by addressing

WM. SMILEY, Malcom, Ia.

Col. Geo. P. Bellows, Auctioneer.

TOO LATE TO CLASSIFY.

125 Duroc Spring Pigs For Sale Cheap

I AM making very reasonable prices on our crop of spring pigs. These pigs are very thrifty and represent the blood of the great Gold Dust Jim, Belle's Echo by Echo King and out of the great Nebraska Belle. Others sired by Ired Knight, first and sweepstakes boar at Neb. '05. The pigs will be sold at prices to suit the purchaser. We have the blood lines as well as the strong individual points. Our aim has always been toward the best obtainable. We will hold our sale of brood sows in February. Remember we are advertising to sell. Write us your wants and we will do the rest.

J. H. MICKEY & SON, - - OSCEOLA, IOWA.

"INDIVIDUAL EXCELLENCE" LYNDALDE SHORT-HORNS AND POLAND CHINAS

SHORT-HORN CATTLE

Twenty-eighth Annual Sale Event

— AT THE —

WALNUT HILL BREEDING FARM

Thursday, August 16, 1906

Fifty head of females are listed from the most popular families of pure Scotch and pure Bates represented at Walnut Hill. Ten very choice young bulls, including herd headers of absolutely high individual merit, from both Bates and Scotch strains. In this offering is listed a very large proportion of early maturing, milk and beef Short-horns in the Scotch and Bates bred lines and it will without doubt be an event which must attract the more thoughtful Short-horn breeders.

The sale will be held at Walnut Hill Farm, where every possible comfort will be provided for our guests on sale day. Parties from a distance will be provided with free entertainment at the Wellington Hotel in Des Moines.

Catalogs containing all the pedigrees of the cattle to be sold, together with full information concerning the sale, will be mailed to applicants.

Col. F. M. Woods,
" Geo. P. Bellows,
" A. R. Guy,

Auctioneers.

FLYNN FARM COMPANY,

WHOLE NO. 2561.

CHANGING THE ENVIRONMENT OF BREEDING ANIMALS.

The following communication has been received from one of our Missouri subscribers:

"No doubt thousands of your readers enter the ranks of pure-bred stock breeders every year, and few of these have any idea of the difficulties that are likely to confront them. In most cases experience must be relied upon to teach the important lessons. Nevertheless I am a firm believer in education, and I know that by reading good papers and talking with well-informed men many a hard lesson may be easily learned.

"I desire to call the attention of beginners, especially, to the attention that animals should receive when their environment is changed. This was forced on my attention recently by some sales made by myself. I sold some Short-horn calves to go into another state and later had the opportunity of inspecting them. Previous to leaving my farm they were on pasture, though they had access to a comfortable shed both day and night. The bulk of their ration, however, was clover and blue grass. They also had been fed a mixture of corn, oats and bran, from the time they were able to eat.

"Imagine my surprise when I found these calves shut up in a small dry lot with nothing to eat but grain and dry hay. They had fallen off in flesh considerably and did not look nearly so thrifty as when they were taken off pasture. I made inquiry into conditions and the reason given for confining the calves in this way was that there was a shortage of fencing. It was the intention to get them out later on.

"Now, in my opinion, that is one of the best possible ways to produce non-breeders, and the treatment that animals are subjected to after leaving the breeder's hands is very often responsible for much of the kicking that is afterwards done. I think every man who buys an animal from another should inquire closely into the method employed in feeding and caring for that animal, and special pains should be taken to keep conditions as normal as possible. In any event the change will be abrupt, and it is just possible that the animal will fall off in

flesh during the first week or two, but if pains are taken to continue the ration that was formerly fed the old form may be soon restored.

"Avoid, above all things, putting an animal that has been accustomed to plenty of exercise and green feeds into a small dry lot or stall and feeding on dry foods."

There is considerable wholesome advice in the suggestions given by this subscriber. This doctrine applies to all classes of live stock, and, while special mention is made here of young beef animals, it is equally true when applied to hogs. The season is approaching when men are looking around for their young male pigs, and in view of this we call special attention to the importance of carrying the young animals along much in the same way as they were fed

previous to shipping. It is an easy matter to ruin any male animal even in a few weeks by suddenly changing the method of feed and general management. Even if breeding qualities are not impaired, they may be thrown out of condition so that growth is interfered with or the feet and legs permanently thrown out of form. If an animal has been closely confined and highly fed before shipping, one can make no mistake in giving the animal its liberty and supplying plenty of green feed, though of course the change in any case should be made gradually. But to change from succulent foods to dry grain suddenly is a mistake that few will make a second time, and it is hoped that some of those who read the above communication will be prevented from making the mistake even the first time.

Nearly all of these draws have a high-water level. The soil being already moist with deep water from higher levels cannot absorb the surface water when it rains, which then runs off with destructive force. The ditches if left to themselves are annually caving down, getting wider and deeper, encroaching farther and farther up the slopes, carrying the rich soil into the rivers.

We have resorted to a method that puts a stop to it by using tile and blue grass sod. The tile solves the difficulty that is always encountered in the use of straw, etc., making the land dry and capable of absorbing water. The use of tile alone will solve the problem, but as it requires such large tile to carry the storm water in times of a big flood, the blue grass sod is used in connection with it. A depression that can be crossed with any kind of machinery is left in grass, the width depending upon the amount of water. The tile carry water to their capacity. The surplus runs over the grass. In this way the draw never gets any deeper, but usually gets higher each year from the soil that lodges in the grass. It is usually advised to lay the tile on each side of the ditch. If the slough is a wide one and the ditch is not very deep it is the best way. We have one that has a line of six-inch tile on one side and a line of five-inch on the other, with branches running up the hillsides, and it works very satisfactorily. The ditch that was about two feet and a half deep was plowed in and filled half full. It now has a grass strip about a rod wide. The sides have a gentle slope and the strip is easily crossed with any kind of machinery.

In another case a ditch about twenty feet wide and six feet deep in a blue grass pasture was desired filled to make a corn field. A line of tile were put in the bottom usually a little to one side of the center and about two feet deep. The tile were covered with a foot of dirt and then hedge brush tramped in as tightly as possible, then a large amount of brush put in the main ditch. The banks were plowed down raising the center of the ditch and equalizing the conformity. On top of all, strips of blue grass sod three inches thick were laid in by hand to keep the center from washing out. In all ordinary times the tile keeps the land

The Problem of Soil Washing.

By George Steen.

Plowing land deep, thus making a reservoir in the soil to hold the water, has the effect of preventing the soil from washing. Hillsides that are plowed shallow have no storage capacity, consequently the water must run off and in doing so carries the soil along. The soil carried away is the best and what is left behind is the poorest. A large amount of humus in the soil gives more capacity for holding water. Decaying grass roots and manure absorb water, and it explains why the longer land is cropped and the older it gets the worse it washes.

In the great Mississippi valley it often rains in such great amounts that the soil is unable to absorb as fast as it falls. So it runs off, carrying plant food in solution and soil with it. The soil usually at some time of the year is in need of moisture. Anything we can do to retard the storm water and give the soil time to absorb it is within the province of good farming. A short crop rotation will undoubtedly keep the soil in better condition, capable of absorbing a large amount of water and not so easily washed as a field that is continuously in cultivation. Cultivating up

and down the slopes is a bad thing, and should be avoided when possible, especially when laying the corn by.

Sometimes there are small ditches on hillsides that wash out badly but do not usually need any tile. In such places as the land is plowed up strips of sod are left to prevent washing out. If the land is already plowed blue grass sod set in will prevent further trouble. It is one of the problems to prevent big ditches from washing. Corn stalks, brush, straw and manure have been used for this purpose and found wanting. In ditches and draws they serve their purpose for a year or two by collecting and holding the soil washed from higher ground. In the course of time the material rots, a big storm carries out the fill, together with the soil cultivated, and the ditch is washed out deeper and wider than before. I have seen ditches in fields filled with stalks and plowed over and covered with dirt. This being washed out the next spring the process is repeated several times until it can no longer be done, as all the black soil is washed away and the clay shows. It is now less productive and difficult to use machinery.

BIRD'S-EYE VIEW OF THE IOWA STATE FAIR GROUNDS—LOOKING WEST.

dry and will carry away any ordinary rain, the blue grass being only of use in times of big storms.

It is well to have a few catch basins to enable the surface water to reach the tile quicker. They are made of sewer pipe and a grating used to keep out the trash. Some make the mistake of laying their large tile too shallow. They should be in not less than four or five feet to give best results.

This seems to be the only solution of the ditch problem that is enduring. After the first expense, which is rather large, little attention will keep it in repair. About the only thing that needs to be done is to re-sod the whirlpools that sometimes get started.

HOMESTEAD FRIENDS AT STATE FAIR.

Present prospects indicate that the last week of August, 1906, will be a period of unusual significance. At that time will be held in Des Moines the annual state fair, and the preparations that have been made, together with the interest already shown by exhibitors, indicate that the event will be a record-breaking one.

In prosperous times like these the state fair is an annual event that interests all the people, notably those who reside on the farm. All cannot attend, it is true, but the sentiment found on every hand is such as to support the policy of maintaining a great annual exhibition. The remarkable degree of success attained in the past is due to the support that comes from the people, and it is believed that more liberal support than ever is forthcoming this year.

As in the past, The Homestead will be at home to its friends on the state fair grounds. Its booth, located on Newspaper Row, will be open to all comers. It may be made a most convenient meeting place for friend to meet friend. Indeed, we urge our readers to utilize our quarters to the greatest possible extent during the week. Packages will be checked free at all times and there will be those in attendance during the day who will constitute themselves a free bureau of information. If we can serve you in any way it will be no task, but a real pleasure to do so.

The Homestead offices and printing presses can be found at Third and Locust streets. The plant has been enlarged to three times its former capacity so that now it is regarded as one of the interesting sights of Des Moines. The large press on which The Homestead is printed is itself worthy of the time required to inspect it, and all are cordially invited to place this on their program of sight-seeing.

Although the fair begins on Friday, August 24th, yet the first three days are devoted to the installation of exhibits and the fair proper is open to visitors Monday morning, August 27th. With improved equipment on the grounds and with larger appropriations than ever for exhibits, the entire week will be filled with events of interest. We hope to see a large attendance and shall look anxiously forward to the pleasing task of helping our friends enjoy the week.

RYE AS A FERTILIZER.

A Wisconsin subscriber sends the following communication:

I would like to know if it will pay to sow rye this fall when it is the intention to plow it under next spring in preparing land for corn. When would be the best time to sow and when should it be plowed under? The land in this instance will not produce a very good crop of corn unless something of this kind is done, as it has been heavily cropped for ten years; otherwise it is well adapted for corn, being in part of light clay and in part of black loam.

Rye does not belong to that class of plants that has the power to take nitrogen from the atmosphere and store it in the soil. Nevertheless, it is a crop that may be used in a case of this kind to very great advantage. We would advise sowing it just as soon as the land can be prepared after a cereal crop is removed. The more growth that can be obtained this fall, the better it will be for the following crop.

The plowing under in the spring of a good growth of rye means the addition of humus to the surface soil. The leaves and roots upon their decay, furnish the vegetable acids which unite with the mineral elements of the soil and form plant food compounds. No doubt the soil referred to in this instance has been simply robbed of its vegetable matter, and if this is supplied it is altogether

likely that fairly satisfactory crops may be grown.

Regarding the time to plow the rye under in the spring it may be said that it is sometimes of advantage to leave the plowing as late as possible so as to encourage a large growth of rye, although we have known instances where men preferred to plow under their rye crop the first thing in the spring.

Of course it must be borne in mind that the use of a crop in this manner is only a means to an end. Such a soil as is here described must eventually be built up either by the use of legumes, which add nitrogen to the soil as well as vegetable matter, or farm yard manure, or both. To tide over a pinch, however, when one is anxious to make the soil produce in the immediate future, it is good farming to use rye in the manner described above.

A LIVE ISSUE.

Throughout states where sheep are kept there will be found the sheep destroying dog. Dogs are seen everywhere in both country and town. In various localities of some of our more eastern states the depredations done by dogs have been the means of driving many out of the industry. As the mining and manufacturing interests increase they seem to carry with them a horde of dogs which are not at all particular where they get their living, so a large share of it consists of mutton. Much of the mining country of the East is a natural sheep country, being rough, and it is a shame that a great industry has to be driven out by such factors.

Present dog laws where any exist do not abate the nuisance, neither do they furnish enough revenue to pay the losses. But there are signs of awakening on this subject and all who are interested in sheep should make it a point to let their members of legislatures know what is needed along this line. Kentucky has just enacted its first dog law. Ohio has just defeated one bill but has another one before its legislature that farmers should support. West Virginia is without a law and Pennsylvania has a law that is wholly inadequate. Iowa has a law that has proven a dead letter simply because it is impossible to execute it. We would like suggestions from sheep owners of what they would like to see as a solution of the dog nuisance.

The following are a few ideas of some of the laws and some suggestions of prospective laws: The Missouri statute is; "Sheep killing dogs, fate of—in every case where sheep or domestic animals are killed or maimed by dogs, the owner of such animals may recover against the owner or keeper of such dog or dogs the full amount of damages, and the owner shall forthwith kill such dog or dogs; and for every day he shall refuse or neglect to do so after notice, he shall pay and forfeit the sum of \$1 and it shall be lawful for any person to kill such dog or dogs."

The bill before the Ohio legislature last winter provides for the prompt payment of the dog tax, is a commendable one, and farmers should do all they can by letters and petitions to secure its adoption. It requires the assessors to demand the payment of the tax at the time of listment, and to give receipts therefor. If not paid, the same is reported to township trustees, or mayor, or board of public safety, who shall at once notify the delinquents, and if the tax is not paid within ten days the officials must see that the dogs are killed, the cost of destruction to be paid out of the dog tax fund.

In West Virginia the census shows more dogs than sheep, and it is proposed to tax dogs \$5 each and bitches \$10. Sheep breeders will do what they can to prevent a law converting this tax into the school fund as is proposed. There is a feeling in that state that there are too many foxes, wildcats, and other destructive animals to do away with dogs entirely.

At twenty-four out of twenty-five farmers' institutes held in Ohio last winter it was the consensus of opinion that depredations by dogs were responsible for many going out of the sheep business. One speaker in that state "would have the dog taxed out of existence." At such institutes we gather the following individual opinions about sheep and dogs: "Sheep killing dogs seem to lack judgment, as they do not kill the old and worthless sheep, but usually take the best." Another speaker says: "There are entirely too many dogs in

Do You Use a DISC HARROW?

If so, look at the picture. See there isn't any tongue—but a truck—to hitch to. Know what that means? We'll tell you. It means that the Detroit Tongueless Disc Harrow, the greatest invention of the age, will save your horses 25 per cent of the strain of Discing. There's no Side Draft—and no Neck Weight. One horse doesn't have to pry the machine around by crowding on the tongue. It's just an even, steady pull for both horses, and saves much time by making quick, easy turns. And it's sold direct from our factory on time and on approval test. If not just as represented, after 30 days send it back—we'll pay all the freight both ways. Write for our catalogue today. It describes and gives delivered prices on 14 sizes.

AMERICAN HARROW CO.

Largest Commercial School and Institute of Shorthand and Telegraphy west of the Mississippi river. Owns and occupies entire building. Graduates assisted to positions. Students may work for board.

The Large Illustrated Catalog is Free.
BOYLES COLLEGE, 1804 HARNEY ST., OMAHA, NEB.

the country," and in the next breath says, "but a farmer needs one dog." One Ohio man makes a dog trap which catches the culprits and they are soon sent to a dog heaven, wherever that is; at any rate, they will not disturb any sheep. This trap is made by providing a lot with fence so constructed that the dogs can jump in, but not out.

The dog nuisance is a hard one to down. The writer is a law abiding citizen, but he takes care of his flock as seemeth best to him. He has a dog proof lot where his sheep are kept. Next to that lot is a lot with a dog guard on the inside. Dogs once in there seldom go home. No poison is used. A gun is indispensable in the sheep business. The right hand should not know when a dog is killed. It is not necessary to advertise that a dog has been sent to the happy hunting ground. It may be necessary to keep dogs, but they should be kept where they belong. The writer owns no dog and is not compelled to distinguish "which dog" when he looks through the sights of his gun.

FALL SOWING OF GRASS SEEDS.

The following communication has been received from one of our subscribers, Mr. W. M. Anderson, of Boone county, Iowa:

I desire to seed down some land this fall, using an oat stubble for the purpose. Will it be necessary to plow the soil or will it be enough to simply disk it before sowing the seed? What would you advise sowing and when would you sow it, it being the intention to use it for hay next year?

The seeding down of land in the fall in the corn belt is not always a success, though in the southern half of it the practice of sowing in the fall is, if anything, increasing.

We would advise the plowing of the stubble lightly; not more than three or

four inches. It should then be thoroughly worked down with the harrow so as to make the seed bed fine. With the rainfall that has prevailed throughout the central West during the last few weeks we are of the opinion that plowing will not be a difficult task, and furthermore that the soil will not be lumpy. Use the harrow from time to time in order to conserve the moisture and also to fit the surface for the reception of the seed.

A mixture of clover and timothy may be sown, though we hesitate to advise anyone to sow clover in the fall, because there is about an even chance that it will be winter killed. The timothy, however, is more hardy and we have known many instances where it has been seeded in the fall and the clover sown in the early spring.

We again give it as our opinion that it would be better to let the seeding go over until spring and use such crops as millet or a mixture of oats and peas for hay purposes next year.

BERKSHIRE BREEDERS' MEETING.

The Berkshire breeders of Iowa will hold a meeting on the state fair grounds during the week of the Iowa State Fair, at 10 o'clock, on Wednesday, August 29, the meeting place being the swine pavilion. Mr. Geo. S. Prine, secretary of the Berkshire association, calls our attention to the fact that there are a number of interesting matters to come up at this meeting, and he is exceedingly anxious to see a large attendance present.

If you have not read this chapter of the continued story by the Litchfield Mfg. Co., you had better not read it unless you are interested in a manure spreader.

Farm Furrows

Turned by a Practical Farmer.

Diamonds have never appealed to me, but if farmers' daughters desire to wear them, they certainly have the right to do so.

We often hear people say that pork is not healthy and that some other meat should be substituted for it, but it goes slowly.

When a man speaks of the short hog crop that is evidently in sight it is well to designate that he means the four-footed crop.

I am one who believes that the world is getting better, but I realize that it takes a great deal of hard work to keep up the improvement.

If some of the quack nostrums of the country could be as thoroughly investigated as were the packing houses, there would be reason for rejoicing.

Bad roads are unprofitable. They put a farmer out of business and make nothing for any man. Who is responsible for a bad condition of the roads?

A friend asks me if he should invest in a patent right. I would advise no man to invest in a patent right. The value of all patents is problematical.

I am still of the opinion that infinitely more meat should be eaten near where it has been produced. In our anxiety to do well, we often lose sight of this fact.

A man asked me what would be a good kind of a badge to get for farmers. I think several ears on the inside of a man's hand would be the best badge of membership.

Every farmer is entitled to an outing, and but few will meet with loss if they arrange to attend their state fair, where an outing can be obtained with a business tinge to it. See your state fair at all hazards.

Sleeping and dining ears have been provided by railroads which have become a necessity rather than a luxury. Now some railroads propose to put on theater ears.

I never tumbled to the word "grub in the head," until recently, although I have been in the sheep business all my life. It means at dinner time when a man goes to take his dinner.

Squirrel tail grass that is so perniciously spreading all over roadsides, in meadows and other places should have war made on it. It does mischief to the mouths of animals eating it.

It always pays to haul out manure on the farm, and it usually pays better to do that work about this time of the year. A manure spreader will be found a most excellent implement on the up-to-date farm.

Signor Liberati with his grand military band, of New York, and his famous soloists, will furnish the high-class music for the state fair at Des Moines. His opening concert will be on Sunday eve-

ning, August 26. The 56th regiment band, U. S. G., of Fort Dodge, will also supply music. All music lovers will appreciate the fine series of concerts.

All sorts of excursion rates are given people at this season of the year to visit places of interest to them. There is no talk about giving the well-fatted steers excursion rates to visit a packing house in some distant market.

When I was a boy, no farmer would stack grain unless he had a stack bottom made of rails. In my farm experience I never had a stack bottom. I don't believe it necessary if proper drainage is given the stack yard.

At the end of the growth of any plant is the time to kill it. In the month of August more weeds and undesirable plants can be killed than in any other month of the year. This applies to briars, bushes, willows, etc.

Word has been sent out by someone who professes to know that weeds are crop-robbers and not soil-robbers. This will be comforting to the farmers who come on the stage of action after the present generation has passed.

Some of the organizations of farmers who would regulate the prices of farm products have just come up to the problem that in some things, such as wheat, there exists a world's competition which they are powerless to regulate.

It has been stated that prosperity is so pronounced in Nebraska that the farm girls wear diamond rings and recently a cow was slaughtered to get a diamond which she had accidentally eaten while being fed by a diamond-ringed lassie of that state.

Book farming is all right, but not always do we find the book farmer right. It is well enough to know the rules of practical agriculture and it is all right to put them to practice, but we often see people who are in practice and they do better than others.

The man who lives near a large city is not coming up to his possibilities if he does not cater to the best markets near his home. There are many farm products the city people would like to have which he could furnish. This is a trade that it pays to cater to.

The wheat producer is told in one paper that it will be best for him to hold his crop for better prices. In another paper equally as reliable he is told that "every decline of one cent per bushel on wheat puts it near the export price, and it is the price abroad that must determine crop values as long as we have a surplus." In the multitude of such counsels it will stand the wheat-grower in hand to "know where he is at."

Entries already made and space secured indicate that the live stock show of the Iowa State Fair, August 24 to 31, will this year surpass in every respect its predecessors and sustain the reputation of Iowa State Fair as unrivaled. All leading breeders will be represented, all the new things and novelties will be seen, the choicest herds and flocks and the greatest prize winners. There will be complete exhibits in dairy, fruit,

THE NEW MOLINE THE IRONCLAD WAGON!!

Five hundred men, masters of the wagon-maker's craft, put the best efforts of their hands and brains into the making of New Moline Wagons.

With its gearing of select Hickory and tough White Oak and its box with Yellow Pine Bottom, grooved and matched, the New Moline Wagon has a foundation that will last for years.

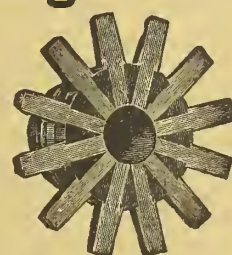

It's so strongly reinforced with extra heavy iron throughout, that farmers call it the "Ironclad" Wagon.

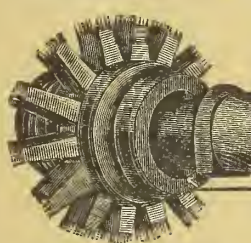

Pole, doubletrees, singletrees, gearing and box are so thoroughly protected and strongly braced with heavy ironing that its solidity and durability defy the test of time.

Its dust-proof skeins keep out every particle of dust and dirt.

Lightest Running Wagon in the World

Section Hub and Spokes. Practically One Solid Piece.

Note Dust-Proof Skein.

The New Moline is built right, from the ground up. It's a light-running Wagon, and the longer you use it the better you'll like it, for it's got more up-to-date features, and gives more years of satisfactory service than any ordinary wagon. We've been perfecting this wagon since 1854.

We fully guarantee every New Moline Wagon that leaves our works.

The demand for New Molines is enormous—taxing the full capacity of our immense factories.

GET THIS BOOK! We want every farmer to have a copy of our wonderful Wagon Book. It don't make any difference whether you are thinking of buying, or not—send for it anyway! It tells just how the genuine "Ironclad" Wagons are made. Shows all the parts SEPARATELY; and you can SEE how they are IRONED and BRACED and DOUBLY REINFORCED, making THE NEW MOLINE the most durable as well as the lightest-running wagon on earth. The book tells you more about a wagon than any other Wagon Book in existence. It is FREE, postage prepaid by us.

MOLINE WAGON COMPANY

MOLINE, ILL.

flowers, agricultural products and machinery.

The toad is a garden policeman. Seventy-seven per cent of his diet is composed of insects and the remainder consists of spiders and worms of all kinds. The toad is in a position to capture his "daily bread" with his tongue. In this respect he is like some who get their living by talking. A toad should be a welcome guest in a garden or flower bed.

The aerial flight of the Knabenshue airship at the state fair will be as sensational as the exhibitions of the same wonderful craft in New York and Washington and at the Portland exposition. It will be a practical demonstration of safe navigation of the air by the only successful airshipping expert in the

world. The initial exhibition will be given on Monday of fair week.

Water in the house will wash away all sorts of discord and unhappiness. There are many places where the water from neighboring springs can be brought to the house. Others will have to raise it by wind power. At any rate let it be brought to the house.

Once upon a time some of my neighbors elected me road supervisor "just for fun," but it did not prove to be so much fun when I made my neighbors work—actually work out their road taxes. Every man put in all the work the law would allow. I was not re-elected.

Sheep feeders are looking about for feeding lambs, and it is safe to guess that the six-cent feeding lambs, if there are any, will be grabbed as quickly as a wolf would a weakling lamb. There is money in sheep, but some "know how" will be required in getting it out.

HOMESEEKERS' RATES.

Every Tuesday, via the C. & N.-W. R'y, until December, 1906, to authorized home-seeker points in Wisconsin, northern Michigan, Minnesota, South Dakota east of the Missouri river, North Dakota, Alberta, Manitoba, western Ontario and Saskatchewan. Full information at C. & N.-W. passenger station or 401 Walnut St.

INCREASE YOUR INCOME.

Opportunities in all lines of business in new and growing towns in Iowa, Illinois, Missouri and Minnesota along the line of the Chicago Great Western Railway. Write to Industrial Department, C. G. W. Ry., St. Paul, Minn., for "Town Talk" and county map.

ARE YOU GOING ABROAD?

To Europe, Alaska, South America, China, Japan, Australia or around the world. Full information, details, lowest rates can be procured from A. J. Cheeseman, C. P. & F. A., Chicago & Northwestern Railway, 401 Walnut St., Des Moines, Iowa.

NEW ENGLAND AND CANADIAN POINTS.

The Chicago Great Western Railway will sell round-trip tickets to the above points at very low rates on certain dates this summer. It will pay you to call on city ticket agent, 514 Walnut St., Des Moines, Iowa.

PREVALENCE OF HOG CHOLERA OR SWINE PLAGUE.

Information has reached us from different parts of the corn belt indicating that there is considerable hog cholera and swine plague in the central West. In one case a writer states that 200 young pigs and about twenty-five sows were swept away by one of these diseases in but a few days. In localities where these diseases are breaking out many are shipping their pigs and hogs to market whether they are fat or not.

These diseases run their course so rapidly that the fight must be made against their introduction. While it is true that here and there individuals are found who have had success in preventing the spread of these diseases in herds, yet it is a fact that up to date the department of agriculture has little to recommend for their cure and only emphasizes the use of preventive measures.

The list of precautions that should be taken have become almost stereotyped, so frequently are they repeated in bulletins and in such instructions as are given by our experiment station workers. Boiled down to their simplest form, they may be stated briefly as follows: Do not feed any of the hogs on the farm very heavily during the warm months, when there is cholera in the neighborhood. It is much better to delay the matter of bringing them to maturity than to run the risk of heating their blood. Pigs now weighing from fifty to one hundred pounds, if they have access to reasonably good pasture, will get along very nicely with one pound of grain per head daily in conjunction with the pasture. In most cases this grain will necessarily be corn, though it would be a little better if mill feeds could be used. We are not afraid, however, of this small amount of corn, and believe that it is perfectly safe when there is plenty of pasture. Of course as the hogs get heavier, it will be necessary to gradually increase this amount, otherwise they may get a little thin.

The use of a good coal tar product for disinfecting purposes is absolutely essential. A few dollars invested in a good dip may save hundreds of dollars.

LIGHTNING STOPPED

worth of hogs. Wallows should be disinfected every few weeks, and it is an excellent plan to use a little of the dip around the feed troughs. It takes but little time once a week to wash out the troughs with a dilute solution of coal tar product. Where slops are used, a little of it in the slop will practically amount to the same thing, and the dips are in no wise harmful to hogs, and on the other hand we have always considered them beneficial. Dipping or spraying hogs, in addition to general cleanliness, cannot be too highly recommended. Where one has a spray pump it is an easy matter to call the hogs into small quarters with a little feed, close the door and turn on a spray pump, using a dilute solution.

It is well to leave them in the shade some little time after they are sprayed, for fear that the hot sun may irritate the skin. There is no danger after the hair has dried. Where they can be run through a dipping tank, this is possibly the ideal method.

Some breeders have never resorted to the use of such substances as charcoal, and yet have never had disease on their farms. However, we believe that as these substances are inexpensive, their use is advisable in some instances. Copper sulphate in small quantities put into the slop two or three times a week has a desirable effect by way of keeping the digestive system in order. We say "small quantities," because it is almost impossible to get hogs to eat their feed if large amounts are used, as the compound is exceedingly bitter. An old five-gallon dip-can may be kept near the swill barrel and eight or ten pounds of copper sulphate placed in it. Keep the can filled with water, and as the solution is used from time to time, refill with water. In this way it is handy and will be much more apt to be used than if one has to go to the trouble to dissolve it from time to time.

Where plenty of corn cobs are available on the farm, these may be piled up and burned without much labor. When they are nicely charred, cool the pile off by applying plenty of water. We have always liked the practice of adding a little salt and copper sulphate to the water that is used in quenching the fire. Let the hogs have access to the charcoal at will.

Of course it is unnecessary to say that good, clean drinking water is essential at all times. Unless there is a running spring in the hog lot, we believe that it will pay every man to have plenty of drinking fountains, as these are easily cleaned, and in any event they are difficult to contaminate. By attaching them to barrels or tanks the problem of watering hogs is greatly simplified.

Kansas Weather and Crops.

To the Editor of The Homestead:

This is the ending of the first ten days in the month, when several of our venerable weather prophets said we were going to have a "prolonged drouth," and of course it has been raining just a little more than usual on account of it. The rains have come more in the nature of showers, yet there is no spot in this locality they have not reached. It rained a little the last of last week, gave us quite a wetting on Monday, and yesterday forenoon it gave us some more.

This is not the kind of weather when it is safe to cut down much prairie grass, but it is great on the corn. In reality, the bulk of the corn crop of Kansas is now made to a certainty. Even the man who chronically wants "one more rain" will admit this. Ears in the earlier planted fields hang down from the stalk like clubs, and there are a plenty of them, too. On top of her ninety million bushels of wheat, Kansas is going to raise an eye-opening crop of corn. Taking the state all over, from East to West and from North to South, this has been a great year for Kansas. There is an abundance of everything. No crop is even a failure, or even a partial failure.

The fruit crop is simply greater than there is a demand for. In every orchard apples are rotting under the trees. There is no sale for them, as everyone has plenty of the fruit without buying, or, in case of the town folks, their friends on the farm give them all they can use. Peaches are very much the same. All the women-folks talk about nowdays is canning. Every cellar will be filled to the roof with canned fruit by cold weather, if the pace keeps up.

Even the potato crop is a great one. The quality is perfect, while the quan-

10 WEEKS FOR 10c

The Oldest and Best Known Agricultural Weekly Paper in the West.

The Journal of Agriculture

Established 1866.

THE JOURNAL OF AGRICULTURE is a weekly journal that every farmer, every gardener, every stock raiser, every man and woman interested in poultry or the products of the soil, will need and read from cover to cover. No dry rot, no long-winded articles by city farmers who do not know the difference between a "pumpkin tree" and "watermelon bush," but short, meaty, interesting, useful, reliable and seasonable matter in all departments throughout. Besides well written stories of fiction, travel and adventure, current news in condensed form, handsome illustrations, timely cartoons, terse comment on live topics, wit and humor, it contains departments concerning the care and handling of all kinds of farm stock, floriculture and gardening, cooking, hints about the house, veterinary department, poultry, dairying, bees, young people's department, correspondence columns and the LATEST ACCURATE MARKET REPORTS giving the prices of Live Stock, Grain, Seeds, Vegetables and Produce in the leading markets, thus keeping its readers well posted as to what their products are worth and enabling them to get the top price for them.

To introduce THE JOURNAL OF AGRICULTURE into thousands of new homes, we will send it every week for **TEN WEEKS FOR 10c.** Address **Journal of Agriculture, 19 Journal Bldg., St. Louis, Mo.**

tity is immense. There will be potatoes to feed to the hogs in this part of the state this year. All garden stuff is more than plenty—it is wasting in the gardens. The Kansas horn of plenty is big at both ends this year.

Though warm between the showers, the ground plows easily, and more and more blackened fields appear as the days go by. Every farmer is getting some ground ready for wheat. This and the countless chores always to be done on any well-regulated farm furnish the work of today. Corn prices still linger around the forty-cent mark, in spite of the crop in sight, while wheat keeps at the sixty-cent figure, a price that is too low for the quality of grain Kansas has this year. Henry Hatch.

Coffey Co., Kan., Aug. 10, 1906.

On page 9 we publish a large picture of the Omaha Commercial College. This school was founded by Messrs. Robrough Bros. in 1884. Under their direction it has grown and prospered. Its new building is a very large and attractive structure containing ample facilities for a very large number of pupils. In addition it has a beautiful auditorium used for entertainments, school gatherings, etc., also a society hall and a fine gymnasium. Pupils from twenty-seven states and territories attended this school last year. A much larger enrolment is expected this year. See page 5 for advertisement.

THE BOY ON THE FARM.

BY A. G. KLINKNER.

With unmistakable emphasis the future and common sense are pointing a warning finger at the boy who is leaving the farm to go to the city. There are grave reasons why discerning men and women are counseling the boy—that is, the average boy—to stay on the farm, and these reasons spring not so much from a desire to doom the boy to thralldom or a life of the common-place, but from a healthy instinct that sees in the city a sort of Babylonish captivity.

Many farmer boys are inclined to think that the farm is no place for them. They falsely presume that they are less fortunate than city boys because they can not accumulate that acme of foppishness, which is heartily despised by every true person. They long for the idle luxury of the thoroughfare and the park, little aware that all the luxury of a life in the city is synonymous with languor, and an utter feeling of uncomfortable satiety. Through "rose-colored" glasses the farmer boy views life in the city, imagines it is always a picnic and that existence is a honeyed dream. How futile his visions! Could he look with "honest eyes" upon the less brighter side of city life he would not so lightly exchange his farm home for the uncertain favors of the metropolis. There is so much misery and uncertain success, so much misfortune, and so really little that is truly beautiful and noble.

A boy on the farm has really much to be thankful for. The city may have its treasures of art, but even if he journeyed to Europe and saw the greatest paintings by Angelo, Raphael or Rubens, he would see nothing to be compared with what he may see in his own farm home surroundings. There he can see the lilies painted by the greatest of all artists, whose breath of perfume the canvas cannot contain, hear the music of the birds in the theater of nature, the sweetest singers that live. He is surrounded by the best and truest impulses and here he will bring forth the noblest elements of a truly beautiful and well ordered life.

Boys should remember that in the city, competition in every line is sharp, and often it is necessary to be unscrupulous to rise; therefore boys who have a good farm home should remain on the farm until their character is formed. Emerson tells us that character is nature in its highest form. We can therefore readily see that a boy on the farm can lead a more regular and natural life than boys in the city, where the pitfalls are innumerable, and where vice rears its ugly head to spoil his life in the very flower of manhood.

The farm in its homely setting has always furnished the rugged characters who "shaped the rude outlines of the world." The farm home has nourished in her spotless bosom the prophets and saviors of the world. A boy on the farm, if he can only be made to realize it, lives in a veritable heaven. Living

close to nature he is living close to God.

The world will come to the farm home for you, farmer boy. It will discover your talent and reward your genius. It is time enough for you to come to the city when you have to. Don't make the mistake of leaving the farm home and compromising your future happiness for the prodigal son's husks which were intended for the swine.

Home on the farm is the best place for the average farmer boy. There is where the sun of human love, radiating from your parents' and brothers' and sisters' hearts shines warm upon you, and where is typified the most sacred emblem of human devotion. Mark well that "ambition is a glorious cheat," that its reward is, "praise—when the ear has grown too dull to hear; gold—when the senses it should please are dead; wreaths—when the hair they cover has grown gray; fame—when the heart it should have thrilled is dumb; all things but love—when love is all we want."

Don't leave the old farm home, boys! In the days that are to come you will often wish yourself back in the peaceful haven of its quiet retreat; you would eagerly exchange all your triumphs and heartaches for its waiting embrace—but it will be too late.

Boys, remain on the farm.

The Cherry Slug.

To the Editor of The Homestead:

Within the last few days the cherry slug has made its appearance in a number of orchards, and while heretofore it has not been a dangerous enemy, this year the numbers are so great that many trees have been defoliated and much damage is likely to follow. Moreover, this is an insect which usually produces two broods each season and if the second is yet to come, as is quite probable, protective measures are imperative in many instances, else not only the next crop, but the life of the trees will be the consequence.

The cherry slug comes from an egg which is laid by a four-winged fly. The slug or larvae is dark green, about half an inch long and large at the head, tapering toward the tail something like a tadpole. After eating about two weeks the larvae drop to the ground and bury themselves for a time, emerging in the adult or winged form and lay the eggs for the second brood.

As each female lays several hundred eggs, the second brood will naturally be much larger than the first. This insect is very easily destroyed with poison. There are two reasons for this. It is a greedy eater, devouring everything in reach, and is so sluggish that it will not move as long as there is food within reach. Hence if there is any poison near it, it is sure to get a fatal dose. The proper remedy is lead arsenate, the formula for which is as follows:

Arsenate of soda 5 ounces
Sugar of lead 12 ounces
Water 50 gallons

Dissolve the soda and lead separately in a little hot water in earthen vessels. Mix, stir thoroughly and add fifty gallons of water. One spraying is usually sufficient, but if more worms appear a second may be necessary.

Paris green is also effective. The following is a good formula:

Paris green 4 ounces
Fresh lime 4 pounds
Water 50 gallons

Work the Paris green into a pulp with a little water. Slack the lime and strain into the water. Then add to the water and lime and stir thoroughly.

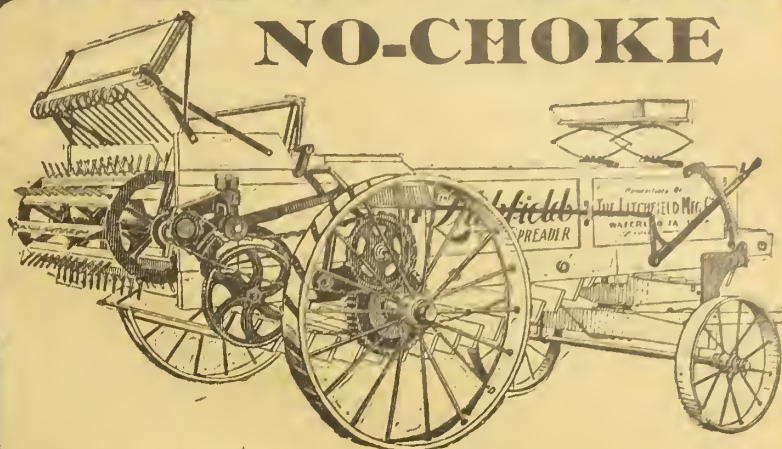

A dust spray for this insect is made as follows:

Air slacked lime 4 pounds
Paris green 4 ounces

Mix well and dust over the affected trees. Care should be exercised not to inhale the dust. Franklin Brown.

Polk county, Iowa.

Let no man labor under the delusion that a dozen hens will make him rich, for they will not do it. It would require several hundred to make him rich, and even then they will require the best of treatment and management. It is safe to say that the ordinary farm flock is not brought up to its possibilities.

Litchfield Endless Conveyor.

IT has been almost universally conceded that an endless conveyor is the most practical kind for a manure spreader and is an ideal form of construction, if the troubles due to clogging up with certain kinds of material in severe cold weather could be overcome. This is even admitted by our competition.

Therefore, to prove absolutely that the Litchfield Manure Spreader is superior to every other machine on the market in this particular part, we have only to prove that the Litchfield automatic self-cleaning swinging section conveyor is the only non-clogging conveyor manufactured.

As evidence to our readers that the Litchfield fully controls the no-choke conveyor we refer to the records of the patent office which will verify our statements. It is easy for anyone to understand why other spreader interests will attempt to throw "cold water" on the growing popularity of the no-choke endless conveyor. It is always a hard struggle for any individual and radical improvement to gain a foothold where competition, by being cut out from the use of this improvement, is continually arguing against it.

We therefore say to our readers: Do not let the arguments against the endless conveyor, that are commonly offered by interests manufacturing the other kind, mislead you. All the arguments that are put up against the endless conveyor do not hold good in any way when it comes to applying them to the Litchfield No-choke Endless Conveyor.

See the machine. See it work and judge for yourself. Investigate the style of construction and the manner in which this conveyor is put into the machine and the way it works and use your own judgment.

We hope no customer will buy a Litchfield Spreader simply because we, or any of our agents, say it is the best. What we want is investigation. All we want is a fair chance and we will show you that the Litchfield Spreader is not anywhere near duplicated by any other make of machine being manufactured in the United States, or elsewhere, today. Time is telling the story very fast and sure. Write us and watch this space next week.

GET RID OF YOUR STOVES.

The Harvest Will Soon be Over.

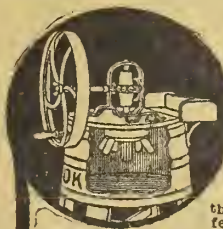

Are you going to be comfortable with a furnace, when you read, or roast your head and freeze your feet beside a stove? Get a

GREEN FURNACE

and put it in your cellar out of the way. You save the dirt in your rooms, and get the space which your stoves now occupy. As simple to operate as a stove. Used in 2300 Des Moines homes, and more going in every day. Economical in the use of coal, will last almost a life time if properly cared for, have large ash pits and long smoke travel. Don't buy something that will make you want to swear every day for ten years, get the kind that satisfies.

Send us your name to-day, also the name of your dealer. We will tell you how and where to get a GREEN FURNACE and tell you all about it. Address

GREEN FOUNDRY & FURNACE WORKS.
DEPT. H. DES MOINES, IOWA

The Easy Way

A child of ten can run an O.K. washer, standing or sitting, and do the work right. It is just simplicity itself. No complicated and expensive parts like machines that squeeze, pound and force water through the clothes. Fly wheel turns either right or left—pin wheel reverses automatically. Clothes are turned back and forth through the hot

suds, dirt is dissolved and they are cleaned thoroughly and perfectly and quickly.

O.K. washers are sold on their merits alone. We make no "free" offers. So is every other washer sold. Do not be caught by "free" talk. If you don't believe it just try to get one of their machines for nothing.

O.K. sales have increased in six years from 25 a week to 35 a day. Sold, mind you, not given away. It's the washing machine people are glad to buy when they know it. And it's sold at a fair price. Our free book explains. Write for it.

H. F. BRAMMER MANUFACTURING CO.,
1455 Rockingham Road, Davenport, Iowa.

SPECIAL EXCURSION RATES TO COLORADO, UTAH AND THE BLACK HILLS, Via the North-Western Line. Beginning June 1st excursion tickets will be sold daily to Denver, Colorado Springs, Pueblo, Salt Lake City, Hot Springs, Deadwood, Lead and Custer, S. D., etc., good to return until October 31st. Specially low rate round trip

tickets to these and other points, with favorable return limits will be sold the first and third Tuesday of each month until September 18th, inclusive. A splendid opportunity is offered for an enjoyable vacation trip. Several fine trains via the North-Western Line daily. Apply to agents Chicago & North-Western Railway.

Everything Burned but the Roof.

A BARN burned up down in Decatur, Ill., the other day, that is—everything but the roof.

And the roof was my famous "No-Tar"—the only Fire Proof roofing made. Send me your name and address on a post card and I will tell you all about my roofing—tell you how to test any kind of roofing and send you a sample of my "No-Tar" to test.

I will also send you **FREE** a copy of my book which tells how you can lay "No-Tar" Roofing with only a sharp knife and a hammer for tools.

My book also tells how I make "No-Tar" Roofing and why it is the only roofing that is weather, water, acid and wear, as well as Fire Proof.

"No-Tar" Roofing

won't crack in cold weather and the hottest sun can't melt it.

When you send me your name and address I will tell you why.

You ought to write me at once if you are in any way interested in roofing, for I can save you money—on roofing and on Fire Insurance.

Send me a post card today. Don't let anything hinder you.

O. A. HEPPESS, Secretary,
THE HEPPESS COMPANY,
2401 Fillmore St., CHICAGO.

DAY BY DAY

Agricola

Thank a kind Providence, berry picking is over for this season. Pears, apples, and plums will be a short job compared with the berries.

The Burbank plum is the heaviest bearer that ever grew in the land. The Wild Goose has but little fruit, but the Wyant still makes up all deficiency.

It is a great help to clean plums to have the hen coop with the young broods under the plum trees. They make life a weary burden to the pesky curculio.

The gladioli are now in full bloom, in the height of their glory. And they are glorious. The varied markings and tints are marvelous, and all exquisitely beautiful.

Why should not a farmer's home be surrounded by beautiful objects? Should we be spared until another season, we will have twice as much as now.

Yesterday we guided a gentleman from eastern Iowa through our corn field. "Why," said he, "it is a wilderness. A man would be liable to lose himself."

We are not afraid to compare our corn and gladioli and auratum lilies with any farmer in Iowa.

Received yesterday a postal card mailed from Venice, in Italy.

So by this it seems that postal cards are used all over the civilized world. A penny brings a card from the capital, twenty miles distant, and also from a city located towards the eastern end of the Mediterranean sea. Wonderful!

Peaches are ripe and small boys are getting the colic, for boys devour skins and all. They would the pits only they are too hard.

Melons are coming on. What they need more than other vines is constant rain. A pumpkin seems to be moderately independent. We irrigate them.

Going through the corn we observed that the pumpkin vines were badly dwarfed which were among the corn, but at the edges they were rank and luxuriant. However, we have rows devoted to pumpkins only and there they are magnificent.

Pumpkin pies would, if possible, make the lips of a graven image water to have a bite or two.

We, Agricola, prefer it to apple pie. However, we are fond of pretty much all sorts of pies.

We were never beaten except by one kind of pie. This was of dried apples which

we enclosed in the crust without cooking them. The crust was baked hard and the apples were as we had put them in.

This was while soldiering which always makes boys think of home and mother's good pies. They get hungry for them.

A vase of gladioli adorns the butcher's counter where we purchased our steak. It adds a charm to it.

Any sort of a shop is happier for a vase of flowers. Even a pawn shop is the better in appearance for them.

Wish we had a book all about butterflies, with cuts of the insects in their natural colors. It would be instructive. From now until frost is the time of year for most of our butterflies.

A flock of chickens all of one breed is an attractive sight. It is an easy matter to have such an one. Eggs just now are thirteen cents a dozen.

It is a good plan to go over the plum trees as they are ripening and gather the rotten and stung ones and destroy them.

There is a species of fungus which seems to be peculiar to the plum. We make a practice of going over ours every day.

The native plums, however, such as the Wyant, seem to be clear of disease, but all plums should have lots of air, and also be made the favorite scratching grounds for the poultry.

Plums are ripening which is the reason we talk about them, and also because they will be in these parts quite scarce.

A young and fat chicken makes an excellent Sunday dinner.

The auratum lily is the most magnificent flower in our grounds. They are wonderfully large and fragrant.

There is a white lily, the candidum, nearly as fine. We will plant a lot of both bulbs this fall.

Pinch the chrysanthemums now for the second and last time. They will make fine heads by so doing.

We also prune the young raspberry canes. They make better bushes and so bear more fruit.

Blackberries are now about dried up. The rabbit is the great enemy of this berry. In the winter they eat the bark and ruin the canes.

ACCOMMODATIONS FOR STATE FAIR VISITORS.

The Commercial club of the city of Des Moines will, as heretofore, constitute itself a free bureau of information during the week of the Iowa State Fair, and Secretary Milo Ward sends a special invitation to Homestead readers to use the bureau to the greatest possible extent during the week.

Among other things, the club is in a position to furnish information about board and lodging. Already, 6,000 people have registered for accommodations, though provision is made by the club to take care of many times this number. Prices will be reasonable in every instance.

SECRET VISCOUNT 212705.

Mr. F. A. Edwards, proprietor of the Bluffview herd of Short-horns, has secured a new bull to follow the famous Duke of Oakland 2d. The bull referred to is the beautifully-bred Secret Viscount whose pedigree is set forth below. From a Cruickshank standpoint pen could scarcely portray a more richly-bred bull, coming, as he does, through one of the very best Sittytown families, and topped out with some of the most noted bulls ever bred by Mr. Amos Cruickshank. Mr. Edwards can justly expect this bull to follow the Duke of Oakland 2d with splendid success. The sire of Secret Viscount is the Orange Blossom bull, Orange Viscount, a winner at the American Royal in 1904, sired by grand champion, Lavender Viscount. The second sire in this pedigree is Imp. Craven Knight, a Brawith Bud bull, sired by Cumberland and out of a daughter by the famous Barmpton. The following bulls, Pride of the Isles, Champion of England, The Czar, and Lord Sackville, were all bred by Mr. Amos Cruickshank, and are of such wide and international reputation that we refrain from further comment.

SECRET VISCOUNT 212705.

DAM	Red, white marks; calved May 6, 1903. Vol. 58.	BRED BY
Sunshine	Got by Orange Viscount 157352	W. A. Betteridge
Imp. Sorrel	Craven Knight (96923)	A. Cruickshank
Surname	Roan Gauntlet (45276)	A. Cruickshank
Superb	Pride of the Isles (45274)	A. Cruickshank
Splendor	Champion of England (17526)	A. Cruickshank
	The Czar (20947)	A. Cruickshank
	Lord Sackville (13249)	A. Cruickshank

Amatite
MEANS SATISFACTION

A building covered with Amatite is prepared to stand all kinds of weather—winds, rainstorms, hailstorms, hot weather, cold weather.

In addition it is an excellent fire retardant. You have secured the very best Ready Roofing you can buy for the money when you invest in Amatite.

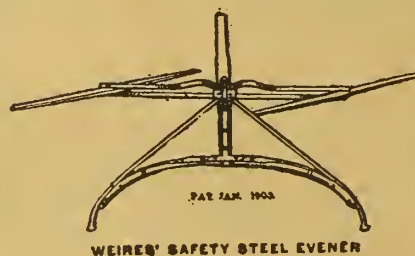

It doesn't shrink, crack, buckle, creep or rot. It's the up-to-date Ready Roofing for up-to-date farm and factory buildings, warehouses, etc.

OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should have them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

LAW QUESTIONS CONSIDERED.

STALLIONS.

An Iowa Subscriber.—What distance away from a dwelling house does the law require a man to keep a stallion?

Answer.—There is no specified distance prescribed by law.

RAILROAD STOCKS.

Mr. Harry M. Fisher, LaVale, Wis.—(1) Can non-assessable railroad stock become assessable by majority votes of the stockholders? (2) Can non-assessable railroad stock become assessable by receiving dividends on the stock?

Answer.—(1) It cannot. (2) It cannot.

APPEAL FROM BOARD OF REVIEW.

A Subscriber, Dorchester, Iowa.—A. owns a farm of 360 acres and B. lives on it as A's tenant. The assessor came and assessed B's property and assessed the land to suit himself, and never went near A. to have him sign the tax paper. Afterwards A. went before the board when it met to have a change made and the assessor said it was a mistake, but the board would not make it right. What can A. do about it?

Answer.—A. probably has no remedy. He had a right to take an appeal from the action of the board of review to the district court, but most likely he let the time pass without doing it. The law allows twenty days for taking an appeal after the board adjourns.

CONTRIBUTORY NEGLIGENCE.

Mr. N. Schoemann, Panama, Iowa.—I had a horse killed by a railroad train on the crossing of a public highway, about fifteen feet from the cattle guards. It broke through my gate and was caught by the train and killed instantly, and carried 150 yards on the railroad right of way. I think the company is liable because the horse was lying on its property. Can I recover damages from the company?

Answer.—We think not. The real cause of the loss to you, or rather the first cause, was the horse breaking through your gate and getting on the track. This would be considered as the result of your own negligence—contributory negligence, and would most likely defeat your claim for damages. The fact that the dead horse was found on the company's property, has nothing to do with the matter in a legal sense.

DRAINAGE—ASSESSMENT.

A Subscriber, Dallas Center, Iowa.—A number of farmers own land and live near the head or source of a creek. They wish to tile drain their farms and they claim the bed of the creek is too high for the outlet of such drains. They therefore wish to dredge out the bed of the creek for four or five miles through farms of other people who have tile outlets in it which have been there for years, and are in many cases several feet above the bed of the creek. Can these farmers at the head of the creek, by process of law or otherwise, cause men who are not actually benefited by such dredging and deepening of the bed of the creek, to be taxed for the costs and expense of it?

Answer.—The dredging of the creek if accomplished at all, must be under chapter 2 of title 10 of the code, where the following method is provided for assessing property benefited: The county auditor appoints three commissioners, one a civil engineer, to inspect, classify, and report an assessment for benefits, on property supposed to be benefited by the improvement, to the board of supervisors, who then hears the report, and finally determines the assessments to be made, and levies taxes accordingly. It seems from the code, and from a decision of the supreme court, that the question as to whether or not any given lands reported, are actually benefited, rests with the commissioners in the first instance,

and finally with the supervisors that if they determine that lands are benefited, no court has power to change it, so the only thing an owner can do is to convince, first the commissioners, and finally the board of supervisors that his land is not actually benefited.

ANTE-NUPtIAL CONTRACT.

An Iowa Subscriber.—A. is a widow with grown children and some property. B. is a widower with grown children and some property. In case they should intermarry, what legal arrangement would be necessary in order to give each one control of his or her property?

Answer.—It would be necessary for them to enter into a written contract before marriage, setting forth the precise and exact relations which are to exist between them as husband and wife, in reference to the property owned by them respectively. This is called an ante-nuptial contract. It should be prepared by a competent lawyer.

RULES OF SCHOOL.

A Reader, Dysart, Iowa.—A class of pupils in our school obtained permission of their parents to go picnicking a half day during school hours. The principal was not informed about it, and he wrote to the parents asking if they had given permission to the children and the parents replied to him in a disrespectful manner. He then kept the class an hour every evening after school till it made up lost time. Had he a right to do this?

Answer.—The school board has power to make such a rule, and require the teacher to enforce it, and the law will uphold a teacher in enforcing such a rule even though the absence of the pupils from school, to attend a picnic was by the consent and permission of the parents.

INHERITANCE IN KANSAS.

A Subscriber, Coffeyville, Kan.—A married couple live in Kansas and have no children. The husband owns a farm and personal property there. Suppose both husband and wife should die or get killed in a way that it could not be proved which died first, and neither of them had made a will, how would the property be disposed of?

Answer.—The property would go to the parents of the husband if living; if only one parent living, the entire estate would go to the one. If both parents dead, to the brothers and sisters of the husband. In some states the law would presume that the wife died first in such a case, but in Kansas no such presumption exists.

EXEMPTIONS—NORTH DAKOTA.

A Subscriber, Woodstock, Ill.—(1) How much does the law exempt of real and personal property from execution and attachment in North Dakota? (2) A. lives in Illinois and holds a judgment note against B., who lives in North Dakota. B. owns real estate and personal property, both mortgaged. How can A. collect the debt?

Answer.—(1) Family picture, Bible, school books, and a library worth \$100. Wearing apparel, pew in a church, lot in a cemetery, provisions and fuel for one year—then if one is the head of a family, he may select property to the value of \$1,500, or take specific things actually worth more than that, such as household furniture, live stock, farming tools and implements. Besides this in personal property, the homestead is exempt. It may be worth not exceeding \$5,000, and consist in 160 acres of farming land or not more than two acres in a town or city with improvements. (2) Only by a suit brought in North Dakota and execution there against B.'s property which is not exempt from execution.

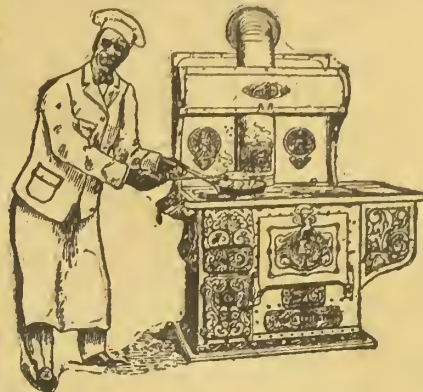

LAW OF ESTRAYS.

A Subscriber, Nora Springs, Iowa.—What is the law in relation to taking up stray stock in Iowa?

Answer.—Any animal of an unknown owner running at large, or trespassing within a lawful enclosure is an estray, and may be taken up, between May 1st and November 1st, except an unbroken animal which is not required to be restrained by a police regulation. The taker up must post written notice within five days, in three of the most public places of the township, giving full description of the animal, and place where taken up. If not claimed in ten days he must go before a justice of the peace and make oath to the notice, and a statement whether marks or brands have been altered. The justice of the peace records the notice and sends it to the county auditor who records it in stray book, and publishes the notice for three weeks. The taker up pays the fees and expenses of justice of the peace and auditor and if the animal is (stock), of the horse, cow, mule or ass kind, one dollar and fifty cents for publishing notice. All these payments must be refunded to the taker up, in case the owner claims the property. If the animal is of the kind above stated it will belong to the taker up if not claimed in one year; if other animals, in six months.

Meet Us At The Iowa State Fair.

AUGUST 24th TO 31st INCLUSIVE.

ELECTRIC

VETERINARY MATTERS

PROFESSIONAL veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of \$1.00. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

SYMPTOMS AND TREATMENT.

TONGUE LOLLING.

What can I do to prevent my four-year-old back mare from hanging her tongue out when a bit is in her mouth?

In bad, long established cases the only cure is to have a portion of the tongue amputated by a veterinarian. In some cases the habit may be checked or cured by buckling a strap around horse's nose at place where bit crosses lower jaw, or by fitting a disk upon bit with the bar as an axle, so that the disk lies upon the tongue.

LOCAL PARALYSIS.

I have a black mare mule one year old last May that has her under lip paralyzed. I put a yoke on her, made of pieces of 1x4, and it got down between her ears, making the cross piece press very hard against her jaw. Her lip seems to hang loose, and she cannot swallow very well. She has been troubled this way about two months. What can I do for her?

Treatment may do a little good, but filly may grow out of the trouble in time. Blister poll of head with cerate of cantharides and internally give fluid extract of nux vomica three times daily, commencing with ten drops at a dose and increasing a drop or two daily until the muscles are seen to twitch involuntarily, at which stage go back to first dose and repeat, if necessary. Allow filly to run out as much as possible.

LAME HOGS.

I have a Poland China grade shoat three months old that has enlargements on the legs near the joints that are as hard as the bone itself. The trouble is of about six weeks' standing, and while at first he was not much lame, he is real lame now, and it seems to pain him very much. I have fed alfalfa, both pasture and hay, sweet milk at night, and new milk fresh from the cows in the morning. The hogs have dry quarters, plenty of exercise, good well water when wanted. Have two more starting the same way. Please advise as to cause and treatment.

Rheumatism sometimes affects hogs in this way and the best remedy is to blister the enlargements, alternately, with cerate of cantharides. Internally, after physicing with epsom salts, give ten grains of salol and iodid of potash alternately every four hours. Feed light slop and keep hogs in dry, sunny quarters.

RETAINED AFTERBIRTH.

I have a fine twelve-year-old Short-horn cow which was quite sick after calving, the trouble seemingly being caused by retained afterbirth. She had quite a lot of corn for three weeks before calving, so have been told she was not in proper condition. As she is due to calve again this fall I would like some advice in regard to caring for her properly. (1) Please tell me how to remove the afterbirth, and how soon this should be done if it is necessary. (2) Which is the best to use to cleanse the womb, a veterinary syringe or a catheter, and could any harm come from performing this operation three times daily? (3) What should she be fed to keep her in good condition for calving? Is bran and some shorts with a little stock food mixed, good? Would ginger be of any benefit, and if so, how much should she be fed at a feed? (4) Should she have any corn within two months of calving time? (5) Which is the better as an injection solution, carbolic acid and sulphate of zinc, or a solution of permanganate of potash in water?

We would advise you to employ a veterinarian to remove the afterbirth, not later than forty-eight hours after calving, as the operation requires skill and experience. After flushing out the

womb and vagina with a 1-per-cent solution of coal tar disinfectant, the protruding parts of the afterbirth are followed into the womb by the cleansed hand and arm, which have been lubricated with carbolized oil. The afterbirth is then stripped free from each cotyledon in turn, until the main portion of the womb has been cleared, after which each of the two horns is dealt with in the same way. The cotyledons are mushroom-like tumors upon the interior lining of the womb, and to these the afterbirth is adherent. Care must be taken not to injure the cotyledons. (2) A syringe serves to inject the antiseptic solution; a catheter is required to draw it off again. (3) Feed no corn, but give bran mash and a little flaxseed meal daily while she is given as much outdoor exercise as possible every day. She will not require ginger, and stock food is quite unnecessary in all cases. (4) No. (5) Coal tar disinfectant or permanganate of potash are admirable as disinfectants for the womb and vagina.

BLOAT OF SHEEP; PARALYSIS.

(1) Can you tell me what will cure bloat in sheep? One of my sheep came in from the pasture apparently all right and in about half an hour she was bloated until she could scarcely breathe, and in twenty minutes more she was dead. (2) Also, what is the cause of pigs getting weak in the back and dragging their hind parts? Is there a cure for this trouble?

In bad cases the paunch should be tapped on left flank by means of a trocar and cannula made for the purpose and for sale by dealers in veterinary instruments. A tablespoonful of turpentine in four ounces of raw linseed oil is a favorite remedy or give an ounce of hyposulphite of soda and one dram of aromatic spirits of ammonia in a cupful of warm water once an hour until relieved. Either medicine is well followed by a four-ounce dose of epsom salts in warm water, adding two teaspoonfuls of ground ginger root. The homeopathic treatment is to place fifteen to twenty drops of tincture of colchicum seeds upon the sheep's tongue and repeat in twenty minutes, if necessary. (2) See recent answers under the head of "paralysis."

HOMESEEKERS' EXCURSIONS.

CHICAGO GREAT WESTERN RAILWAY.

On the first and third Tuesdays of each month until November the Chicago Great Western Railway will sell homeseekers' tickets to points in Arkansas, Indian Territory, western Louisiana, Mexico, New Mexico, Oklahoma Territory and Texas at rate of one fare plus two dollars for the round trip, except that a maximum rate of \$23.00 from Des Moines will be in effect to above territory with the exception of Mexico. Stopovers will be allowed in both directions. Limit thirty days, stopovers both ways.

On the first and third Tuesdays of each month until November the Chicago Great Western Railway will sell homeseekers' tickets to points in Arizona, Kansas, Missouri, Nebraska, Nevada, Utah, Wyoming, Alabama, Florida, Georgia, Kentucky, eastern Louisiana, Mississippi, North Carolina, Tennessee and Virginia at rate of one fare plus two dollars for round trip. These have limit of twenty-one days to return and allow stopovers on going trip.

On the first and third Tuesdays of each month until November, homeseekers' tickets will be on sale to Denver, Colorado Springs, Pueblo, at rate of \$23.00 from Des Moines and to Ogden and Salt Lake City at rate of \$29.50. Other Colorado points in proportion.

OUR DAIRY DEPARTMENT.

Contagious Abortion of Cows.

BY A. S. ALEXANDER.

Contagious abortion of cows is caused by microbes or microscopic organisms termed bacteria which invade the generative organs of the female or may be carried there by the tainted bull. The exact character and identity of the special germ in this disease has not yet been determined by scientific investigators, but enough is known to make it seem apparent that in Europe the contagion is more virulent than here, suggesting a difference in the causative germs, but that in both instances the disease may be communicated by local inoculation with discharges from a diseased cow.

When the germs find access to the vagina they set up irritation and start colonies from which others form in the womb or even in the fallopian tubes. Due to the irritation a discharge comes from the affected animal and this discharge contains the germs which have the power of similarly affecting another cow and get to her in the stable by discharge falling into the gutter, getting onto the tail and thence being switched onto the external generative organ whence infection spreads to the inner parts. This form of abortion cannot be caused in any other way than contamination conveying the germs from one affected animal to a clean one and from the latter in turn to a bull or cow and so on until all of the animals in a herd may become infected.

Investigation also seems to have proved that when a cow becomes affected the germs spread gradually until all available tissues are infected; that at first, for say three periods of gestation (pregnancy), the irritation due to the presence of the germ colonies is sufficient to cause abortion, but that each successive abortion comes later in pregnancy than the first one and in time the cow becomes immune to the effects of the germs and carries her calf the entire period of gestation.

In other words the cow that has aborted three or more times may then carry her calf the full length of time, but still be infected by the germ of abortion and while not aborting herself may spread the contagion to cows associated with her in the stable or to them by means of the bull contaminated by her at time of service. In time this immune cow may become free from the germs, as they find no new tissues to affect and it also is fairly well proved that the contagion of abortion may suddenly and without known cause depart from an affected herd so that for years no more cases of abortion occur and the contagion has again to enter in an affected animal before it does further harm.

Experiments in this country thus far have failed to prove that the germs of contagious abortion are contained in the blood of the affected cow or in that of her fetus, but they have been found in the womb, vagina and placental membranes. Despite this fact some contend that the disease is in the blood of the dam and from her conveyed to the calf in her womb, but there is no proof that were the germs in the blood of the cow they could be thus conveyed to the

fetus which does not directly receive blood in utero from the dam.

Personally we prefer to believe that the disease is entirely invasive from without and does not exist in the blood of cow or fetus and that freedom from effects in an infected cow come from the immunity we have mentioned and not from death of the germs or their entire eradication by use of internal and applied disinfectants.

The disease gets into a herd from without. It is not, apparently, spontaneously produced upon any farm. A herd remains clean when kept away from the contagion, but when the germs once are introduced they spread from one cow to another until all have aborted several times, then become immune or spontaneously lose the infection.

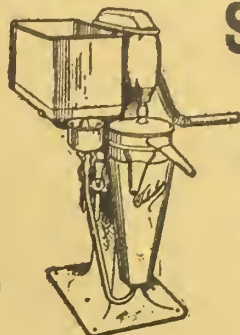

These conclusions are somewhat theoretical, but based upon facts apparently proved in practice and we have at least arrived at a fairly effective method of prevention.

This consists in quarantining every new purchased cow or bull until properly disinfected and seen to have abnormal discharge. The cow requires to be quarantined at least a month and the bull two weeks. During this time of probation the sheath of the bull should be flushed out once daily with a 1-1,000 solution of chlorid of zinc or other effective disinfecting solution and the same strength solution should be used daily to sponge, spray or wash the external genitals of the cow or she may even have a few vaginal injections if there is the slightest trace of discharge of a suspicious nature.

The bull is to have similar treatment before and after each service when released from quarantine and the pregnant cows should have the external treatment daily throughout pregnancy if abortion has been prevalent in the herd. All cows that have aborted are to be kept separate; all of such cows again in calf are to be kept separate; all bred heifers that have not previously aborted are to be kept with pregnant cows that have never aborted or been exposed; the bull that has mated with an affected or exposed cow must not be used with the clean heifers and cows; no cow is to be allowed to calve with or near other pregnant cows; all afterbirths, soiled bedding or aborted calves are to be burned; disinfectants are to be used daily in the gutters back of all cows and the stables are to be kept clean, disinfected and well ventilated. These measures will tend to prevent abortion, but if the disease has been prevalent internal treatment or hypodermic injections of anti-abortion serum should be used.

The favorite internal treatment is pure carbolic acid, but just how it has its effect is little understood considering that the germ is not known to be

A FARMERS' COMMITTEE SAYS TUBULAR IS WORLD'S BEST CREAM SEPARATOR

The Tubular

Low Can
Lightest Bowl
Simplest Bowl
QUICKEST CLEANED

Self Oiling
Ball Bearing
Enclosed Gears
CLEANEST SKIMMER

A community of farmers and dairymen recently united and appointed a committee of six wide awake farmers to thoroughly investigate cream separators and decide which is best.

Why? Simply because they were convinced that cream separators pay, and wanted to know the best before buying. The committee requested all leading separator representatives to meet the committee and show their machines.

Why did they do that? Because the committee wanted to find out positively which separator actually is best. They didn't want to take anybody's word for it, but wanted to see all reliable separators side by side and decide for themselves.

When that committee met, many farmers were present waiting the decision. The committee carefully examined the different separators, and unanimously decided that the Sharples Tubular Cream Separator is best, excelling all others in fifteen essential points.

The members of the committee backed up their decision by buying for themselves six No. 6 Sharples Tubular Cream Separators right on the spot—one Tubular for each farmer on the committee.

What did that mean? That this investigation had absolutely satisfied the committee that the Sharples Tubular is the best cream separator built—the best in every way. If you buy a Sharples Tubular, you will get the world's best separator.

It is to your advantage to learn all about this committee—its decision—and the world's best separator. Write for our handsome, complete catalog C 121, with leaflet and the committee's sworn statement telling all about it.

Save 20% to 50% By buying a DAVIS Separator

It comes direct from the factory

Factory prices. No middlemen's profits. Investigate our fair selling plan.

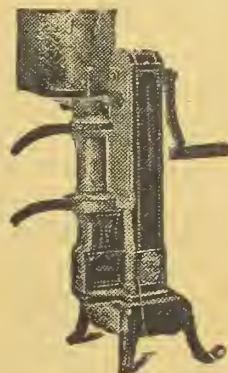

It's the low-down separator (just belt high) that has a three-piece bowl that can never get out of balance. In all the separator world there is nothing to equal the Davis for convenience, for nice, close skimming, for easy running and easy cleaning. Don't buy without having our money-saving Catalog No. 118. It's free. Write for it to-day.

Davis Cream Separator Co., 54-L North Clinton Street, CHICAGO, ILLINOIS.

BUTTER-BRED Holstein bull calves, 6 to 8 months old, sired by Prince Inka, (18 A. R. O. daughters), and out of A. R. O. dams, \$50 each. No females now for sale. G. C. Mosher, 605 Bryant Bldg., Kansas City, Mo.

present in the blood. The average dose is one dram of the pure carbolic acid once or twice daily in water and mixed with the food or as a drench. A heifer may take half this quantity and every other day if merely exposed, but not known to be contaminated. An adult cow may take the full dose twice daily if she has previously aborted and again is pregnant; and even larger doses may be given to cows suffering from leucorrhea (whites). Many people merely give the carbolic acid two or three times a week and claim good results. Others give it in salt at the rate of two pounds of the pure carbolic acid to 100 pounds of salt placed in numerous troughs, before cows that have been allowed to become salt hungry. It also is used as a 3 per cent solution hypodermically, the dose being two drams to be repeated every ten days throughout pregnancy.

A Cream Separator Without Cost

That is What We Offer You in the

Iowa Dairy Separator

Repeated tests have demonstrated that the "IOWA" is the only Separator that takes out every particle of the cream. Therefore, given a certain amount of milk, for a specified length of time, and the additional amount of cream secured will pay for the machine.

Gold medals at World's Fair and Portland attest the superiority of the "IOWA" over all others.

Made in all sizes from 250 to 750 pounds. Your name and address on a postal card will bring you a handsomely illustrated booklet with full information, price list, etc. Write at once, for every day that finds you without an "IOWA" finds you losing money. Ask for catalog 25. Address,

The Iowa Dairy Separator Co., Waterloo, Iowa.

POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

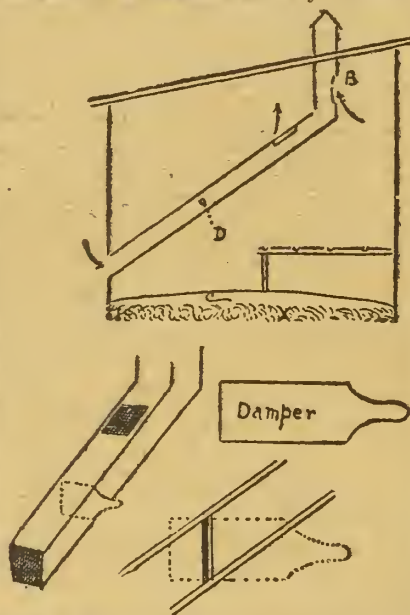

INVESTIGATION OF COLD STORAGE.

The cold storage system as it is operated at present has a great deal to do with the poultry and egg industry. Recent investigations of the cold storage business in Chicago recently brought out some facts that may be termed "trade secrets." Although not new, the methods outlined appear novel and interesting to consumers as well as to producers of poultry supplies. Objection was made to stamping the date on the supplies on the ground that since Illinois only having that law, it would be prima facie evidence that such products came from Chicago and would injure the sale of them to a greater or less degree. The following facts were brought out by the investigation: "Not 5 per cent of the goods in cold storage warehouses in Chicago are sold in that state," declared the witness. "They are either sent abroad or sold in the East. People, when they buy food products, are peculiar. You sell chickens or turkeys in New York or New England market, and you have to tell the buyer they came from New Jersey or Connecticut. The Iowa chicken is better than the New Jersey chicken, but the New Yorker does not think so. He must have his broiler from New Jersey, and the result is that there are more chickens sold in the state in one day than the State could produce in a week. And there is butter. Not enough butter is made in Elgin to supply one-fourth of the Elgin butter which is sold in Chicago every day. The Elgin butter you are buying is mostly made in Iowa and Minnesota, and it is just as good butter as that made in the Elgin territory. The time to inspect a turkey is before it is frozen," said he. "There is no use of inspecting it after it is frozen. The way things are now, we get two classes of goods. The farmer in Illinois, Iowa, Wisconsin or Minnesota sends us his chickens and turkeys and we freeze them. They can be inspected in Chicago before being put in the warehouse. Again, we get a large amount of goods from Kansas City, Omaha and other packing points which are frozen there. They should be inspected before being put in cold storage, but the Chicago inspector can't do it. That is the reason

for a federal inspection, which will cover all cold storage plants." Another objection raised was to the requirement that all fowls be "drawn" before being frozen, and the length of time goods could be kept in storage. It was argued that it was healthier not to draw the birds, and that six months was too short a time, the average for eggs being nine months and fowls ten and eleven.

POULTRY HOUSE VENTILATION.

There are a number of ideas for the ventilation of poultry houses which are very desirable, but most of them are expensive to put into operation. The main benefit to be obtained from ventilation is dryness of atmosphere, which of itself means the circulation of pure air. In any plan of ventilation the air from out-of-doors should be taken in from near the bottom of the house and follow the ventilator until it reaches the top or nearly so before it is allowed to escape into the room. We think the plan of ventilation indicated in the illustration is one of the best known. The foundation for a comfortable dry house is

laid in the floor which is of concrete kept thickly covered with straw. The shaft is run in an angle entering the house at the point indicated by the arrow at the bottom left and escaping into the room at the point in the shaft indicated by the upper arrow, which opening is covered with wire netting. At the point B an opening is cut into the shaft through which the foul air escapes into the shaft and out at the point of the ventilator on the outside of the house. A damper is provided as shown so that the current of air can be controlled in the event of a windy day. The detailed drawing at the bottom of the cut shows how this damper is operated. The whole plan is simple, easily put in operation and will be found very effective.

BOYER'S SUMMER ADVICE.

Michael K. Boyer, of New Jersey, a practical and extensive poultryman, says there is nothing that will wilt the ambition of a wide-awake poultryman like hot weather. The hot, scorching days of summer are inclined to cause one to put off until tomorrow what can be done today. He evidently knows what he is talking about, for he is guilty himself. In the Poultry Success he gives many very good hints for hot weather management of poultry, as follows: "There is an old saying, 'a lazy man will have lazy fowls.' It is still true. Hot weather is apt to produce the fever in both man and bird.

"Avoid too much carbonaceous food during the hot spell, as it is too heating. "See that the houses at night are fully ventilated. The scratching shed plan is the best, from the fact that the birds get the full benefit of the cool at night. "The poultry should not only be supplied with fresh water two or three times a day but care should be taken that the drinking vessel is placed in the coolest spot possible.

"Shade must be provided. Trees are best, but where this is not the case, it is best to build canopies. There must be a shady spot where the hens can go and dust themselves during the heat of the day.

"But the enthusiastic, plucky, willing worker will plod along, knowing that the season will soon be here when the stock will look better, will do better, and when

Swift's Digester Tankage

—for Growing Pigs

Growing Pigs cannot build up Bone and Muscle and take on Flesh unless their rations are properly balanced with a liberal supply of digestible Protein. Feeds rich in fat, make fat and not Flesh.

What It Costs

Less than half a pound of Digester Tankage, costing under one cent will balance the daily ration and produce maximum gains. For booklets giving facts and figures write—"Protein for Profit" tells the story. Ask for it.

PEDIGREED Scotch Collie pups at farmers' prices. If you want one, address, Fred Massure, R. F. D. No. 2, Linden, Iowa.

the prices for eggs and poultry will be of a more tempting figure.

"We have entered a period when dry feeding is becoming popular. On many of the large farms wet mashers are no longer fed; instead, the ground meal is placed in troughs or hoppers, and the fowls allowed to help themselves at will. At first, I admit, I did not take kindly to this method. I was afraid the hen would not be satisfied; that she would not take readily to it, and, in consequence, lose her appetite. But I experimented, and found I was mistaken.

"The hens not only enjoy the food given in that way, but are doing better work. They are not suffering from bowel troubles during this warm weather, as so often is the case while feeding wet mashers; they do not become overfat, and they do not suffer from indigestion.

"We have adopted this dry feeding method for both our old and young stock, and have reduced the dangers of summer to a minimum.

"Green food is another important item. Short, tender grass, lettuce and radish leaves are not only relished, but the very best kind of greens to give. Of course, the best method is a range over a good pasture, but poultrymen do not always have that advantage to give their fowls.

"Green food is a tonic, a medicine, in the bill of fare. It relieves the fowl of too much concentrated food. It is bulky.

"There is more or less dry weather during the summer, and the runs not infrequently become baked, and in heavy soils more or less filthy. The man who has the best interests of his stock at heart will once a week use a hand plow in such yards and stir up the soil so as to make it loose and fresh. If he does

Why Dig a Pit?

What's the use of making a hole in the ground for farm scales when you can get the pitless kind direct to you from the factory at half the price of the old fashioned scales. I make and sell the

Knodig Pitless Scale

But before you buy you may have a set to try for 30 days absolutely free of charge. No deposit. No notes to sign. If you don't like it, send it back. I pay the freight both ways. You'll like the Knodig. It's absolutely accurate. No parts below surface to rust out or accumulate dirt. You can take it down and set it up anywhere. Write for catalogue.

H. C. GUMBEL, Gen'l. Mgr.
Nat'l Pitless Scale Co., 2011 Wyandotte St., Kansas City, Mo.

this at night, the next morning the fowls will get to work scratching, hunting for worms and stirring up things generally. It is wonderful how much they find in this turned-up soil that furnishes both amusement and food.

"It should be a rule that nothing is thrown in the poultry runs that will not be eaten up quickly. To make the runs a dumping place for slop soon furnishes the stock with a lot of sour, tainted stuff that is bound to produce sickness. We never believed in feeding sour slop to our pigs and certainly not to our poultry."

HORTICULTURAL TOPICS

This department is conducted by an experienced horticulturist. All questions relating to horticulture will be answered if of sufficient general interest to warrant a reply in this department. Communications and inquiries upon horticultural topics should be addressed to this office.

THE ARBOR VITAE OR WHITE CEDAR

A Grinnell, Iowa, subscriber, sends the following inquiry:

Under separate cover I am sending you some sprays from an arbor vitae hedge which is dying out in places. Can you tell me what is the cause of the trouble and is there any preventive?

The specimens sent are of the native arbor vitae or white cedar. Many of the sprays are found to be infested with the lecanium. This is one of the scale insects which sometimes does considerable injury. If you examine it at this season of the year it will be found that under each scale there are myriads of eggs. These will hatch out in a short time. The young move a short distance, establish themselves and begin to feed upon the plant by sucking the sap. In time each individual is covered with a scale like that of its parent. Eggs are deposited which hatch the next year and thus the cycle is completed. Where the plant is badly infested it is seriously weakened and devitalized through the loss of sap. This insect may be combated by spraying with kerosene emulsion. An application should be made just after the young hatch and before they have formed a shell. It is probable, however, that the presence of this insect is not entirely responsible for the present condition of your plants. In my experience the arbor vitae is not a satisfactory hedge plant for the middle West and full-grown plants frequently go in this fashion. In its native haunts it is a semi-swamp plant and where planted under especially adapted conditions it is apt to suffer for the lack of moisture. If the ground is all dry they winter kill and are also apt to winter scald and as a result present a sickly yellow appearance in the spring. The native arbor vitae is more hardy in this respect than the oriental form, but for general purposes I should use the barberry or some other hedge plant in preference to it.

A. T. Erwin.

"Spare That Tree"—From the Advertising Public.

To the Editor of The Homestead:

I wish it were possible to call an indignation meeting in every rural community, one that would enter such a loud protest that the would-be advertiser would pause ere he pounces upon every beautiful tree along the roadside with his handbills and box of tacks and usurps the privilege of posting every conceivable and often objectionable advertisement upon these conspicuous signboards. Evidently they appeal to him as nothing more than signposts, and he presumptuously supposes that they gré for his especial benefit, and that the gullible public must be attracted in this manner to his wares.

The fact in the case is that every intelligent passer-by is disgusted and annoyed by such an utter lack of reverence and respect for God's beautiful handiwork. We are just awakening to the responsibilities around us in protecting the few trees that have been left standing along our highways. Just a few years back the well-meaning public and the agricultural press were unanimous in advising farmers to clear up the roadsides along their farms. Neatness was the goal that all were striving for, and it is just beginning to dawn upon us that even neatness may be overdone, for with the clearing away of every vestige of nature, we find that our song birds are driven to other haunts and localities, and we are thereby the losers both in sentiment and in practicability. The few trees that are left should be spared the ruthless marring at the advertiser's hands.

I know of a mammoth and stately elm that stands midway in the public road and has stood there, so old settlers declare, for fifty years in all its wealth of beauty like an oasis in a desert on a midsummer day, and I think every man and beast who passes under either side always breathes a prayer for its preservation. I am sure if it could tell the tales and reproduce the innermost thoughts of all the hosts who have traveled by it softly and slowly in the past half century there would be a huge compilation of good thoughts credited to

the side of mankind, for such a tree is an inspiration to catch the passer-by. Likewise a mark to catch the mercenary eye of the advertiser's agent who keeps it posted from base to limbs with his flaunting tokens of irreverence.

How many farmers would dare go into the city parks and nail their business cards, or anything they wished to place before the public, to the shade trees? Would such an act be tolerated? Certainly not. No one would be so presumptuous, yet many business houses in the city start their man out just as soon as the roads are fairly passable with instructions to post their bills in every possible conspicuous place along the country roads. The telephone poles are a source of convenience, but not to be compared with a beautiful tree. The only wonder is that our orchards have not been turned into billboards. Their location is all that has saved them, for farmers are slow in remonstrating and usually so busy that they ignore many impositions rather than assert their rights.

This is the reason when we may expect to even awaken some morning and find our front porches and our front fences heralding the merits of some quack medicine or some chicken remedy for every ailment, and if we each one appoint ourselves a committee of one to destroy every advertisement placed in an illegitimate place we will do away with a great many eye-sores and eventually put a stop to such schemes of advertising. Like everything else, there is a place for advertisements. In this day of free delivery, when every family receives a daily paper, a half dozen agricultural papers, the best magazines, etc., there is no danger of not "catching our eye." It is true and creditable that some papers discriminate and bar objectionable advertisements, but there are others who advertise anything, and these are always the class who appreciate the "fake" advertisement and support it. Look at it from any viewpoint and there is nothing in favor of marring the few shade trees by any scheme of advertising.

Spraying When Fruit is Grown.

To the Editor of The Homestead:

It is frequently necessary to spray when the fruit is almost quite grown, and sometimes when it is ripening. This is especially true in regard to European plums, as they frequently rot at ripening time if they have not been thoroughly and frequently sprayed with bordeaux mixture while growing. But other plums are much given to rotting at the beginning of the ripening season, and all fruits are likely to require attention at this crucial time when neglect will frequently change an almost realized profit to disastrous loss.

Bordeaux mixture is the panacea for all these fungous diseases, but it cannot be used at or near ripening time on account of the fact that it stains and discolors the fruit. For that reason it is necessary to use some other preparation which is free from this fault. Ammoniacal copper carbonate is the one usually recommended and most frequently used. The formula is as follows:

Copper carbonate 6 ounces
Strong ammonia (26 degrees Baume) 3 pounds
Soap 1 pound
Water 50 gallons

Dilute the ammonia about one-half with water, add slowly to the copper carbonate, stirring the while. Use no more ammonia than is necessary to dissolve the copper carbonate. Dissolve the soap in hot water and pour into the copper carbonate solution. Agitate well and add enough water to make fifty gallons of the mixture.

This should be prepared as used. Stock solutions may be made in any quantity, but the copper carbonate solution must be kept tightly corked and exposed only as it is necessary to prepare the spray for use.

Franklin Brown.

OUR HOME DEPARTMENT

All communications intended for this department should be addressed to Post Office Drawer 1127, Kansas City, Missouri.

WITH THE EDITOR.

"During the busy season on the farm, the indoor management should provide well-cooked meals promptly, keep late papers handy, and try to make life easy for the outdoor toilers."

It pains us to admit it, but the fact is that sometimes "the indoor management" does neglect the comfort of "the outdoor toilers." It may even be that some women of this Home Department are not providing well-cooked meals promptly, are not placing the late papers handy—in a word are not doing all they might, should, could, to make life easy for "the outdoor toilers."

There are all kinds of women. Some are "no count" because they were ill born and have not overcome the evil effects of their birth and training. The woman whose mother was "no housekeeper" and so failed to teach her daughter housewifely arts and to nurture in her housewifely instincts of cleanliness, daintiness and thrift has small chance of becoming a good cook and a tidy housekeeper. When such a woman gets a home of her own, as a rule, she does as her mother did, possibly not as well; her work is done without system, and cleanliness, is conspicuous by its absence in her house and well-cooked and promptly served meals unknown in the family.

Then there are other women who are no better although they had good mothers and good training, they could not be taught, wouldn't learn. As children they were selfish and lazy, as young women indolent and pleasure-loving, as wives they are slatterns and gossips. Frequently she nurses some imaginary ailment, always she is a social parasite of whom the world would be well rid.

Closely related to the women last mentioned are those whose fond, foolish mothers did the housework while the girls played the piano or dawdled over fancy work. When such girls marry they are apt to have a sort of scorn for the homely duties of life. Useful tasks do not appeal to them, they like to make a cake or a salad, but they object to bread making and churning, they "love" to embroider, but they "hate" to mend or patch. The last thought of such women is "to make life easy for the out of door toiler." Their one ambition is to make life as pleasant as possible for themselves, and they pursue their ambition serenely unconscious that they may be disappointing legitimate hopes, that they may be making life hard for others.

There are other women who fail to satisfy the expectations of the out of door "toiler," but they are unrelated to those of whom we have been speaking. They form a class, two classes rather, entirely by themselves.

A wife is usually not only a housekeeper, but also a mother. She has not only the care of the household, but the care of children whose coming, more often than not, has impaired her health. With the best intentions in the world the mother of a family cannot be the wife, the housekeeper she should. Children, especially during the first ten years, make large demands upon the mother. The young mother is languid when she is not actually weary, her husband and her house are bound to be more or less neglected where, as so frequently is the case, everything depends upon her. The lot of the outside toiler may be arduous in the busy season, but if the father and such a mother could slip not only into each other's shoes, but into each other's skins it is safe to prophesy that before a week the husband would be registering a vow that never again would he find fault with his wife.

When a good girl marries the man who has won her affections her dearest ambition is to be to him the very best wife a man ever had. There is nothing she would not do for him and nothing she would not sacrifice for him, she cooks his favorite dishes and she gives him the best of everything, she effaces herself and finds her highest pleasure in ministering to his comfort. It sometimes happens that the wife who begins by thinking that nothing is too good for her husband ends up by thinking that any old thing is good enough for him. When this happens it is pretty safe to suppose that the wife has tired of playing a lone hand. When consideration is

THIS TRADE MARK

is the best way to tell the Dodd & Struthers Lightning Rod from an imitation.

Burned on the end of every spool, for your benefit; but to get the benefit you must see that it is there.

Look for it and be sure it is burned on the end of the spool, and that it looks exactly like this cut. Write for free booklet.

Also make the agent show you his Agent's Certificate. Be sure he has it; read it for yourself.

Our Rods are so good that our competitors try hard to make something like them, something just as good, and there are some good counterfeits; but you can get the genuine by seeing the Trade Mark and Agent's Certificate.

DODD & STRUTHERS, DES MOINES, IOWA

all on one side it becomes a sort of boomerang, it wounds the most vital parts, it paralyzes the springs of action and gradually makes of duties one time glad some an intolerable weariness—and so it comes about that some meals are not well cooked and not cooked in time and that the outdoor toiler is not met with the smile so generally considered to be his right.

A clever minister can write a half dozen sermons on the self same text, I could write at least one other editorial on the quotation at the head of this article; some day I will.

HOME AND HOME MAKING.

LITTLE HELPS BY THE WAY.

Go make thy garden as fair as thou canst,
Thou makest it never alone;
Perhaps she, whose plot is next to thine,
Will see it and mend her own.

There is love that stirs the heart,
And love that gives it rest,
But the love that leads life upward
Is the noblest and the best.

—Henry Van Dyke.

The doors of your soul are open on others, and theirs on you. Simply to be in this world, whatever you are, is to exert an influence—an influence, too, compared with which mere language and persuasion are feeble.—Horace Bushnell.

HUSK MATS.

To make a husk mat, begin by taking clean, ripe corn husks. Split them in the center and dampen by sprinkling warm water over them. Hold a piece of husk so prepared between the thumb and forefinger of the left hand, letting the top of husk project an inch or more. Now take another piece and place upon the first, letting it project same as the first, toward the right. Fold the first piece over the second as in simple braiding, only be sure to insert a piece of husk each time a fold is made. Braid several yards in this manner, after which the strand may be sewed into a square, circular, or oblong shape, using a darning needle and stout twine; dampen before beginning to sew. Sew precisely as though making a braided cloth rug, and let the projecting ends of husk lie uppermost. Enough husks can be braided in an evening to make a large rug. These rugs last a long time if kept from dampness or rain. If wanted for kitchen doors, or entry, make of whole husks instead of splitting them.

Husk mats can be disposed of in town and city stores, if neatly made; and a little practice will soon enable one to produce marketable ones. We know one woman who earned her own "pin-money" by the making and sale of husk mats.

TO GET RID OF BED BUGS.

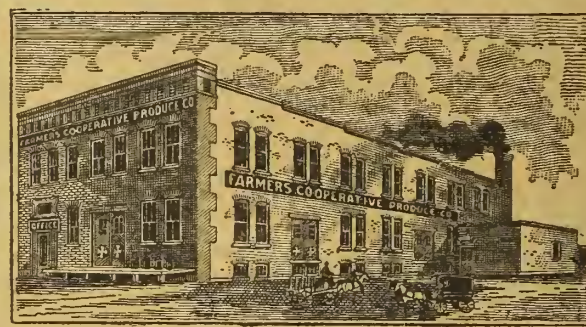

H. B. Geer, of Nashville, Tenn., in the Epitome, says: Get a quart of wood alcohol and four ounces of corrosive sublimate, putting the latter in the alcohol, where it will quickly dissolve. Make a "swabber" by means of a soft rag tied firmly on the end of a stick, after being wrapped about it several times so as to make a sort of ball. Dip it in the solution and after taking the bedstead down, apply it to the cracks and crevices so that the stuff will run in well. This can be done by simply pressing down on the stick so that the solution will run freely from the knotted rag. Keep your hands out of the solution, for while not dangerous it is injurious to the skin. Two applications, a week apart, if thoroughly put on will rid the worst infested bed of the miserable things. Once every three months after that will keep them away. This remedy is a "dead shot"—you can count on it.

It is said gasoline applied in the same way will exterminate them.

HINTS TO HOUSEKEEPERS.

A woman who has traveled in India suggests that one of the daintiest ways of keeping a room cool in summer is by hanging curtains of an eastern grass, which is now procurable here, in the windows. These curtains are drenched in water. The air passing through the moist grass is not only cooled, but also slightly perfumed with an Oriental odor, which is peculiarly refreshing. In lieu of the grass a piece of flannel

EVERY FARMER WHO HAS CREAM FOR SALE SHOULD VISIT OUR TENT ON THE STATE FAIR GROUNDS

WE ARE the people that are getting you the best prices you ever got for your cream. In a union there is strength and we want you to co-operate with us and you make the price on your own product instead of the other fellow. If you have not yet received our plan of working send at once for our prospectus; it tells you all about our new creamery plant, the largest and finest in the state, and how you can benefit by being a member of our company. Don't fail to come to our tent on the fair ground. The knowledge of the

milk business you get from us will be worth many times over what your trip has cost you.

FARMERS CO-OPERATIVE PRODUCE CO.
B. F. Heller, President. DES MOINES, IOWA

Most economical and durable roof covering known. Easy to put on; requires no tools but a hatchet or a hammer. With ordinary care will outlast any other kind. Thousands of satisfied customers everywhere have proven its virtues. Suitable for covering any building. Also best for ceiling and siding. Fire-proof and water-proof. Cheaper and more lasting than shingles. Will not faint rain-water. Makes your building cooler in summer and warmer in winter. Absolutely perfect, brand new, painted red two sides. \$1.50 is our price for our No. 15 grade of Flat Semi-Hardened steel roofing and siding, each sheet 24 inches wide and 24 inches long. Our price on the corrugated, like illustration; sheets 22 inches wide x 24 inches long \$1.60. At 25 cents per square additional we will furnish sheets 6 and 8 feet long. Steel pressed brick siding, per square \$2.00. Fine Steel Beaded Ceiling, per square \$2.00. Can also furnish standing seam or "crimped" Roofing. **WE PAY THE FREIGHT TO ALL POINTS EAST OF COLORADO** except Oklahoma, Texas and Indian Territory. Quotations to other points on application. **Satisfaction guaranteed or money refunded.** We will send this roofing to any one answering this advertisement C. O. D., with privilege of examination if you will send us 25 per cent of the amount of your order in cash; balance to be paid after material reaches your Station. If not found as represented, you do not have to take the shipment and we will cheerfully refund your deposit. **Ask for Catalog No. W-500.** Lowest prices on Roofing, Eve Trough, Wire, Pipe, Fencing, Plumblings Doors, Household Goods and everything needed on the Farm or in the Home. We buy our goods at sheriff's and receiver's sales. **CHICAGO HOUSE WRECKING CO., 35TH & IRON STREETS, CHICAGO**

dipped and wrung out of cold water may be hung over the window screen.

In hot weather, when stocks and gravies are kept from day to day, it is well to reheat them each day, putting them into freshly scalded jars. In spring and autumn, when the weather is mild, every other day will be sufficient. Keep them in as cool a place as possible.

To keep flies out of the larder sponge the windows daily with a weak solution of carbolic acid and water. You will not be troubled with flies if you attend to this faithfully.

PLUM RECIPES.

Preserved Plums.—Pour boiling water over the plums, then remove the skin. Make a sirup of one pound of sugar and a teacupful of water to each pound of fruit and when boiling hot pour over the plums. Let it remain over night, then drain, boil again, skim and pour over the plums. Let them remain in this another day. Then put over the fire in sirup and boil until clear. Remove with skimmer; pack carefully in jars; boil the sirup thick, pour over the plums and seal.

Plum Jelly.—Take half a gallon of half-ripe plums, put them in a porcelain kettle, cover with water and let boil ten minutes. Pour off the juice and strain through a jelly bag; add one pound of white sugar to each pint of juice and boil until it will harden when cold. This will require from twenty to thirty minutes boiling.

Plum Sauce.—Boil three quarts of half-ripe plums fifteen minutes; rub through a colander; add one pound of sugar, one teacupful of apple vinegar, half a teaspoonful each of ground cloves, mace and cinnamon; again place on the fire and boil for half an hour. Seal while hot and keep in a cool, dark place.

Spiced Plums.—Boil half a gallon of plums five minutes; pour off the water and add three pounds of sugar, one teaspoonful of ground cloves, allspice and cinnamon and

SPENCER'S LATEST HAY PRESS INVENTION

J. A. SPENCER, Dwight, Ill.

one pint of vinegar; boil half an hour, stirring constantly. Seal while hot.

Plum Pie.—Pare and halve enough red plums to fill a deep pie shell; pour a rich sirup over and let stand two hours. Cover the pie plate with rich paste; brush with white of egg; fill with the fruit; dust a heaping teaspoonful of corn starch over the sirup; make a lattice-work of paste; put a bit of butter in every open space; sift sugar over the top and bake in a hot oven. Serve cold.

IT TAKES A WOMAN.

A man may stop a foaming horse that's tearing down the street,
May stop an enemy's advance amid the battle's heat;
In fact, stop almost anything in situations trying,
But not a single man alive can stop a baby crying.

AMONG OURSELVES.

Some little time ago I read about a "Nature Book," in which the owner, a

lover of God's out-of-doors, kept notes of all kinds. She made a record of the comings and goings and doings of citizen Bird, jotted down descriptions of sky effects—the glory of sunrise, the pagantry of sunset, the play of clouds in calm and storm—and made little studies of trees and flowers. As I read I decided to tell the friends about this book so rich in possible pleasures, the coming of a fine letter from Mrs. Cornelius recalled my intention and so this week our meeting is having the benefit of two good ideas along the same line—the wisdom of making the Book of Nature a means of grace:

Something from outdoors? Why, certainly. We couldn't send much from indoors when we spend so much of our time outside with garden fruit, chickens and sometimes the hammock. My contribution shall be a few extracts from my old note books, with the memories they recall. Here is the first entry, made after reading "Birds Through an Opera Glass," and deciding that I could learn something for myself: March 27th—A large flock of birds came to our groves this morning. A thin, sweet chirping song attracted me first. The hedge was full of little brown birds, which I take by the tiny patch on the breast, the ashen under-color, and the lifted brown cap, to be tree sparrows. Dozens of downy woodpeckers—I wonder if I didn't see double?—crept up the tree trunks and skimmed about the grove, one alighting quite near me. They worked spirally about the trunks and posts. A third bird was with them, of which I had only a glimpse. It was dusky above, lighter below and showed white in flying. (Later.) They were Juncos (snow birds.) They came near the house, working among the dead leaves and flying into trees when startled, or to play. Every new description was numbered boldly on the margin and referred to by number till the name was found. May 24th—Had a good view of No. 7 this morning. A pair of them are in the blackberry bushes. I am sure there is a nest, for the little lady scolded like a wren, but her husband looked on unconcerned. What a joy that vireo's nest was to me, through all the season, till the fledglings left it, and I cut the twigs and put it in my little museum.

Next week we shall have a second set of extracts from Mrs. Cornelius' delightful book, meantime I hope some other friend will give us something which will serve to incite us to wild wood rambles in the autumn.

There are some fine topics for discussion reposing in our Among Ourselves cupboard, but I doubt if there is anything better in its way than what "Dessie" is about to suggest to us:

Having been invited by the able editor of Among Ourselves to write upon some subject of general interest I have concluded to do so. Our editor has specified that we bar religion, politics and woman suffrage, so I must cast about in my mind to find some other subject relative to farmers, their lives and their families, or in other words I must simply come right home and talk about "Ourselves" "Among Ourselves." The editor furthermore says our letters may not be our own views, but that we either must affirm or deny some certain fact, and some of the other sisters may then write and express their views. So I'll resolve my letter into a debate as follows: Resolved, that farmers as a rule are very liberal-hearted people. Your writer will now take the negative side, for nearly all the farmers I know are quite stingy. I don't know of very many around here that contribute to any church regularly; I haven't seen any of them taking a few bushels of potatoes or apples to any deserving widow, and I really cannot remember that any of the farmers hereabouts ever went to town on one of our holidays with a fat chicken, duck, or turkey as a Thanksgiving, Christmas or New Year's gift to the poor, and I wonder how many farmers wives do any charity work whatever? Have any of you ever taken a little roll of butter or a dozen fresh eggs to some unfortunate person in the adjoining town as a gift, or how many of us ever send some of our nice fruit, jellies, or vegetables to the hospitals, charity or orphan's homes? And we would miss this so little and they would appreciate it so much! No; we women folks can't take time to bother our heads over these things so I guess we're stingy, too. There may be farmers who contribute to the civilization of the heathens, or they might give a wandering beggar a small sum, but they would be more likely to tell them to work for it, and nearly every pedler, traveling preacher, book agent, or other traveler will tell you that they sometimes have to travel for miles before anyone will take them in and entertain them for the night, and I guess none of us are afraid "lest we entertain angels unawares." Then in the fall some of us stingy women folks will take the new school ma'am to board, charge her up for every meal, whether she eats it or not, charge her for every handkerchief we wash for her and begrudge her a little cob heating stove in her room,

and then ourselves and grown daughters talk about her all over the neighborhood if she gets any of the young men to take her home on Friday evening instead of walking from five to ten miles in any kind of weather. Yes; we're all liberal, the men folks especially, for at the end of the year after farming in partnership with the Lord (for while we sow, tend and reap, he sends his sunshine and rain) why they puff all up, never even thank the Lord, never even dedicate a penny to his service, but just pocket it all. If the women folks want anything extra they can sell butter and eggs or board the school ma'am, and the men take all the credit. Yes; we're very liberal, and the town folks should take example.

Is there, or is there not truth in what Dessie says? I am curious to see how the circle will take what is, in effect, a sort of arraignment. A friend Among Ourselves writes: "I consider the discussion of the large versus the small family one of the, if not the most important thing that has ever been brought up in our meetings. If I had the pen of a ready writer I should consider it not a privilege so much as a duty to add my mite. Hoping to help though I cannot write myself I send you the following which was written by a friend of mine:"

It is very easy for the president and those who sympathize with his views on "race suicide" to point to instances where the mothers of large families have preserved health and good looks. These are not rare when the mothers are required only to bear the children and can have all the help they need in caring for them, but show us the women who have borne many children and from necessity have been the nurses, cooks, seamstresses, etc., for their families as well, and their appearance will tell a different story unless they have slighted the work of making their households comfortable and have lightly passed over the duties of home maker. Often these duties are so multitudinous that no time is left for what should be the sacred privilege of every mother, viz., to see that the moral development of the child is not neglected. But, alas! the physical needs are so very evident that they must be attended to, and the hours are so short for the weary round of work, and so the days slip by while the child falls into this habit or that error which will mar its character and impair its usefulness for life, and all this because there were too many demands on the mother. Many a man and woman can look back to their childhood and see how they were deprived of the counsel which was their right and which would have made them strong to face life's temptations and fight its battles; therefore, can we wonder that to them "Honor thy father and thy mother" has not the force this divine command should convey. If parents would always first consider their responsibility for the physical, mental and moral characteristics of their offspring there would be fewer human wrecks than there are today, and if all gifted in the use of tongue or pen would urge the necessity of producing more perfect specimens of the race instead of increasing the population without regard to quality, we should have less need of almshouses, asylums and penitentiaries—outward evidences of indiscriminate reproduction which is far more to be deplored than so-called "race suicide."

If husbands and wives would read Mrs. Cornman's letter together would not the general good be served? I think it would. Reform in this direction calls for co-operation of the father and the mother.

Miss Nellie Schain wonders if anyone Among Ourselves can give her a little poem whose every other line is "Keep ago'in'." As most of us need encouragement in the line of keeping ago'in' response to this call will bless more than Miss Schain anticipated.

M. E. R. comes in response to my call of a fortnight ago, in good time for tomato canners:

Noticing your request for a recipe for canning corn and tomatoes I will send you my way of canning tomatoes. Wash ripe tomatoes, then scald them, remove the peeling, cook thoroughly. Usually there is enough juice when you put them on to cook without adding water. To can in tin, set the cans near your kettle or vessel of boiling tomatoes, fill full, set on table, heat sealing wax, drop a drop or two of lard into the hot wax to keep it from cracking. If tomatoes in your cans have settled down a little, fill up, put on the top, pour wax round in the crease. In using glass jars, set jars in plates (of course after you have rinsed out with hot water), fill full, set off, put rubbers in shallow dish, pour hot sirup out of your tomatoes over them; put lids in something and pour scalding water on them again; fill jars up full, put rubbers and tops on hot, letting them be as sticky as possible; screw them on loosely for a minute or so, then down as tight as you can. I use a wet dish rag to help out a weak arm. When the handy boy comes round at dinner or supper time, say, "Give those cans tops an extra twist." I have used this recipe for the last two years and never had any spoiled tomatoes. I think the later in season you can tomatoes the easier it is to get them to keep well. I use the same recipe in canning peaches; have now 100 quarts of early ones canned this year; canned from June 10th to July 10th. No loss as yet, July 30th.

addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.] Advance hints as to fall styles as well as glimpses of the new costumes now in the ready-to-wear stock bring us some assurance as to the probable leading features, and these never come too early for us, even though we may not be quite ready to use them.

Shirt-waist costumes in the light-weight woollens as well as silks are in the lead for early fall wear, but the two-piece costume consisting of jacket and skirt of one material will be the preference a little later when there is necessity for a consideration of warmth, and before it is time for the heavier wraps.

The costume coat or jacket will have as varied forms as in the preceding seasons, only slight modifications being noted. The blouse

[5318—Nine Gored Princess Skirt, 22 to 30 waist.]

jacket with high girdle will claim much of the favor accorded the eton during the past season, and the fitted and semi-fitted hip length jackets will be much used as part of the costume.

In skirts the pleated effects of all sorts will be in favor, and all numbers of gores in the pleated as well as the plain skirts are to be noted. Some of the late models are noted in ten, twelve and fourteen gores. Many of these have extensions cut on each gore that is overlapped to form a pleat, and these pleats are either box or side pleats.

No. 5318 pictures a nine-gored Princess skirt, having only a slight corselet effect. It is snugly fitted at the waist line, the gores are stitched to some depth, below which

[5319—Girl's Tucked Dress, 6 to 12 years.]

each gore is cut with an extension that forms an underfolded pleat. The long lines

Don't Miss This YOU NEED A WAGON SCALE

If you intend buying one, send for Osgood's book showing their big line of Pit and Pitless Scales. Most accurate, durable scale made. Fully warranted on 30 days trial.

Osgood Scale Co., 103 Central St., Binghamton, N. Y.

are graceful, and the skirt when neatly fitted and finished is one of the most charming. The pattern provides for making the in sweep as shown or for cutting in round length. For a skirt that is to see general service the latter is a wise selection, and will prevail extensively in fall and winter skirts. The pattern No. 5318 is cut in sizes for a 22, 24, 26, 28 and 30-inch waist measure.

No. 5319 pictures a pretty little dress that is to be made in low neck and short-sleeved style, and that has a gümpe provided that may be worn or omitted. The fullness of both the waist and the skirt is adjusted by means of short tucks, but gathers may be used if preferred. The square yoke and short, puff sleeves are finished with bandings of embroidery. The skirt and waist are joined in a seam. The gümpe is made entirely separate and has the long sleeves and a yoke facing. By having the two styles of sleeves with the pattern one may make these either long or short as she likes, using the pattern in any way suited to individual needs. The skirt has two deep tucks and a corresponding hem encircling it. Pattern No. 5319 is cut in sizes for girls of 6, 8, 10 and 12 years. Order in these sizes (or ages) only, and be sure to say which, when ordering.

Send eleven cents in money (not stamps) for any pattern wanted, these or others. Address all orders to Sylvia Silverthorne, Muscatine, Iowa.

THE INTERNATIONAL SUNDAY-SCHOOL LESSON

Third Quarter. Lesson VIII. Luke XVIII, 1-14. Aug 19, 1906.

The Judge, the Pharisee, and the Publican.

Two went to pray; or, rather, say
One went to brag, the other to pray;
One stands up close, and treads on high,
Where the other dares not send his eye.
One nearer to the altar trod,
The other to the altar's God.

—Anonymous.

Most pictorial of parables! On background of temple these antipodal worshippers live and move and have a being. Jesus deals in no abstractions or generalities, no vague ratiocination. He just personifies, incarnates, concretizes truth. In the Pharisee one sees the false and fruitless; in the publican the true and successful worshiper.

How true the Pharisee is to his name, which signifies "separatist!" He stands apart to avoid ceremonial pollution, and to be more conspicuous. He strikes an attitude. He is statuesque. He is in full regalia of talith and phylactery. He stands up close, and treads on high.

He gets as close to the holiest place as a layman dares to tread. With outstretched palms and upturned eyes, he begins his self-laudation before the Deity.

"I thank Thee"—that is a promising prelude. But the next syllables dash us with disappointment. He does not recognize God as the Author of his good character or happy environment. He does not say, "But for the grace of God I might be an extortioner, unjust, an adulterer, or a publican." Depreciation would have followed a sincere confession of grace. He would have cried, "I am not worthy of the least of these Thy benefits," but haughtiness and presumption are his characteristics. He will fain confess the publican's sins for him, as he has none of his own to speak of.

He passes now from the denial of gross sins to the affirmation of his active pieties. Though the Levitical law only required one annual fast, he abstained from food every Monday and Thursday. Though Moses only exacted a tenth of certain items in one's income, he tithes all his annual gains. So, through supererogation, God is his debtor. Superlative audacity! He poses there in absolute complacency before the holiness of highest heaven.

This publican, this inferior tax-collector, has found his way to the temple with a purpose. It was an uncommon thing to see one of this class on holy ground. Whatever their faults, and however numerous, hypocrisy was not one of them. They did not pose as saints. Here was an awakened sinner. He had come up the holy hill to get clean hands and a pure heart. He had faith in the promise and provisions of the first covenant of grace.

He stands on the opposite side of the court from the Pharisee, just inside the inclosure. He dares not "send his eyes" toward the sanctuary. He keeps smiting his breast with self-accusing gesture, and keeps crying in an unprescribed, but noble collect, "God be propitiated toward me, the sinner." He attempts no pallia-

tion. He confesses, "I have sinned and done evil." He is in the oblivion and self-abandon of penitence, only conscious of the Eye that is on him from above. He tries not the ever unwise expedient of comparing himself with others. He looks at himself in the perfect law of God, that mirror that has no aberration. He is emptied of self and hungering and thirsting for righteousness. The moral universe would have tottered to ruin had he not been filled. How long think you it took for his Miserere to chord into the hallelujah of salvation?

"I tell you." That is ex-cathedra—Jesus' own decision from which there is no appeal. No one knows what became of the Pharisee. Of the party who thought so much of himself it is not deemed a matter of sufficient importance even to mention his exit. But in the court of highest heaven the indictment against the publican was ordered erased from the record. Henceforth, because of his penitence and faith, and through the mercy and grace of God, he was to be accounted just and righteous. The way home and home itself was transfigured by the luminous power of an inward experience.

Now follows what a little girl aptly called "the children's gospel." Some parents, knowing that Jesus was about to leave the neighborhood, and that another opportunity might not be afforded, pressed forward with their little folks that they might receive the Teacher's blessing. They hoped that His look and word might be caught upon the sensitive plate of the child's memory. The disciples consider it an intrusion, the waste of time that might be employed in the instruction of adults.

But Jesus encouraged their coming in the immortal words which fix unequivocally the spiritual status of child-life. They, and they alone, who resemble them in spirit belong to the kingdom. The characteristic traits of the child—trustfulness, docility, teachableness, obedience, are the indispensable requisites for citizenship in the kingdom of God.

Analysis and Key.

1. A Pictorial Parable.
Two sorts of worshipers made to live before the reader.
One false, fruitless; other, true, successful.
2. Pharisee: "separatist."
Self-laudation before Deity.
Presumption and haughtiness.
Gross sins denied.
Active pieties affirmed.
3. Publican.
Comes with a purpose.
Penitent. Believing.
Depreciation; no palliation attempted.
No comparisons.

GOOD MONEY IN CLOVER SEED.

You're wasting money if you are cutting clover, timothy, buckwheat or short wheat without

THE AMERICAN BUNCHER.

This device is easily attached to any make of mower.

Pays for itself in cutting five acres of clover. Then earns money for you all the rest of your life.

Does away with the rake. Saves a bushel more clover seed per acre than any other method. Saves time. Saves labor. Write for catalog.

Dr. Coffee's Free Offer

TO ALL
STATE FAIR
VISITORS.

At all times except during State Fair week, Dr. Coffee makes a charge of from \$5.00 to \$25.00 for consultation and examination. During State Fair this charge will be abolished and

CONSULTATION AND EXAMINATION MADE FREE OF CHARGE
to enable all who are afflicted with any eye or ear disease to obtain an opinion of their case, what it is, whether a cure is possible, etc., from a specialist whose practice in these diseases extends over a period of twenty-five years.
Every afflicted person should take advantage of this offer and become familiar with Dr. Coffee's method of treating these diseases.

CALL AND GET EITHER OF ABOVE BOOKS FREE

80 PAGE BOOK ON EYE DISEASES.
Will be given free of charge to all who call at office. The book tells all about eye diseases, describes their symptoms, shows many pictures of diseased eyes, tells what diseases are curable and tells just what must be done to obtain a cure.
This book tells how to care for the eyes; how to live, diet, bathe, exercise, etc.; tells how to test the eyes, as well as many other facts about the eyes and diseases which everyone should know.

64 PAGE BOOK ON DEAFNESS.
Is free to all who call at office. This book tells how Deafness, Headnoises, Discharging Ears, Catarrh and all Ear, Nose and Throat Diseases can be cured in a very simple manner.
It describes all forms of Deafness, what causes them. Tells about Headnoises and what the various noises indicate. Tells all about Catarrh and how it can be cured permanently.
Tells how to test the Hearing, how to live, diet, bathe, etc., to keep healthy. The most complete book on these diseases ever published.

Cross Eyes Straightened in 2 Minutes without Pain or Chloroform.

Dr. Coffee's new method of straightening cross-eyes, originated by him several years ago, enables him to cure this deformity without pain or any discomfort to the patient. This method is successful in every instance, can be used on the smallest child as well as grown people, requires no chloroform before or bandages on eyes after they are straightened.

During state fair Dr. Coffee makes a special reduced rate of \$25 for straightening any case of cross-eyes successfully.
Patients who contemplate coming to office for consultation and examination should arrange to come in the forenoon.

Dr. W. O. Coffee, Century Bldg., Des Moines, Ia.

Hungers for righteousness.

Miserere transposed to hallelujah.

4. Jesus' ex-cathedra conclusion.
"I tell you." Exit of Pharisee unnoticed.
Publican goes "justified."
5. The Children's Gospel.
Spiritual status of child-life defined.

The Teacher's Lantern.

The great influx of pilgrim caravans to Jerusalem was probably the immediate suggestion of the parable. Multitudes were going up to pray—Jesus pictures for all and for all time the false and the true spirit of prayer.

Language of man can not produce a stronger antithesis. Here are two portraits in one frame. Spiritual haughtiness: Penitent humility. The one ugly in the extreme. The other wonderfully engaging.

How about our church-goers of today? Are their likenesses to be found in this parable?

The age-old contrast still maintains—the conflict goes on. It is still "Works" and "Faith." The effort to merit heaven:

to make God one's debtor: to pile up a surplus of good deeds: all this tends to pride, complacency, self-righteousness. This "deadly doing" must be laid down, all down at Jesus' feet.

A parallel Bible-reading:

1. The character of the Pharisee:
"And the Pharisees also, who were covetous, heard all these things; and they derided Him. And He said unto them, Ye are they which justify yourselves before men; but God knoweth your hearts: for that which is highly esteemed among men is abomination in the sight of God." (Luke xvi, 14, 15.)

2. Why the Pharisee was unheard:
"But your iniquities have separated between you and your God, and your sins have hid His face from you, that He will not hear." (Isa. lix, 2.)

"And when ye spread forth your hands, I will hide Mine eyes from you; yea, when ye make many prayers, I will not hear: your hands are full of blood." (Isa. i, 15.)

3. The Humbling of the Proud:
"And the mean men shall be brought down, and the mighty men shall be humbled, and the eyes of the lofty shall be humbled." (Isa. v, 15.)

4. God near to the Humble:
"For thus saith the high and lofty One that inhabiteth eternity, whose name is Holy: I dwell in the high and holy place, with him also that is of a contrite and humble spirit, to revive the spirit of the humble, and to revive the heart of the contrite ones." (Isa. lvii, 15.)

5. God near the Penitent:
"The Lord is nigh unto them that are of a broken heart; and saved such as be of a contrite heart." (Psa. xxiv, 18.)

6. The Exaltation of the Humble:
"When men are cast down, then thou shalt say, There is lifting up; and He shall save the humble person." (Job xxii, 29.)

HARVEST RATES.

The Minneapolis & St. Louis Railway will sell daily, during August, harvest tickets at special rate of \$14.50 from Des Moines to principal Minnesota and Dakota points, such as Fargo, Grand Forks, Minot, Devil's Lake, etc., with special certificate returning. We will also sell round-trip rates daily, until September 30th, good to return until October 31st, to Fergus Falls and return, \$15; Detroit, Minn., and return, \$16.30; Minnawaukan, N. D., and return, \$19.20; Devil's Lake, N. D., and return, \$19.75. Two sold through trains leave Des Moines 8:15 a. m. and 9:05 p. m., making the through connection with all northern lines. Call at city ticket office, 512 Walnut St., or address D. B. Ransburg, C. P. A., or W. K. Adams, D. P. A.

Echoes From a Kansas Farm

By Henry Hatch

There's always a kick coming from some folks. Now that crop prospects are A No. 1, they are going to find it impossible to get help to crib it all "without working all winter."

Took an eight-mile ride this morning, almost all before the sun came up. Reason—hogs to market. Hogs are good property now, so of course everyone wants to "go into hogs." Raisers of thoroughbreds will have no trouble selling all early this fall.

Saw a number of fields of English blue grass with seed crop still uncut. Most would have made five or six bushels of seed to the acre, too. With seed worth better than \$1.25 a bushel, it is easy to see where some western farmers have "leaks."

Some farmers seem constitutionally opposed to buying machinery. We know of one who has let a field of blue grass seed waste rather than buy a binder. He could get no one to cut it for him, as all machines were busy. This man has said that he believes there might have been \$200 worth of seed in the field. It would almost pay for two binders.

Mr. Smiley, of the Kansas Grain Dealers' Association, continues to give reports from time to time, on Kansas crop conditions. His reports are fairly reliable, and the people read them with interest, but when the Kansan wants the simon-pure thing, the report that can be relied upon, he waits for Coburn's report of actual results.

Speaking of the grain dealers' association, it is responsible for a wider margin between the local and Kansas City prices for grain than used to be the case. Time was when 6 or 7 cents was all the dealers asked between here and Kansas City, but now they must have 10. Three cents a bushel on corn means a good deal. It means the cost of husking.

The weather we had after harvest this year proved what is often asserted—it pays to stack grain. We know of several farmers who have waited three weeks on a thrasher, and their grain is still in the shock. Many of those who stacked as soon as the grain had cured have all their stubble ground plowed. The rains that kept back the thrashers made plowing unusually easy for this season of the year.

Wheat raising, with wheat selling for 65 cents a bushel, isn't an everlasting gold mine, yet eastern Kansas will have a greater acreage of wheat sown this fall than ever before in her history. It will mean a change for the ground, if not a profitable crop, but wheat ought to be worth more now than it is. Those who hold on may get more. When wheat sells for 65 cents and corn for 45, corn is king, with a free hand.

Farmers used to run their shoes out to get a mill located in their town, but they do not do that any more. We live almost an equal distance from five towns, and we never think of selling grain in the town where two mills are located. With its two mills, that town is only paying 63 cents for wheat now, while the other towns, two of which are without elevators, are paying 65 cents. The bulk of the farmers are not so keen to help others to help themselves as they used to be.

This western country seems to develop by neighborhoods. It is possible, right here in Kansas, to go less than twenty-five miles and come to a locality that is ten years behind the locality left. Why this is, it is hard to explain, unless it is that two or three good farmers have set the pace in the up-to-date neighborhood, and the others have followed. A neighborhood had far better work to locate the good farmer there than the mill or "factory" in a nearby town.

The cattle feeder is feeling dubious. With beef prices so uncertain and corn over 40 cents a bushel, it looks like a losing proposition to convert much corn into beef. At any rate, feeding operations are going to be cut down to the minimum, which may have a tendency, in time, to make better prices. Usually, with any kind of stock or grain, when everyone "goes in big" prices drop, and

WESTERN NORMAL COLLEGE.

SHENANDOAH, IOWA.

STUDENT'S R. R. FARE PAID
SEND FOR SCHEDULE

COMPRISES FOLLOWING DEPARTMENTS AND COURSES:

SCHOOL YEAR 40 WEEKS
STUDENTS ENTER ANY TIME

Normal Comprising Teacher's, Iowa State, Didactic, State Certificate, County Certificate and all courses for Training of Teachers. Accredited by State of Iowa.

when the majority "quit," there is soon a demand and better prices.

Five years ago an implement dealer predicted that "within five years corn

will be handled the same as small grain; cut, bound, then shredded." His prediction has not come true, mainly because all the fodder cannot be profitably used. Where a person does not want the fod-

THE FARMER'S 'PHONE

By J. SORFLATEN

Copyrighted 1906, by W. E. Ashby, Telephone Cut Out Co.

Up to date? Well I should say!

Up to date in every way,

Are the farmers of today

Isolated and alone,

Like the bull pup with his bone?

No sir; he has got the 'phone.

If some help he wants to hire;

Case of sickness, case of fire,

Messages flash o'er the wire.

Markets also are in reach,

Extras? Well that 'phone's a peach!

Long experience will teach.

Produce, will you trade or sell?

Just step up and ring the bell:

Business men the terms can tell.

And the ladies, I should smile!

Like to use it, all the while.

'Phones are certainly in style.

If you're suffering from the blues,

Just ring up and hear the news.

Call by wire, and save your shoes.

If some friends you wish to see,

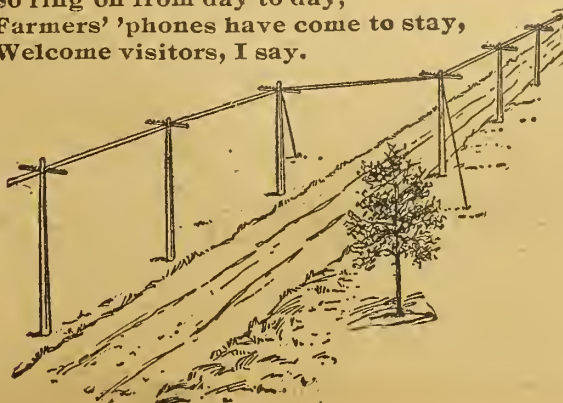

Find out if they home would be.

April fooling! Not for me.

So ring on from day to day;

Farmers' 'phones have come to stay,

Welcome visitors, I say.

AT THE IOWA FAIR POWER HALL
Get our "NO RISK" LIGHTNING ARRESTER
TO TRY FREE.

Come around to our booth, show us your name and address on a card or envelope, and put one of these No-Risk Arresters in your pocket and take it home. Try it on your telephone through a severe electrical storm. If it proves good—if you are satisfied it is the protection you need, a possible preventer of death and fire from lightning—send us \$2.00 and keep it. If not, return it at our expense. That costs you nothing. It must sell itself to you—we won't bother trying to talk you into buying it; so come around, take one home and try it.

We have good things to offer agents. Anyone can sell it. It's practical and a real necessity on all phones. Made by W. E. ASHBY TELEPHONE CUT OUT CO., 101 Square St., Chariton, Iowa. If you can't come to the Fair, write us.

der, the cheapest way to get the grain is to husk it. Handling all the fodder just to get the grain is too expensive. When a person wants the fodder, though, the cheapest way is to harvest with a corn binder, then to rash or shred the fodder from the field. When we say the cheapest, we mean if you are as short of help as the average farmer is.

Iowa Climate and Crop Bulletin.

The following climate and crop bulletin is issued by the United States Department of Agriculture, Iowa Section, from the central station at Des Moines, Iowa, for the week ending Aug. 13, 1906:

The average temperature for the past week was slightly above the normal in eastern half of the state, and slightly below in the western districts. The rainfall was unequally distributed, as usual at this time of the year, but all parts of the state received some benefit from the showery weather that prevailed the first half of the week. The heaviest showers were reported from stations in the Northwest, North Central, and East Central districts. In the Northwest district the heavy rains retarded the wheat harvest, and continued wet and cloudy weather caused grain in shocks to sprout. In limited areas considerable damage to spring wheat and oats resulted from the unfavorable local conditions. For the state at large, the copious rains for the week have been of inestimable value. The corn crop has been relieved at its most critical stage; pastures show marked improvement, and late potatoes give promise of an ample yield. In portions of the southern section more rain is desired within a few days, but in the central and northern sections there is an ample supply of moisture to bring all crops to maturity.

LOW RATE EXCURSIONS.

The Missouri Pacific Railway and the Iron Mountain Route will sell round-trip tickets to points in Texas and Louisiana for \$20 from St. Louis and \$25 from Chicago on the first and third Tuesdays of each month. Proportional low rates will apply from other points; also one fare plus \$2 to points in Indian Territory, Arkansas and Missouri, and \$5 from Chicago to Pueblo, Colorado Springs and Denver, with limit of twenty-one days except to points in Louisiana, Arkansas, Texas and Indian Territory, which are limited to thirty days, stopovers going and returning.

Mexico: Less than one fare on the first and third Tuesdays, with stopovers.

California: Low round-trip rates on sale daily to September 1st.

Hot Springs, Ark.: Commencing June 1st to September 30th, one fare plus \$2, good thirty days, on sale daily.

Remember the Missouri Pacific Railway and Iron Mountain Route reach the principal points in the above-named states without change of cars.

For descriptive literature and other information address, Ellis Farnsworth, D. P. A., 186 Clark St., Chicago, Ill.

MISSOURI LAND

IT'S BETTER at present prices than a gold mine. Come and we will take pleasure in showing you. 509 acres well improved, all kinds of fruit and the best of water, and the low price of \$40 per acre buys it. 220 acres three-fourths of mile to Kirksville. As good prairie land as you will find in Missouri. Fair improvements. This is an ideal lying farm and \$65 per acre buys it. 80 acres, 2 miles from Kirksville, nice improvement. A lovely small home at the slaughter price of \$60 per acre. 82 acres, one-fourth mile to Kirksville, good improvements and as near an ideal home in every respect as can be found, and we are only asking \$90 per acre for it. 132 acres one-half mile to Kirksville, good improvements, all kinds of fruit, no better land in the state, every foot can be farmed with any kind of machinery. This looks good to anybody, but it is better than it looks and we are putting the low price of \$80 on this ideal home. 180 acres, 90 rods to Kirksville, good building, good fence, all kinds of fruit, the best of water and worlds of it, cistern in house, in fact, everything is right. No better or finer lying land in the state. \$70 per acre will buy this home.

ISAAC A. NOVINGER & SONS, KIRKSVILLE, ADAIR COUNTY, MO.

P. S. WE are not real estate dealers, we own the land herein described and furthermore our home is not for sale. We simply have more than we can handle.

WE BUILD YOU A HOUSE FREE OF CHARGE

and sell you fertile land at a low price and on easy terms, within 25 miles of St. Paul and Minneapolis. This is the greatest proposition ever made to readers of this paper. You have your choice of 40 acres or more out of two million acres of the splendid lands of Northwestern Wisconsin. The price is only \$7.50 to \$12. an acre, and to give you a good start we will build your house on the land. The finest climate in the world, pure soft water, ample rainfall, fuel for years on your own land, near to the finest markets. This with a FREE HOUSE and land that will grow the FINEST KIND OF CROPS. What more can you ask? Write TO-DAY for MAPS and FULL INFORMATION.

COLORADO, ROUTT COUNTY, IRRIGATED RANCHES. B. L. Bart, Camera, Col

OUR SHEEP DEPARTMENT

THIS department is edited by a gentleman who has long made the management of sheep a special study. He will be pleased to answer, in this department, all questions of general interest relating to the care of the flock and other kindred topics. Address inquiries, communications, etc., in relation to sheep to this office.

LAMBS IN HOT WEATHER.

One has said that when a lamb gets his stomach full of milk soon after he is born his chances for making a sheep are very good. The lamb has plenty of trouble and many drawbacks in growing to be a sheep. His path is not strewn with roses. There are dangers on every hand for him. Occasionally a lamb will get shut away from his dam for some period of time and will become very hungry. In the meantime the udder of the dam will have become well-filled, and when the lamb gets to his belated meal he will over-eat, which in some cases causes death. This is not a common trouble, but it occasionally occurs. It is not helped any by hot weather.

Contagious sore eyes seems to be one of the troubles that is augmented by hot weather. Most shepherds have come to the conclusion that it is contagious and it is dealt with accordingly. The contagious sore eyes are caused by a germ—no germ, no sore eyes. When lambs are so afflicted, their growth is checked and thrift cannot come. We have been troubled but very little with this disorder, but we have been successful in treating it. A small amount of coal tar dip diluted with water will make a very good eye wash, curing by killing the germ which causes the trouble. It will be a good plan to see that the head and cheeks of the lamb are well saturated with the dip so as to destroy all germs that may be lurking there.

Lambs are quite often afflicted with sore mouths, and sometimes they become so troublesome as to cause the death of the lambs. The remedy for sore mouth is found good as in the case of sore eyes. In addition to the above disorders there are all sorts of parasites which have to be treated in a vigorous manner.

WESTERN SHEEP SITUATION.

Already there is getting to be a great deal of inquiry about feeders. The present indication is that they will not be very cheap unless some unforeseen factor arises to change the present appearance. In some of the western localities where a great many sheep have been fed in the past there has been a short crop of grain and hay and it is possible that the number placed in feeding yards will not be up to that of former years. To the extent that such localities lack, to that extent there will be sheep to fill the demand in some other locality.

Owners of good wethers cannot exactly name their prices, but they can come as near it as is good for the general trade. Prospective feeder buyers are showing a commendable disposition to use a little more discrimination than in some former years. In the Chicago market it was easier to sell good, open wool seventy-pound yearling wethers and ewes, mixed, at \$5.50 than it was to get \$4.50 for heavy-hided ninety-pound wethers.

No one knows just how many sheep are available, how many purchasers there are, or what the prices will be. For making the most satisfactory gains sheep for feeding ought to be on the farms where they are fed by September 1st.

Milk Oil Dip

GEORGE ALLEN, LEXINGTON, NEB.

FOR seventeen years I have been offering to those visiting Des Moines during the State Fair an opportunity to investigate my TREATMENT for CATARRH free of charge. This year special preparations have been made to give my personal attention to all sufferers who call. No charge will be made for this consultation and examination. If you did not call last year you should take advantage of this opportunity.

To those who will be unable to call I will gladly send free of charge my Complete Symptom Blanks and I will make a careful diagnosis of your case and tell you just what I can do for you. Read what those who have used my treatment say:

LEROY, Ia., May 11, 1906.

Doctor:—I can say I am much better every way. My eyes and nose and head feel all right and I have quite a lot of the medicine yet to use. I have missed only one day of using it as directed. I don't think I need any more medicine now, but I will use all you sent me before I quit.

I will praise your medicine to all who are ailing with CATARRH. Many thanks for my improvement.
Your friend,

J. W. HOOD.

LOST NATION, Ia., April 12, 1906.

Dear Sir:—I suppose you wondered why I did not answer your letters, but I thought I did not need the treatment any longer. I am letting my system rest from the treatment a while and if any of the symptoms arise again I will be sure to order more treatment. Your treatment has done a great deal for me and I will not hesitate at any time to recommend it to the afflicted.

Thanking you for your liberal offer, I remain,
Yours very truly,

HORACE B. HANSEN.

KNOXVILLE, Ia., July 2, 1906.

T. F. Williams, M. D.,
Des Moines, Iowa.

Dear Sir:—Yours of the 27th at hand. I am now feeling better than I have for some time. Before I began taking your treatment I could scarcely breathe through my nose, now I can breathe as freely as ever. My nose bled almost every day, but is entirely cured. I have a much better color than when I began taking the treatment. I shall not need any more medicine.

Allow me to say your treatment is certainly all that is claimed for it. It has done me a world of good.

Thanking you for the personal interest taken in my case, and wishing you the best of success in the future, I beg to remain,
Yours very truly, CLYDE C. DARNELL.

DES MOINES, Ia., June 27, 1906.

Dr. T. F. Williams,
Des Moines, Iowa.

I have been troubled with CATARRH for many years; have consulted different physicians and taken many different treatments. A few of them relieved me temporarily, but did not receive any lasting benefit from any of them until in January, this year. I was persuaded to take treatments from Dr. T. F. Williams.

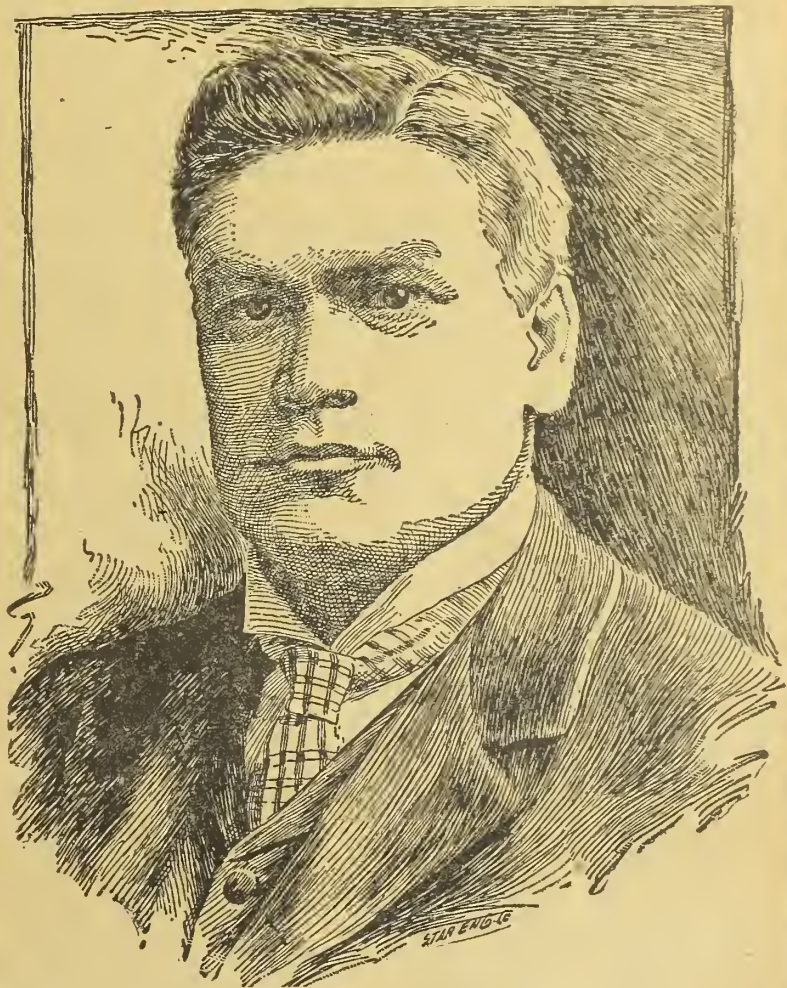

I had only taken his treatment for about sixty days until I felt that there was no necessity of continuing the treatment any longer. I was relieved from CATARRH almost from the beginning of the treatment.

I voluntarily make the above statement, trusting that some other sufferer will be led to taking treatment from the Doctor which has certainly done me a world of good.

Very truly yours,

MRS. W. M. HAGERMAN,

825 W. 17th St., Des Moines, Iowa.

T. F. WILLIAMS, M. D.,

Offices and Consultation Rooms, 211-218 Crocker Building, Corner Fifth and Locust Streets, Des Moines, Iowa.

The present appearance is that yearlings are going to be offered quicker than lambs, owners preferring to graze the latter another year. There is no objection to buying the yearlings, as they will withstand more grief than lambs, but will not be so well suited to feeding a long time.

SUMMER VACATION IN COLORADO.
LOW RATES VIA ROCK ISLAND LINES.
Colorado, as a place for recreation, is the choice of many thousands of summer tourists.

Colorado is a land of clear, pure air and golden sunshine. It is a land of sparkling mountain streams and glassy-surfaced lakes. There are more enjoyable things to do, more grand sights to see in Colorado than any other place under the sun.

From June 1 to September 30 Rock Island Lines will sell summer tourist tickets at rate of \$21.75 from Des Moines, Iowa, to Denver, Colorado Springs or Pueblo and return. Return limit October 31. July 10 to 15, inclusive, the special round-trip rate of \$19.25 from Des Moines, Iowa, is effective.

This latter rate is authorized on account of the Elks' Annual Meeting at Denver July 16 to 21. Tickets limited to return to August 20.

Very low rates will also be in effect to Glenwood Springs, Colo., Salt Lake City and

Ogden, Utah, Yellowstone National Park and to the Pacific Coast, with cheap rates for side trips to nearby points of interest en route.

New and improved train service via the Rock Island is an important feature for the Colorado traveler to consider.

Full details of rates, routes, service and any information desired will be gladly furnished by the Rock Island Ticket Agent at 423 Walnut St., Des Moines, Iowa. Geo. R. Kline, C. P. A.

LOW RATE EXCURSIONS.

The Missouri Pacific Railway and Iron Mountain Route will sell round trip tickets to points in Texas and Louisiana for \$20.00 from St. Louis and \$25.00 from Chicago on the first and third Tuesday of each month. Proportional low rate will apply from other points; also one fare plus \$2.00 to points in Indian Territory, Arkansas and Missouri, and \$25.00 from Chicago to Pueblo, Colorado Springs and Denver with limit of Twenty-one days except to points in Louisiana, Arkansas, Texas and Indian Territory which are limited to thirty days, stop-overs going and returning.

Mexico: Less than one fare for the first and third Tuesday. On certain dates, one fare, long limit, stop-overs going and returning.

California: One fare for the round trip on sale certain dates.

Hot Springs, Ark.: Commencing June 1st

to September 30th, one fare plus \$2.00, good thirty days, on sale daily.

Remember the Missouri Pacific Ry. and Iron Mountain Route reaches the principal points in the above named states without change of cars.

For descriptive literature and other information, address Ellis Farnsworth, D. P. A., 186 Clark St., Chicago, Ill.

EACH TUESDAY THIS YEAR

THE CHICAGO GREAT WESTERN RAILWAY will sell homeseekers tickets to points in Alberta, Manitoba, Minnesota, North Dakota, Saskatchewan, western Ontario and Wisconsin at rate of one fare plus two dollars for the round trip. Remember, THE CHICAGO GREAT WESTERN RAILWAY is the only line from this section which runs three solid trains daily to the Twin Cities. Also remember that on the return trip you can take any one of our four trains, making it certain that you will not have to wait but a short time for connection at St. Paul and Minneapolis. Shortest time, best equipment, best service and connections. Call on or write to E. J. Sawyer, C. T. A., 614 Walnut St., Des Moines, Iowa.

NEW YORK AND RETURN \$18.00

Plus \$2.00 via Erie R. R. from Chicago. August 28th and 29th, good to return until September 4th, inclusive, good to stop over at Saegertown, Cambridge Springs, Pa., Chautauqua Lake, N. Y., and Niagara Falls. Apply to your local ticket agent or write J. A. Dclan, T. P. A., Erie R. R., Chicago, Ill.

FIELD NOTES.

Mr. John Lefebure, of Fairfax, Iowa, advertises a choice lot of Chester White boars and gilts of March farrow for sale on page 23 of this issue of The Homestead.

On page 16 of this issue of The Homestead there is advertised what is claimed to be one of the best 240-acre farms in the county. The address of the advertiser is Box 664, Winterset, Iowa.

A well improved Iowa Stock Farm is offered for sale by Mr. Frank Bissell, of Dexter, Iowa. It is a grand good bargain and \$60 will get it. Who is the buyer? He will have to hustle, as it is a splendid bargain.

The advertisement of the Gilbertson Nursery Company, of St. Ansgar, Iowa, offering ginseng roots and seeds for sale, appears on page 11 of this issue. They are sending out literature which will be of interest to those of our readers who contemplate the raising of ginseng.

We take pleasure in calling the attention of those wanting farm lands to the G. W. Johnson Land Company advertisement on page 16. We can recommend Mr. Johnson as being an honest and upright man, and will say to the public that conditions will be found as he represents them.

We would call attention to the advertisement on page 16 of Paradise Valley Land Company, Endicott Bldg., St. Paul, who are leading dealers in the wheat lands of western Canada. We prefer our people to remain in the States, but if you think of investing in Canada, you cannot do better than consult this company, who have 200,000 acres in the very best district of northern Alberta, Canada.

The Allen Land & Loan Co., of Laurens, Iowa, make the announcement on page 16 of this issue of The Homestead that they want fifty renters; men who have the health, horses, and machinery to run whatever sized farm they undertake. Any reader of this paper who desires to rent a good Iowa farm should send his references with the first letter, or go and visit the above firm, as they wish to rent early that the tenant may get the fall plowing done in season.

A few letters from sheep breeders who have fed Wormine manufactured by the Iowa Stock Food Company, of Jefferson, Iowa: Gentlemen:—Replying to your favor of recent date will say that I am well pleased with the results I have obtained in feeding Iowa Wormine to my sheep. I kept it mixed with salt where my sheep could get it as they wanted it. It kept my sheep free from stomach and intestinal worms. My sheep are in fine condition. I can heartily recommend Iowa Wormine to sheep men. Truly yours, H. W. Miller." Mr. G. A. Parker, superintendent of Keney Park, Hartford, Conn., writes as follows, under date of June 1, 1905: "In reply to your inquiries of May 5th regarding the results obtained by the feeding of Iowa Wormine to the sheep last year, will say that we consider it a decided benefit, so much so that we

are using no other, and have, as you know, ordered a considerable quantity for this year." Mr. Geo. Groff, of Wellman, Iowa, writes as follows under date of May 8, 1905: "The Iowa Worm Powder I ordered of you last October for sheep was a success and also the Iowa Wormine. My sheep are in good health and good condition. I had less dead lambs and less born dead this year than any other year. I have been in the sheep business seven years. I advise all sheep men to feed Iowa Wormine to their sheep. I shall not be without it."

Mr. C. J. Martin, of Churdan, Iowa, makes the announcement that he will sell at his farm at Adaza, Iowa, on May 19, 1907, a draft of fifty Aberdeen Angus cattle, almost entirely all of which are of his own breeding. His herd is now in pasture and doing fine. He says that he is not making any preparations to attend the shows this year, as both he and his cattle are taking a rest. Crops in Mr. Martin's locality, he reports, never looked better than they do at the present time.

The illustration of Dude's Wonder appears in this issue of The Homestead. This grand yearling is owned by Mr. John Schmal, of Sutton, Neb. Mr. Schmal will show this grand yearling at the Nebraska State Fair and will certainly be in line to make a good showing for his herd. Dude's Wonder is one of the best sons of Nemo L's Dude and is very much the type of the old animal himself. The herd of hogs owned by Mr. Schmal represents the blood of Nemo L's Dude, Chief Tecumseh 3d, and Mogul. Look up this hog at the Nebraska State Fair.

On page 23 of this issue, over the address of lock box 447, Collins, Iowa, there is offered for sale a bay trotting-bred stallion, age two years. The advertiser writes us that while this animal is not recorded he is said to show more breeding than the average recorded horse. It is not often that one of this kind of horses appears for sale and it will pay any of our readers who are looking for an animal of this kind to investigate this offer. The advertiser have no use for the horse and will sell him at a price that will make it an inducement for someone to buy.

The First National Bank, of LeRoy, Minn., is offering for rent a 760-acre farm, situated in southeastern Minnesota, within one mile of the Iowa line. There are between fifty and 100 head of cows on the farm at the present time. It is all fenced, partly tiled, has good shelter, and all necessary improvements, and is considered to be a perfect stock and grain farm. It will carry at least 200 head of cattle and 100 head of hogs. The bank will make good inducements to the right party. If there is any reader of this paper who wants to rent a good farm, this is a fine opportunity. See the advertisement on page 16.

Messrs. W. A. Lang & Co., importers and dealers in Percheron, Belgian, Clydesdale, Shire, French Coach and German Coach stallions, in remitting for advertising already done, write: "Horses are all doing well and sales are still going on. We have recently sold one of our new importations of Belgian stallions to a company of German farmers near Colesburg, Iowa, which is about ten miles from our stables. We have also sold a Belgian to a company at Ricketts, Iowa, one at Shawnee, Okla., one at McCloud, Okla., and one at Wanette, Okla. Our stables are full of good ones and we will import again this fall. We have built another new barn and expect to be compelled to build another this fall."

It is only about a week now until fair time, and a great many of our readers are planning their trip to the fair, making their arrangements and getting ready to have a grand, good time such as always can be had by attending the Iowa State Fair. There are a great many interesting and instructive things to be seen at the fair and among them is the exhibit of Messrs. Dodd & Struthers, the lightning rod men, of Des Moines, Iowa. We call the readers' attention to this exhibit especially because almost every day reports come to us telling of buildings being struck and damaged by lightning. The losses from this source are very great and after having watched the business of Messrs. Dodd & Struthers for a number of years we wish to say that none of this damage is caused where their rods are used. We feel sure that we can do our subscribers and friends a great deal of good if we can only get sufficient interest aroused so that they will post themselves on this matter and learn how their buildings may be properly rodded according to the methods and system of this firm. We feel safe in saying that no institution in Des Moines stands better in business and in financial circles, and assure you that any dealings you may have with them will be entirely satisfactory to yourself. A visit to Messrs. Dodd & Struthers' factory would also be a profitable trip and can be taken without additional cost, as their factory is located at 720 Sixth avenue, just four blocks north of the Union depot, and can be reached by a Sixth avenue or a West Ninth street car, but it is only a five-minutes walk from the Union depot. You can do yourself good by seeing Messrs. Dodd & Struthers' exhibit on the fair grounds and going to their factory can learn how their rods are

PILES

FISTULA--NO MONEY TILL CURED

MR. C. P. KINNEY, GLENWOOD, IOWA, WRITES:

"It is with the greatest satisfaction to myself and family that I can write you today that I am a well man and have been since taking your treatment for Fistula in April, 1902."

made and see the work done. See advertisement on page 12.

Ohio Chief boars are being offered for sale by F. A. Strong, of Orient, Iowa.

W. N. Booth, of Danbury, Iowa, offers some great bargains in Poland China boars.

Mr. Grant White, of Afton, Iowa, offers a grand lot of Proud Advance pigs for sale.

Some good Shropshire rams are offered for sale by Mr. Geo. Allen, of Lexington, Neb.

Four good young Short-horn bulls are offered for sale by Mr. W. E. Cutler, of Corydon, Iowa.

Now is the time to buy that large Yorkshire and Mr. F. Rabeller, of Leigh, Neb., has some good ones.

Mr. Carl Hansen, of Herman, Neb., is now booking orders for Durocs, either sex, for September delivery.

Anyone wanting a good Duroc Jersey boar can get one at a reasonable price of Mr. W. A. Peterson, of Lyons, Neb.

Read the Duroc Jersey advertisement of Harman Gruver, of Brewster, Minn., if you want to buy a good sow. He also has a fine bunch of boars on hand.

Mr. G. E. Hamilton, of Des Moines, Iowa, has a 160-acre farm for sale. His advertisement, giving further information appears on page 16 of this issue.

A few very choice Duroc Jersey boars are offered for sale by Mr. J. A. Wehr, of Portsmouth, Iowa. These are sired by one of the best sons of Proud Advance.

The E. J. Ingwersen Manufacturing Company, of Lyons, Iowa, are placing a new style of wire gate on the market. Their advertisement appears on page 6. Write them for full information.

Messrs. Reubel Bros., of Rockwell City, Iowa, are offering three young Short-horn bulls for sale sired by Victor of Hilton 3d. They are making a special price on these if taken right away.

Mr. Wm. Cash, of South Amana, Iowa, has requested The Homestead to name November 13th as the date on which he and others will hold a public sale of Aberdeen Angus cattle at the new pavilion at Holbrook, Iowa.

Read the Poland China advertisement of Messrs. Wm. Ray & Son, of Defiance, Iowa, if you are after the tops. They have a nice litter by the great boar, Impudence, and other good boars. Write them if you want a boar.

Mr. August Post, of Moulton, Iowa, is advertising binding twine for corn harvesters on page 4 of this issue. Mr. Post is a responsible dealer and The Homestead would recommend him to those of its readers who wish binder twine.

Mr. T. A. Davenport, of Belmond, Iowa, is offering Shropshire rams for sale from his Pike Timber Creek flock. He has a good lot of yearlings got by the imported ram, Lord Byron, some of which are out of imported ewes. See announcement on page 23.

Mr. A. W. H. Orr, of Lorimer, Iowa, claims September 20th for his fall Duroc sale. Mr. Orr will put up a nice lot of pigs and we trust Duroc admirers will be on hand to attend this sale. At a future date announcements of the sale stuff will be given.

Forty good Poland China boars from the Pike Timber Creek herd, the property of Mr. T. A. Davenport, of Belmond, Iowa, are offered for sale in his advertisement on page 23 of this issue. These boars are sired by Mr. Davenport's herd boar, Superior Sunshine 92455.

One of the best known and most reliable Duroc Jersey breeders in Minnesota is Mr. Wm. Malcolm, of Bigelow. He has a splendid lot of those good Malcolm's Model sows in his brood and they have farrowed some excellent pigs this year. He has some good ones ready for the trade.

Messrs. T. W. Stoner & Son, breeders of Duroc Jersey swine, of Heary, Ill., advise us that they have decided to cancel the date that they claimed, October 10th, to hold a fall sale. All their best males therefore will be sold at private treaty. They report the sale of several head the past week.

The new advertisement of the J. W. Pedigo Lightning Arrestor appears on page 4 of this issue. This little instrument is a preventive of danger by lightning during thunder storms. It is simple and easy to install. Write Mr. J. W. Pedigo, of Lucas, Iowa, for circulars, which will be sent free. He also wants agents.

Mrs. Laura Mather, of Clarksville, Iowa, in ordering the insertion of her advertisement on page 23 of this issue, writes: "I have raised about 600 Rose Comb Brown Leghorns this season and am now offering them at very reasonable prices, as I have too many. They are fine layers and are sure to please. First come will be first served."

Mr. E. W. Richardson, of Ogden, Iowa, has a nice crop of spring pigs. While his herd is not the largest in Iowa, yet in quality they are equal to any. Mr. Richardson raises both Durocs and Chester Whites. His crop this season will average well. At a later date the card will appear in these columns and it will set forth just what he has for sale. Mr. Richardson takes pride in describing his pigs accurately, and he does this so well that buyers when get-

ting his description depend upon it absolutely. Watch for his advertisement.

Two young Orion boars are offered for sale by A. B. Easton & Sons, of Fremont, Neb.

A section of wheat land is offered for sale at a very low price per acre by Mr. H. C. Croco, of Colby, Kan., on page 16 of this issue.

Two hundred choice Duroc Jersey pigs are offered for sale by W. J. Wendt, of Marcus, Iowa. You can certainly get a herd breeder out of this bunch.

Scotch Collies are announced to be sold at bargain prices for the next ten days by Mr. S. W. Harr, of Riverside, Iowa, in his advertisement on page 23.

Arch Brown & Sons, of Waterloo, Neb., have the best bunch of Duroc Jersey pigs they have ever raised, and they wish to hear from all those wanting boars.

Dr. H. Pritchard, of Wisner, Neb., is offering some excellent Poland China boars, sired by Wisner Chief and Big Tom 2d, his 1,000-pound boar. Size, bone and quality is the doctor's motto.

Readers of The Homestead who lose chickens from rats should read the advertisement of Mr. S. W. Harr, of Riverside, Iowa, on page 23. He is advertising Scottish Terrier puppies from recorded parents for sale.

Messrs. C. W. Daws & Son, of Harlan, Ia., offer some cracking good young Short-horn bulls for sale, among which are two sons of the champion, Nonpareil King. One of these is a show proposition for somebody.

A bargain in a quick sale of 141½ acres of Wayne county, Iowa, land is offered for sale by the Fidelity Real Estate & Trust Co., of Omaha, Neb., in their advertisement on page 16. For particulars read the advertisement and write the company.

Unimproved, smooth table land of the best quality, located within five miles of a railroad town is offered for sale by Messrs. Buchanan & Peterson, immigration agents for the Union Pacific Railway at North Platte, Neb. They also have improved farms in the same locality, an improved stock ranch, and a wild grazing ranch, prices per acre for which are named in their advertisement which appears on page 16. If interested, write the above firm for full particulars.

Mrs. L. M. Estes, of Audubon, Iowa, in sending change for her advertisement found on page 23 of this issue, writes: "I have 400 White Wyandotte chicks that are coming on nicely and I wish to sell my 1906 brood to make room for them. My hens score 95 and 96, are yearlings and I will sell them at \$1.50, \$2 and \$3 each. I have twenty-nine chicks hatched from eggs direct from Mr. J. C. Fisher's best pens and expect to head my yards next year from these."

On October 2d, Mr. C. F. Hood, of Battle Creek, Iowa, will hold a public sale of Short-horn cattle, at which time he will sell thirty cows and heifers and ten young bulls. Mr. Hood is one of the oldest Short-horn and Poland China breeders in northwestern Iowa and he intends putting up some very useful cattle in this sale. His present crop of calves on the farm are sired by Sunshine 205781, a straight Scotch bull, and a grandson of the well-known bull, Gaveston. He has about 100 spring pigs, mostly sired by Pilatus I know and he will have some good things to offer the trade this fall.

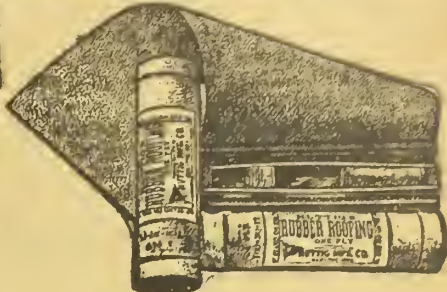

Mr. S. G. Collicott, of Lake City, Iowa, one of the enthusiastic young Duroc Jersey breeders of that section of the state, writes under date of August 6th: "I have recently purchased a fall yearling boar of Mr. U. G. Davidson, of Manson, Iowa, which I intend to use this fall. He is a son of the sweepstakes boar, Crimson Wonder I Am, and is out of Fashion Lady, one of his very best brood sows. I think he will make the boys go some another year. My pigs are doing fine and I expect to have as nice a bunch of sows for my spring sale as will be put up for sale. All my sows that I intend to sell in my sale will be bred to my new boar."

If any of our readers want a good Duroc Jersey boar they had better write Mr. T. A. McMahon, of Craig, Neb., who starts an advertisement in this week's issue of The Homestead. He is one of the best young breeders in the state and we say this advisedly and he has some good things to offer the public who are out for a good Duroc Jersey pig. He has one litter of five males sired by Trone's Oom Paul that are going to make something very good, and another litter by Duroc Standard, a grandson of the noted sweepstakes boar, King Perfection, are big, rangy fellows and will make large, big-boned hogs. He has several litters by Agitator, one of the best sons of Proud Advance, and these are out of his best brood sows, and there are some exceptionally good pigs among the number. We would like to say this for Mr. McMahon, that if any of our readers care to send him an order they can depend on getting just the kind of a pig that he describes, and he knows a good pig, too, so you do not need to hesitate in sending him an order. Kindly write him and mention The Homestead. See page 23.

PERSONAL CONSULTATION FREE.

During the state fair Dr. Williams is offering to all who are afflicted with catarrh and its allied diseases, consultation and examination free. Not only this, but he is offering one month's treatment free to convince the patient that his methods are effective. Special railroad rates will be made to Des Moines during the state fair. This will give you an opportunity to personally investigate the doctor's methods of treating catarrh in all its various forms. Special arrangements will be made to receive

ROOFING THAT WILL LAST.

What the farmer wants for roofing is something that will keep out the water and wind and can be put on easily by himself. After making a series of tests covering a period of several years we have prepared Huttig's Ready Roofing, which we know to be the best quality of roofing ever offered for sale. Our reasons for this are that our roofing is made from the best quality of felt thoroughly saturated with Trinidad asphalt. The treating of this felt with asphalt is what makes the Superior brand of our roofing. Another thing in its favor is that it can be used for the sides of the building as well as the roof, as it keeps out the cold of winter and the heat of summer. When you use Huttig's Rubber Roofing you do not have to repair it every year as is the case with many roofings. There is no wear out to the Huttig brand; it will last for years. Those who have used it find that it is much cheaper than shingles in every way and so easily put on that anyone who can drive a nail can lay his own roof. We have sold great quantities of our roofing to farmers and stock breeders and in many instances they have come back for a second order. We want every reader of this paper to know what Huttig's Rubber Roofing is like and you can find this out by inquiring of your dealer. If he does not carry our roofing just drop us a line and we will send you sample and at the same time tell you all about its different uses. Write to.

Huttig Manufacturing Co., Muscatine, Iowa.

visitors, and he will give his personal attention to all sufferers who call. See page 17.

GREATEST MEDICINE ON EARTH.

Mr. John A. Adams, of Elvaton, Md., writes to the Dr. B. J. Kendall Company, of Enosburg Falls, Vt., and says: "Please find enclosed a two-cent stamp for your 'Treatise on The Horse And His Diseases.' I have used your Kendall's Spavin Cure for two years and have found it the greatest medicine on earth for what it is intended." See advertisement on page 8.

SECKMAN'S DISPERSION SALE.

Duroc Jersey breeders intending to add new blood to their herds or who are in need of an extra good herd boar should remember the forthcoming dispersion sale of Mr. Geo. W. Seckman, of Ripley, Ill., whose advertisement appears on page 23 of this issue. Write to him for full particulars of the offering he is going to make, and apply early for catalog, kindly mentioning this paper.

HORNING DISPERSION SALE.

Mr. Geo. Horning, of Liberty, Neb., has purchased property in Lincoln, Neb., and has decided to close out his herd and move to that city. This herd is one of the strongest of the Duroc breed. He has several very strong families in the herd and the sale on September 11th will give the breeder an opportunity to get some of the good sows that have done good work for him. Watch for his announcement.

WHEATLEY AND WARD HAVE GOOD ANGUS BULLS FOR SALE.

The Wheatley & Ward herd of Aberdeen Angus cattle was founded some years ago with the object of producing the beefy type of Angus. The better families were drawn on for breeding matrons. For herd bulls this firm went out and bought the best they could buy and have mated them with their cows, using their best judgment as to how the various crosses would turn out. Few missteps in this respect have been made and as a result they have a class of bulls to offer that are the true Angus type and are thick, meaty fellows. Some herd heading material can be found in Messrs. Wheatley & Ward's herd and we take pleasure in recommending this firm and their cattle. See page 26 for their advertisement and if wanting an Angus bull write them and kindly mention this paper when doing so.

COTTINGHAM'S FORTHCOMING SALE.

Mr. Ira Cottingham, of Eden, Ill., well known to our readers as a breeder of Short-horn cattle and Poland China hogs, has selected October 9th as the date for his annual sale. Mr. Cottingham is putting into this sale twenty-five Short-horns and forty-five Poland Chinas. Several of the cows and heifers are bred to Proud Star II, by Imp. Star of the North. Mr. Cottingham's present herd bull, while others are bred to Champion Archer, his former herd bull. The cattle are a well-bred, useful lot and will please those present sale day. The Poland Chinas are of the large, heavy-boned type with plenty of quality and finish. The sire of the earliest spring pigs and all of the fall pigs included in the offering is Harcourt 34569 by Faultless Perfection II, 94441, dam Lady Lad 237094. Long Sunshine 106223 by Sunshine Chief 76813, dam Extra Long A. 23850 by Surprise Wonder 4th 53693, is the sire of several litters of spring pigs. Those of our readers who have purchased stock from Mr. Cottingham have always been well pleased and we are sure that the offering selected for October 9th sale will meet with the approval of all breeders sale day. Further particulars regarding this sale will be found in these columns in later issues.

If you are not now on Mr. Cottingham's mailing list, write him at once and catalogs will be sent promptly as soon as finished. Kindly mention The Homestead when writing.

J. R. TRIGGS' GOOD HERD OF POLANDS.

This paper is now advertising the well-known herd of Poland China hogs owned by the above-named gentleman, of Dawson, Neb. Mr. Triggs has one of the best herds of this breed in the state of Nebraska and his hogs are of the type that meet with the approval of the hog men in general—the rooney type. The great Major M. by Blain's Tecumseh is possibly as large a hog as can be found among this breed today. He is not only large, but is strong as an individual. The boar should have been shown last fall by all means. He is very strong in head and ear for a hog of his size, as well as having a strong back, good bone, very deep body and two good ends. Mr. Triggs has refused several very tempting offers for his great herd boar. The get of this grand sire is very much the type of the sire, and shows signs of making very profitable herd boars and brood sows. The offering of pigs from this herd on October 24th should be of interest to all breeders who are seeking the type that are noticeable at all times. The sows in the herd are very strong. They represent the blood of Johnson's Chief, Nebraska Chief, Sir Gaspard and many more of note. Any farmer or breeder looking for good Poland should watch this herd. Look up the advertisement on page 26.

THE AUGUST AMERICAN BOY.

Three boys in a sailboat in a spanking breeze look out from the cover page of the August American Boy. The names of Stratemeyer, Tomlinson, Alger and Harbour stand out in the text in four stirring serials now running. Every boy knows that where these names appear there is something of interest to him. The titles of the stories by these well-known writers are additional evidence of their stirring character—"In Defense of His Flag," "The Camp-fire of Mad Anthony," "The Young Book Agent," and "Four Boys in Camp." But this is not all of the good material in this number. "Silver Prince" is a story of a homing pigeon by L. C. Byce. "Follow Your Leader" by James R. Perry is a story that will appeal to young boys. "Billy's Grit" is a baseball story of absorbing interest. Boys who like stirring adventure will enjoy "Capturing a Python" by Captain Hawser. Those more inclined to the substantial will read with interest "The Nicknames of the States," by Prof. Eugene Parsons, ex-editor of "The World Today." Another instalment of "My Young Sportsman," series of articles descriptive of firearms and their use, appears in this number, with the concluding part of "Drums and Drummers" by J. C. J. Langbien, Commander of the Medal of Honor Legion of the United States. Captain McVaine occupies a page that will interest every one with his "Riga and the Butterfly," and the mere title, "The Return of the Coyote" will interest boys who like the study of animals and their ways. Humor that boys will enjoy is found in "Hennipin and Fields, Sensationalists," by John J. Biddison. "Tom's Commission Houses" by Frank H. Sweet is a story of a boy's rise to prominence in the business world through fidelity to duty. "Amigo Fritz" is a bear story by Meyer Mansbach, who has spent almost his whole life among the Indians and the wild beasts of the forest. "Robert E. Lee" is number ten of the "Boyhood of Great Americans." "How to Play Base Ball" by Professor Norris, of the Wenonah Military Academy, tells about team batting and base running. Then there are puzzles, prize essays, clever work with a pocket knife, how to make dry batteries, chemistry for boys, workshop notes, photographs, stamps, coins, and curios, and interesting matter with reference to The

Two Days Sale of Scotch and Scotch Topped Short-horns

Breeders' Combination Short-horn Sale ROLFE, IOWA, AUGUST 22, '06.

55 HEAD IN THIS CONSIGNMENT. 55

FROM THE M. P. Hancher, Claus Johnson & Son, HERDS OF Thos. H. Fisher, A. G. Hewlett.

Including a number of really choice Scotch bulls, among which is a splendid son of Carter's Choice Goods, a good Missie and a grandly bred Cruickshank Rosemary bull. There will be a good lot of Scotch-topped bulls, with exceptional individual merit.

Some of our best Scotch cows go into the sale, and it is an offering that we all feel proud of. Many cows will have calf at foot by good Scotch bulls, and all old enough will be bred and safe in calf. We extend a cordial invitation to all to be with us on sale day. Write for catalog to

M. P. HANCHER, Mgr., Rolfe, Ia.

Col. Geo. P. Bellows, Al P. Mason, Auctioneers.

Brodsky's Closing Out Sale PLOVER, IOWA, AUGUST 23, 1906.

90 Head In The Sale. 50 Head Scotch Cattle.

Including seventeen richly bred Mysies, sixteen celebrated Dorothy's, six Miss Ramsdens, besides a number of Miss Buckingham's, Lavinias, Bonnie Belles, Sweet Roses, and other Scotch tribes. There will be twelve bulls in the sale and ten of them are straight Scotch, including my royally bred Cruickshank bull, McDiarmid. I will also sell one imported Percheron stallion and one stud colt; four pure bred Percheron mares and one filly.

L. BRODSKY, Plover, Ia.

Col. Geo. P. Bellows, Carey M. Jones, Al P. Mason, Auctioneers.

PLEASE MENTION THE IOWA HOMESTEAD WHEN WRITING FOR CATALOG.

American Boy Legion of Honor and the Order of The American Boy, with sprinklings of good advice from the editor. In addition there are over eighty illustrations. Subscription price, \$1 a year. The Sprague Publishing Company, Detroit, Mich.

OAK PARK DUROCS.

Mr. W. J. Hartung, proprietor of the Oak Park herd of Duroc Jersey swine, of Maxwell, Iowa, writes that he will have five pens of Duroc Jersey hogs in Pen No. 15 at the coming state fair and that the first man who will remit \$5 will receive one of them. He says: "My pigs are coming along fine and are as good a bunch as I ever raised."

MR. J. H. MOYER, OF NEWTON, IOWA, SELLS A GOOD SHORT-HORN BULL.

The well-known Short-horn breeder, Mr. J. H. Moyer, of Newton, Iowa, whose announcement appears in The Homestead regularly, has recently sold the very good Short-horn bull, Beauty's General, to Messrs. Williams & Arhood, of Earlham, Iowa. Mr. Moyer had a number of inquiries for this bull, but the above firm came early and secured this fellow at the bargain price of \$150. Mr. Moyer has other good bulls that he will sell at prices equally as advantageous to the buyer. He is located but a short distance from Mr. H. D. Parson's Malaka herd. One trip will suffice to visit both these worthy and reliable breeders of Short-horns. Mr. Moyer reports his herd as doing nicely and The Homestead can certainly recommend him to its readers.

THE WISNER LIVE STOCK SHOW.

The fourth annual show of the Wisner Live Stock Association will be held at Wisner, Neb., September 12th to 14th, at which time there will be one of the best collections of cattle and hogs that has ever been shown in that section of the state. This show is open to the world, and while there are no premiums given, it is, nevertheless, going to be a show that breeders can afford to attend and show their stock. This section of the state has bought more high-priced stock in the last year than any other part of Nebraska and the breeders in that vicinity are exerting every effort to make this show a great success. Choice Goods, Ruberta and other noted winners will be shown here. Anyone interested should write Secretary Buck, of Wisner, Neb., at once and he will furnish you full particulars about the entries.

ADVANCE PREMIUM LIST OF THE FIRST INTERSTATE SHOW TO BE HELD AT ST. JOE, MO.

Mr. M. B. Irwin, manager of the Interstate Live Stock and Horse Show, to be held at St. Joseph, Mo., September 24th to 29th, inclusive, has issued a neat advance premium list that should be in the hands of every breeder who contemplates showing this fall. Most liberal premiums are offered and every dollar of these are hung up by the association. No breed association contributes a dollar, as their appropriations were exhausted before the Interstate show was fully organized. This shows the spirit of the men behind the show and they merit the support of the show men. It is their first annual show and is the first of three great shows, viz.: The Interstate, at St. Joseph, Mo., September 24th to 29th; the Missouri State Fair, Sedalia, Mo., September 29th to October 6th, and the American Royal, October 6th to 13th. Address Mr. M. B. Irwin, manager, South St. Joe, Mo., for premium list and complete information, and kindly mention this paper when writing.

REGISTERED SHORT-HORN SALE.

Mr. C. E. Iliff, of Milford, Ill., who is advertising the dispersion sale of the famous J. G. Withers herd of Scotch and Scotch-topped Short-horn cattle to take place at Watseka, Ill., Friday, August 24th, has issued a cordial invitation to the public to attend this sale. He writes: "In placing this grandly bred herd before you in their present condition we realize that it is doing them an injustice as well as their breeder and former owner, Mr. J. G. Withers, of Stony Creek Farm, Milford, Ill., who spent a quarter of a century in bringing the herd to its present high standard of excellence. Mr. Withers had gathered about him from all corners of the Short-horn world kings and queens of royally bred families, which, with their descendants, we are placing at the mercy of the public in this, our initial bow to the Short-horn fanciers. For the breeding and individuality of these cattle we have no excuses to offer, but their condition at the time of the sale will bear us out in the assertion that no special preparation has been given them for this occasion. In fact, one week ago there was no thought of their being placed on the market and a continuous drouth in this section of the state, which

has shortened pastures to almost the starvation point, has made it necessary for this dispersion. The buyer will therefore see them in their natural condition, stripped of the mask of flesh which too often covers up the defects and detracts attention from the real type of animal under inspection. The sale will include the imported bull Rustler 242648, an international winner, also several imported females with their produce." Interested readers should write Mr. Iliff for catalog after reading advertisement on page 25.

DOING A BIG BUSINESS.

On page 4 of this issue can be found the advertisement of the St. Joseph Harness Company, of St. Joseph, Ill. This company is composed of Messrs. C. W. Couden and C. W. Dale, both practical harness and business men. They have been engaged in this business for some time, having sold thousands of sets of harness which they are advertising, and in all their experience have never had one set returned. If you are in need of a set of single harness you will profit by purchasing one of theirs. They are making a specialty of handling single driving harness, devoting all their time to this one line, selling nothing else, hence their claim that they can sell a better harness than could possibly be obtained any place else for the same money. It would pay the readers of this paper, if ever in their city, to drop into their mammoth factory and look through it, and at the same time become acquainted with the proprietors of the establishment, both of whom are genial, affable gentlemen.

HEREFORDS FOR SALE.

Mr. W. L. Dodge, of Hubbard, Neb., has for sale a few choice young Hereford hulls and a number of females. Mr. Dodge is breeding some very choice stuff. The bulls are sired by Whitney, a grandson of Boatman, and Master Donald 2d, a full brother to Prairie Donald, first-prize bull at the American Royal and International, which was sold for such a large price. Mr. Dodge could fit out young breeders with foundation stock to good advantage. You could select a number of females that he would price at very reasonable figures that are not in any way related to the bulls which he has for sale. To the young breeder who is in search of some choice foundation stock and does not care to spend such a large amount, he will find some good bargains at this Hereford farm. He could furnish yearling heifers, open or bred, or cows ranging in age from two to four years old. His cows all have calves at foot and can be purchased at very reasonable figures. If interested write to Mr. Dodge and in writing please mention The Homestead.

BLUFFVIEW SHORT-HORNS.

Elsewhere in this issue will be found the announcement of Mr. F. A. Edwards' famous Bluffview Short-horns. Mr. Edwards is located at Webster City, Iowa, and has been breeding Short-horns in this locality for over a quarter of a century. More than twenty years ago he realized the advantage of using thick-fleshed Scotch hulls, one of the first being a son of old Imp. Spartan Hero, one of the best sons of old Barmpton (37763). Following this hull Mr. Edwards used other Scotch hulls of more or less note, but probably none, outside of the Duke of Oakland 2d, gave the Bluffview herd as much prestige as did old Lord Victor, the first Scotch bull used. For several years Mr. Edwards has been making annual sales from the Bluffview herd with marked success, attracting the attention of buyers from many states. Recently he has been fitting a few young cattle and exhibiting at Des Moines, simply to give the breeders of the state who had not attended his sales an idea of the character of the Bluffview Short-horns. This year he will be at Des Moines as usual with a herd consisting of his beautifully-bred Cruickshank hull, Secret Viscount; the splendid roan cow, Fennimore Princess, which has a beautiful hull calf at foot that will show with her. She is by Imp. Englewood and is out of the Young Mary family with six Scotch tops. It is certainly a feature not to be overlooked by Short-horn men when any breeder presents as good a Short-horn cow as Fennimore Princess with a fine big hull calf suckling. She has not only shown her ability as a producer, but also an ability and adaptability to take on flesh while suckling. Lavender Rose is a beautiful, smooth, two-year-old heifer that will be shown, sired by Duke of Oakland 2d. She is very smooth and is possessed of a lot of scale, and is the making of a magnificent matron that is a credit to any breeder. A beautiful red yearling heifer, called Edelweiss, will hold up the yearling end of the herd. She

has been a winner as a calf and promises well for the future. The heifer calf will be a beautiful roan, calved September 4th, and is a daughter of Duke of Oakland 2d. This forms the herd, so far as class contestants are concerned, but in the show for get of sire Mr. Edwards will present a beautiful red cow by Duke of Oakland 2d, a splendid Broadhooks two-year-old roan heifer, the heifer calf, and two-year-old heifer above referred to. At this particular time he is desirous of selling two good Scotch bulls; one is a red roan, four years old in August, called Great Light, a son of Imp. Red Light and out of an imported dam. The other is a roan Brawith Bud out of a dam by the Duke of Oakland 2d. This is a very smooth calf, one year old and is worthy a place at the head of some good herd. Note the announcement on page 23.

MISS COWAN'S HANDSOME POSTER.

The publicity department of the American Royal Live Stock Show is distributing a handsome, colored poster advertising this year's show, which is to be held at Kansas City, October 6th to 13th. The poster is in five colors. The central figure is that of a handsome girl, and is surrounded by a circle of heads of typical animals of the several breeds included in the show. The poster is pronounced one of the most artistic of the series issued by the American Royal. Especial interest attaches to this poster by reason of the fact that it was designed by Miss Cora E. Cowan, of Chicago, daughter of Mr. B. O. Cowan, assistant secretary of the American Short-horn Breeders' Association. Miss Cowan is a young artist of decided talent, her work having received much praise from leading artists of this country. Her pronounced success in this, her first venture in the field of poster designing, would indicate that she is destined to achieve prominence in this line of work. Ten thousand copies of this poster are being sent out to railroad stations, banks, business houses and breeders. As long as the supply lasts copies will be sent free on application to Mr. J. M. Hazelton, superintendent of publicity American Royal Live Stock Show, 1710 West Sixteenth St., Kansas City, Mo.

YOUNG MEN AND WOMEN WANTED.

There never was such a scarcity of young men in our cities, during the history of the country, as there now is. Any young man possessed of energy and ability, and who has the knowledge necessary to handle an ordinary position, is assured of good wages and an opportunity to advance to the very top notch in the business world. Almost every great business man who is attracting the attention of the world today was born and reared on a farm—country air and country food seem to be required to give a man the stamina necessary to stand the great strain of modern business methods. City boys break down under this strain in a short time and become nervous wrecks, while the country boy, or girl, who has built up under favorable country conditions, an iron constitution, wins, and wins easily, in the race for wealth and distinction with far less effort and damage to health than his or her city cousin. The man who has a good constitution to start with need fear but little that it will fall him if he takes good care of himself. Look at Russell Sage, who recently died, at a ripe old age, and who, although he passed through one of the most strenuous lives of any noted American, never knew what it was to have a day of sickness until old age drove him from active business life. He was bred and brought up in the country, and his history is the history of hundreds and thousands of other noted Americans. Young man, if you live on the farm and have energy and perseverance you stand a much better show to win in life's race than the boy who is raised in the city, if you will fit yourself to win. In a conversation with Mr. H. B. Boyles, president of Boyles Commercial College, 1504 Harney street, Omaha, Neb., a few days ago, he said: "At the present time we have calls for far more young men and women than we can fill. We have standing orders from some of the largest corporations in the West for all of the young men and women we can send them who have advanced far enough in the commercial courses to do ordinary work. If we could get twice the number of young men and women we are now getting, who have ability after short training, to hold good positions, we could place them. During the last year we enrolled over 1,100 pupils and a large majority, all that were eligible, are now holding remunerative positions. The business world is looking for good men and women as it never looked before, and the supply is short. Send in

your young men and women to the cities. We will take care of them, and I will be glad at any time to tell any young man or woman who wishes to better his or her condition how to do it if they will write me." See advertisement on page 2.

THE ARDMORE COMPANY BUYS PAYMASTER.

One of the very best purchases in the way of a Berkshire boar made so far this season was recently consummated by the Ardmore Stock Company, of Holstein, Iowa, when they secured from the noted Berkshire breeders, Messrs. A. J. Lovejoy & Son, of Roscoe, Ill., the great young hog, Paymaster 90000, at \$500. This young boar was considered one of the best sons of the great Masterpiece, and Messrs. Lovejoy & Son write us as follows concerning him: "This choice boar was reserved by us to add to our own herd and is a boar full of the true Berkshire type, having a great head and ear; fine, arched back; strong hams and the best of feet and legs. His sire, Masterpiece, needs no introduction to the breeders of Berkshires as a sire or show hog and we sold him to Mr. W. S. Corsa, of Whitehall, Ill., for \$2,500, and last week Mr. F. W. Morgan, of Beloit, Wis., bought a double grandson of Masterpiece for \$3,000, which goes to show how the breeders are after Masterpiece blood. We would not have sold Paymaster only for the fact that we had just bought a Premier Longfellow boar to use on Masterpiece sows and had selected a younger Masterpiece pig to use in the herd the coming winter. Too much cannot be said for this young boar, and we predict he will make a great nick on those Royal Majestic and St. Patrick of Ardmore sows in the Ardmore herd. We certainly think the Ardmore Company made a master stroke in securing such a grand individual to put at the head of their herd, coupled with the best blood now known to the Berkshire breed."

IMP. MUTINEER AND HIS GET.

Among the breeders of Short-horns in Missouri who have exceptionally good breeding hulls is Mr. A. C. Berry, of Unionville, Mo. The writer has just paid a visit to Mr. Berry, has inspected his herd and especially the herd bull, Imp. Mutineer, and his get. As an individual Imp. Mutineer ranks among the good hulls of America, showing an amount of quality that is pleasing, a head that is good and masculine enough to denote prepotency. Going back from the head one finds Mutineer exceptionally smooth over shoulders, showing a wonderfully good front with full, rounding brisket; over crops and loin he is good, with a level line over the tall head. Like a majority of the Missie hulls he carries his thickness from end to end and has a bottom line that is in keeping with his top line. That he comes by his individual excellence by inheritance will be seen by all who study his pedigree. He was bred by the late Mr. W. S. Marr, of Uppermill, Scotland, and was got by Bapton Chief, he by the same sire and his dam by the same sire as Bapton Diamond, Mr. Dan Hanna's great breeding bull. Mutineer's dam, Imp. Missie 167th, is also the dam of the grand champion, Whitehall Marshal, and was got by Lord of Fame by Lord Douglas out of Lillie Fame by Dittyton Fame, used one season by Mr. Duthie and sold for export to Argentina. His bull calves for the season sold for an average in excess of \$1,000. The next sires along down the list in Mutineer's pedigree are William of Orange, Ventriquoist, etc. Better Missie pedigrees are seldom, if ever, found. As we have said before, Mutineer has the individuality, and on this our second visit to Mr. Berry's farm we are more favorably impressed with his ability to sire good stuff than ever before. Mr. Berry has a number of the get of Mutineer that are now of such age and size as to show his worth as a sire and herd hulls may be found here. Among these is a Secret, a bull that will stand inspection by the most critical. In conformation he is one of the hard ones to pick to pieces. Over the back he is a marvel for width, carrying it from end to end, with as even a coating of mellow flesh as one could wish for. His well-sprung ribs, smoothness over shoulder and evenly-proportioned quarters form a carcass that would be a credit to his ancestors, no matter where shown. His head, too, is near perfect and decorated with moderate-sized drooping horns. The man hunting for an all-red yearling herd bull should look into this proposition. Another good one is a Victoria, now sixteen months old, a red and, like all the get of Mutineer, he has the feeder's head, is a loose-hided fellow, good over crops and loin, has the desired spring of rib, the even quarters and will make a

desirable stock bull. Another Victoria and a red is a bull that should please some critical buyer. Among the other good sons of Imp. Mutineer is a Secret out of Sally 9th by Imp. Prince Favorite, the best son of Hapton Favorite, a Queen Bess out of Lurcne by Imp. Matabee Chief. The latter three are coming yearlings and will do for light service this fall and winter. Mr. Berry is pricing these bulls worth the money and those hunting herd bull material will make no mistake by investigating. See page 23 for advertisement and address, and kindly mention this paper when writing.

MINNESOTA STATE FAIR SALE OF ABERDEEN ANGUS.

Through the efforts of the Minnesota State Board of Agriculture, breeders of Aberdeen Angus cattle will participate in the series of sales to be held at Hamline during the week of the state fair. Tuesday, September 4th, is the date of the auction, and Mr. W. C. McGavock, of Springfield, Ill., who has had charge of all of the auctions held under the auspices of the National Association of this breed, has been selected to manage this sale. Some very high-class entries have been secured and the following herds are represented: W. J. Pickard, Richland Center, Wis.; W. J. Miller, Newton, Iowa; W. L. Gelbach, Lancaster, Wis.; S. Melvin, Greenfield, Ill., and Arthur Meeker, Chicago, Ill. Quite a number of the animals cataloged will be shown at the fair and are expected to be prize winners there. Blackbirds, Prides, Ericas, Queen Mothers, Heather Blooms, Minas and other leading families are represented. It is an offering that would do credit to breeders anywhere and it should be appreciated in Minnesota where was produced Clear Lake Jute 2d, that is probably the most celebrated of all fat stock show champions, be having been a champion over all breeds as a calf, yearling and two-year-old, and in his two-year-old form was awarded the grand championship at the International Exposition at Chicago. The breed has a remarkable record for the production of fat stock show champions and market-topping steers, and one of the cows included in the auction is a sister to the first-prize steer at the World's Fair at St. Louis. Catalog will be mailed on application to Mr. McGavock.

PITTMAN OFFERS CHOICE OHIO CHIEF LITTERS FOR SALE.

On page 23 of this week's Homestead will be found the Duroc Jersey advertisement of Mr. W. D. Pittman, of Lake City, Iowa, who is offering some very good Ohio Chief boars for sale, as well as a number by Crimson Wonder Jr., Orion 2d, and Leather Stockings. Mr. Pittman will be remembered as one of the good buyers at the Manley, Smith Brown, R. J. Harding and other well-known sales and it stands to his credit that he never bought a poor one. The tops always fell to the Pittman bid and in consequence he now has some of the good things to offer the boys. He has two good litters sired by the great Ohio Chief that he is now offering for sale. One of these litters is out of a granddaughter of Echo King and Duroc Challenger and the other is a granddaughter of Ak-Sar-Ben 4th. He is ready to book orders for these at any time from now on and the breeder who is looking for an Ohio Chief pig had better get in touch with Mr. Pittman as soon as possible. He has a splendid lot of other boars sired by Crimson Wonder Jr., Orion 2d, and Leather Stockings, and some of these are out of daughters of the great Nebraska Belle. Mr. Pittman has about seventy-five pigs in all this year and they are the best he has ever raised and are good enough that any breeder can go there and get a herd header. He has eight or nine fall boars sired by Tip Top Notcher out of a granddaughter of Nebraska Belle. If you are on the market for an Ohio Chief boar you should lose no time in getting in touch with Mr. Pittman. He also breeds Shire horses and Aberdeen Angus cattle and he has young stock for sale at all times. Write him at once and please mention The Homestead.

HOLBROOK DODDIES.

Breeders of improved cattle throughout the universe are always pleased to learn of the success of the enterprising, painstaking, careful breeder of pure-bred cattle. It has often been said that all the world loves a lover. This is equally as true among breeders of improved stock who love to see their neighbors and fellow breeders succeed in one of the most notable achievements of man—the further improvement of our improved breeds of live stock. We introduce to our readers in this issue a group of breeders of Aberdeen Angus cattle, located at Holbrook, Iowa county, Iowa, namely, Messrs. P. J. M. H. and Mike Donohoe, John and Michael Cash. These five breeders have allied themselves together for the purpose of benefiting the breed and disposing of their stock. Their combined herds number 200 head of as choice and fashionably-bred Aberdeen Angus cattle as can be found in America. Perhaps the greatest Angus bull of modern times heads these allied herds. We refer to Black Wood Lawn 22088, the International champion of 1902. This famous old bull is in active service and has been assisted by Wood-Lawn Blackbird Lad, Homedale Black Jam and Morning Star 2d. These breeders are all located in one community and the five herds can be seen in less than one-half day of inspection. Mr. P. J. Donohoe, at whose farm Black Wood Lawn is kept, will be at the Iowa State Fair with a very creditable herd of doddies, consisting of some eleven head, all but two being the get of this famous bull. The show herd will be headed by that very select, thick-meated two-year-old bull, Morning Star 2d. This is a bull unusually smooth and even in his flesh, possessed of the proper doddie type and is a bull that will be hard to down in any show-yard company. Mr. Donohoe will show for his cow, Blackbird Favorite 2d. This cow is not a debutante this season, but has many times graced the show-yard arena; however, she comes forth this season arrayed in her best gown and more fully entitled to be called the belle of the season than at any former period. Two beautiful two-year-old heifers will uphold this class, namely, Pride of Clover Leaf and the Erica heifer, Eileen, a daughter of Heather Lad of Emerson 2d. Two nice yearling heifers, both by Black Wood

Lawn, are being fitted, namely, Black Martha and Brookside Pride 4th. In the heifer calf class, Brookside Rose 2d and Brookside Pride 5th will uphold the banner for Holbrook in this class. The yearling bull that Mr. Donohoe exhibits is one of the best specimens that has made his appearance in several years. Like all other Angus bulls, he is of absolute perfection, yet he approximates this high standard in a marked degree. He is unquestionably a bull that will have to be reckoned with in every big show this season. Summed up in a nut shell, it may be stated that in the two-year-old bull class, yearling bulls and two-year-old heifers, Mr. Donohoe will have to be consulted. This showing from Holbrook is unquestionably one that will do credit and honor to this famous locality, and we predict the merited success to which the herd and its owner are entitled. Mr. Donohoe will be pleased to meet all lovers of Angus cattle at his barns during the week of the Iowa State Fair.

A VALUABLE FREE BOOK FOR THE DAIRYMAN.

A new twenty-four-page book is being given away by the Sharples Separator Company, of West Chester, Pa., which takes up the subject of business dairying and the science of making cows pay. Wasted food is wasted money, as every dairyman and farmer knows. To thoroughly understand what foods make muscle, blood and milk, and what foods produce heat and fat, is to have the secret of successful dairying. Business Dairying tells in a practical way what foods are best for the dairyman to feed and why. It also touches on the care of milk and cream, butter making, churning, working and packing, as well as how much milk for a pound of butter. The selling value of cream is another point taken up, and how wastes can be turned to profit. A close study of Business Dairying will reveal many ways to the intelligent dairyman for cutting off losses and improving every opportunity to save. Another feature of the book is "Stable Hints and Suggestions," and the value of manures. While the practical experience of dairying is usually and best confined to the local conditions there is enough valuable information in Business Dairying to more than pay for the time and trouble in writing for it. The points to be observed in judging cows will be worth many dollars in selecting dairy cattle. This is illustrated with table of points to be considered and diagram of the perfect dairy cow. Profitable dairying is in the "knowing how" and this book tells in a brief, intelligent way how to reduce the cost of milk production and how to cut off the waste. A postal card addressed to the Sharples Company as above will secure you the book without cost. Be sure to mention the Homestead when writing for "Business Dairying."

LAST CALL FOR THE ROLFE COMBINATION SALE.

Breeders who intend going to the L. Brodsky sale should make it a point to be at Rolfe, Iowa, on August 22d, when they can attend the combination sale under the management of Mr. M. P. Hancher. We have called the attention of our readers to this sale in previous issues, and desire to repeat that anyone who is in search of a good young bull or well-bred cows and heifers will find them in this offering. The cattle are a representative lot, there being a number of Scotch bulls and some good Scotch cows and heifers in the offering. They come from the herds of Claus Johnson & Son, M. P. Hancher, A. G. Hewlett and Thos. H. Fisher, all well-known breeders in the vicinity of Rolfe. Messrs. Claus Johnson & Son are selling ten head, four of which are young bulls. One of these is a richly-bred Mysie, about sixteen months old, a red in color and a good individual. Here is a herd bull for some man and he will bear inspection on sale day. They also sell a good Scotch-topped Young Mary bull, sired by Aberdeen Prince and out of Shaffamade, one of their best cows. They sell two other Aberdeen Prince bulls and are all red in color. Among the females that they sell is a good five-year-old cow with calf at foot by Victor Prince. Another good cow that they sell is Charming Lady, by the noted bull, Baron Secret. She will have a good daughter in the sale by Imp. Revelry. Several others that they sell are good, useful cows and are all bred to Scotch bulls. Mr. A. G. Hewlett sells fifteen head, three of which are young bulls, sired by Aberdeen Prince. One of his best cows is Lily Louan, a five-year-old daughter of Highland Amhurst. She is due to calve in August to Baron Marr, his present Scotch herd bull. Two other cows that he contributes are daughters of Highland Amhurst. Vestibule Maid is a daughter of Vestibule and out of a daughter of Imp. True Briton and she will have a calf at foot by Aberdeen Prince. He also sells a large Ianthe cow, a daughter of Vestibule, a roan in color and bred to Baron Marr. Mr. M. P. Hancher sells eighteen head—six bulls and six heifers, the rest matured cows. Some of the best things in the sale come from his herd. One of these is the ten-months-old bull, Choice Goods Ury, a son of Carter's Choice Goods, and out of a daughter of Morning Star. He belongs to the Ury tribe and is a herd-heading proposition for some man. Another good bull that he sells is Brawith Bud, by Golden Lad and out of Imp. Rosemary. This is a large roan bull and will make a 2,500-pound bull when matured. He also contributes one of the best Scotch cows in the sale—Mina of Oak Ridge 2d. She is a splendid individual and she will have a good bull calf at foot by Gloster Prince. He is selling several other good cows and heifers that are worthy of mention, but we will let the catalog and the cattle speak for themselves on sale day. Mr. Thos. Fisher is selling eight head—four females and four

Jayne's Tonic Vermifuge

gives rosy cheeks and active health to pale, sickly children.

And it is good for their elders, too.

bulls. One of the best bulls in the sale will be sold by him. He is a son of Prince of Athene, his former herd bull. He sells a well-bred Bates cow with calf at foot by Prince of Rosebud and he also sells a good Scotch-topped heifer. All those who attend this sale can get to the Brodsky sale on the following day. Write to Mr. M. P. Hancher, of Rolfe, Iowa, for catalog, and mention The Homestead.

BARBER'S PREMIUM CHESTER WHITES.

One of the very best herds of Chester Whites in the state of Iowa is owned by Mr. J. L. Barber, of Harlan, whose advertisement is appearing regularly in The Homestead columns. Mr. Barber showed last year at the Iowa State Fair, also at the Pottawattamie county and the Shelby county fairs, where he won, all told, twenty-eight premiums, consisting of eleven firsts

and two sweepstakes over all breeds. Mr. Barber is now using at the head of his herd the prize-winning boar, Captain 14119 and he is the sire of the most of his present crop of pigs. He was a winner of first in yearling class at the Iowa State Fair in 1904, also at the Minnesota State Fair, and was first and sweepstakes winner at Sioux City the same year. He was also first and reserve champion at the World's Fair the same year and was a first-prize winner in 1905 as well. He also has a number of good things in the herd sired by Monarch Jr., the boar that took first and sweepstakes at the Shelby and Pottawattamie county fairs in 1904 and he also got fifth place at the Iowa State Fair in 1905. Among the many good sows in the Barber herd is one that deserves special mention and that is Miss Hanna. This sow was a first and sweepstakes winner at the Shelby and

Pottawattamie county fairs in 1905 and she won third at the Iowa State Fair the same year. He has a number of her get on the place and they are worthy a place in the herd of any Chester White breeder. Mr. Barber has a grand good herd and he has a crop of boars and sows now on the place that are hard to beat. He is now booking orders and he will ship at any time. If any of our readers want a boar or a sow they will do the proper thing by writing to Mr. Barber at once and mentioning The Homestead.

THE JOURNAL OF AGRICULTURE.

The St. Louis Journal of Agriculture, founded in 1866, has been purchased by the Lewis Publishing Company, publishers of The Woman's Magazine and The Woman's Farm Journal, St. Louis. For over forty years the subscription price to the Journal of Agriculture was \$1.00 per year, and the first move of its new owners was to reduce the subscription price to fifty cents per year. However, the Lewis Publishing Company believe that the people should know what kind of a paper the Journal of Agriculture is before paying even fifty cents in advance for a year's subscription, and they are offering the Journal of Agriculture ten weeks for ten cents so that the people may take the paper ten weeks at this nominal price and see what kind of a paper the Lewis Publishing Company is going to give them at the regular price of fifty cents per year. Their advertisement, giving full particulars, appears in this paper on page 4.

CRITICAL TIMES FOR PIGGIE.

The Iowa Stock Food Company, of Jefferson, Iowa, have solved the problem of how to keep pigs, sheep and cattle healthy. Directions: Hogs—For disinfecting and cleansing feeding floors and sleeping quarters sprinkle with one part Iowa Dip to 100 parts water. The best method to clean hogs of lice and mange is by dipping. If animals are sprinkled they should be wet thoroughly with the solution. In dipping hogs for lice use one part Iowa Dip to fifty parts water. In case of mange heat the water to 100 degrees Fahrenheit. In bad cases of mange it may be necessary to use a solution of one part Iowa Dip to forty parts water. Animals should be dipped two or three times, a week between dippings, in order to destroy lice that may hatch out from nits that are on the hair and to destroy mange parasites that may develop. Sheep—For a sheep dip for ticks, maggots or lice, use one part Iowa Dip to fifty parts warm water. For scab on sheep use one part Iowa Dip to fifty parts hot water, and give a second dipping in ten days. In bad cases of scab it is sometimes better to dilute one part to thirty-five parts hot water. In case of scab, animals should be held in emulsion one to two minutes. For a disinfectant around sleeping quarters and feed lot, use one part to 100 parts water. Cattle—For a cattle dip or spray, for lice, use one part Iowa Dip to fifty parts water. For mange, itch or scabies use one part to thirty-five or fifty parts hot water, the strength of the solution depending upon the virulence of the disease. Water should be kept at a heat of 100 to 105 degrees Fahrenheit and the animals held in the solution one to two minutes. A second dipping should be made within ten days for scabies, and in extremely bad cases a third dipping may be necessary.

THE BULL OFFERING IN THE BRODSKY CLOSING OUT SALE.

The dispersion sale of L. Brodsky, at Plover, Iowa, on August 23, furnishes a particularly strong lot of Scotch bulls. In fact nearly all that go into the sale will be Scotch, there being about twelve all together. Included in the number will be the herd bull McDiarmid, one of the most richly bred Mysie bulls used in the West. He is a large, thick-fleshed bull, with a splendid breadth of beam and a very mellow fellow. His get in this sale is all the recommend he needs as a breeder, and proves him a valuable herd bull. While calling attention to the herd bull it should not be overlooked that there is a splendid lot of young Scotch bulls also that will afford buyers a splendid selection from which to secure a choice herd header. Several are of the same family as McDiarmid, and a number are of Brodsky's favorite Cruickshank Dorothy family. The oldest of the young bulls is Douglas 233215, a two-year-old bred by N. A. Lind and sired by Imp. Morning Star, while his dam was Imp. Lady Blanche Douglas, by the Duthie bull Scottish Victor. Douglas is a dark roan of good type, and is mellow fleshed and full of quality. The rest of the bulls, except one, are reds, and nearly all are yearlings. Several are by McDiarmid, among them the richly bred Miss Ramsden calf called Lad For You, his dam being Baron Miss, by the former herd bull Baron Lavender. The second dam was Lad's Miss, a Miss Ramsden, by the Robbins show bull The Lad For Me (by the champion St. Valentine), while the next dam was by the champion Imp. Gay Monarch. This is a good big calf of the blocky type, with an extra good, smooth back, and a good, wide, short head. His dam is also in the sale. There are also one or two good Dorothys by McDiarmid and several choice ones sired by Magistrate 2d. One of these is of the Mysie family, and as the sire is a double Mysie, it makes the bull a very strongly bred Mysie. He is called Double Mysie 3d, and he is a very promising young bull, being straight lined with a good back, heavy quarters, straight legs, and a good head. His dam is Seventh Mysie of Pleasant View, one of the greatest breeding cows in the herd. Another is Lord Champion, a red calved December, 1904. He was sired by Lord Craibstone, and his dam was Bonny Bell C., by the Crawford Scotch bull Champion, while the next dam was by Imp. Craven Knight. Lord Craibstone topped John Ramsden's sale as a yearling. He was sired by Imp. Golden Crest and out of Imp. Craibstone Baroness, a granddaughter of William of Orange. Lord Champion is a straight-lined, deep-bodied young bull of good length and with a strong back. He is good enough that Mr. Brodsky has been using him some. There will be ninety head in the entire offering, and there will be an unusually attractive lot of Scotch cows and heifers. The catalog shows up some of the best Scotch breeding that will be put in a sale this year,

and those who want something of this kind will do well to attend the sale. He will also dispose of one imported Percheron stallion, four pure bred Percheron mares and one stud colt. The catalog tells the story. Write for it and mention Iowa Homestead.

HAMLIN SHORT-HORN SALE.

During the Minnesota fair an important sale of Short-horns will be held. This will be an excellent opportunity for stock men to get choice cattle to improve their herds. These cattle have been consigned to this sale by the most prominent and successful breeders of the Northwest. The following will be represented in the sale: H. F. Brown, F. W. Harding, N. P. Clarke, Col. R. A. Wilkinson, Arthur Meeker, Judge D. B. Searle, Arthur Cooper, J. B. Gilfillan, Samuel Fletcher, W. W. Brown, L. J. Norris, D. J. McLean, O. F. Henkel, Todd Bros., J. R. Hudgin and others. As beef animals Short-horns have no superiors, while they have a creditable record in the production of milk and butter. The sale will be held under the management of the American Short-horn Breeders' Association. For catalog write Mr. B. O. Cowan, assistant secretary, 17 Exchange Ave., Chicago, Ill. Come to Minnesota fair and remember the sale, Thursday, September 6th, 1 p. m. See page 13.

WRIGHT AND HIS FEEDERS WILL BE AT THE IOWA STATE FAIR.

One of the interesting exhibits that will be at the Iowa State Fair will be a full line of Wright Stock Feeders, manufactured by Mr. C. A. Wright, of Rosendale, Mo. He will have with him a complete assortment of sheep, hog, calf and poultry sizes, painted and set up and ready to ship. He has arranged for a tent 19x23 and will be located just east of hog barn No. 14 in the Duroc Jersey department, facing the street between the hog barns and the windmill. He will also have a herd of Duroc Jerseys with him which he will drive out to show the Iowans that old Missouri is not behind when it comes to breeding red hogs. Mr. Wright says he has enjoyed a good trade this season in feeders and the most encouraging feature about the whole thing is that those who purchase are well pleased. He has thousands of testimonials to this effect and he will be more than pleased to have hog men, chicken fanciers, cattle and sheep men call around at the tent and let him show them the good features of the Wright Feeder.

REUBEL BROS.' POLAND CHINAS.

The well-known Poland China and Short-horn firm of Messrs. Reubel Bros., of Rockwell City, Iowa, start their hog advertisement in this week's issue of The Homestead and they are now offering thirty head of good boars for sale sired by R's Keep On, Iowa Chief, Winning Perfection and Imperial Perfection. This is an array of herd boars that is hard to beat, combining the blood of the most noted hogs belonging to the Poland China breed. R's Keep On is a son of the champion boar, Keep On, and his dam is the noted brood sow, Expressive, that sold in the Brumback sale for \$320. She is also the dam of the Indiana State Fair winner, Missing Link. As a sire he has more than met the expectations of Messrs. Reubel Bros., and he has a grand lot of very stretchy, good-boned and good-backed pigs on the farm. He has sired a very lengthy pig combined with abundance of quality and he has put a good head and ear on them as well. Their old hog, Iowa Chief, a son of the noted Thickset, and the best son that has ever been seen in the West; has also a good lot of pigs to his credit. This boar has been in use in the herd for some years and has proven himself to be an excellent breeder. They also have boars sired by Winning Perfection and Imperial Perfection. They have purchased some of the very best brood sows from the most noted herds and the pigs that they are now offering are out of some of these same sows. They will sell a number of sows sired by R's Keep On and Iowa Chief and they are good ones. The boys have aimed to breed a large, heavy-boned hog combined with sufficient quality to make him acceptable anywhere, and they have that kind in abundance. They guarantee satisfaction and when they send out a pig they know he is all right or they will make it good. If any of our readers want a Poland China boar or a sow they can feel that they will get what they order if they send to Messrs. Reubel Bros. See page 23.

MAUPIN & APPLGATE AND THEIR DUROCS.

Among the progressive breeders of Durocs in northeast Missouri is the firm of Messrs. Maupin & Applegate, of Shelby, Mo. These gentlemen are breeding the Durocs because they like them and it is their object to breed a class of hogs that will command the attention of the breeders of the corn belt as well as the farmer who raises the pork hog. With this object in view this firm have recently made some purchases of herd boar material. Among these is a boar from Mr. S. R. Murphy, of Savannah, Mo. He is from Mr. Murphy's great Nebraska Belle gilt and was got by Ohio Chief. Messrs. Maupin & Applegate had to pay a long price for this young boar, but after looking the field over they considered him good enough. Another boar, recently purchased, was a son of Proud Advance and out of a sow bought at Messrs. Sheldon & Son's sow sale. He was secured from Mr. A. E. Poush, one of Iowa's more progressive breeders. From the herd of Mr. Ed A. Baxter, of Pawnee, Ill., a son of the Illinois champion, Buddy K., was purchased. His dam was got by the great Tip Top Notcher. With these three boars Messrs. Maupin & Applegate feel that they have strengthened their herd greatly. Their former herd boars were Paul Kruger (got by Kruger and out of an Oom Paul sow), Missouri Chief, and Bowman's Top Notcher (got by Goldie's Top Notcher). Their sows were got by good boars of popular breeding and are a good, useful lot of breeding matrons. On October 17th Messrs. Maupin & Applegate will hold a sale of boars and gilts and on Feb. 15, 1907, they will hold a sale of bred sows and gilts, at which time the buyers of bred sows will be given an opportunity to get the blood of their three new herd boars. Until the sale days come around these gentlemen will have nothing to offer, as all their spring and

HULBERT'S POLANDS.

Mr. Chas. H. Hulbert, Oakland, Neb., the bustling and wide-awake Poland China breeder, and the man that made the highest average in the West last year, writes about his present crop of pigs: "I wish the readers of The Homestead could see a draft of sixty spring boars that I have selected for my early trade. Among the draft are one litter, farrowed January 1st, of six sows and three boars. This litter will average 200 pounds. I expect to show the gilts at the Iowa State Fair. They are by Oakland's Prospect and out of Diamond Dust. If they don't find a place down at Lincoln it will be a hog show. Oakland's Prospect is coming along just as you would naturally expect, and he also is slated for the capital. I will show one of his yearlings, called Cain. His dam, One Thousand, is the only sow we ever bred to Oakland's Prospect that raised Cain, and we will let the boys see how well she did the work. Breeders can expect to see the best lot of sows ever sold in Nebraska next February, when we put up the cream of 200 head. It just seems to me I never had a more promising outlook. I am going to take a few boars and also a like number of gilts from our March crop, just to show the boys what we have at home. I am issuing one of the most attractive private

sale catalogs ever published for the herd and I think they are deserving of it. I can mail them out in about two weeks. I have had several inquiries for a price on Oakland's Prospect." Mr. Hulbert has offered to sell his great herd boar, Oakland's Prospect, and some enterprising breeder is going to get a money maker if he only wakes up to the opportunity. Seven of his gilts sold in his last sale for over \$500 and ten boars brought the same. Who is the man that is going to get him? Look out for Mr. Hulbert and his Oakland's Prospects and his Chief Enterprises at the fair. If you are wanting a boar pig, write Mr. Hulbert at once. He has them good and plenty.

HIGH-CLASS HEREFORDS AT HAMLIN, MINN.

The Minnesota State Board of Agriculture has this year taken charge of the Hereford auction to be held at Hamline during the state fair on September 5th, the date following the Aberdeen Angus auction and the day before the Short-horn sale. The board selected Mr. W. C. McGavock, of Springfield, Ill., to take charge of the auction and he has succeeded in securing high-class entries for the event. The Cosgrove Live Stock Company, of Le Sueur, Minn., consign ten head, four bulls and six females, that are exceedingly useful animals and in just the condition to go on and prove prolific and profitable to their purchasers. They are sired principally by Hamline Hesiod, a bull that represents a combination of the blood

of Anxiety 4th and Hesiod 2d, bulls that made the fame of Messrs. Gudgeon & Shipson, and James A. Funkhouser. A few of the entries are sired by Minnesota Gold Bug, a bull that also combines the blood of the famous Anxiety 4th with that of Garfield, Sir Bartle Frere and other celebrities of the Shadland herd. The dams are by Hesiod 30th, The Grove 3d bull, Silky; the Wilton-Anxiety bulls, Wildy 29th, Wilton Anxiety and Wild Eyes. A daughter of Bright Duke, a son of Lamplighter, also appears in the list of dams. Mr. J. C. Andras, Jr., of Manchester, Ill., is selling some high-class show cattle sired by Prince Improver and Perfection Yet, sons respectively of the celebrated bulls, Improver and Perfection. Mr. G. H. Hoxie, of Thornton, Ill., includes the two-year-old heifer, Petunia, one of the best daughters of the champion and champion sire, Perfection. Other breeders with high-class consignments to the sale are Messrs. Tom Smith, Crete, Ill.; A. R. Haven, Greenfield, Ill.; R. A. Wilkinson, Crookston, Minn.; Zander & Tong, Goodenow, Ill.; H. J. Fluck, Goodenow, Ill.; David H. Powers, Delavan, Wis.; David Boss, Zumbro Falls, Minn., and H. F. Mussman, Grant Park, Ill. The catalog can be obtained by addressing Mr. McGavock at Springfield, Ill.

GREENE COUNTY, IOWA, DUROC JERSEYS.

Readers of this journal for many years were familiar with the name of Messrs. Wm. Roberts & Son, proprietors of the Iowa herd of Duroc Jerseys. At the time of the death of Mr. Roberts the main portion of the herd, together with the good will and name of the herd, was sold to a neighbor at Paton. Since that time Mr. L. H. Roberts, the son, has decided to rebuild the old Messrs. Wm. Roberts & Son's reputation and has succeeded admirably thus far. Mr. Roberts kept a small portion of the family that gave them their reputation, namely, some brood sows of the Ohio Anna strain. The sow which formed the nucleus for the new herd was Ohio Anna 7th. From her the herd has enlarged with the addition of a few other sows to more than 200 head. Mr. Roberts has taken into partnership with him in the rebuilding of the Roberts herd under the name of Greene County herd, his son, and hereafter the style of the firm will be Messrs. L. H. Roberts & Son. The writer of this article was acquainted with the late Mr. Wm. Roberts for about twenty years, and was probably in as close touch with him in his breeding operations as was any other living man, hence we speak from knowledge in dwelling upon the earlier history of the improvements of the Duroc Jerseys. Mr. Wm. Roberts was a scientific man, a thorough student of animal husbandry. Nature endowed him with many special gifts enjoyed by few men. Coupled with these natural advantages, Mr. Roberts was one of God's honest noblemen. Years ago Mr. Roberts recognized that the Duroc Jersey was susceptible of vast improvement. He set about single handed to make this improvement. The chief points of the Duroc that were objectionable to him were the long neck, bad feet (more designed for sled runners than for the locomotion of porkers), cat hams and hollow backs. Rarely did the writer engage in conversation with Mr. Roberts but what he would lament on these weaknesses of his favorite breed. His herd was founded in 1881 and in 1887 began the improvement of the Roberts herd. It was at this time that old Criterion 1623 was secured to commence the evolution of the Duroc Jersey. This bear was sired by Bayon 1205 and out of Belle Grinnell 3d 4514. He was bred by Mr. Chas. H. Holmes, one of the early promoters of the famous Cherry Blonches. Good results followed the use of Criterion, yet needed improvements, even on his get, were plainly visible. Criterion was of the compact, deep-bodied type, with a splendid head and ear, short neck, but lacked materially in feet and legs, as well as being slightly off in color. Hence Mr. Roberts saw the necessity of selecting another herd bear that would improve feet, back, hams and give more scale. In 1889 Exchanger 2539 was secured of Mr. Seth Macey, of Colfax, Iowa. Exchanger was Imperial 2d 2267, dam Belle of Chester 2d 6030. Exchanger, while not a handsome animal to gaze upon, worked out for Mr. Roberts the type of brood sows that he was striving to obtain. Here was laid the foundation for the present improved type of Duroc Jersey. The next prominent bear used was Panic 4107, a son of Hoosier King, dam Ivy V. In order to fix and preserve this improved type that wise old head used a bear called Allison 5267. He was a son of Panic and out of Diana, a daughter of the Iowa State Fair prize winner, Iowa Banner 2871. Young breeders may not see the philosophy of using on the herd a son of one of the leading herd bears, but the man who did more to improve the Duroc Jersey to the type of the Poland China than any other living man (Wm. Roberts) saw the advantage of using a bear somewhat inbred in order to fix a type that would not be easily lost. The type being now fixed, Mr. Roberts secured Orion, one of the most shapely Duroc Jersey bears of the Poland China type that was in existence in his day. Orion was a son of Ben Hur H. 4539, Orion's dam being Nellie C. 2d. The Duroc Jersey world needs no enlightenment on the history that has been made by Orion and his sons. In fact, Duroc Jersey circles were shaken from the center to circumference when Messrs. Wm. Roberts & Son went down the line of state fairs, capturing everything in sight with the get of Orion. Later, bears were used of Mr. Roberts' own breeding, perhaps one of the most notable being Lord Roberts. Duroc Jersey breeders have come and gone, but have been little missed; however, the name and remembrance of Mr. Roberts, the founder of the present type of Duroc Jersey, lives on to do honor to the greatest of all men that ever yet engaged in the improvement of the red hog. Messrs. L. H. Roberts & Son have about forty-three brood sows at their home farm adjoining the city limits of Paton, two-thirds of which descend from old Ohio Anna 7th. A representative of this paper spent a day with Mr. Roberts last week in review of the Greene County herd. We found two sons of Ohio Chief, also King of Iowa, in service as herd bears. The crop of about 150 pigs at the home farm give promise of furnishing some valuable stock for fall trade. Arrangements are being made by the present firm to hold the

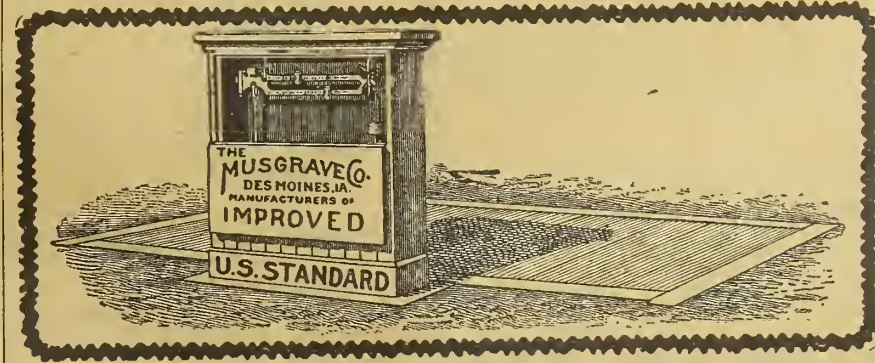

first annual sale under the new name on Oct. 23, 1907. It will consist of yearling brood sows, which are now pigs, and of the type and character that will certainly be great attractions when fully developed. The equipment for handling Duroc Jerseys by Messrs. Roberts is unsurpassed anywhere. The knowledge and experience of Mr. L. H. Roberts in training with his father for a quarter of a century in the swine industry has certainly placed him in position to know how to mold and maintain the ideal type of Duroc Jersey known as the modern hog. We predict the success for the new firm that was so rapidly achieved by the venerable Mr. Wm. Roberts in the building up of the Iowa herd. About fifty good, early spring bears are now ready to be put on the market and will be sold at modest prices, even at farmers' prices for many of them. This paper takes pleasure in recommending the new firm of Messrs. L. H. Roberts & Son.

TEST THIS HARROW FREE TO PROVE ITS GENUINE MERIT.

The American Harrow Company, of Detroit, Mich., offer to let any responsible farmer use their new Detroit Tongueless Disk Harrow a month, to prove the following: That the new Detroit takes all weight off of the horses' necks and leaves them free to pull; that it saves much of the strength of the team by doing away with the tongue which, on ordinary disk harrows, heats up the horses' legs and worries their life out in the turns; also that with this Tongueless Harrow there is none of the "side draft" common with all disk harrows. This is probably the fairest offer ever made to prove the genuine worth of one of the greatest—if not the greatest—improvements ever made in harrows. It will soon be time for fall harrowing, so get your request in early if you want one of these new Tongueless Disk Harrows. Write to the American Harrow Company, 140 Hastings St., Detroit, Mich., for their new Harrow Book. Pick out the size harrow you want and tell them. They will ship it to your railroad station, freight all prepaid—and you can take it home and use it a month to prove their claims for it. They ask you to test it out in good shape. And—if you don't find it as claimed, you can take it back to the railroad station and tell the agent to ship it back to Detroit at the makers' expense. If it is as represented, you can pay for it on time. The American Harrow Company make their terms to suit their patrons' needs. You could hardly figure out a more favorable proposition for yourself, and it is the offer of an old established house that you can depend upon to do just as it agrees. They make a specialty of these Tongueless Harrows, which they sell direct to farmers on the plan outlined above. This harrow improvement was developed in the factory of the American Harrow Company, and, doing away with the tongue and having a front truck to take all the weight of harrow frame and driver, is certainly a wonderful invention. The truck swings on a pivot and in the turns the team is free to pull, instead of having to pry the harrow about as with the old-fashioned tongue disk. Your horses are saved a lot of labor and the amount of harrowing you can do in a day is largely increased. There is a lever to control each section of the new Detroit Tongueless and these you work from the seat. To get one of these Harrows for the month's free approval test, you should write at once to the American Harrow Company for full particulars of their offer. Farmers everywhere are taking advantage of this chance, and, of course, only a certain number of the harrows can be made this season. Write today to make sure of getting one. Address American Harrowing Company, 140 Hastings St., Detroit, Mich.

Nidlinger's Duroc Jersey Sale.

Mr. J. D. Nidlinger's Duroc sale held on Wednesday, August 8th, at Decatur, Ind., brought breeders from Nebraska, Iowa, Illinois, Indiana, Ohio and Kentucky. The quality of the stock consigned to these sales is well known in Duroc circles and the breeders present got good values for their money. Mr. C. E. Kimm, of Blairstown, Iowa, topped the sale, paying \$210 for the yearling boar, J. D.'s Improver 17095. Mr. Frank M. Erschen, of Odell, Ill., being the contesting bidder. This boar was a winner of five ribbons at five shows last year, including the Ohio and Indiana State Fairs. Mr. W. F. Harris, of Morganfield, Ky., topped the female portion of the offering, paying \$200 for the yearling show sow, Grace F. 2d, Mr. W. A. Craver, of Fillmore, Ind., being the competing bidder. Mr. Craver secured an under year daughter of Longfellow that will be heard from at the fairs.

THE MUSGRAVE SCALE.

Experts have estimated that during the life of the average farm scale there are weighed products of the farm, stock, etc., to the value of \$300,000. They also estimate that there is a 5 per cent loss during this time through the inaccurate weighing, either resulting from a poor scale to begin with or the use of a scale which can be manipulated, if any one desires to defraud or practice dishonest methods. Figuring on this basis the 5 per cent loss would equal the sum of \$15,000.00. These figures are startling and demand the attention of every farmer and stock raiser. There is only one way to avoid this and that is to purchase a perfectly reliable scale in every particular. Such a scale is the Musgrave U. S. Standard Farm scale made by the Musgrave Co., Des Moines, Ia., whose advertisement appears elsewhere in this issue. The company guarantee this scale to be made of only the very best material throughout by skilled workmen and each scale sent out must give entire satisfaction to the purchaser in every particular or they agree to take it back and promptly refund any money paid. Write them for descriptive matter and best prices, or call upon them at the Iowa State Fair at their exhibit just to the right of street car entrance.

TOO LATE TO CLASSIFY.

TWO CHOICE OHIO CHIEF LITTERS FOR SALE.

70 Head of the Toppiest Duroc Jersey Pigs.

I AM offering for sale two very choice Ohio Chief litters out of a granddaughter of Echo King and Ar Sar Ben 4th. I also have pigs by Crimmon Wonder Jr., Orion 2d and Leather Stockings, out of daughters and granddaughters of Nebraska Belle, Echo King and other noted sows and boars. I have the best blood lines known to the breed and I have a grand good lot of pigs. If you are looking for herd heads or write or come and see me. I also breed Shire Horses and Aberdeen Angus Cattle. Young stock for sale at all times. Address

W. D. PITTMAN,

LAKE CITY, IOWA.

Holbrook Aberdeen Angus Breeders.

COMPRISING the allied herds of P. J., M. H. and Mike Donohoe and John and Michael Cash of Holbrook, Iowa. 200 head of choice Daddies within a radius of two miles of Holbrook. The International Champion Black Wood Lawn 42088 heads the herd. The following families are represented: Prides, Blackbirds, Ericas, Heather Blooms, Barbaras, etc. Other bulls used on the herd are Wood Lawn Blackbird 1st, Homedale Black Jam and Morning Star 2d. We can supply any class cattle desired. Come to Holbrook and allow us to convince you of this fact. Address any of the above breeders, mentioning this paper.

70 HEAD OF PRIZE WINNING DUROC JERSEYS

ONE of the best sows of Proud Advance at head of herd. A choice lot of boars for sale out of Orion, Crimmon Wonder, Dandelion and American Royal sows. Write me for prices. I can furnish you a boar from the best known strains.

T. A. McMAHON,

CRAIG, NEB.

TEXAS LANDS.

WE WANT a reliable influential farmer in every community to act as our agent for the sale of Texas lands. We own 350,000 acres of the best lands in Texas. For sale on easy terms. Write us for particulars.

Snyder & Yutz, Dwight Bldg. Kansas City, Mo.

SCOTCH Collie bargains for the next 10 days. Beautiful pups. Also brood bitches. Pedigree with sale. Write at once. S. W. HARR, Riverside, Iowa.

She is No. 24 of the catalog and sold for \$100. Messrs. Taylor & Son, of Kokomo, Ind., secured a March boar sired by Hanley at \$152 that will be heard from during the show season. Messrs. Taylor also secured the yearling show sow, Red Silk 39500, at \$100 and were liberal bidders throughout the sale. Mr. Frank M. Erschen, of Odell, Ill., secured Hanley 2d, a half brother to Hanley, both out of the same dam, at \$100. Mr. Erschen was a liberal bidder and secured many good things at reasonable prices. Messrs. Hood & Baker, of Dunlap, Iowa; Mr. Smith, of Panama, Iowa; Mr. Ira Jackson, of West Milton, Ohio, and Mr. Ollie Markley, of Bluffton, Ind., were among the liberal bidders and secured bargains for their persistency in bidding. Colonel Reppert opened the sale with a very strong plea for Duroc interests. He was followed by Colonel Keil, and he by Colonel Luther, who made a very instructive as well as strong talk on the breeding of Durocs. Colonels Carrell and Bowers also assisted in making the sale a success. Below is found a list of animals selling for \$25 or over.

HENS scoring 94 to 96, yearlings, \$1.50, \$2 and \$3 each. 29 chicks from eggs from Fisher's pens. Mrs. L. M. Estes, Audubon, Iowa.

SOUTHWEST

The Land of BIG CROPS and PROSPERITY

Are you making as much off your farm as you ought? No doubt you are making all you can. The trouble is the land costs too much. It takes too much money to buy a big farm, and so you are trying to make a living on a small farm, or perhaps you are renting one and paying a good share of what you raise, in rent. Wouldn't it be better to go where the price of good land is so little that you can own a big farm—where every acre of ground is working for you and all you raise is paying you good profits?

There are thousands of acres of fertile land in the Southwest along the line of the Cotton Belt Route that can be bought for from \$3 to \$10 an acre. This land is increasing in value each year.

See the Southwest at Small Cost

A trip to the Southwest would convince you that your best interests lay in settling there. The trip can be made at very little expense. On the first and third Tuesdays of each month you can purchase a round trip ticket to any point in the Southwest on or via the Cotton Belt Route at very low rates. Stop-overs will be allowed for you to examine any locality you are interested in.

Write at once for free copies of books describing this wonderful country and for full information about cost of tickets, etc.

L. E. SAUPE, T. P. A., Cotton Belt Route, St. Louis, Mo.

640 ACRE FREE HOMESTEADS
IN WESTERN NEBRASKA

This is an opportunity that will not last long and is worth investigating.

WILL HELP YOU LOCATE—I am employed by the C. B. & Q. Ry. Co. to help intending settlers find desirable free Kinkaid homesteads. More than 1,000 persons have made land filings in western Nebraska during last three months. Best lands are going fast.

SPECIAL OPPORTUNITIES—Lands that are NOW BEING CANCELLED on reports of the Special Agents of the Government are generally desirable homesteads. I keep track of all of the cancelled lands for the benefit of the patrons of this Bureau.

NEXT EXCURSIONS—I will personally conduct excursions as follows:

- TO WHITMAN, NEB., AUG. 21, 1906.
- TO SCOTSLUFF, NEB., SEPT. 4, 1906.
- TO ELLSWORTH, NEB., SEPT. 18, 1906.
- TO MULLEN, NEB., OCT. 2, 1906.
- TO HYANNIS, NEB., OCT. 16, 1906.

at which times I will have with me township plats showing the homestead land in those localities.

RATES—Very low round-trip homeseekers' excursion rates to all points in western Nebraska.

NEW FOLDER FREE—Write today for our new folder with map of Nebraska, telling all about the 640-acre free homesteads, what the lands are valuable for, and how to acquire title. Address

D. CLEM DEEVER, Agent Burlington Route.

Homeseekers' Information Bureau,

1004 Farnam Street, OMAHA, NEB.

Fred Schweizer, Elwood, Ill.

ROSEMARY DUROCS.

OLD Finch, champion International 1903, heads of herd, 75 extra good spring pigs sired by him for sale at reasonable prices.

HARRY RIGGIN, PETERSBURG, ILL.

OAKWOD DUROCS.

CHICAGO Lad 12367a heads herd. An excellent lot of pigs sired by this prize winning boar for sale. Also good litter by Proud Advance. Address,

G. T. ROGERS, PETERSBURG, ILL.

150 SPRING PIGS 150

25 HEAD of fall gilts, either bred or open, sired by Kant-be-beat, recently sold for \$2,500. Top Notcher's 2d Last, Golden Rule, Veribest and other noted boars. We breed the winners. Home and birthplace of more World's Fair Champions than all combined. Write for prices and descriptions, mentioning The Homestead.

WATT & FOUST, CEDARVILLE and XENIA, OHIO

A CHOICE LOT OF PROUD ADVANCE PIGS.

I HAVE the best lot of Duroc pigs ever sired by Proud Advance. Also have pigs by Keep On II, the Iowa State Fair prize winner. A choice lot of pigs by other boars also. Now booking orders for September delivery. Don't overlook me if you want the best. Address,

GRANT WHITE, AFTON, IOWA.

STONER'S DUROC JERSEYS

200 SPRING pigs sired by Stoner's Improver, Advance Col (one of the best sons of Proud Advance), Ohio Ben, he by Chief Surprise and other noted boars of the breed. Write your wants. Description guaranteed.

T. W. STONER & SON, HENRY, ILLINOIS

CRIMSON WONDER I AM | SOWS and gilts bred to this great sweepstakes boar for fall farrow.
U. G. Davidson, Manson, Iowa.

The "Nancy Herd" Durocs } Boar sale November 8. } Pigs by Orion, Junior Jim, Critic's Eds.
} Sow sale February 25. } Inspection invited. 125 pigs. Write us,
W. A. STAPLES & SONS, GLIDDEN, IOWA.

WON more prizes at Indiana and Ohio state fairs 1905 than any other Duroc herd. Stock reserved for public sale August 8.

J. D. NIDLINGER, DECATUR, INDIANA.

UNGLE'S HOGGETTE, THE HOG REMEDY,

IS a preparation easy to feed and the best corrector on the market for hog troubles. It is strongly endorsed by such breeders as John Blain, Pawnee City, Neb.; T. J. Coughdon, Pawnee City, Neb.; J. O. Hunt, Marysville, Kan.; Geo. Briggs & Son, Clay Center, Neb.; G. Van Patten, Sutton, Neb., and many other good breeders. Herds visited at \$5.00 per visit and expenses. Wire or address,
Phone F-336. THE UNGLE'S HOGGETTE CO., 1525 P. St., Lincoln, Neb.

Sutter's

GROWTHY DUROC fall males got by Neb. Wonder, he by Crimson Wonder are now ready to ship. Write me. WM. SUTTER, Liberty, Neb.

PIONEER HERD DUROCS.

ECHO King 18415 and Royal Top Notcher 23639 at head of herd. We have a limited number of sows left bred to the above boars and Sire Winner. If you want the tops come to us; we have the best. Correspondence promptly attended to. Address, Arch Brown & Sons, Waterloo, Nebraska.

THREE GOOD DUROC JERSEY BOARS FOR SALE.

WE will sell our splendid show and breeding boar, Pericles H., also one good yearling and one good fall boar. These are bargains if taken soon. Address,
Norris & Bevington, Klingsley, Ia.

Rankin's Ohio Chiefs

I HAVE pigs by Ohio Chief, and a son of the sweepstakes boar, Gold Dust Jim, out of the best sows known to the Duroc Jersey breed. Address,
W. A. RANKIN, CARSON, IA.

ALFALFA MEADOW HERD OF DUROCS.

I HAVE some nice fall gilts by Van's Perfection; 11571; some tried sows bred to Royal Prince 41911, that raised good litters last spring and are due to farrow in September, and a few fall boars by Van's Perfection and Jumbo Chief 19589, for sale.
F. ALDRITT, FRIEND, NEBRASKA.

Nothing for Sale Now.

SOMETHING over two hundred pigs comprise this year's crop. They will be ready to go out after September 1st. Correspondence invited. Inspection desired.
E. Z. RUSSELL, BLAIR, NEB.

OHIO CHIEF DUROC BOARS

FOR SALE. Also pigs by Keep On, third prize boar at Des Moines; Proud Advance and W. L. A.'s Choice Goods. Write at once.
F. A. STRONG, ORIENT, IA.

DUROC JERSEY HOGS.

MAPLE AND LAWNSDALE DUROC JERSEYS.

HOME of Big 1 Am and Hambletonian, the two 800lb. boars assisted by Proud Advance and Veribest. Our spring pigs are moving out and will weigh 125 pounds, just in growing condition, sired by big 1 Am, Tip Top Notcher, Perfection Chief and other herd boars. Also Scotch Collie pups ready to work. Write for description and prices or come and spend a day with us and see what we have. Free livery. Fall sale Oct. 26, bred sow sale Jan. 30, 1907.
Manlove Bros. & J. H. Norris, Bowen, Ill.

Fall Sale Oct. 31, 1906. Spring Sale Feb. 6, 1907.

HOME OF

THE La. For Me 10733A and his daughter, Helen Blazes 64502, the dam of the \$1,000 gilt and the \$1,910 litter, and Lib C. 67204, dam of the first prize litter at Illinois State Fair, 1905. Choice pigs of fancy breeding. Prices in keeping with quality. A great variety of the very best breeding. We guarantee satisfaction. Visitors welcome. Farm three-fourths mile from depot. Fagin, Browning, Hess & McCabe, Hersman, Ill. Sale Average \$116.48.

HIGHEST DUROC AUCTION AVERAGE.

HOME of Kant Be Bent, the \$2,500 boar, 57 firsts and sweepstakes prizes out of 59 showings, the undisputed king of sires of prize winners. Long line of sweepstakes, prize winning and producing dams, 125 spring and fall gilts and boars, sired by Ohio Chief, Pericles, Red Knight, Morrison's Bell Top, Junior Jim and Crimson Wonder. Fall sale October 16th.

JOHN M. MORRISON & SONS, COLLEGE VIEW, NEBRASKA.

12 GOOD ORION BOARS

FOR SALE. These are out of some of our very best Duroc sows and it is about the last chance to get an Orion boar. Write quick if you want one.
MANLEY & CO., LYONS, NEB.

A Few Good Duroc Jersey Boars For Sale

MINNISON'S Perfection, a son of the sweepstakes boar, King Perfection, and Orion's Model, a grandson of Old Orion. Also a few young boars. Write me at once. Address,
J. E. WEHR, PORTSMOUTH, IOWA

Shamrock Herd of Duroc Jerseys

OF Prize winning sires and dams. Have a few boars left and some sows and gilts.

F. M. ERSCHEN, Odell, Illinois.

WALNUT GROVE DUROCS.

I HAVE about 75 pigs for the fall trade. They are of the large, roomy type, representing the blood of Improver II, Higgin's Model, Jumbo Perfection, Bell's Model, Bell's Top, and others. Watch for my fall sale October 20th.

HENRY G. WARREN, INLAND, NEB.

Minnesota's Prize Winning Duroc Jerseys

I WON eight 1st and eight 2d prizes and all the sweepstakes at the Minnesota state fair in 1905. The leading strains in herd: Orion, Top Notcher, Proud Advance, Tolstoy and Crimson Wonder 100 pigs. Good ones. Write me your wants. Prices reasonable.

Wm. Malcolm, Bigelow, Minn.

CHOICE OHIO CHIEF PIGS

WE have a choice lot of pigs by Ohio Chief, Alfr Advance (a son of Proud Advance), Iowa Lad, a grandson of Higgins' Model, and Brilliant Advance. We have the good ones. Write us at once.
A. L. & U. S. G. Lynch, Mt. Airy, Ia.

MAY & PORTER,

REMINGTON, IND.

MAYOR'S CHIEF 40727 and Top Notcher Best 37685 head herds. An excellent lot of pigs of spring farrow to select from. Write for prices. Inspection invited.

DON'T READ THIS

UNLESS interested in good pure bred Duroc swine or Barred Plymouth Rock chickens. Write your wants when on the market. Address,
Roy Stacy, Rochelle, Ill.

Smith Brown's Duroc Jerseys

THE home of the winners. 125 pigs by Echo King, Red Chief 1 Am, Crimson Wonder 2d, Waterloo Prince and other well known boars. I have the pigs this year; if you want a good one write me. Address,
SMITH BROWN, Waterloo, Neb.

ROSE HILL DUROCS. Good ones. 3 sows brought \$1.

300, 130 pigs for season's trade, from 3 best boars of breed Jr. Jim, 1st prize last Neb. state fair, Arion winner Des Moines and Lincoln 3 yrs. In succession and Long Alfr. Litter bro. to Alfr II. Size, bone, back, color my specialty. Visitors welcome. Phone. 3 miles west of city. Austin Renshaw, Blair, Neb.

WATSON BROS., CRESTON, IA.

200 DUROC JERSEYS, out of Orion Proud Advance and Advancer sows. Pigs by Proud Advance. Keep On and Addy's Choice Goods. Public sale, October 3d.

E. E. ETTER, UTICA, NEBRASKA.

BREEDER of up-to-date Durocs. 2d Surprise's 5th Redeemer and a son of Duroc Challenger and Minerva C 2d head my herd. Sows represent the blood of the Challengers, Glendale Critic, Improver II, etc. Have a few fall pigs that I will price right. Write me.

A SMALL HERD OF

SHORT-HORNS FOR SALE

INCLUDING my Crickshank herd bull Red I had 145102, and 10 or 12 cows and heifers. These are bargains if taken soon. Write me quick.
DELMAR McCANN, Kennard, Nebraska.

ENTERPRISE HERD DUROCS

CHOICE spring males by live prize-winning sires for the season's trade. I am now booking orders for future delivery. Address,
A. E. FOUSH, CHARITON, IOWA

Prolific Herd of Duroc Jerseys

I AM offering some very promising male and female pigs sired by Billy K., Meadow Forty Kings, Billy K. Jr., and Frank's Choice by Belle's Echo. Can give you good herd headers at prices to suit purchasers. Address, G. Van Patten, Sutton, Nebraska.

GRANT HERD DUROC JERSEYS.

I AM now ready to book orders for delivery after September 1st. Carl Hansen, Herman, Neb.

THE LONG HOURS ON THE FARM.

The following communication has been received from one of our subscribers, Mr. H. L. Kelley, of Bremer county, Iowa:

In an editorial published in your paper of recent date I note the following: "Few will win out in the future on the old plan of working from 5 o'clock in the morning until 8 or 9 in the evening unless it be at exceptional times when a rush of work is on," and citing some of the best farmers as having chores all done at half past 6 so everybody could have a long evening to do as they pleased.

It seems to me that there are several reasons why such a plan would not be practicable for a man who had rent or interest to pay and a family to bring up and educate, and I must confess I can see very little to be gained by it. In the first place, we cannot hire help as cheaply as we used to. I can remember a few years ago when farm hands could be had for from \$160 to \$175 per year, while now they are getting from \$260 to \$275 and a horse kept besides. In the second place, we have to furnish and keep in repair more machinery than formerly, and it takes more horses to run it and consequently more time must be spent in caring for the horses. This same labor-saving machinery makes farm work of such a character that it is no hardship for a man to work long days (from 5 in the morning until 8 or 9 in the evening, if you please), and why shouldn't he? What excuse can a man have for not working up to his full capacity?

The hired men who are really worth having are not the ones who are looking for a soft snap, but are perfectly willing to work as long as the boss does, just so they get good wages; and the boss who doesn't have interest enough in seeing things move to want to work from 5 in the morning until 8 or 9, or even later, and do it all summer, is not a successful farmer, although he may appear so. The chances are that this 6:30 man got his start from someone who did work long days or else he got it by sharp, not to say dishonest, practices.

Now, two hours a day means one day a week, and if we pay a man for all his time, why should we have to give him one day of each week to keep him good-natured, besides furnishing him with all appliances to make his work lighter? What benefit would it be to him anyway if he spends his time loafing around town, smoking, drinking or gambling, or if he goes to dances, or even if he doesn't do anything worse than stay at home and read the murders and scandals in the daily papers? He is far better off physically, mentally and morally to be at work. To be sure, he may spend his leisure wisely, but the hane of these times is not too little reading, but too much, and too little thinking, and if a man really wants to improve his mind by good reading he can read enough in half an hour to keep him thinking all day.

So here's for the long day on the farm, with everyone busy and happy in the consciousness of doing with our might what our hands find to do. Surely a life that is not a battle is not worth living, and really if that 6:30 man lived in this neighborhood we would call him for want of a better name, "lazy."

We acknowledge that there are two sides to this question, and, indeed, we are free to confess that it is sometimes very difficult to keep up with the work unless long hours are put in every day. The complaint is here made that while formerly men could be obtained for \$160 a year, they are now receiving at least \$100 more than this. In order to earn this extra amount and also a profit on same, it is contended by Mr. Kelley that the hours must be long, every day's work extending well into the evening. It should be understood that one reason for the increase in wages is the long days on the farm as compared with the city. Men are attracted to centers where the work day is shorter and thus leaving a scarcity of men for farm work, and consequently an increase in wages. It is true that there are a number of other factors that enter into this equation, causing the rise in wages, but this is one of them.

Our thought in advocating more regular hours and shorter days was to equal-

WHERE THE NEW MOLINE WAGON IS MADE.

The best effort of 500 masters of the wagon maker's craft have combined to make the New Moline wagon a marvel of combined strength and lightness. Gearing of select hickory and tough white oak, a box with yellow pine bottom, grooved and matched, all parts ironed, braced and strongly reinforced, combine to produce a wagon that is the farmer's delight and to which he has given the name "Ironclad." The Moline Wagon Company will send to any farmer who will write for it a wagon book full of valuable information about how wagons are made—facts which every successful farmer, being from necessity his own master mechanic, desires to know. Homestead readers would do well to write the company at Moline, Ill., for a copy of the wagon book. It will be sent to you free, postage prepaid.

ize matters and thus, if possible, make farm life a little more attractive to those who are obliged to "work out" and also for the growing boys and girls. The making of money should not be the only end in view, and while we are all anxious to realize good profits on our investments and good wages for our work, at the same time it is not difficult to find men who are wealthy and yet who are driving all the forces on the farm at the rate of fifteen and sixteen hours a day. In too many cases such men find that when the boys grow up they do not take to farm life. The real cause of the desertion of the farm may never be known, nevertheless the long days are responsible for much of it.

THE BREEDER'S REPUTATION.

The breeding of pure-bred live stock with the average man who is engaged along this line is a serious business proposition. From the very beginning, careful investments must be made, and the herds or flocks must be handled in such a way, so that they not only pay their way, but also pay a profit on the investment and on the labor utilized. The man who runs a breeding farm as a side issue to some larger proposition is in a position to pursue quite a different policy, and to him these words are not addressed at this time.

While we believe that stockmen are as careful, and even more so, of their reputation as are men in any other calling, yet examples loom up occasionally which indicate that too large a percentage of breeders do not realize that the reputation they create for themselves may be made a valuable asset. It is by no means uncommon to find cattle, for example, selling for 25 per cent higher at a sale of an old-time reputable breeder than the same animals would bring on the farm of a beginner or even an old-timer who has failed to fix in the mind of the public that a square deal is always assured. This, then, is an asset, not merely in the matter of fame, but in cold dollars and cents.

Our suggestion to those who are beginning the business would be to suppress their anxiety for a time to plunge immediately to the top as a "big" breeder. If you are handling hogs, it matters not how well your breeding animals may

be bred, or how well they are cared for, they should not all be sent out for breeding purposes, no matter how keen the demand. We recently heard a very reputable swine breeder make the statement that in his opinion not more than 40 per cent of the pure-bred pigs raised should be used by anybody as breeders. His practice for thirty or forty years had been to send to the meat market more than half the number raised, and the result is that this man has no difficulty whatever in always disposing of his good ones at prices considerably higher than the average. This is reputation of the right kind, and the individual we have in mind is making more money today, and has been for the last quarter of a century, than would have been the case had any other policy been adopted. In carrying out the doctrine of the Golden Rule, one incidentally employs the very best business principles.

It would not be surprising if much of the disease that is found among hogs is directly traceable to the practice of breeding from animals that should never have been used for breeding purposes. In many cases these may come from established herds, and there may be no dishonest intention in sending them out, but this is not the way to build reputation. There are plenty of herds today in the corn belt that are noted for their constitution and stamina, and all animals purchased from such herds may be depended upon as begetting thrifty, hardy stock. If beginners can be induced to employ sound principles, we believe that it will only be a matter of time when to a very large extent disease could be stamped out, and, as said before, that is after all the most profitable line of business to operate along live stock lines.

SAVING THE STRAW.

Enough thrashing has already been done in the corn belt to indicate that there is likely to be an immense amount of straw wasted during the coming year. Since the introduction of the modern stacker, the practice of hand-stacking has almost become a thing of the past. As a result you will find rot heaps dotted here and there throughout the entire central West.

We are willing to give the new stack-

ers all the credit that is due them, and believe that their introduction is a real benefit to grain growers. It is not their fault if men do not use them wisely. Our experience is that two good men, where a blower is used, can put a straw stack in such shape that it will turn water until the straw is used, providing it is not kept over another year.

Because straw has little commercial value out on the farm is no indication that it is not valuable to the farm itself. The reason why a farmer cannot dispose of his straw for anything like a reasonable cash price is that its bulkiness interferes with shipping. Pressing, of course, partly solves the problem, but this means labor, and labor is high.

While there is much less straw wasted now than when the country was new, yet there is too much wasted still. It can be put to such an excellent use in bedding down yards and stables during the fall and winter months that it is surprising to see how sparingly it is used. It takes labor, of course, to put it where it is wanted, but the additional comfort of animals that are well bedded contributes to the thrift, so that there is this value added to its manurial value.

As an absorbent to be used around stables it is ideal, and as liquid manure is always rich in fertility elements it pays to save it. If you will think the matter over, you will find that the man who utilizes all his straw around his stables and yards year after year is the individual who is growing large crops.

It is specially important that plenty of straw be used around hog quarters, notably fattening hogs. If this is not done, one can scarcely expect to get much benefit from the manurial standpoint from the feed consumed by hogs.

SUPPRESSING TUBERCULOSIS IN CATTLE.

Most of our readers will remember that some excitement prevailed among breeders of pure-bred stock a year ago over the prospect of having laws passed which would result in the slaughter of all cattle that were found to be tubercular, as indicated by a reaction of the tuberculin test. The scare has to a large extent subsided, but tuberculosis has by no means been wiped out. What is known as the Bang method for handling tuberculosis is likely, if put into practice, to free the herds of America from this disease. The object of this method is to replenish a tuberculous herd with as little loss as possible. It requires that all animals that show physical symptoms of the disease shall be destroyed. Those that give a tuberculin reaction but which exhibit no evidence on physical examination of being tuberculous, are isolated. They are still kept for breeding purposes, however. The reacting animals are carefully watched, and if any of them develop obvious symptoms of disease they are isolated.

In Denmark it was found at one time that 35 per cent of dairy cows were tuberculous according to the tuberculin test. In order to replenish the herds with healthy cows before the total destruction of the reacting animals, the following plan is put in force:

1. A herd is tested with tuberculin. The animals that are in a bad condition are slaughtered. The re-acting animals that show no physical evidence of the disease are isolated. They are kept for breeding purposes.
2. The offspring from the reacting cows are promptly removed from their dams and fed milk from non-reacting cows, or the pasteurized (heated to a temperature of 185 degrees Fahrenheit) milk from the re-act-

ing ones. The milk of the isolated cows after pasteurization is also used for human food.

3. If any of the isolated cattle give evidence of the disease advancing, such as enlarged glands or emaciation, they are slaughtered.

4. The non-reacting animals are tested from time to time and if any individuals react they are placed with the isolated ones.

5. The calves that are raised from the reacting cows and which fail to react to tuberculin are placed in the sound herd.

As the herds were replenished the isolated cattle were fattened and killed. In this way the people of Denmark have been able to greatly reduce the high percentage of tuberculous cattle and at the same time minimize the loss they formerly sustained by the frequent death of diseased animals.

The Wisconsin Experiment Station have put the Bang method to a practical test. In 1896 this station started with a herd of sixteen reacting animals and eighteen healthy ones. In 1899 they had twenty-seven healthy ones, all the progeny of tuberculous cattle.

It will be seen from this that tuberculosis may be present in the animal's system and yet the animal may give birth to a perfectly healthy calf—one apparently not even predisposed to tuberculosis. Of course under no circumstances is it permissible that the calves shall be given unsterilized milk from tuberculous cows, and when this principle is complied with, the cows may be bred year after year just as if they were healthy. Eventually they go to slaughter and may even then be utilized for meat, providing the disease is confined to certain members of the internal organs.

On this rational basis it would appear that breeders of pure-bred cattle in America should favor the passage of such laws as will aim to stamp out this disease, to the end that there shall in the future, as was the case in Denmark, be less loss from tuberculosis and that the danger of communicating the disease from animal to man shall be practically stamped out.

THE HOMESTEAD "AT HOME."

The Homestead is always "at home" when the farmer whose name appears upon its rolls of subscribers or advertisers pulls its latch-string. Primarily our subscribers, now a vast army of the competent and prosperous farmers of the corn belt, and secondarily our advertisers, have made possible the growth of this great and growing journal of practical and scientific agriculture; and the friendship and appreciation we owe to these supporters of our enterprise are always uppermost in our minds and hearts. When a farmer or his wife or children, or better yet, when a farmer and his entire family come to see us, it affords us one of the greatest satisfactions of our lives to express the greetings to which such friends are entitled. Any occasion which brings these friends to us in large numbers is especially welcomed and heartily appreciated.

One of the chief of these occasions is the yearly Iowa State Fair, which is always attended by thousands of Homestead subscribers from Iowa and surrounding states, hundreds of whom invariably take advantage of the fair to visit our plant and acquaint themselves with its methods of management, its interesting mechanical equipment, and the sights incident to the production and distribution of a large publication; while hundreds more make a rendezvous of our pavilion on Newspaper Row on the fair grounds, stopping to rest there or chat with friends, or leave their parcels for safe keeping.

Speaking to all our subscribers, whether personally known to us or not, we wish to emphasize what has been said heretofore in welcoming them one and all to our building at 301, 303 and 305 West Locust street and to our booth at the fair grounds. Members of the Homestead staff will be detailed to welcome you at either place at all times during fair week; and if we do not succeed in making you feel at home it will not be because you are not most cordially welcome, but because of our inability to serve you according to our desires.

The Homestead plant, the largest in the world devoted exclusively to the printing and distribution of agricultural papers, is now housed in a building three times the proportions of our old office. Our great perfecting press and other modern machinery constitute one of the most interesting sights of this flourishing western city. Our electrotyping plant, our type-casting machines and the equipment of our mailing department are pro-

nounced by experts to be equal to any in the world. We want you and your friends to come and see them, and, if there is anything about them which you do not understand, we trust you will feel free to ask all the questions that may occur to you. They will all be cheerfully answered, with the feeling that it is quite as much of a favor to us for you to come and see us as it is for us to show you how The Homestead is made.

Our pavilion at the fair grounds is to be considered more yours than ours. Do not hesitate to make it your headquarters. Make it the meeting-place for yourself and friends; leave your lunch-baskets, wraps, packages, umbrellas, etc., there during the day without charge, taking our checks for their return. If we can serve you by giving you information or otherwise, do not fail to command our best endeavors.

In short, it will be the aim of The Homestead management to add in every practical way to the comfort and enjoyment of your outing at the fair. You will confer a real favor upon us by giving us this slight opportunity to serve you as one of the members of its great family.

DESTROYING MUSTARD WITH CHEMICALS.

The period of growth of wild mustard is over for this year, and in too many instances the crop has been allowed to seed. This means trouble for years to come, as the mustard seed is somewhat oily in its nature and because of this remains in the soil for almost any length of time without losing its power of germination. Although an annual, mustard is one of the worst weed pests that grows in the central West.

The University of Wisconsin has been conducting experiments to ascertain the value of iron sulphate as an agent of destruction to the mustard plant. Professor Moore, of that station, has prepared the following statement concerning the use of this material in destroying mustard:

The material used was a 20 per cent solution of iron sulphate, which was placed in a mounted tank and pulled by one horse. From twenty to twenty-five acres of ground can be covered by the sprayer in a single day. The Platz sprayer, imported from Germany, was used for the work. With hose attachment it will cover a strip of ground twenty feet in width at a single spraying.

To make the solution, empty a 100-pound sack of granulated iron sulphate into a fifty-two-gallon barrel (kerosene or vinegar barrels are generally gaged for fifty-two gallons), and fill with water; stir vigorously for a few minutes until sulphate is in solution. The solution can be put in spraying tank and used immediately or kept in cask until the desired time for using.

The iron sulphate solution is not poisonous and can be readily handled without fear. White clothing coming in contact with it will be discolored, but not burned.

The test should be made on a calm, bright day after dew has disappeared, as the work is more effective if the solution is put on in warm sunlight. Where rain follows the spraying within a few hours, the extermination of the mustard will not be so perfect.

In tests made where rain followed sixteen hours after spraying the mustard was found to be destroyed. Where it rained two hours after spraying no less than 50 per cent of the mustard plants retained sufficient vigor to produce seed. The following day after spraying, the tips of the blades of grain were somewhat blackened, but no detrimental effect could be noticed to the crop or grasses seeded with the same two weeks after spraying.

Daisies, cockle burs, bind weed, rag weed, sheep sorrel, yellow dock, and many other weeds were partially or wholly eradicated from the fields where tests were made for the extermination of mustard.

The grain fields should be sprayed when the mustard plants are in the third leaf or before the plants are in blossom in order to have the spray do most effective work.

Iron sulphate can be purchased for about \$11 per ton in small quantities, and in bulk for considerable less. One hundred pounds of iron sulphate will make sufficient solution of the proper strength to spray approximately one acre.

In the eradication of mustard, the treatment of the Canada thistle by similar process was also included, although the season was advanced and the thistle too far developed to make the tests final. But even under the adverse conditions the thistle yielded to the destroying effect of the treatment. It was shown fairly conclusively that earlier treatment with sulphate of iron, when the thistle was not so far developed, would absolutely destroy it.

The Canada thistle, unlike mustard, is a perennial and propagated by roots and seeds and therefore would require treatment every year for several years in order to eradicate and finally clear the fields. But it was shown that one application of sulphate of iron spray, in the same manner and at the same time as applied to wild mustard, would kill the Canada thistle for the season, thus preventing its further drawing upon the soil, seeding and consequent distribution to the fields.

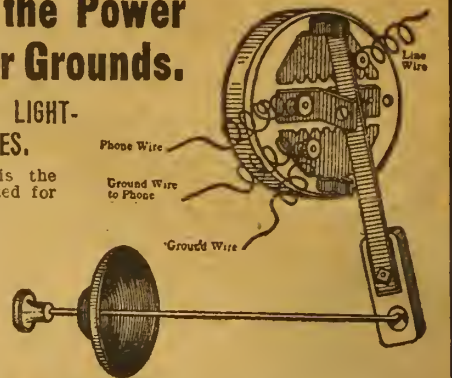

Attention is simply called to this matter at this time so that those who are troubled with this pest may be in better shape to destroy it in the future than in the past. By the chemical method, one can prevent the mustard from

Come and See Us In the Power Hall On the State Fair Grounds.

WE CAN SHOW YOU HOW TO KEEP LIGHTNING OUT OF YOUR TELEPHONES.

Our "No Risk" Lightning Arrester is the most wonderful instrument ever invented for keeping lightning out of the telephones. By using our arrester you at once insure your home and family from the deadly lightning stroke which so often enters the house over the telephone with the most disastrous effects. We want you to visit us at the fair sure, but if you do not come, just write for our little booklet. We guarantee your telephones against lightning. It will save you money.

W. E. ASHBY TELEPHONE CUT-OUT CO.,
101 SQUARE ST., CHARITON, IOWA.

going to seed, and at the same time allow a cereal crop to mature. Rather than allow the soil of the corn belt to become infested with this pest, we believe that the cost of spraying materials, as well as the labor involved in applying it, is a matter of secondary consideration, providing the chemicals will do the work. According to Professor Moore's statement, iron sulphate is very effective, and not unreasonably expensive.

MISSOURI STATE FAIR.

Possibly our readers are aware of the fact that the board of directors of the Missouri State Fair have just completed one of the finest live stock pavilions that can be found anywhere in the corn belt or out of it. This pavilion is 187x237 feet, built on solid concrete foundation with vitrified brick walls, tile roof and steel truss supports. The arena is 125x175 feet and the seating capacity is 12,000. This pavilion will add much to the comfort of sight-seeing this year. The fair, as has been previously announced, will be held from September 29th to October 5th. This change of date, as compared with former years, gives promise of bringing out a mammoth agricultural exhibit. Practically all crops at that time of year will be mature and may be shipped and installed with the reasonable expectation of their keeping in good condition.

The live stock entries indicate that the Missouri fair will be larger than ever before, as many of the important herds will land there before going to the American Royal, at Kansas City.

Many interesting features have been added during the last year. For example, the National Saddle Horse Breeders' Association offers a solid silver cup valued at \$100, for the best saddle under two years old exhibited at the fair. A number of good ones from Kentucky have already been entered in this class. Another interesting feature includes a display of hand-made blacksmith work. The directors of the fair believe that the country blacksmith with his anvil, furnace and hammer must ever be an important figure among agricultural people. Liberal prizes will be offered for the best exhibit along this line.

Persons desiring further information concerning the exhibition of agricultural products or products of any kind should communicate with Sec. John R. Rippey, Sedalia, Mo.

KANSAS CROPS.

The Kansas State Board of Agriculture recently issued a statement of the acreage and probable yield of winter wheat in Kansas in 1906, and the acreage and condition of the growing corn, as reported on Wednesday, August 8. It says:

Wheat—The year's yield of winter wheat, as stated at this time by the men who have grown it, and who are now thrashing and marketing it, is 91,385,676 bushels, a very large proportion of which is of more than the usual high quality. The average on the entire area sown is given as 14.7 bushels, but the government report issued August 10th estimated the average yield per acre at 15.3 bushels. The year's crop, as reported at this time, is 20 per cent larger than that of last year, 41 per cent more than the 1904 yield, and is the state's second greatest. No figures are given as yet of the year's production of spring wheat, but the yield from its largely increased area will add considerably to the state's total wheat output. While the winter wheat yield reported is a careful approximation that doubtless will answer every practical purpose it should be understood that the figures represent but a preliminary estimate by correspondents, and are, of course, subject to such amendment as the more complete thrashing returns seem to require in November. Recent rains that have been so beneficial to corn have delayed thrashing in many neighborhoods, and in some portions more or less damage is reported from the

sprouting of wheat, much of which is yet in the shock. In line with advices last fall the probable area sown to winter wheat was placed at 5,900,000 acres; in their conservatism the board's reporters somewhat underestimated, as the returns of assessors from 104 of the 105 counties showing an increase of about 214,000 acres, making the state's total area in winter wheat 6,214,000 acres, from which this year's crop was harvested. Assessors also report 197,088 acres in spring wheat, an increase over 1905 of more than 20 per cent, 335 per cent greater than in 1904, and the largest since 1893. In 1904 thirty-three counties had no spring wheat; this year the number is five. In the more western and northwestern counties considerable macaroni wheat is reported as having been sown, which may in a measure account for the marked increases there in the past two years. The area of wheat (winter and spring), sown for the 1906 crop was the greatest in the state's history, or 110,048 acres more than the next largest, in 1902. The area sown to winter wheat for the crop of 1902, however, was greater than that for this year's. Present reports indicate that, owing to the favorable soil conditions now almost uniformly existing, this fall sowing will be on a scale never before equaled, only eight counties reporting decreases. As to this year's yield, twenty-nine counties raised more than 1,000,000 bushels each, and eleven counties exceeded 2,000,000 each. Barton leads, as last year, all the others, with an aggregate of 4,615,352 bushels; Sumner next with 4,390,665 bushels, while Reno takes third place with 3,862,145 bushels. The larger yields per acre are in the eastern third of the state, Nemaha county leading with thirty bushels, closely followed by its neighbors, Brown and Atchison, with twenty-nine and twenty-eight bushels, respectively; the lowest are four bushels in Ellis, and five in Lane, Rush and Hodgeman. In the past ten years Kansas has raised wheat crops aggregating 706,000,000 bushels, and in three of those years the state has to her credit yields of more than 90,000,000 bushels each—a record that stands without a parallel.

Corn—The area planted to corn is 6,562,556 acres, using last year's figures for the one county whose assessors have not yet reported. This is 236,899 acres less than last year. While nearly two-thirds of the counties report present conditions—based on 100 as a satisfactory situation—ranging from ninety to 100 or above, the other third, comprising not a few of the foremost in area of corn, brings the average for the whole state to eighty-eight; the report for June gave it as seventy-nine—a gain since then of nine points. Twenty-two counties report conditions of 100 or above, Harper leading with 115, and the adjoining county of Sumner next, with 109. Forty-five counties range in condition from ninety to 100, making sixty-seven counties with conditions of ninety or above. The lowest condition is fifty in Smith, a county ranking fourth in area planted. Its neighbor on the west, Phillips, standing seventh in area, reports an average condition of sixty-nine; its neighbor on the east, Jewell, second in area, has a condition of seventy-seven, while Republic, adjoining Jewell on the east, and ranking fifth in area, reports a condition of sixty-eight. Marshall county, with the largest area in corn, 204,155 acres, averages in condition eighty-three. Thus it is seen that the state's most noted corn district, of the more central counties of the northern tier, presents a prospect not entirely flattering, but far from discouraging, as recent quite abundant rain in most of these counties is rapidly bettering the situation. The thirty-eight counties with conditions of less than ninety average seventy-eight. Twenty-five counties having one-half of the state's corn acreage report an average condition of eighty-five. In a majority of the 105 counties the weather and soil have been favorable for vigorous growth, and the more or less general recent rains have greatly improved the prospect throughout.

PRELIMINARY CLASSIFICATION FOR INTERNATIONAL.

W. E. Skinner, general manager of the International Live Stock Exposition, Chicago, informs us that the preliminary classification for the 1906 exposition is now ready for distribution. As a number of changes have been made, notably in the sheep and swine classes, it is hoped that all persons who contemplate exhibiting will send, without delay, for a copy.

The Litchfield Mfg. Co. are furnishing a continued story on the "Litchfield Manure Spreader" that should be very interesting to every up-to-date farmer. Do not miss it.

Farm Furrows

Turned by a Practical Farmer.

State fair dates—August 24th to 31st.
Don't forget the fair.

I believe more homes will be equipped with heating plants the coming fall than in any year for a long time. Farmers are living up to their opportunities more and better as the years go by. A house is made comfortable and a home is made better by having a good heating plant.

There is one thing that is staring our county officials in the face. It is that all bridges should be constructed so as to accommodate the traffic of heavy thrashing outfits. It is awful to think of any man losing his life in the manner so often given in papers throughout the country. Let bridges be made strong and durable.

A neighbor has spent so much time in politics this year that his corn has been neglected and the growth has not come up to its possibilities. His corn lies just over the fence. I spent enough time in politics, but did not let anything keep me from doing my duty to my corn. My first duty is to raise corn.

More than twenty acres will be covered with the state fair exhibit of machinery, implements and vehicles. An electric plant is being installed for the operation of all machinery. A novelty will be the manufacture of steel wire on the grounds. All the newest labor-saving farm machinery will be shown this year.

A poultry department is to be added to the equipment of the Iowa Agricultural Farm at Ames. I once sent the dean of the agricultural department at Ames a pen of pure-bred Asiatic fowls, and the students killed and roasted every one of them, at least that is what the dean told me. I remember that the dean at that time was particularly fond of roast chicken. A different condition now presents itself.

I have observed for almost twenty-five years that one never minds the price of binder twine when the crop is generous. Have just heard from a cousin farmer in Indiana that his winter wheat yielded fifty-seven bushels per acre. This wheat grew on a farm that my grandfather opened up from the woods early in the history of the state, say in the '30's. I would just like to grow one crop of winter wheat with such a yield.

The pleasure program for the Iowa State Fair is one of the best. The races will be fine. The music is the best. A strictly high-class and clean vaudeville show will be given every evening, closing with a great fireworks exhibition. Reserved seats can be secured in advance. A special train service for the night crowds will make traveling pleasant and over-crowding impossible. Excursion rates as usual.

I have spent many years trying to convince myself that grain does not sweat in the stack. I have come to the conclusion that if the grain is dry when it is stacked, it does not go through the "sweat," but if stacked damp it will go through what might be termed a "sweat." It is also my experience that the farmer sweats more about stacking than does the grain. The conditions are usually there that will cause him to sweat.

I have often wondered why there was any use made of long, scientific names of plants and things. It may be that scientific terminology is an aid in identification, but what's the use? One man desires to exterminate "old wife," and people are led to believe that he desires to set aside his wife, but not so, that being another name of "heartsease," a very troublesome weed, a weed of the

buckwheat family, and found so abundantly in western corn fields.

Money properly expended will build good roads, but it is observed that in some localities where the most money is available, they have poorer roads. It is applied work that makes roads. Let us have money enough to hire work enough to put the roads into good condition.

The Irishman who said he would rather be a live coward than a dead hero puts me in mind of something just now found in prominence in the press. "How would you like to be dead and own all Russell Sage's money?" Money does a dead man little good. It does a live man little good if unused.

The facilities for camping at the Iowa State Fair are unexcelled. The camping ground, especially laid out, is in a delightful grove of young trees, where every convenience can be had. Thousands of Iowa people annually take advantage of this to spend their vacation living in tents at the greatest fair of the country.

A farmer had engaged to take the kitchen wastes of a large hotel in the city near his farm for hog feed. His hogs began to die, and it was suggested that hogs would not do well on modern viands. But not so; it was the washing fluids and powders that were used in dish-washing that the hogs could not stand.

A farmer, learning that packing house meats had been preserved by the use of sodium chloride, decided to have none of it in his. It is awful to contemplate when packing house men will preserve their meats in sodium chloride, which is only common table salt, after all. I like sodium chloride in meat, but I do not like it to excess.

A thinking man is asking this question: "What would become of this rip-roaring old world, if the boys did not leave the farm?" That's the question, what would become of it? Water will seek its level. Sons of illustrious parentage will rise to their environment. A boy that does not wish to stay on the farm will be of no especial value there.

"Go to the ant and watch his ways." Yes, it has been found that the ant is responsible for the dissemination of the corn-root louse. It collects the eggs of the louse and stores them away in winter, hatching them carefully in the spring. A study of the communistic relations of ants and other insects shows some extraordinary displays of reason and intellect.

Met a friend in town recently who is a resident of the place. He greeted me with the usual compliments of the season, and then said: "I hope the corn is doing all right these hot days. It is so awful hot one can't sleep, but it is all for the good of the corn." It is always safe to believe that corn is doing well when the average city man sweats down one collar a day.

A lady writes me that she was successful in putting up corn in Mason cans last year in the following manner: To nine cupfuls of corn, cut off the cob, add one cupful of sugar, one-half cupful salt, one-quarter cupful water. Cook ten minutes and can while boiling hot. When preparing for the table soak over night in cold water. In canning corn it is essential that the cans be filled as full as possible.

It was my privilege recently to pass by where a number of men were taking exercise in playing a field game known as golf. I observed that the office young men had their sleeves rolled up and their arms and faces were tanned as brown as the skin of an Indian. They wanted to get a healthy color. At the same time the average young man on the farm was wearing gloves to keep his hands white and nice. So there you have it.

A few years ago two widely known dairymen got into a discussion at a farmers' institute about the merit of their cows. One was a breeder of Holsteins and the other kept Jerseys. The Jersey breeder said to the farmers: "If you wish to test the milk of a Holstein cow, just take a ten quart pail, milk it full and place a dollar in the bottom of the pail. If you can readily discern the dollar in the pail through the milk, there

is some Holstein blood in the cow that gave the milk." The Holstein man said: "If you wish to ascertain if there is any Jersey blood in a cow, just place a dollar in a ten-quart pail and if you can get enough milk from the cow to cover the dollar, there is some Jersey blood in the cow." Honors were about even.

Women of Iowa need not fear danger from undue fatigue or excitement while attending the Iowa State Fair, for their comfort and welfare has been considered above all else in the women's rest building and the emergency hospital. From the broad verandas of the rest a fine view of the fair is obtained, and it is an ideal place for weary women and little children to spend a quiet hour. There is a competent matron in charge of the women's building and a doctor in attendance at the hospital nearby. These provisions, especially for women who have come long distances and from the farms insure against danger from sudden illness by reason of over-exertion, and they have come to be greatly appreciated by many of the fair visitors. The seeing of the fair is now a matter of comfort and safety for all members of the family.

DAY BY DAY

Agricola

The damp ground makes it a first-class time to pull weeds in the melon patch.

Now, too, we go through the raspberry canes and prune them. Cutting off the long canes which are reaching to lay hold of the ground causes them to branch cut and we have more places for the berries.

We should also gather the wormy plums under the trees and destroy them. By so doing we destroy the bugs which sting and ruin the fruit. "A stitch in time saves nine."

The abundance of the apple crop is seen in the cheapness of apples at the groceries. It is also seen in the fruit going to waste under the trees.

Thank a kind Providence that black-berry picking is about over. It has been pick, pick, every day, since raspberry ripening. This has been as great a fruit year as any since the civil war.

Agricola is becoming famous. He received yesterday a spike of gladiolus named for him by its originator, Mr. Goodrich, of Luther, Iowa. The gladiolus is charming. Agricola isn't sure that he is.

Little, round muskmelons which look without character bring a dime at the groceries.

The Russian domestic pot seems to be boiling all the time. Morals are not native in Russia. Here comes Gorky to this land, bringing a woman with him who is not his legal wife according to our standards. He has been told so by our own folks and it makes him angry and so he is flinging mud, but somehow nobody sympathizes with the pair.

Our Chautauqua is going on with full attendance. The talent engaged is first-class. We are hearing notables of all sorts, from Chaplain McCabe to a man with trained birds. A good brass band—local—furnishes excellent music.

The progress of civilization can be clearly seen in the growth of music. Good singers are in demand all the time.

When we were on the staff of Gen. P. Edward Connor, of Utah, we were in an Indian expedition. We had a troop of friendly Indians with us. They took a few Sioux scalps. They sang and danced over them night after night. There was no music in it. Our old cow, mother of a herd, bawling, is heavenly, compared with such savage strains. This was in 1865.

Just finished breakfast and I was reminded that Washington and the first Adams sat down to boiled corn beef and potatoes in a room without gas, lamps, stove, carpet, without coal in winter or ice in summer. Franklin said it took him four days to go by coach from New York to Philadelphia, and the driver as they jogged along spent his time knit-

Mr. Edison says:

"I want to see a Phonograph in every American home."

An offer open to every responsible person.

No Money Down!

THE HOMESTEAD

A Practical Journal for the Farmer,
Stockman, Fruit Grower, Poultryman,
Gardener and Housekeeper.

BY JAMES M. PIERCE.

JAMES ATKINSON, Editor in Chief.

ESTABLISHED IN 1855.

Entered at Des Moines Postoffice as second class matter

PUBLISHED EVERY THURSDAY.

SUBSCRIPTION RATES—Single subscriptions, \$1 a year; ten copies one year, \$10, and an extra copy together up of club. In clubs of one hundred or more, 25 cents a year. Single subscription three years in advance, \$2; five years in advance \$3; ten years in advance, \$5. Remit by draft, registered letter, postoffice or express money order. In renewing subscription, use same name and initials as address on paper, or explain why you change. In changing your postoffice address, send the old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

Address all communications and business letters to

THE HOMESTEAD COMPANY,
Des Moines, Iowa.

SOME LIGHT ON THE SEED DISTRIBUTION.

The Annual Year Book of the department of agriculture gives a little information on the character of the service given to the people in connection with the free distribution of seeds. Concerning the improvements that have been made in this service, the report says:

One of the most important tasks which the department has to perform is the securing and distribution of the large quantity of seeds made necessary by the congressional seed distribution. In the earlier work of the department it was the practice to secure this seed, put it up and send it out entirely with a departmental force. As the demand for seed increased and the work grew, it was found difficult to handle the complicated questions involved in this way. For the time the handling of the congressional distribution was placed in the hands of contractors, but this was found unsatisfactory.

The bureau of plant industry was charged with all matters pertaining to the seed work, and for the past four years has been giving special attention to improvements in the methods of securing, handling and distributing. The department has made a special effort to secure home-grown seeds from growers and dealers in the United States.

A special effort has been made in the matter of encouraging bulb culture. While the actual number of miscellaneous vege-

table seeds distributed has increased, the cost of the work has been diminished and the saving effected thereby has been devoted to the purchase, distribution and encouragement of the use of improved seeds of various kinds. A special feature has been made of encouraging school garden work through the seed distribution. Formerly it was the practice to send the same kind of seeds to the cities as was sent to the country districts. Now special arrangements have been made for placing in the hands of senators and members of congress who have city constituents seeds especially designed for encouraging garden work in the public schools. Circulars of instruction have been prepared and issued with these seeds. Special attention has also been given to the securing and distribution of improved forage-crop seed, cotton seed, and other seeds.

It has been apparent for some time that Secretary Wilson has greatly reformed the work of seed distribution. Seed packages are labeled much more correctly than in former years and they are almost always reliable from the germination standpoint. If congress is to continue its liberal appropriation for this purpose it is commendable that the department of agriculture should co-operate to the end that the people shall be given the best possible service for the money appropriated.

Some time ago we took occasion, before congress had made its last appropriation for seeds, to denounce the practice and expressed the hope that the department of agriculture would be given the amount annually used for this purpose to use in other and more important work. The comments afterwards received from our subscribers on the stand taken by us were not all favorable, several expressing themselves as believing that the common people were entitled to some such favor at the hands of their national government. We still maintain that the practice of distributing seeds free has outgrown its usefulness, because it is almost impossible to find "new and useful" seeds for distribution. The resort to the use of common vegetable seeds, promiscuously distributed among those who use them and those who do not, is senseless legislation. We hope that at some future time there will be found sufficient nerve in both houses of congress to vote down forever the practice of distributing free seeds.

A HANDSOME POSTER.

The publicity department of the American Royal Live Stock Show is distributing a handsome colored poster adver-

tising this year's show, which is to be held at Kansas City, October 6th to 13th. The poster is in five colors. The central figure is that of a handsome girl, and is surrounded by a circle of heads of typical animals of the several breeds included in the show. The poster is pronounced one of the most artistic of the series issued by the American Royal.

Special interest attaches to this poster by reason of the fact that it was designed by Miss Cora E. Cowan, of Chicago, daughter of B. O. Cowan, assistant secretary of the American Short-horn Breeders' Association. Miss Cowan is a young artist of decided talent, her work having received much praise from leading artists of this country. Her pronounced success in this, her first venture in the field of poster designing, would indicate that she is destined to achieve prominence in this line of work.

Ten thousand copies of this poster are being sent out to railroad stations, banks, business houses and breeders. As long as the supply lasts, copies will be sent free on application to Jno. M. Hazelton, superintendent of publicity American Live Stock Show, 1710 West 16th street, Kansas City, Mo.

Kansas Weather and Crops.

To the Editor of The Homestead:

Kansas is having her summer now. It has been blistering hot for the past four days, and today has been the hottest of them all. Just how hot it has been, we have no means of telling, as we have no thermometer, but we know it has been just as hot as we care to see it, and at the same time work in the hay field. There has been no breeze, which makes the heat all the more noticeable.

Almost everyone is at work putting up prairie hay. It is fine weather for that as far as curing the hay is concerned. That mowed in the forenoon is ready for the rake and stack right after dinner. There will be no hay put in the stack or mow too green as long as this weather lasts. The crop is an average one—about the same as last year's. It is selling for a good price, and many are baling from the field and shipping. Getting the hay up is being retarded by lack of help. The grass is already at the stage where it ought to be cut to make the best hay. In reality, however, the work of putting it up has just started.

Secretary Coburn has footed up the figures of yields of wheat as reported to

him, and finds that the present estimate of this year's crop is over 91 million bushels. This is 20 per cent more than the estimate made earlier in the season, caused by the grain thrashing out better than expected. There has been only one larger crop raised in the state, but this present one is large enough to put Kansas way in the front rank as a wheat producer. No other state in the Union can come anywhere near us in quantity or quality.

Coburn's report on the corn crop also makes interesting reading. It shows that Kansas is booked for a big crop of corn. There used to be a saying that corn and wheat never "hit" together. If there was a big wheat crop, the corn would be short, or vice versa. This is one of those years when everything "hits" in Kansas. As the Boston paper says, "more pianos for the girls on the Kansas farms."

It is going to take no small amount of disking to work some of the early plowed fields into shape for seeding. From a distance, some of the earliest plowed look like a newly started meadow, but the crab and water grass is yet small and tender, and a good disk will easily turn it out. Should we have two weeks of wet weather, though, it would be more like a meadow than ever, and a disk might not do the work. The air is perfectly still this evening, and it is hot. What we ask for is a puff of northwest wind. We don't need any moisture, but we could use a little breeze here in this corner of the "Windy West."

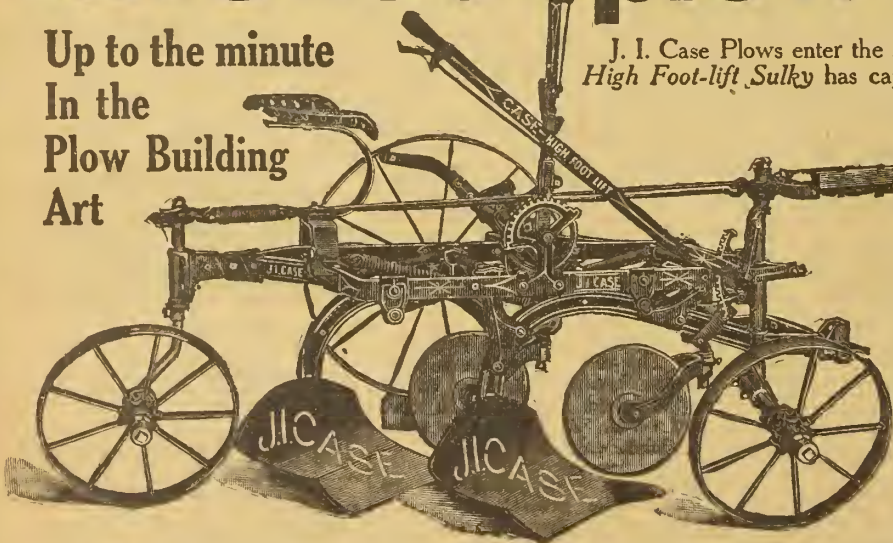

Henry Hatch.

Those of our readers who are coming to the Iowa State Fair next week will do well to write or call on Mr. L. A. Jester, secretary of the East Side Commercial League, who can locate board and lodging for fair visitors. He can be found on the ground floor in the Capital City State Bank Building, on the southwest corner of East Fifth and Locust streets. This building is a six story building one block east of the Northwestern depot and four blocks west of the capitol. Mr. Jester is an affable and cordial gentleman and will be glad to locate visitors in good homes on the east side of the river.

Read what the Litchfield Mfg. Co. have to say this week about the "Litchfield Spreader," and watch their space next week. They may surprise you.

J. I. Case plow supremacy

Up to the minute
In the
Plow Building
Art

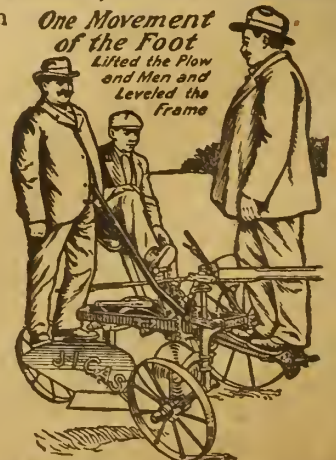

J. I. Case Plows enter the season 1906-7 absolutely supreme. The J. I. Case Self-leveling, High Foot-lift Sulky has captured the entire country. It is a marvel to farmers everywhere.

It has brought out many advantages that were heretofore thought impossible. It is the only real High Foot-lift and more nearly approaches the ideal than any riding Plow ever built.

One movement of the foot-lever raises the bottoms from six inches in the ground to six inches above the ground. You do not need to operate a hand-lever, in addition to the foot lever, in order to complete this operation as in other makes of Plows. This single lever feature, for raising and lowering the bottoms and leveling the frame in one operation, is original with J. I. Case Plows and is a labor saver.

And remember, one movement of foot-lever not only raises the bottoms way up high in the frame, out of the way of the trash, but the same operation levels the frame. Two results with one operation. Other so called foot-lift Plows require the handling of a hand-lever, in addition to the foot-lever, in order to level the frame, or the operator must ride in an uncomfortable position.

One Movement
of the Foot
Lifted the Plow
and Men and
Leveled the
Frame

while having a powerful leverage in the foot-lever, is aided by a strong lifting spring so that even a boy can lift the bottoms out of the ground with ease.

Further, the foot-lever and height of seat can be quickly adjusted to suit the reach of a tall or short person, thus making the high foot-lift self-leveling feature equally effective for any size of operator.

The bottoms enter the ground point down, heel up and start plowing at once. They come out point up, heel down.

It is provided with an adjustment to raise and lower the heel of the landside according to the condition of the soil.

It stays in no matter how hard the soil. It plows straight on the roughest ground.

It is light draft because the friction of the bottoms are carried on the wheels instead of on the ground.

We will gladly furnish you a complete description of this remarkable gang, for the asking, also our catalogue of the entire J. I. C. line. Read our free offer below and write today.

Echoes From a Kansas Farm

By Henry Hatch

Sometimes it is thirty acres when sown, twenty acres when thrashed, and just eighteen acres when the neighbor who harvested it is paid.

We have the chronic kicker and the chronic borrower. Which is the worst to have in a neighborhood, it is hard to say. Then, too, there is the free borrower and the stingy lender.

Early plowed land is showing a tinge of green. It is crab-grass. Crab-grass is a great nuisance and pest, but sometimes we think it a good thing. Without it, many would not work their land enough.

The corn-belt farmer of eastern Kansas is finding that wheat growing isn't all a snap. He finds that it takes work to get land ready for seeding, and it is work that must be done in hot weather and at a time when there is enough of something else to do.

The ten-disk drill is large enough. Ten disks, each eight inches apart, just take two rows in corn-stalk land as ordinarily planted, which is quite an object when drilling in spring grain or disked stalk fields. Eight inches is also the right distance between the disks; any closer causes clogging in damp ground.

Difference in the first cost causes some to buy the hoe drill, but they regret it in a year or two. The disk drill is positively ahead of any other style on the market, either hoe or runner. The hoe drill is a trash gatherer and the runner drill a horse puller. Disks roll through trash and leave it where it was before, while the difference in draft is as the draft of a sled is to a wagon, on bare ground.

Any old place has grown hay here this year. A seven-acre patch of this spring's seeding of clover yielded fifteen big loads of hay recently, on this farm, with another growth coming on. Five years ago we were told this land would not grow clover, and ten years ago several told us it would not grow anything.

So far as this section of the Southwest is concerned, the weather prophet who predicted a dry summer has got badly left, yet this does not prevent him from predicting a hard winter. Why is it customary for the majority of the weather-wise to predict hard winters? Why don't some of them speak for a mild winter once in a while?

It may be an inopportune time to ask it, but we would like to know what has become of the man who was going to furnish us farmers' fertilizer so condensed in the form of bacteria that enough

of it could be carried in the vest pocket to fertilize an acre of ground?

We know of a man who started out to do something this spring. He did not say he expected to do it, but we know his idea was to beat all the rest of us with a big yield of corn. He used commercial fertilizer at the time of planting, and drilled his corn so the stalks are from ten to twelve inches apart. He has a lot of nubbins in that field and but few good ears. When we start to do something big, we are apt to overdo, and get less for it.

Another neighbor hauled out a manure spreader yesterday. He lives two miles from town, so went in with four horses and brought a load of manure from one of the livery stables. It was coarse stuff, as liverymen always use coarse hay if they can get it, and much of it was with the manure. His spreader tore it in pieces so fine that it looked like dust when being spread. He has the seventy-bushel size, and it takes four horses to make easy work hauling it. Buying manure spreaders beats buying commercial fertilizer.

The newspapers give special prominence now to any story of bad beef sold by the packers. Last evening we read of a family being poisoned by bad beef that had been shipped from a packing house. In every case we believe beef leaves the packers in good shape, but in hot weather it does not take beef just out of cold storage long to become unfit for use. No doubt the methods of some of the packers are bad enough, but we believe the way some of the local dealers handle the beef after they get it from the packers needs looking into, also.

Land lookers are on the move again. Every excursion day the trains are packed, and the present is only a foretaste of what will probably come later. September, October and November is when the greatest rush is on. The agents are busy trying to get farmers hereabouts to list their farms with them, and many of the agents, when they strike a man who names a reasonable figure, buy at once, in their own name. There are many farms not for sale at any price, this one included. What is the use of selling, when a person is satisfied where he is?

INTERSTATE GOOD ROADS MEETING

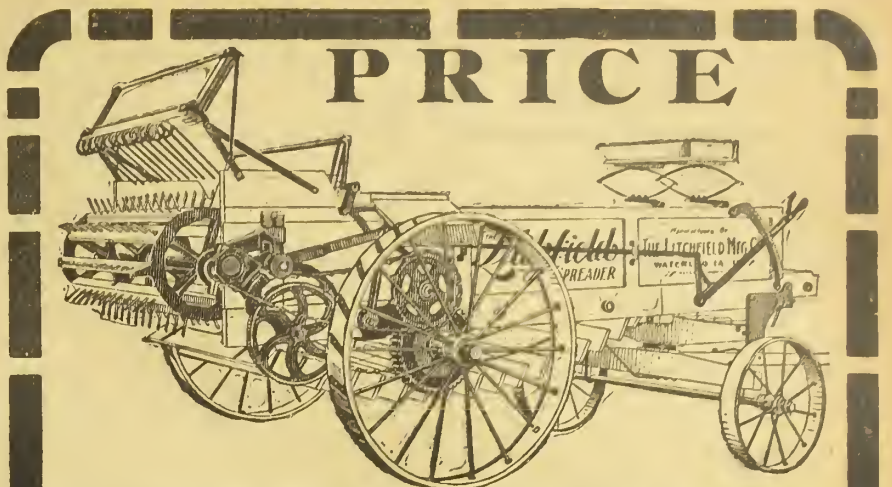

An important road meeting will be held from September 3d to 8th at Chillicothe, Mo., under the auspices of the Missouri State Board of Agriculture. It will be known as the Interstate Good Roads Convention, the program including speakers from a number of corn-belt states. The object of the convention is to crystallize sentiment in favor of some definite, practical, progressive scheme for road improvement in the central West.

We believe the importance of the road question justifies every county in the corn belt having a representative person at this convention. The program as furnished by Sec. George B. Ellis, of the Missouri State Board of Agriculture, is as follows:

Monday, September 3d—Preparation Day, "Laying Out Demonstrations in Road Construction, etc."

Tuesday, September 4th, 9 a. m.—Address of welcome, Prof. Allen Moore, Chillicothe; response, "Why Are We Here," Hon. Norman J. Colman, member of board of agriculture, St. Louis; appointment of judges and committees; demonstrations in road construction. 1 p. m.—"Better Roads For Missouri," Hon. Joseph W. Folk, governor of Missouri; "Road Maintenance," D. Ward King, "The Good Roads Apostrophe," Maitland; Senator T. J. Wornall, Liberty, Mo., one of the most prominent farmers and live stock breeders in the state, has made a tentative promise and will probably be on the program during this or the evening session. 7:30 p. m.—Paper, Hon. John Howatt, Clarksville, (Mr. Howatt was formerly a member of the board of agriculture of Iowa); an address, Judge I. C. Dempsey, Bowling Green; "Road Drainage," Mr. W. R. Goit, Kansas City, (Mr. Goit has had wide experience in the use of tile in road construction).

Wednesday, September 5th—All forenoon devoted to an examination of the road construction which will be in progress on the roads near Chillicothe. 1 p. m.—Paper, Hon. F. M. Filson, Cameron, (Mr. Filson is postmaster at Cameron and has recently organized the nine rural routes in his territory, so that practically every mile of road on these routes will be improved); "Value of Skilled Supervision in Road Work," F. P. Spaulding, dean of engineering department, Missouri State University; "Work of the Illinois Highway Department," Hon. A. M. Johnson, chief highway engineer of Illinois, (Mr. Johnson was formerly chief road engineer of the United States Department of Agriculture and has had a wide, practical experience in road building). 7:30 p. m.—Paper, E. E. Zimmerman, county clerk, Savannah, Mo.; "How to Build Roads," Mr. G. W. Donaghey, Conway, Ark., (Mr. Donaghey is an experienced road contractor);

PRICE

IS NOT THE WHOLE THING.

WE always admire a close buyer. It usually indicates a man who will appreciate a good thing when he gets it and who will take care of it. At the same time we like to see him a good buyer. If we can sell our Manure Spreaders to close buyers and good buyers, we prefer them every time for customers. We say to our customers, however, "Do not lose sight of what you are buying when you are figuring on what you pay for it."

Ordinarily, a horse is worth more than a dog, and a wagon worth more than a wheel barrow. So do not let the price of the dog fix the value on your horse, because if you do you may get a dog instead of a horse, or possibly may have to push a wheel barrow where you intended to ride in a wagon.

When you buy a Litchfield Spreader you get spreader value and not something else. The Litchfield Manufacturing Company has made farm machinery for twenty-seven years and the farmers of this western country have bought their machines. We are today selling to sons whose fathers bought Litchfield's goods during a previous generation. This is because for every dollar charged they got a dollar's worth.

It is to maintain this reputation that the Litchfield Spreader is built as it is today, with the high-class steel wheels in place of the cheap wood kind, which might answer the purpose. It is for this same reason that two and three-sixteenths-inch cold-rolled steel axles are used in place of the one and three-fourths-inch common steel, as many other manufacturers are using today. This is why the expensive, endless conveyor, with its no-choke system of sections is used in place of the half length, returning conveyor like we find in most other spreaders.

It is to maintain this reputation and strengthen it that these Spreaders are built with the modern style of expensive beater wheel construction and the new, improved Spreader body at the rear, also the adjustable pole for center or side hitch, the wide-faced tires on the wheels, the heavy system of drive from both wheels and the general, all-round construction that is made in this machine the best that the manufacturers know how to produce. "Seeing is believing" and if you will take occasion to see this machine operate you can appreciate our statements.

"How would you like to trade? We still have some Indian pictures left and, if our readers can give us the names of prospective Spreader buyers, we want to trade."

THE LITCHFIELD MFG. CO., P. O. Box A388, WATERLOO, IOWA

"Missouri and Good Roads," Hon. Walter Williams, Columbia, (few men are more widely known in Missouri than Mr. Williams, and everyone will be interested in hearing what he has to say on this subject).

Thursday, September 6th, 8:30 a. m.—Business session, discussion and adoption of resolutions. Witnessing road demonstrations. 1 p. m.—"Country Roads and Country Schools," Dr. R. H. Jesse, president Missouri State University, Columbia, Mo., (Dr. Jesse has recently made a tour of Europe and made a study of the road and school systems of several European countries); "A Random Talk," Hon. W. J. Stone, United States senator from Missouri, (Senator Stone needs no introduction to the people of Missouri; he will have something to say that will not only interest, but instruct, and everybody should hear him). 7:30 p. m.—Paper, Hon. Benton Gabbert, Dearborn, Mo.; "Concrete Construction in Road Work," Hon. Thomas H. MacDonald, chief highway engineer for the state of Iowa, (this lecture will be illustrated with stereopticon views, and will be highly entertaining and full of information on a subject of very great importance); an address, Hon. H. H. Weaver, Rush Tower, Mo., (Mr. Weaver has had a great deal of legislative experience, and what he has to say will be valuable in formulating proposed legislation).

Friday, September 7th, 8:30 a. m.—Business session; road demonstration and awarding of prizes. 1 p. m.—"Good Roads Legislation," Hon. Wm. W. Rucker, Keytesville, Mo., (Mr. Rucker is a member of congress from the second district and is very much interested in the subject of improved roads); an address, (subject to be selected), Hon. Samuel Lancaster, consulting engineer, office of public roads, department of agriculture, Washington, D. C., (the United States Department of Agriculture for several years has been building object-lesson roads in several different states, and everyone interested in practical road building should not fail to hear Mr. Lancaster's address).

ST. PAUL AND MINNEAPOLIS POPULAR EXCURSION.

On Friday, August 31st, the Chicago Great Western Railway will have a popular excursion from Des Moines to St. Paul and Minneapolis at rate of \$4.50. Tickets will be good going on special train, leaving Des Moines at 9:30 p. m., and good to return on all regular trains Saturday and Sunday, September 1st and 2d. Special coaches will be reserved for ladies and gentlemen, checks for which may be obtained at City Ticket Office. Berth rate in tourist sleeper, \$1. Reservations should be made early. For further information apply to E. J. Sawyer, City Ticket Agent, 514 Walnut St., Des Moines, Iowa.

CHEAP R. R. RATES VIA M. & ST. L. Every Tuesday homeseeker round trip tickets to Minnesota, North Dakota and Canadian Northwest, also first and third Tuesdays to Montana, Washington, etc., at one fare plus \$2.00.

Summer tourist round trip rates to Minneapolis and St. Paul, also to points in Minnesota and North Dakota on sale daily after June 1st, return limit October 31st.

Special round trips daily June 1st to September 15th to Portland, Seattle, San Francisco and Los Angeles.

For particulars call at the M. & St. L. ticket office, 512 Walnut St., Des Moines, Iowa.

\$24.95 BUYS THE NEW IMPROVED MODEL K ECONOMY HAND CREAM SEPARATOR

400-pound per hour capacity, the best separator made in the world, provided we receive your order within 30 days.

SEND NO MONEY. Cut this ad and send to us and we will send this big, 400-pound per hour capacity, New Improved, Model K Economy Hand Cream Separator by freight, C. O. D., subject to examination. Examine it at your nearest railroad station, and if you are convinced it is the equal of any separator you can buy anywhere for \$100.00, then pay the railroad agent our special thirty-day offer price \$24.95, and freight charges. The separator weighs about 200 pounds and the freight will average about \$1.00 for each 500 miles.

TAKE THE SEPARATOR HOME, give it a thorough trial, compare it with any other separator made, and if you do not find this new big, 400-pound per hour Model K Economy Hand Cream Separator will skim closer, skim colder milk, run easier, clean easier, and handle better than any other separator made regardless of name or price, if you are not satisfied it will wear any other separator made, if you are not convinced it is in every way the highest grade cream separator made in the world, you can any time after giving it the most thorough trial for any part of 60 days, return it to us at our expense and we will immediately return your \$24.95 together with any freight charges paid by you.

THIS OFFER IS GOOD ONLY FOR 30 DAYS. To get this new, big, 400-pound per hour capacity Model K New Improved Economy Separator for only \$24.95, less than one-half the price for which separators are sold to dealers in carload lots, and one-fourth the price at which inferior separators are sold at retail, to take advantage of this extraordinary \$24.95 price WE MUST RECEIVE YOUR ORDER WITHIN 30 DAYS.

WE HAVE 3,000 of these new, big, 400-pound per hour capacity Model K Economy Separators on hand and as a most extraordinary offer and inducement to dispose of them all within 30 days we make this astonishing offer: Send no money. Pay the \$24.95 to the railroad agent after the machine has been received, then try it 60 days and if the separator is not entirely satisfactory return it to us and get your money back.

THIS SEPARATOR is covered by a written binding 20-year guarantee. We will always furnish you repairs in the years to come. We guarantee the machine to do everything that any other separator will do and do it easier and better. Don't wait until next spring and then pay \$75.00 or \$100.00 for an inferior machine. Send us your order immediately. Your order must reach us within 30 days to get the benefit of our \$24.95 price on this big 400-pound per hour capacity Model K Economy Separator, the best separator made in the world. If you don't order this Big Machine at \$24.95, don't fail to write for our free Cream Separator Catalogue. Address, SEARS, ROEBUCK & CO., Chicago.

CURRENT EVENTS AND COMMENTS

On Friday last 1,200 persons lost their lives in the city of Valparaiso on account of an earthquake which shook that city. The property loss from the shake, as well as from the fire, is estimated at over one hundred million dollars. The population of the city is upwards of 150,000 and it is the most important town on the western coast of South America. Other towns along the coast have experienced rather severe shakes.

The important events of the next few weeks are the state fairs. In the corn and wheat belt the dates for these fairs are as follows: Iowa, at Des Moines, August 24-31; Nebraska, at Lincoln, September 3-7; Ohio, at Columbus, September 3-8; Minnesota, at Hamline, September 3-8; Indiana, at Indianapolis, September 10-14; (Kansas, at Topeka, September 10-15;) Iowa Interstate, at Sioux City, September 10-15; South Dakota, at Huron, September 10-15; Wisconsin, at Milwaukee, September 10-15; Missouri, at Sedalia, September 29-October 5; (Kansas, at Hutchinson, September 17-22;) Illinois, at Springfield, September 28-October 5; Missouri, (American Royal), at Kansas City, October 8-13.

It looks now as though Speaker Cannon, of the house of representatives, was, in the estimation of those who make and unmake statesmen, the logical leader of republicans as a candidate for president. He was given his seventeenth nomination by acclamation at Danville, Ill., a few days ago, and commended to the Republican National Convention of 1908 for nomination as candidate for president. Speaker Cannon is seventy years old. President Roosevelt, at a conference recently held at Oyster Bay, predicted that Speaker Cannon would be the next president. President Roosevelt stated that no necessity could arise that would induce him to accept the nomination again, even if it were tendered him.

Certain sections of the corn belt were visited last week by the heaviest rain storms that have been known for years. In some instances, as much as five inches of rain fell in as many hours. Fortunately, but little wind accompanied the rain, and no damage was done to corn by lodging. Intensely hot weather followed these rains for a few days, accompanied by an atmosphere highly charged with moisture. As a natural result much suffering in the populated centers was experienced, and not a few deaths. Corn, generally speaking, was benefited by the rain, though the effect will be to delay the maturing date to some extent.

Preliminary classification catalogs for the International Live Stock Exposition, to be held in Chicago in December, are now being sent out. Numerous changes have been made in several classes, and those who contemplate exhibiting should secure one of these catalogs. Application should be made to W. E. Skinner, Union Stock Yards, Chicago.

The Iowa State Fair.

It is not so much a boast as a statement of fact with reference to the Iowa State Fair to say that it is the greatest annual state exposition held anywhere on earth. For the fifty-second time the gates will open again on August 24th. The managers of the Iowa State Fairs take pride, and pardonably so, in the all-round completeness and perfection of their annual exhibitions. There have been other greater industrial expositions and sometimes a larger number of prize-winning farm animals are got together, but as an annual affair this one in Iowa and for Iowa is such that comparison with all others is invited.

Everybody knows what a fair is, but nobody can know the Iowa State Fair unless he spends more than one day on the grounds. A good catalog will give the main points, but the progressive farmer who desires that he get full value for his pains must spend several days at the fair grounds. The fair naturally divides into several features, namely:

Educational and instructive: A summer school of agriculture; a dairy school and milk cow test; great show of fruit and flowers and all farm products; seed corn judging and competition; contest

of the greatest herds in the world and exhibition of prize-winning live stock; show of all the best farm machinery and appliances for economy and labor saving. Recreation and pleasure: Splendid speed program; great airship exhibition; unrivaled vaudeville show of high-class and clean exhibitions; fireworks and choicest music; soldiers' campfire and opportunity for summer camping.

Profit: Best opportunity in the world for making intelligent selections for improvement of herds and flocks; chance to study best machinery and make comparisons; exchange of views and information as to farm methods.

In the past ten years there has been much done to improve the 226-acre park where the Iowa fairs are held. More than \$174,000 has been expended in permanent improvements in six years, and about \$25,000 is being expended this year. All this and more is really needed to care for the increasing number of entries and the greater demand for opportunities for all sorts of exhibitions.

The live stock departments are especially fine. No finer herds of cattle are seen anywhere. The best breeders of all the midland country attend with their choicest products. Ex-gov. Packard, of Marshall county, has had charge of this department and has made the Iowa cattle shows famous among all lovers of fine stock. The horse department is now in charge of Prof. C. F. Curtiss, of Ames, and he is bringing to this department a broad experience and large abilities.

This year, so it is announced, the machinery and implement exhibit will occupy far more space than ever before. An especially good show will be given of all the latest farm machinery, such as manure spreaders, stackers, ditchers, etc. An electric plant is being installed for the operation of machinery. An exhibition of steel wire making will be given. There will be a larger number of vehicles on the ground than ever before.

One of the features of the Iowa fair appreciated by the people who come long distances is the women's rest building and the emergency hospital. Women and small children find the rest building ideal for a quiet hour in which to recover from the fatigue of sight-seeing, and the matron and doctor in charge are ready to quickly attend to all wants of those who may be ill. Sight-seeing at the fair is thus made free from the danger of illness.

It is the belief of President Murrow, Secretary Simpson, and others of the fair managers, that while the central idea of the Iowa State Fair as a purely agricultural and live stock show and an industrial exposition with educational features should never be deviated from in the least, there is a genuine demand for wholesome amusements that will prove attractive to all fair visitors. To this end the incidental program is varied in nature and filled with novelties.

The speed program is excellent in every way. Interspersed with the races

there will be best music and vaudeville acts. The music will be by the famous Liberatori military and concert band, of New York, and his soloists; also by the Fifty-sixth regiment band, I. N. G., of Fort Dodge, and an orchestra for the pavilion.

The vaudeville features from which the four splendid night shows will be made, include the Miller performing elephants; the Allison troupe of acrobats from Europe in wonderful exhibitions; the four Pickards, in feats of skill in aerial bar work; the sensational "Double Gap of Death," wherein riders of bicycles pass each other in mid-air; the seventeen Zouaves in exhibitions of wall-scaling and drills; Clayton, Jackson and Jasper, in comedy mule act; the "Dark-town Circus," and similar features. The

fireworks display will be the best ever brought to the state.

But the one great sensational feature of the amusement program this year will be the exhibitions of the Knabenshue airship, in aerial flight from its station on the fair grounds to the city of Des Moines and return, at a high altitude. This is the only successful air craft outside of France and it will be the first exhibition in Iowa. No one thing will be more sensational and really interesting than this airship show. The first trip will be made on Monday of fair week.

With good crops, with abundant prosperity, with the spirit of progress leading on, there is every reason to anticipate that the Iowa State Fair of 1906 will lead all others.

HOMESEEKERS' EXCURSIONS.

CHICAGO GREAT WESTERN RAILWAY. On the first and third Tuesdays of each month until November the Chicago Great Western Railway will sell homeseekers' tickets to points in Arkansas, Indian Territory, western Louisiana, Mexico, New Mexico, Oklahoma Territory and Texas at rate of one fare plus two dollars for the round trip, except that a maximum rate of \$23.00 from Des Moines will be in effect to above territory with the exception of Mexico. Stopovers will be allowed in both directions. Limit thirty days, stopovers both ways.

On the first and third Tuesdays of each month until November the Chicago Great Western Railway will sell homeseekers' tickets to points in Arizona, Kansas, Missouri, Nebraska, Nevada, Utah, Wyoming, Alabama, Florida, Georgia, Kentucky, eastern Louisiana, Mississippi, North Carolina, Tennessee and Virginia at rate of one fare plus two dollars for round trip. These have limit of twenty-one days to return and allow stopovers on going trip.

On the first and third Tuesdays of each month until November, homeseekers' tickets will be on sale to Denver, Colorado Springs, Pueblo, at rate of \$23.00 from Des Moines and to Ogden and Salt Lake City at rate of \$29.50. Other Colorado points in proportion, all having limit of twenty-one days to return and allowing stopovers on going trip.

To points in Idaho, Montana and Washington homeseekers' tickets on sale the first and third Tuesdays of May, June, September, October and November at rate of one fare plus two dollars for the round trip, tickets having limit of twenty-one days to return.

To points in Minnesota, North Dakota, Manitoba, Saskatchewan and other Canadian provinces, homeseekers' tickets are on sale each Tuesday this year. Have limit of twenty-one days and allow stopovers west of St. Paul.

Full information can be obtained from E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

Farm house on the Monona, Iowa farm offered for sale by Mr. Z. T. Lindsey, of Omaha, Neb. The farm contains 567 acres and is quite fully described in the advertisement on page 17.

OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should result \$1.00, addressed as above.

LAW QUESTIONS CONSIDERED.

ROAD BOSSES.

A Subscriber, Ames, Iowa.—A road supervisor has dug a large hole in the public road on a side hill, so that the road is narrowed to about seventeen feet in width. The hole is about nine feet deep and on a corner and makes a dangerous place for people traveling on the road, especially after night. The hole was dug to obtain sand and gravel, but only fine sand was found, which is of no use in repairing roads. What remedy is there in such a case?

Answer.—Call the attention of the township trustees to the matter. If they will not act, about the only practicable remedy the people have is to elect another board. In this country the officeholders, even including trustees and road bosses, are supposed to be the servants of the people, anxious to carry out their will. If they will not do so with alacrity and cheerfulness, the people can eventually retire them to private life. In such cases the remedy seems to be political and not legal.

CITIZENSHIP.

Mr. Henry Salvason, Gilmore City, Iowa.—I was three years old when I came to the United States with my father. I have lived in the United States ever since, and am now twenty-five years old. My father took out his first naturalization papers in 1900. (1) Do I have to be naturalized before I can vote in Iowa? (2) If a foreigner has taken out his first naturalization papers, can he enter a homestead in North Dakota? (3) Do I need naturalization papers in order to take a homestead in North Dakota?

Answer.—(1) If you were under twenty-one years of age when your father was naturalized, you are a citizen of the United States, and can vote in Iowa without being naturalized; if you were over twenty-one years old when your father was naturalized, then you must be naturalized, before you can vote in Iowa. (2) He can. (3) If you were over twenty-one years old when your father was naturalized, you must make your declaration of intention to become a citizen of the United States, (first papers) before you can enter a homestead in North Dakota, or elsewhere.

PEDIGREES—STALLIONS AND BULLS.

Mr. J. W. Pierce, Republic, Iowa.—Please publish the new law in relation to the pedigrees of stallions and bulls, and state when it will take effect.

Answer.—The new law passed by the legislature of 1906 on the subject of pedigrees is too long for publication in full in this department, but its main provisions are as follows: The owner or keeper of any stallion or bull kept for public service, or for sale, exchange or transfer, who represents such animal to be pure-bred, thoroughbred, standard-bred or registered, must cause the same to be registered in some stud book or herd book recognized by the department of agriculture at Washington, D. C., and obtain a certificate of registration of such animal. He must then forward such certificate to the secretary of the state board of agriculture of Iowa, who examines it and if he finds it correct, issues a certificate to the owner or keeper, which certificate must be posted on the door or stall of the stable where such animal is usually kept. Any patron is entitled to a copy of such certificate upon request. The fee for issuing the certificate by the secretary of the state board of agriculture is one dollar. In case of sale or transfer of the animal, the purchaser may have a new certificate issued in his name by filing

the assigned original certificate and paying fifty cents. The penalty for fraudulently representing the pedigree of a stallion or bull, or posting or publishing a false representation of such pedigree, is a fine not exceeding \$100 or imprisonment in the county jail not exceeding thirty days, or both. The law is now in force.

TENANTS IN COMMON—PARTITION.

Mr. J. E. Davis, Girard, Kan.—A and B. each own a half interest in a livery barn. B., who is a veterinary surgeon, uses half the barn for a hospital and feed barn. He wishes to buy A.'s interest in the barn. A. refuses to sell because he owns another livery barn in the same town and fears the competition. Can B. compel A. to either sell or rent his interest in the barn to him?

Answer.—He cannot, but he can bring suit for partition, and force a sale by order of court and a division of the proceeds. At such a sale B. would have an opportunity to bid in the property like any other bidder.

SALE OF LAND—DECEIT.

A Subscriber, Benton, Iowa.—Last summer I traded farms with B. through A., his agent. A. showed me around the farm and represented the well near the house to be fifty feet deep and that it supplies plenty of water. I moved on the place after the trade and found that the well was only twenty feet deep and good for nothing. I have a witness to these representations. Who, if anyone, is liable to me?

Answer.—It is somewhat doubtful whether you could hold anyone liable for damages. The matter is complicated by several things. First, the fact that you, being on the ground, did not half investigate for yourself. Second, what authority the agents had, if any, to make such representations. Third, the loose, uncertain nature of the representations made except as to depth, etc. All these things would make the result of a law suit uncertain. Compromise with B., if possible, without litigation.

TAX TITLE—HEIRS.

A Subscriber, Miller, Mo.—A. deeded to each of his children a piece of real estate in Missouri. To his youngest daughter, B., he deeded 120 acres of land for her life time, then to her heirs. B. has eight children. Her husband has induced her to let the land be sold for taxes. He hopes to buy it in at the tax sale and in this way beat the children out of their inheritance. (1) Can either of B.'s children pay its proportionate share of the taxes and prevent a sale of its share in the land? (2) In case B.'s husband should obtain a tax title, would it exclude B.'s heirs at her death from inheriting the land?

Answer.—(1) No; because if a tax sale takes place at all, it is the whole land that is sold; not in shares or undivided parts. B.'s children should pay all the taxes on the whole tract of 120 acres; if it has already been sold for taxes, B.'s children should redeem it. (2) Such a title would cut off B.'s children from inheriting the land from their mother at her death.

DIVISIBILITY OF CONTRACT.

A Subscriber, Oelwein, Iowa.—(1) Ten persons signed a contract with a company. The company released one of the signers. Can it hold the others to fulfill the contract? (2) A company entered into a written contract for the sale of two certain horses. The company shipped one of the horses out of the country. Can it compel the buyer to take the other horse?

Answer.—(1) On general principles, the company can hold the others liable, but we could give a more precise and reliable answer, if we knew more about the nature and terms of the contract. (2) If both the horses were the subject of one contract and not bought separately, by distinct contracts, the company cannot hold the buyer to the bargain to the extent of one of the horses, but if the horses were bought in separate agreements, each one being the subject of a contract, then the company can hold the buyer liable for the price of the one delivered.

HOMESTEAD—MARINE SERVICE.

Mr. W. A. Paine, Eagle Grove.—A young man served five years in the marine corps of the United States navy, but was not in the war of the rebellion, nor in the Spanish, or Philippine wars. He has taken a homestead in North Dakota, and they tell him at the Dickinson land office that he has no rights other than any American citizen and must reside on his claim for the period of five years. Where can I find the law on the subject?

Answer.—The land officers are correct. It is provided in the Act of June 16, 1898, Chap. 458, 30 U. S. Statutes at Large, page 473, as follows: "In every case in which a settler on the public land of the United States under the homestead laws, enlists, or is actually engaged in the army, navy or marine corps of the United States, as a private soldier, officer, seaman or marine, during the existing war with Spain, or during any other war in which the United States may be engaged, his services therein shall in the administration of the homestead laws, be construed to be equivalent to

Now Is The Time

To Investigate Corn Machines.

THESE ARE THE REASONS:

Your corn crop will reach that state of perfect maturity before long—when the ears begin to glaze.

If you have a good reliable corn harvester and binder or harvester and shocker on your place at that time, you are all ready to go over the field rapidly and secure the whole 100 per cent feeding value of that crop.

If you don't have a corn binder or shocker at that time, you will likely snap or husk the corn in the field and leave the stalks standing.

If you do that, you will lose 40 per cent of the feeding value of your crop—because the stalks, leaves and husks contain 40 per cent of the crops' feeding value at the time of maturity.

Gather only the ears and you lose that stover value for good. If you cut the stalks at the right time and cured in the stack, they are practically worthless. When left standing in the field they lose their nutritious juices and become little more than woody fibre in a short time.

Harvest the whole crop, instead of simply gathering the ears, and you will add \$16.00 extra profit to every acre you cut.

The stover will give you that much extra feeding value, because, when the crop is cut at the right time, properly cured and run through a husker and shredder, the stover is nearly equal in feeding value to good timothy hay.

It is worth \$8.00 a ton; you will cut at least two tons from each acre, thereby realizing \$16.00 more profit per acre than your neighbor who

snaps or husks in the field. The hay crop is light this year, and the demand will be so great that you can readily market your entire crop at a good price. If you will cut all of your corn and *shred* the fodder, you will have enough forage to keep your stock all winter—and you can sell your hay.

If you didn't know the value of the corn plant when properly cared for, you might think we put the case this way simply because we want to sell you a corn binder or shocker.

But, most likely, you do know that what we have said are undisputed facts, demonstrated and taught by various Government Experiment Stations, the best farm papers and other high authorities.

When we say, cut your whole crop at the right time and run it through a shredder any time during the fall or winter—we only repeat what the highest authorities in the country are teaching and have been teaching for a long time.

The dairyman gets the full value of his crop by using a corn harvester and making ensilage. You can do even better than the dairyman if you invest in the right corn machines. You can feed the stover and market the grain separately.

This proposition must appeal to you, and as you cannot handle the whole crop successfully and economically without a first class corn binder or shocker and shredder, we urge you to call on the nearest dealer and get a catalog and examine the merits of any of the following makes:

Deering, Milwaukee, McCormick, Osborne and Champion Corn Binders; Deering, McCormick and Plano Huskers and Shredders

In each of these machines you have all the advantages made possible by the unequalled manufacturing facilities of the International Harvester Company.

The International Harvester Company owns its own timber lands and saw mills, its own iron and coal mines, its own coke plants and rolling mills, from which it produces a large percentage of all raw materials used, selecting in every instance only the best material and working it out in the best way in the above great manufacturing plants. These are advantages which no buyer can afford to overlook.

The International lines are represented by different dealers in your town. Call on them for catalogues and investigate their machines.

International Harvester Company of America, Chicago, Ill. (INCORPORATED)

HEAT YOUR HOUSE STORE, CHURCH or SCHOOL HOUSE WITH

Bovee's Compound Horizontal Furnace Radiator

THOUSANDS IN USE. BURNS ANY KIND OF FUEL. 11 YEARS on the MARKET.

Having BOVEE'S Improved Hot Blast Ventilating System and Return Circulating Radiator, which gives perfectly pure air and saves One-Third of the Fuel. Any handy man can properly install one of these furnaces with all connections in a short time. These furnaces absolutely make the best and most durable heating plant in use. Everything guaranteed to be first-class. We can save you 40 per cent on the cost of your heating plant, our price being but little more than good stoves. Send for catalog. We have the largest and best line of furnaces in use, including our Celebrated WATERLOO Furnace, complete for..... \$43

VETERINARY MATTERS.

PROFESSIONAL. Veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of one dollar. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

LAME COLT.

I have a horse colt about three and a half months old, still suckling, that will weigh about 500 pounds, which is lame on one of his hind legs. He favors the leg when he trots or stands. I thought it might be spavin, but there are no signs of it on the hock. What would you call it and what would you prescribe as a cure?

You give no hint which would enable us to even guess at the location or cause of the lameness and it is evident that an examination will have to be made by a veterinarian on the spot.

DIPPING PIGS.

My pigs have some sort of skin trouble; they rub and seem to be a little scabby, and I thought of dipping them when I castrate them. Should I dip them before or after they are castrated? As I have no tank, I thought I would use a barrel, and make a dip of one part Kresol dip to seventy-five parts water.

The pigs should be dipped before castration and the disinfectant will be an advantage in making infection less liable to happen from the wounds in scrotum. The solution mentioned will prove effective. A fee of one dollar must accompany an inquiry to which an answer is desired by mail.

SICK MARE.

I have a fourteen-year-old mare which had a colt this spring and got along all right until about ten days after I had bred her again (to a stallion that weighs a ton), when I noticed her straining some as if in heat. She continued worse for a week and since that time seems about the same. She humps her back and drags the points of her boobs on the ground when walking; draws in her flanks, and is getting very poor, although she has a voracious appetite. Her flanks are drawn very tightly from hip bone down toward point of belly. She is very uneasy and rests first one hind leg and then the other. Is there a possibility of the stallion hurting her inwardly at time of service?

This is a case for the local veterinarian who will have to make an examination of the vagina and womb for injury or disease due to service of stallion. Without such an examination we are unable to give an opinion as to nature of trouble present.

LAMENESS.

I have a valuable registered trotting stallion, one year old the 30th of last April. Last October he got lame in one of his hind pastern joints and then got all over it, but in about a week or ten days he became lame in the other hind pastern joint. He continued this way until April of this year, never being lame in both joints at once, but one at a time, with a little time intervening sometimes. He has not been lame now for four or five months, but his hind pastern joints are a little enlarged and seem to be a little tender when touched, although not much. I would like to know the cause of the lameness and also if anything can be done to help the joints. Will he outgrow it? Last summer he ran in the pasture with his dam, and last winter was kept in a good barn at night and allowed to run in the lot in the day time, his feed being largely oats, with some corn, and all the good hay he would eat. He is now running in the pasture with his dam.

The symptoms suggest lameness as the cause of the recurring lameness and it implicates the sheaths of the tendons. He likely will grow out of it, but should he have another attack we would remove the hair and blister the joints with cerate of cantharides or some other effective blister and internally give salicylate of soda in two dram doses twice daily. Meanwhile do not blister, but simply hand rub the parts thoroughly once or twice daily, using a little oil on the

hands. Allow plenty of out-door exercise and keep him growing by generous feeding on oats and bran along with fodders.

SALT FOR HOGS.

Should I salt my hogs? One of my neighbors advises me to, and another says not.

It is usual to add salt to slop for hogs at the rate of about a handful to the barrel.

LAMENESS.

I have a black roan mare, three years old, which I have had to leave tied in the barn for two weeks. She kicked the partition a good deal, and is now so lame she will not stand on that foot when taken out for exercise. She will walk on the toe of her foot for about half a mile, and seems to drop forward on that ankle, after being driven on a walk for two or three miles will scarcely limp at all, but as soon as stopped will stand on toe again. The past day or two she rubs the lame joint with her upper lip. What can I do for her?

It is probable that if you simply turn her out to grass for a month the lameness will pass off, but if it proves tardy in disappearing a blister should be applied to affected part.

SORE ON UDDER.

I had a three-year-old black heifer come fresh about two months ago and began milking her. On brushing her udder I discovered on the right side at the top of the udder a rough place, as though it had been scratched by wire. I supposed it would heal up, but later found that it was a sore. I immediately quit using her milk, and now the place extends nearly across her udder and is about two inches wide. What can I do for it?

Cleanse parts thoroughly with soap and hot water and when scales have been removed and part is dry apply a little benzoated oxid of zinc ointment. Repeat application twice daily.

GOITER.

Will you please tell me what is the matter with my calves? I have had several of them drop this year with a lump or large neck. The local veterinarian says it is goiter. What is the cause of it and what can I do for it?

Your veterinarian is correct in his diagnosis, and doubtless is competent to treat the cases. They indicate, as a rule, weak constitution, mal-nutrition, an excess of lime in drinking water and food, in-and-in-breeding, or some debilitating cause. Avoid any cause such as we have suggested. Rub tumors (enlarged thyroid glands) with iodine ointment daily and give iodid of potash in drinking water under direction of your veterinarian.

SCIRRHUS CORDS.

I had a yearling colt castrated last spring. He seemed to get along all right and has grown well all summer, but when I examined him a few days ago I found that the skin had grown to the cords, leaving the ends exposed. A watery pus exudes from the ends of the cords. What treatment would you advise me to give the colt?

It will be necessary to dissect the cords free from their attachments with the scrotal walls and then sever them above the tumors. The operation is somewhat dangerous on account of the bleeding which is apt to take place, so that it would be safest to employ an expert. Such cases are easily avoided by making free incisions in the scrotum at castration time and cutting the cords high, so that they will not become caught between the healing scrotal wounds. In bad cases infection with a fungus known as botryomyces complicates matters and explains growth of tumor and formation of pus.

LOCK JAW.

What should I have done for a horse that died of what was pronounced to be lock jaw? He was a four-year-old, large, strong, and a willing worker. Some time before he took sick he got a sore in his front foot, caused, apparently, by snagging it. This I kept open, using turpentine. The sore got well as far as could be seen, and I was working him. One forenoon he did his work as usual, but on coming from the field at noon he refused to drink, and I noticed that he was not well. He began showing signs of lock jaw by the haw of the eye drawing over the eye-ball. There being no good veterinarian here I proceeded to do the best I knew. I first gave him salts, then an injection of tobacco tea, cleaned out the foot he had the sore in, and put on a flaxseed poultice. The next day I gave him a dose of aloes, gentian and croton oil, but it had no effect on him. He stood panting, and every muscle seemed to be drawing its utmost. I kept on giving him injections of tobacco tea and washed his mouth out with it, which seemed to relieve him somewhat and make him rest easier, but in a day or two he died.

The disease was due to infection of the wound in the sole of the foot by entrance of the tetanus bacillus which gives rise to toxins (poisons) which affect the nervous system and produce the symptoms characteristic of the disease. The disease might have been prevented by keeping the wound in the sole open and disinfected by frequent use of a 1-500 solution of corrosive sublimate. When attacked, unless severely affected, there is a chance of recovery if horse is kept

Poland China Barrow. Age 18 months. Weight 1,035 pounds. Fed on Iowa Stock Food Bred and owned by Peter Houw, Orange City, Iowa.

HOG CHOLERA

CURED and prevented, worms run out and hogs made healthy and thrifty in a few days at a small expense. Write for book of reliable information on care and treatment of hogs. Also reports of public tests. Address,

Dr. J. H. Snoddy Remedy Co., Box 852, Des Moines, Iowa.

perfectly quiet, supported in slings and fed on slops. Fussing and dosing with medicines only aggravate the spasms and induce death sooner than it would occur in fatal cases. We have had many cases recover without use of medicine; none where animal was frequently dosed and fussed with. Hypodermic injections of equal parts glycerine and pure carbolic acid give good results; better than from use of tetanus antitoxin used in similar way.

FISTULA.

I have a three-year-old mare that has a running sore at the base of her ear. I do not know of how long duration it is, as I just bought her, but it has been there for six months or more. She seems to have some pain in it and will not let one touch it. Will you kindly tell whether there is anything that can be done for it or not?

In some cases the discharge comes from a fistula connecting with a supernumerary molar tooth which can be located by probing and removed by a veterinary dentist. In other cases, there is a fistula connecting with the bursa mucosa and this is very difficult to cure even by crucial surgical operation. In either case a graduate veterinarian will have to be employed.

PARALYSIS.

I have a two-year-old heifer that calved about two weeks ago and now cannot raise herself on her hind legs. The calf was dead when born. In other ways the heifer seems to be all right; what shall I do for her?

The paralysis may be from absorption of decomposing matters in womb, and as she has been down two weeks, we would consider the case desperate. Womb should be cleansed with 2-per-cent solution of permanganate of potash and heifer be given hypodermic injections of strychnia by a qualified veterinarian or increasing doses of fluid extract of nuxvomica by owner, commencing with half a dram twice daily, increasing dose daily and when muscles twitch involuntarily, going back to first dose and repeating.

LAKE AND RAIL TRIPS.

During the summer months the Chicago Great Western Railway sells tickets via all steamship lines on Great Lakes in connection with their line to Chicago, or St. Paul and Duluth. From this time until September is the time to sail the lakes and see Duluth, Superior, Isle Royale, the Copper Range, Sault Ste Marie, Mackinac Island, Detroit, Toledo, Cleveland, Erie, Buffalo, Niagara Falls and other points of interest. Call or write for full information. E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

HOMESEEKERS EXCURSIONS.

The Iowa Central will sell round trip excursion tickets every Tuesday to points in Minnesota, Wisconsin, the Dakotas, Manitoba, Saskatchewan and the Canadian Northwest, and on the first and third Tuesdays of each month to points in the South, Southeast,

DIPPING TIME

Is happy because he is being FREED from LICE that torture and torment. August, September, October, are best months to dip hogs to kill lice. Dip-OLENE, the best Hog Dip, works quickly and thoroughly. OUR DAIRY DEPARTMENT

All communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

DETECTION OF SKIMMED MILK.

In his recent work on milk testing Prof. L. L. Van Slyke, of the New York Experiment Station, devotes some space to the discussion of the above subject. Among other things he says:

The percentage of fat in milk in relation to the other milk solids is reduced either by direct removal of fat through some process of skimming or by the addition of separator skim milk to normal milk. Milk containing less than 3 per cent of fat is generally skimmed. Watering milk does not disturb the relations of the constituents of milk to one another, since it reduces the percentages of all uniformly, but the removal of fat does very seriously affect the amounts of the constituents in respect to their relative percentages. In skimming milk, the solid constituent most largely removed is fat, comparatively little casein, sugar, etc., being taken with the fat. The removal of fat therefore leaves the milk containing less fat, but with most of the casein, sugar, etc., still remaining. In normal herd milk, containing over 3 per cent of fat, the percentage of fat is rarely as low as the percentage of casein and albumin. In 5,500 analyses of samples of American milks, compiled by the author, with a fat content lying between 3 and 5 per cent, the fat averages 3.92 per cent, and the casein and albumin together, 3.20 per cent; that is, for one part of casein and albumin there is an average of 1.225 parts of fat. In skimming such milk, the fat may be decreased to 1 per cent or .1 per cent, but the remaining milk still contains about 3.20 per cent of casein and albumin. Milk is open to the suspicion of being skimmed when the percentage of fat falls below that of the casein and albumin.

The percentage of fat removed based on the legal standard may be calculated, according to Professor Van Slyke, by multiplying the per cent of fat in the milk by 100 and dividing the result of the legal standard for fat, subtracting this from 100. It is pointed out that where milk contains originally as much

as 5 per cent of fat and had been skimmed down to 2½ per cent, this formula would only indicate the removal of 16½ per cent. On ordinary milk the author says more accurate results will be obtained in detecting whether milk has been skimmed or not by multiplying the per cent of fat in the milk by 100 and dividing it by 3.75 instead of 3 and then subtracting the result from 100.

The Cost of Milk.

To the Editor of The Homestead:

In order to make dairying a success, you must first of all see to it that the raw material—the milk—is produced as cheaply as possible. I have read of tests being made in Denmark in which the cost of production from 200 cows varied from 15.1 cents to 78.5 cents per pound. These experiments show that the profitable dairy cow is found, not only by selecting a particular breed, but also by paying strict attention to each individual cow. The "average" cow is the curse of dairying.

It requires no great intelligence to see that it is better to milk six cows giving a good profit than to milk ten, four of which reduce, if they do not annihilate, the profit of the other six. But this is what is being done on a great many farms. It is well to remember, though, that it takes a dairyman to care for a dairy cow, and the best cow alive may be unprofitable in the hands of an unskilful, careless man.

All foods consist of various elements that are grouped mainly as proteids, muscle-producing elements and carbohydrates, fat and heat-producing elements. Various experiments have shown that the best result is obtained when these are present in the food in a certain proportion, and that it is largely waste when either is given in too great excess. What this proportion should be is a mooted question, and some have proposed to vary it according to the quantity of milk given, but it seems to me that the economical ratio will depend somewhat on circumstances; that is, on the local price of the various feeds. Judgment must be used to decide whether, for instance, to sell oats and corn and buy bran and oil meal or not, and cost of freight and hauling both ways must also be considered.

In our western states, the carbohydrates are produced in excess, and consequently the mistake of feeding too much of them is often made, as when corn is given in excess. The rations should be balanced up by adding bran, peas, linseed or cottonseed meal, the latter containing over three times as much protein as corn and only half the amount of carbohydrates. Every dairyman should inform himself as to the cost of various commercial feeds, and then calculate the most economical ration for his cows under his conditions. It is a simple matter to write to your experiment station and state what feedstuffs you have and their selling value, as well as local prices of bran, oil meal, etc., and ask for suggestions as to proper rations. But always bear in mind that chemical analyses of feeds are averages, and may not fit your case exactly.

One thing is certain—where corn will grow, no cheaper basis exists than a well preserved silage. In summer, the most common mistake which increases the cost of production is to allow the cows to shrink in yield when pastures are getting poor, instead of supplementing them at once with some sort of a soiling crop.

Most farmers, as well as scientists, labored for years under the delusion that an increase in the feed, and especially in that rich in fat, would increase the percentage of fat in the milk. Later experiments have proven that this is not true to any extent worth mentioning. Feeding to excess or feeding very rich food may for a short time increase the richness, but it soon drops into the percentage normal for each cow, and the ambitious breeder who tests his cows that way has a fair chance of ruining them for life. Increasing the feed of a cow not fed up to her full capacity will increase the milk yield—the total amount of butter fat produced, but not the percentage offat in the milk. If this old belief were correct we should be able to make Holsteins give Jersey milk.

A cow should be fed all she will pay for—no more, no less. The right cows being secured, and the right feed given at the regular hours, the advantages gained may yet be lost if the cows are kept shivering in the lee of a straw stack or suffocating in a dark, close stable. If she is left to shiver in the

MILK CANS ROB YOU

Look through a microscope at milk set to cream in pans or cans and you'll see how they rob you. You'll see the casein—the cheese part—forming a spider web all through the milk. You'll see this web growing thicker and thicker until it forms a solid curd. How can you expect all the cream to rise through that? It can't. This

casein web catches a third to half the cream. You stand that loss just as long as you use pans or cans for they haven't enough skimming force to take out all the cream. But, just the minute you commence using Sharples Dairy Tubular Cream Separator, you stop that loss.

Sharples Dairy Tubular Cream Separators have 10,000 times more skimming force than pans or cans, and twice as much as any other separator. They get all the cream—get it quick—get it free from dirt and in the best condition for making Gilt Edge Butter. Casein don't bother the Tubular. The Tubular is positively certain to greatly increase your dairy profits, so write at once for catalog I-121 and our valuable free book, "Business Dairying."

U. S.

CREAM SEPARATOR

For many years the U. S. Separators have been tested under all conditions, and have proved to thousands of satisfied users that they are the best machines of their kind. There are good reasons for their superiority. With only two simple parts inside the bowl the U. S. skims so thoroughly as to hold the **World's Record** for clean skimming.

All parts of the machine are strong, simple and easy to get at. The gears being entirely enclosed are protected from dirt and dust. The bowl having only two simple parts inside is easily and quickly washed. The whole machine is very light running because the working parts run in oil, and are accurately made and fitted. No other separator has all these advantages. The U. S. is the cream separator for you to buy.

Look into this. Write today for a copy of our handsome, new separator catalogue. Ask for number 81. It is finely illustrated and tells all about the U. S. Address

Vermont Farm Machine Co., Bellows Falls, Vt.

Prompt deliveries of U. S. Separators from warehouses at Auburn, Me., Buffalo, N. 448

fall rains and snow, the cow will not only utilize a large amount of her feed as fuel to keep warm (an expensive fire-wood, indeed), but, as experiments in Denmark have shown, she will change the composition of the butter fat in her milk so much that the butter is liable to be mistaken for oleomargarine. There is no need of providing fancy stables. We may even make fairly good ones with a clay floor and the walls and roofs of straw, if we only provide ventilation and light. Com-

fort is an important element in cheap milk production, and while fixed stanchions may make it easier to keep the cows clean, we need only observe them when lying in the pasture to know how cruel and unnatural their position must be in those "animal stocks." The better system is to tie them, or, if it can be afforded, buy one of the modern stalls, and a liberal supply of bedding to keep them clean should never be forgotten. Wm. Sorensen.
Howard Co., Neb.

POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

AILMENT OF GOSLINGS.

"I have a number of goslings that are almost feathered out, they eat well and they have a large range, no creek to run to, have plenty of fresh drinking water, some grit and meal. Some are poor and others are in good condition. They have no lice on them. They fall down suddenly and do not appear to have any strength to get up again for some time. They flounder about, fall on their heads, sit up awhile, then flop their wings and go to eating. Some days they have several spells and then they will miss a day. What is the cause and the cure?" B. S.

Verailles, Illinois.

Geese are freer from disease than any of the domestic fowls. Were it not for the fact that these goslings have no lice we would at once believe they have large head lice on them. Two parasites of this character will cause goslings to act in the manner described by our inquirer. When highly fed goslings will sometimes give evidence of being somewhat affected with attacks of apoplexy or vertigo, but such cases are most rare. The only advice we can give in this case is to ascertain the cause of these attacks and remove it.

SELLING EGGS BY WEIGHT.

It will be remembered that a great deal was said in the papers last spring about selling eggs by weight, and that the Iowa legislature had arranged to have them sold that way, and that by this law each vender in eggs was required to sell his eggs so that one dozen would weigh at least one and one-half pounds. No such a law was passed by the Iowa legislature, but in a table of

THE FAMOUS OLD TRUSTY
More than your money's worth in incubators during the summer. We have them all beat; 40, 60 or 90 days to prove it. 6 year guarantee.

Remember Rates twelve weeks, including furnished room and board, \$39.90. Music, \$3.00 higher. Railroad fare repaid as per schedule. Enter any day.

weights, the matter of eggs was appended, stating that a dozen of eggs should weigh one and one-half pounds.

In bulletin No. 122, issued by the department of agriculture, this matter has been shown by the North Carolina Experiment Station as follows: "Generally speaking, larger eggs were laid by hens than by pullets of the same breed. The eggs laid by the Pekin ducks (old and young) were heavier than those laid by any breed of hens, weighing 35.6 ounces per dozen. Of the different breeds of hens tested the largest eggs were laid by the Light Brahmas, weighing twenty-eight ounces per dozen. The Black Langshan and Barred Plymouth Rock hens' eggs weighed a little over twenty-six ounces per dozen, while those laid by Single Comb Brown Leghorn, late hatched Plymouth Rock, White Wyandotte, and Buff Cochins ranged from 21.7 ounces to 23.7 ounces per dozen.

Of the pullets, the heaviest eggs were laid by the Black Minorcas, weighing 26.5 ounces, the lightest by the Single Comb Brown Leghorn and Silver Laced Wyandotte, weighing 17.5 and 22.1 ounces per dozen respectively. The barred Plymouth Rock, White Plymouth Rock, White Wyandotte, Black Langshan, and Buff Cochins pullets' eggs all weighed not far from twenty-four ounces per dozen. As will be seen, the variation in the weight of the eggs was considerable. Rating the lightest eggs (those from Single Comb Brown Leghorn pullets) at thirteen and a half cents per dozen, the prevailing market price in North Carolina when these tests were made, the relative value of eggs from other breeds on the basis of their weight and their real value in proportion to the market price was calculated as follows:

Breed.	Relative val.		Val. above market pr.
	per doz.	Cts.	
S. C. Brown Leghorn p.....	13.5		
S. C. Brown Leghorn h.....	16.3		20.7

One of the Collies from Springdale Kennels, owned by Geo. T. Underhill, of Knoxville, Iowa. See the advertisement on this page of The Homestead. Write for their large, illustrated catalog.

On the basis of the results obtained the station believes that selling eggs by the pound would be more rational than by the dozen. "On what other article of food will people be content to pay the same price for what may vary over 50 per cent in value? Or what producer of merchantable produce of any other kind will consent to supply all the way up to 55 per cent more than market value and not think to add to the standard price for additional value? An apparent objection to selling eggs by weight is that they are not generally used in the household in this way. Most recipes call for eggs by number and not by weight. There is no question that weighing the eggs would be more accurate, and recipes are occasionally met with in which this method is followed.

SUMMER VACATION IN COLORADO. LOW RATES VIA ROCK ISLAND LINES.

Colorado, as a place for recreation, is the choice of many thousands of summer tourists.

Colorado is a land of clear, pure air and golden sunshine. It is a land of sparkling

mountain streams and glassy-surfaced lakes. There are more enjoyable things to do, more grand sights to see in Colorado than any other place under the sun.

From June 1 to September 30 Rock Island Lines will sell summer tourist tickets at rate of \$21.75 from Des Moines, Iowa, to Denver, Colorado Springs or Pueblo and return. Return limit October 31. July 10 to 15, inclusive, the special round-trip rate of \$19.25 from Des Moines, Iowa, is effective.

This latter rate is authorized on account of the Elks' Annual Meeting at Denver July 16 to 21. Tickets limited to return to August 20.

Very low rates will also be in effect to Glenwood Springs, Colo., Salt Lake City and Ogden, Utah, Yellowstone National Park and to the Pacific Coast, with cheap rates for side trips to nearby points of interest en route.

New and improved train service via the Rock Island is an important feature for the Colorado traveler to consider.

Full details of rates, routes, service and any information desired will be gladly furnished by the Rock Island Ticket Agent at 423 Walnut St., Des Moines, Iowa. Geo. R. Kline, C. P. A.

SUMMER TOURIST EXCURSIONS

Via Chicago Great Western Railway to points in Alberta, Arizona, British Columbia, California, Idaho, Montana, Oregon, Washington, and Mexico City. Stopovers and side trips allowed. Tickets on sale daily to September 15th. Final return limit October 31st. For full information apply to E. J. Sawyer, City Ticket Agent, 514 Walnut St., Des Moines, Iowa.

NEW YORK AND RETURN \$13.00

Plus \$2.00 via Erie R. R. from Chicago, August 28th and 29th, good to return until September 4th, inclusive, good to stop over at Saegertown, Cambridge Springs, Pa., Chautauqua Lake, N. Y., and Niagara Falls. Apply to your local ticket agent or write J. A. Dolan, T. F. A., Erie R. R., Chicago, Ill.

THE FARM ORCHARD.

BY L. R. JOHNSON, CAPE GIRARDEAU, MO.

The condition of the ordinary farm orchard is generally such as to make the experienced horticulturist feel sad. To begin with, the soil is often the poorest on the farm, because it has been regularly called upon to yield a crop of grain in addition to a crop of fruit. That this double burden is an unfair and impossible one does not seem to have attracted the attention of the farmer. He has never thought of fruit as a crop at all. He very well understands that a crop of corn or wheat takes away a certain amount of fertility and leaves the soil poorer, but he has always regarded a crop of apples or peaches as somehow the product of the tree, without direct relation to the soil. Once planted, he considers it the duty of the tree to bear year after year and furnish an abundance of fruit without any of the attention that he would consider indispensable in the case of a grain crop. And if it does not, if the tree sets little fruit, or if what it sets drops off, or if it be small and knotty and wormy, or if it be destroyed by the rot, he talks of the good old days when the trees were always laden with fine fruit and the cellar was stored with bushels of rosy-hued beauties that were passed around the circle before the big fireplace on winter evenings and enjoyed with the keen relish of healthy appetites. He laments the degeneracy that has come upon the trees of modern days and declares his inability to understand why the orchard of today falls so far short of the achievements of its ancestors forty or fifty years ago.

The first step toward permanent reform in the care of the orchard must be a thorough understanding that fruit is a crop in exactly the same sense as corn or wheat; that is, it requires a certain amount of fertility in order to return good crops; that every crop consumes a certain quantity of soil fertility and that that fertility must be maintained by the same means employed in the case of other crops. Secondly, that a certain amount of work must be given toward the production of a fruit crop just as in the case of other crops. These propositions once comprehended, there should be no complaint if the orchard yields only in proportion to the care bestowed upon it.

The truth is, there is no good reason why the farm orchard should not be as profitable as any field, at least of the

same number of acres, on the farm. If the farmer, convinced of this, stands ready to reform his methods, the first process will be to restore the fertility of the soil to the degree required for a good crop of corn. To do this he can employ the legumes, such as clover and peas, as well as stable manure and commercial fertilizers. If the trees are large, at least a quarter load of manure should be given each one, scattered as far out as its limbs extend; or a top-dressing of the whole orchard would be preferable if the supply of manure will admit of it. If commercial fertilizers are more available, an application of ground bone and muriate of potash, 200 pounds of each to the acre, would be highly beneficial. The trees should be carefully inspected, one by one, and lightly pruned if necessary, but the cutting off of large limbs should be avoided. A spraying outfit which is now an absolute essential for fine fruit, can be obtained at a moderate expense; and the approximate dates and times of applying the mixtures, together with the necessary formulas, can be learned from the numerous publications on those subjects.

A great aid to spraying, and one that will at the same time be remunerative, is the use of certain kinds of stock in the orchard, such as hogs, sheep and poultry. The number of injurious insects can be greatly reduced by the eating up of all fallen fruit, for the infected fruit drops first and if eaten by stock, the larvae is of course destroyed. The ravages of the brown rot are also greatly diminished by this means, for the spores survive from year to year in the rotten fruit that dries up and remains under or on the tree till the next year. So efficacious is the presence of stock that it is often found nearly equal to spraying in subjugating insects and rot.

Hogs can be turned in to eat not only the fallen fruit, but clover, rape and cow peas. These crops will fatten the hogs and together with the fruit put them in fine condition for the fattening process. Sheep are much like hogs in making away with the fallen fruit. Poultry are also very useful, and the orchard makes a splendid place for the coops and the young chicks. While they cannot devour the whole fruit, they will eat some, and also very many insects that would escape the hogs and sheep. A good annual rotation to improve the orchard is cow peas sown in May, to be "hogged down" when ripe, followed by rye disked in in the fall. Poultry are also very fond of ripe peas and when given the run of a patch invariably give liberal returns in eggs. The rye will afford a good green winter pasture for both the poultry and the calves. Under such treatment the orchard will soon be as fertile as any land on the farm, and the increase in its returns will convince the farmer of the wisdom of this new policy.

A Fight With Gophers.

To the Editor of The Homestead:

Several years ago in my California garden I had a plague of gophers. They undermined the whole of it, so that wherever anyone stepped, the ground sank a few inches. The destruction they worked was frightful, eating plants above and below the surface of the ground. They managed to keep entirely out of sight.

On one occasion I saw the sand with which, in their usual way, they had stopped the mouth of one of their holes, moving. I gave it a blow with a heavy stick and killed a gopher. From that time they disappeared, and it was years after before there was another invasion of the pests. This time their greed and activity were surpassing, and it seemed as though nothing would be left in the garden. Carnations and lobelia were their special favorites.

A gopher trap was set again, but they only seemed to laugh at it, covering it with dirt and running over it. Pieces of carrot and other vegetables and also raisins were hollowed out, filled with rat poison and put down in the holes without effect. They seemed to have taken possession, and it seemed as though nothing would rout or disturb them.

Seeing their partiality for lobelia, it

Simpson-Eddystone Prints

The Standard calicoes of the United States for over half a century. Your grandmother used Simpson Prints. They were good then because the character of the manufacturer was stamped on the materials and entered into their making. To-day they are better than ever before—the old-time high ideals have been maintained and Eddystone improved art and machinery have raised the standard of Simpson Prints still higher.

Ask your dealer for Simpson-Eddystone Prints.

In Blacks, Black-and-Whites, Light Indigo Blues, and Silver-Greys; Shepherd Plaid effects and a large variety of new and beautiful designs.

Thousands of first-class dealers sell them.

SAVES LABOR---SAVES TWINE---BINDS TIGHT.
AMERICAN SHOCK BINDER
Made by American Shock Binder Corporation.

The Corn Grower's Friend. Saves its cost ten times in one corn crop. Every farmer should have one. One man can bind the shocks as fast as 15 men can cut and shock the corn. Approved by every experimental farm and agricultural college where tried. Price, express prepaid, \$2.

\$50 Per Week. You Can Make It. Active agents wanted wherever corn is grown. Salesmen average ten to fifteen sales daily. Remit \$2 for a binder and secure agency at once.

J. P. LAWRENCE,

General Sales Agent,
1100 North Levee, St. Louis, Mo.

occurred to me that it might be made a vehicle for poison. But the question was how to make poison adhere to the plant. I had heard that gophers were fond of sweets, so I procured one of the strongest poisons—cyanide of potassium—and mixed it up with honey. Then taking sprays of lobelia, I smeared them in the poisoned honey and placed them in the gopher holes. That settled them—there were no more signs of gophers. San Francisco Co., Cal. E. S. Ryder.

THE HOME TOOL KIT.

There is many a nick in many a good tool because it was not properly cared for. If tools are thrown together in a box or drawer, they are soon ruined.

To provide a set of good tools for the home and the proper place to keep them the Keen Kutter Tool Cabinets have been built, containing every tool that is necessary or useful, and each tool belongs to the famous Keen Kutter brand, which is the only complete line of guaranteed tools made.

Keen Kutter Tool Cabinets are the only ones made containing a set of tools under one name and trade mark, and guaranteed to be perfect in every respect.

Keen Kutter Tool Cabinets give the home man an opportunity to possess as good a set of tools, kept in as good condition, as the most experienced carpenter or cabinet-maker.

It is more necessary to have the best tools for the home than for the shop, because few men have the facilities for grinding, sharpening, resetting and restoring dulled or damaged tools at home.

The tools in Keen Kutter Cabinets are sharpened and tested at the factory, and must be perfect before they leave on their errand of service. They will hold their edges, temper, balance and adjustment indefinitely with proper care and ordinary use.

Keen Kutter Tool Cabinets and Tool Boxes are made in all sizes, containing various assortments of tools, and ranging in price from \$7.50 to \$100. All of them contain, in different varieties and numbers, saws, braces, bits, chisels, gimlets, awls, planes, hammers, hatchets, files, pliers, screw-drivers, wrenches, nail-sets, reamers, rules, squares and all the necessary accessories that you would possibly need.

The Keen Kutter Tool Cabinet Booklet will be sent free to anyone on request by Simmons Hardware Company, St. Louis and New York, U. S. A.

STRAIGHTFORWARDNESS DID IT.

It is a time of prevailing humbug, no doubt about it; and men are wondering whether it is impossible to do a successful business without any humbug. Here is a first-rate answer. Macbeth, the lamp-chimney maker of Pittsburgh, beginning small about twenty-five years ago, has been the best in his line in the whole world for many years, and is now extending his trade abroad. His ways are marked by perfect straightforwardness in advertising and dealing.

OUR HOME DEPARTMENT

All communications intended for this department should be addressed to Post Office Drawer 1127, Kansas City, Missouri.

WITH THE EDITOR.

Sometimes this department seems like the home of a widow who has a young family and small means, the housemother has to provide much of the food as well as serve it. At others it is like a family where father and grown-up children bring in abundant supplies and all the housemother has to do is to see that the things they supply are nicely served.

Notwithstanding the heat and busy season, the home cupboard is unusually well-stocked, some of the supplies will keep and lose nothing by the process; others, like certain delicious harvest apples in our old garden, must be used at once or lost. The housemother is delighted with the unusual abundance—who, since the family is doing its part so nobly, will lessen her own labors for a few weeks and simply preside at the family table.

An editorial was prepared for this week—it will keep. A children's day program to follow it is all but completed—it also, can wait. For a few weeks we shall close the editorial sanctum and meet in the big living room of the home where, Among Ourselves, we shall entertain each other and gather inspiration and strength from winsome living.

HOME AND HOME MAKING.

LITTLE HELPS BY THE WAY.

Dear will of God, since thou hast blown my soul

Once through and through with Thy great breath, I pray

This prayer alone, that I may Thee obey In everything, nor shrink from Thy control.

So shall my life take up the planets' pace And move with winds and storms; one work, one end;

And God shall rule His universe and send What messengers He will before His face.

—Zephine Humphrey.

What do we ask of life here or, indeed, hereafter, but leave to serve, to commune with ourselves and our fellow men, and from the lap of the earth to look up into the face of God.

ROOTING SLIPS.

In describing her method of rooting slips in soil a Kentucky woman florist says: "I break off slips of roses with a beel of half-ripened wood, place in a rich soil, turn a glass tumbler or jar lightly over them and leave them this way for three weeks, keeping them well watered. They are usually well rooted at the end of three weeks, after which I put a prop under one side of the tumbler or jar and in this way allow them to have air for one week. I then remove the glass and allow them to grow undisturbed the rest of the summer. I root the Hihiscus and other hard-wooded plants in this way also. I prefer rich soil to sand, as the sand dries out so quickly and the young roots are injured."

JUST A SMILE.

They were out on a bicycle tour and became very hungry, as bicycle riders often do. As there was no inn anywhere within easy reach they applied at a farm house for food. An old man was working in the potato patch, and they attempted to negotiate with him for a luncheon.

He was very willing to do what he could and reassured them by declaring that although he was afraid there was not much else to eat in the house he had plenty of potatoes and he could recommend them as the finest in the country.

The luncheon was entirely satisfactory and after the guests had finished it they spoke enthusiastically of their repast and praised the potatoes in particular.

"Yes-s," said the old farmer, slowly, "you might ha' done wuss. You have eaten two Schoolmasters, two Blacksmiths, four Kidneys and a couple o' White Elephants."

FOR THE COOK.

A New Egg Recipe—Cut an onion into fine dice; fry it in a tablespoonful of butter; then dash in a teaspoonful of vinegar. Butter a shallow dish; sprinkle the fried onion over it and break in five eggs, being very careful that the yolks remain whole. Bake in a hot oven until the whites become a delicate film. Dust with salt and white pepper. Just before sending to the table sprinkle all over the dish coarse bread crumbs

Your roof—give it the permanent water-proofing power found only in Genasco Ready Roofing.

Ask your dealer. Write, anyway, for Book N and samples.

THE BARBER ASPHALT PAVING COMPANY

Largest producers of asphalt in the world
New York PHILADELPHIA Chicago

fried delicately brown in butter, and garnish with watercress or parsley.

Ordinary Potato Patties—Cook eight potatoes, mash and season to taste; cream an ounce or two of butter in a suitable dish, add the yolk of an egg, then put in the potatoes with two tablespoonfuls of cream (or thin, sour milk). When this is thoroughly well mixed, beat up the white of the egg to a thick froth and stir it into the mixture. Divide into the required number of tins, filling them cool, then bake in the oven until a golden brown.

Broiled Chicken—Singe, split down the back, clean and wipe with a damp cloth. Rub inside and out with a little butter, then sprinkle with salt and pepper. Arrange on a greased wire broiler. Cook with flesh side toward the fire at first. When seared hold a little farther away from the fire. Turn occasionally on the skin side, but be careful, as it readily scorches. A chicken weighing two pounds and a half will take from fifteen to twenty minutes. If not well done it will be tough. Transfer to a hot platter and rub again with butter.

Brown Gravy—This is a useful mode of making a little gravy when no stock is at hand. Fry chopped onion (allowing some of the skin to remain upon it), carrot and turnip in a little butter till dark brown. Rub up an ounce of flour with half a pint of water, and add it to the vegetables. When boiling add a teaspoonful of chopped parsley and the same quantity of mixed herbs, a cupful of sugar and a dessertspoonful of vinegar. Let it simmer for half an hour by the side of the fire, and then strain and serve.

Apple Custard—Take tart apples, stew till soft, rub through a colander, and to one pint of the apple add four eggs well beaten, one teaspoonful of sugar, one of butter and one-half of grated nutmeg. Bake as other custards. It is excellent.

Sweet Pickles.—To pickle or spice any delicate fruit of fine flavor is a mistake. It should be put up only in sugar, which preserves the flavor intact. Green tomatoes, watermelon rinds, yellow tomatoes, onions and artichokes that have either an acid or a flat flavor are the most suitable things to pickle.

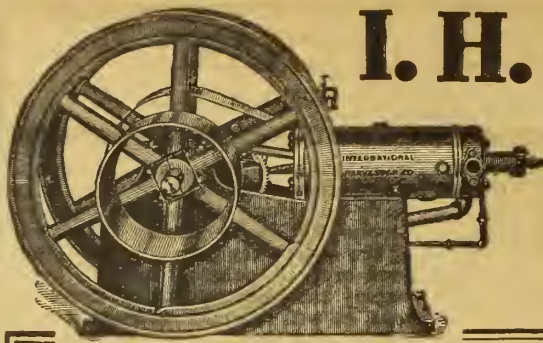

Sweet Peach Pickles.—Something new in making sweet peach pickles is thus prepared: Cut the peaches in two; remove the stones and fill the opening with horse radish mixed with vinegar; tie the two halves together; pack in jars and cover with the following liquid: To two pounds of sugar add one pint of vinegar (best cider vinegar alone should be used for all pickles); tie in a bag some whole cloves, cassia buds, stick cinnamon (broken) and some tiny bits of ginger, allspice and nutmeg; reheat three times and seal the jars. Keep in a dark, dry place. When ready to use remove the string and serve with meat.

Watermelon Pickle—Take the white out of the rind; cut into forms or pieces; dissolve one ounce of alum in one-half gallon of water; scald rind in this until it becomes yellow; take one cupful vinegar to one-half gallon of water and scald in this until it becomes green; take out and drain and put into ice water; let stand one hour, changing water once. This makes it brittle. Make a sirup of one pint of vinegar, one quart of sugar, with cinnamon, nutmeg and mace as for other sweet pickles; cook the rind in this very slowly until transparent. It takes three gallons of water, six ounces of alum, five quarts of sugar and five pints of vinegar for three melons.

AMONG OURSELVES.

Initials are so impersonal, so lacking in individuality, I wonder the friends ever choose to be known, or rather to be forgotten by them. Why not take some pen name if you do not wish to use your own. For instance, would it not be better if "B. S.," being a married woman, allowed us to think of her, not as two letters, but as a wife whose husband sometimes called her Mrs. Bess? I think so. I propose we call her so. I am the bolder in taking this liberty that what she brings us is so good, she has no need to fear identification:

I have just been reading M. L. N.'s letter and, as I have had a little experience along that line myself, I will try and give my view. I was married at seventeen, have been married seven years, and have four small children. Now, I say a girl at seventeen, or even eighteen, has no business to marry, and I believe the man who loves her, if he realized what it would mean to her as well as to himself, would not urge her to marry at that age. There may be, and are, exceptions, but the average girl at seventeen or eighteen is not fitted to fill the position of wife and mother, and in most cases of early marriages one follows the other. She has so many things to learn. Things she did not think of until she was in her own house, without mother at hand to confer with. She doesn't know how to manage to make her work easy. She finds as motherhood comes that she is not always well and strong as she used to be, and perhaps she doesn't get things done just as they ought to be or as she would like to have them. Now, I believe the average man does not realize what his young wife is passing through; therefore, he does not overlook her shortcomings. When he comes in to find the mother half sick and baby cross, the house not in order, and perhaps his meal not just ready, he is apt to be irritated and scold, which does not help the tired, worried girl. And after a few such years she is ready to become discouraged and quit trying to have things as they should be, as the real effort she made on the start was not recognized. Now, this is not just my experience, nor are they all the same, but the other trials have come to me and I feel sure they would have overpowered me only that through it all I have had the kind, loving sympathy of the best, or at least one of the best, men in the world. He has borne patiently with me all my failures and shortcomings with only love and sympathy, and help when I was overpowered by the demands of work and motherhood. I sympathize from the depths of my heart with the girl who gives her youth and freedom

I. H. C. Farm Powers

That a Boy Can Run

That means something. A man's power in the biggest and widest sense of the word but so simple that his boy can run it.

Don't get a complicated engine even if you are a thorough mechanic.

I. H. C. engines are farm engines, intended to be run by farmers, doing farmers' work. They are made as simple as it is possible to make them and have the proper efficiency.

They are not only simple—they are scientifically and conscientiously built. Designed by men who know what a gasoline engine should be. Built so they can stand the most rigid test that can be put upon them.

An imperative factory requirement is that every engine must develop 20% to 40% more than its rating of power. If it fails in this test it is sent back to the factory as a deficient engine.

INTERNATIONAL HARVESTER COMPANY OF AMERICA, CHICAGO, U.S.A. (Incorporated.)

Equipped for use with
**GAS, GASOLINE
or ALCOHOL.**

For certainty of response, quickness of action, smooth running and low cost of running for power made, they have no real competitors.

Designed and built and tested so that no man can possibly make a mistake when he buys one.

We cannot afford to sell any other kind. Vertical, Horizontal, Portable, Stationary—many convenient sizes. Can be used for any work about the farm, from turning the grindstone to operating a threshing machine.

Call on the International Agent or write for catalogue.

WE GUARANTEE that under the same conditions as to power and speed applied, conditions of corn, etc.,

THE APPLETON CORN HUSKER

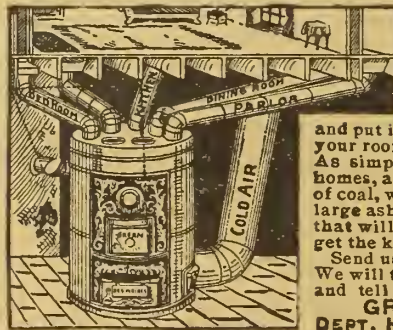

will do more and better work with less power than any other machine of like character and corresponding size; that it is simpler in construction, easier in every way to operate and easier and safer to feed. Let us tell you more about it, and about the

APPLETON MANURE SPREADER

which is guaranteed to do all that any spreader can do and to do it better and more easily, to last longer and to be so easily handled that any boy who can drive can run it as well as any man. We also make Shellers, Feed Grinders, Wood Saws, Powers, Windmills, etc., all Appleton Quality, the standard of excellence.

APPLETON MANUFACTURING CO., 39 Fargo Street, Batavia, Illinois

GET RID OF YOUR STOVES.

The Harvest Will Soon be Over.

Are you going to be comfortable with a furnace, when you read, or roast your head and freeze your feet beside a stove? Get a

GREEN FURNACE

and put it in your cellar out of the way. You save the dirt in your rooms, and get the space which your stoves now occupy. As simple to operate as a stove. Used in 2300 Des Moines homes, and more going in every day. Economical in the use of coal, will last almost a life time if properly cared for, have large ash pits and long smoke travel. Don't buy something that will make you want to swear every day for ten years, get the kind that satisfies.

Send us your name to-day, also the name of your dealer. We will tell you how and where to get a GREEN FURNACE and tell you all about it. Address

GREEN FOUNDRY & FURNACE WORKS, DEPT. H, DES MOINES, IOWA

The Rue Washer Washes.

THE Rue Washer is the only machine that forces air through the clothes. It is the only machine that employs the same scientific principle used on the old time washboard. It is made of the best quality galvanized iron; it will not dry up and fall to pieces; it will last a life time; it weighs only 50 pounds; it will not tear the clothes; it does the work better, easier, quicker than any other machine in the market. Every machine is sold under the positive guarantee of the manufacturer. Ask your dealer for it. If he hasn't it write us. We will send it on trial. The price is only \$3 at your R. R. station.

Rue Mfg. Co., Mapleton, Minn.

LIGHTNING HAY PRESSES

to a man who does not recognize the sacrifice she has made for him or the struggle she must pass through. While I am happy in my home and would not wish myself different I realize that I have missed much of girlhood, but most of all I regret that I was not prepared to be a better wife and also a better mother. Yes, by all means, let us teach our girls that married life is not all play, or even half of it, and that love and forbearance on both sides are required to make it a success.

We all love the author who expresses our views, who crystallizes into beautiful speech our unexpressed ideals, our

unuttered hopes and fears and beliefs. I feel sure thousands of young wives are drawn to Mrs. Bess. I only hope it will be arranged that their husbands shall read Mrs. Bess' letter.

Sometimes initialed letters come in bunches. Here is a man who wishes to be known as M. B. Let us call him Martin Barrow. Until now we have not had a man express himself upon the question of large families, and as Mar-

tin Barrow evidently does his own thinking, what he has to say is doubly worth while:

As I am interested in the raising of a family I was very much interested in the sisters' writing of being opposed to large families. I am the third of eight sons of one father and one mother, and I have four children of my own. I was born here in Kansas almost fifty years ago and I know something of the hard times of large families, being raised out here. I don't believe that a father and mother should attempt to raise more children than they can properly care and provide for. I don't think that children should be raised up and turned out on the world to root hog or die. It is a very easy thing for the president to cry out for large families to be raised by others. That does not burden the president in the least. He has not got a large family for a man of his wealth and standing. I have a neighbor no older than the president who has eleven children. In my father's last years his most pleasant thought was of his eight stalwart sons (and they were not angels either), so I say, let all parents be fully persuaded in their own minds as to the size of their families.

Suppose a reckless, selfish man has a dozen children, which, to quote Mr. Martin Barrow, he turns out on the world to "root, hog, or die." When he grows old, this man may take pleasure in his children, but there is another side to the matter. Will his children take pleasure in him? Is it not the right of children to be given such training and equipment that they shall go through life proud of and grateful to those who gave them birth? But this question is for circle discussion, and I notice that Olive Green, our friend who precipitated such warm discussion upon evening amusements a while back, has been thinking on this line as well as on the merits of borrowing:

So many subjects of interest are being discussed Among Ourselves that I eagerly read all. The subject of borrowing is one that is timely, as it is at all times a habit. To borrow and not return is one form of burglary. In our ideal neighborhood it is not troublesome, as we all live close to town and doubtless wouldn't borrow if we didn't, so clearly do we follow the golden rule. Our neighbors' children do not torment us either, so we can't appreciate the hearty discussions we have had on that line of thought. As to children on the farm, as one sister says, it is so purely a personal subject that it usually adjusts itself. I have known unhappy parents with and without children, and happy ones likewise. Have you ever thought how nice it would be if we could have our children grow up to help us in early married life when we are getting a start, and a little one to cuddle and hold to our hearts when we are older and can have more leisure to enjoy them? I cannot say I am an advocate of large families for farm people who are in debt and not able to have help. It is nice for the German empress to have lots of stalwart sons, but there is a difference in her situation and that of the average farmer's wife.

Woman-like, Olive Green thinks of the woman—of the wife and mother. This is as it should be—the woman bears the heavy end of parenthood.

The Kaiser's wife and the wife of our president may agree with the views of their husbands. Possibly they do. Nurses and governesses relieve them of many of the burdens of motherhood, and comfortable incomes permit them to do everything for their children which the most ambitious mother could desire. A theory which may work admirably as applied to them has, as Olive Green suggests, a very different complexion when applied to the farmer's wife.

Still another initialed letter! What can we make out of E. W.? It would make "Excellent Woman" but I know the writer is too modest to make that name agreeable. There are other combinations—suppose we call her Ellen West. Ellen West comes grumbling, but not without justification. Listen to her and see if you can suggest a remedy for the ills she complains of:

This has been a good year for blackberries and, as usual, we have not been able to gather one-half the berries in our timber because of the queer ideas some of our neighbors seem to have as to their rights to everything that grows in the woods. Picking berries on another man's land without permission is to my thinking one form of stealing and nothing less. If anyone has any arguments to the contrary I should like to hear them. I have always noticed it is a common remark for those who live on the prairie to poke fun at the people who live in the timber as being in "hackwoods," or some similar slighting remark, but those same prairie dwellers are only too glad to strip our woods of all the wild fruit

that grows, and gather our nuts, and even fell a tree to get some honey they have located. And it never seems to occur to them to say "Please" or "Thank you" to the farmer who pays taxes on that same timber. Since this condition of affairs exists and I cannot go to the timber for my fruit I have wondered why I could not transplant some of the nicest blackberry bushes to my own yard. I have a piece of ground in a side hill facing the south that is partly shaded by trees and at present is grown up to grass and weeds to use for my berry patch. Can anyone tell me which plants to transplant—the ones that bore berries this year, or the young shoots that just started this year? Should the ground be well manured, and what is the best time to transplant them, now or later in the fall? Any information on this subject will be appreciated.

Ellen West makes me feel like hiding my head. When I was a girl, I more than once did the very thing she makes look so shameful. In extenuation I plead that the owner of the berry patch never seemed to object to our presence, which is probably the reason we failed to realize that in picking berries as we did we were really stealing.

A question asked by Mrs. Larsen regarding the advisability of mothers allowing their daughters to assist in work in the field brings Mrs. Mark to her feet:

In reading so many good letters it seems as though I were really visiting and that I must speak out. It seems to me that when a farmer is in a tight pinch, hay lying out and liable to spoil, that it would be no more than right that a daughter should help get the hay in, or even the wife might help in such cases. I don't think either this work or to milk a cow or two at night when the tired farmer could finish a piece of work, will make a sensible daughter thought any less of. They can be just as lady-like at doing such work as at playing basket ball and a great deal more useful for the present and future lifetime, I think. Now, as to having a man to be sure and bring in all the water and when he comes from the field tired and thirsty to meet him at the door with an empty water pail would mean lots of "cheek," I think. Suppose, now, we get a good, cool drink for them on their return from the field and in return they get us a few extra pails of water on wash day, it wouldn't then look quite so one-sided. I don't believe in making a slave of either the man or woman, but to help each other, was not this our pledge in the beginning? Well, I will not take more space this time, for I want to read long letters from other readers.

I rather suspected that Mrs. Larsen's question would have results. I was quite sure of it after Aunt Ruth expressed herself: "Already the surface of the stream is rippling and a stream is rising—it looks as if we might have white caps after a little." The breezes are refreshing in sultry weather—let us enjoy them. Mrs. Martin Jones has the floor:

I do not agree with Aunt Ruth in her letter to this circle of August 2d, telling the girls not to learn to do certain outdoor work. That not knowing how to do them, the fathers and brothers would respect and love them better. Let me cite an instance. During this hay season, and the last day of haying, it being Saturday, the father was taken ill early in the morning. There being but one other man on the place, and being unable to procure an extra man at such short notice, the young daughter went out and did the load, her father helping what he could while unloading at the barn and lying on the couch between loads, where he should have been all day. Her willingness to help this way enabled them to get the last load in the barn. By Monday morning it had rained. Do you think, Aunt Ruth, that her father respected and loved her less for it? I am sorry to know that there is one woman who deliberately makes it a point to have her water pail always empty for her men to fill. They certainly cannot have as high an opinion of her as they might. I am inclined to think Aunt Ruth has had the wrong kind of bringing up, and perhaps she is to be pitied more than censured. I am glad to see that more women sign names instead of initials to their letters. How much easier it is to remember a name than it is an initial.

It has never happened before in the history of this circle that mother and daughter have arisen to speak at the same time upon the same topic. That Mrs. Beryl Jones will have an attentive hearing goes without saying:

After reading over Aunt Ruth's article in the August 2d paper, I thought that as Mrs. Walker asked someone to talk about her questions I would give some of my views on the subject. I, for one, disagree with Aunt Ruth. There is nothing that I enjoy more than getting out in the hay field, or any other part of the farm, and driving a team on the hay rake, wagon or harrow. This last spring I disked and harrowed a small field and did it as well as any boy could. And in haying time I raked almost all of our hay, besides loading several loads, and put up over eighteen tons, too. Our farm is not a large one, but there is a great deal of work to be done on it. And as we are a small family there is not as much indoor work to be done as there is in some families, so I am more easily spared from the house than some girls are. Aunt Ruth said that girls and women should spend their time playing basket ball and the piano. For my part I do not know how to play basket ball, and I would much rather read than play the piano or organ. And, too, I think that boys enjoy basket ball and other games as well as girls do and that they shouldn't be kept from enjoying themselves in that way occasionally. Another thing that

10 WEEKS FOR 10c

The Oldest and Best Known Agricultural Weekly Paper in the West.

The Journal of Agriculture

Established 1866.

THE JOURNAL OF AGRICULTURE is a weekly journal that every farmer, every gardener, every stock raiser, every man and woman interested in poultry or the products of the soil, will need and read from cover to cover. No dry rot, no long-winded articles by city farmers who do not know the difference between a "pumpkin tree" and "watermelon bush," but short, meaty, interesting, useful, reliable and sensible matter in all departments throughout. Besides well written stories of fiction, travel and adventure, current news in condensed form, handsome illustrations, timely cartoons, terse comment on live topics, wit and humor, it contains departments concerning the care and handling of all kinds of farm stock, horticulture and gardening, cooking, hints about the house, veterinary department, poultry, dairying, bees, young people's department, correspondence columns and the LATEST ACCURATE MARKET REPORTS giving the prices of Live Stock, Grain, Seeds, Vegetables and Produce in the leading markets, thus keeping its readers well posted as to what their products are worth and enabling them to get the top price for them.

To introduce THE JOURNAL OF AGRICULTURE into thousands of new homes, we will send it every week for TEN WEEKS FOR 10c. Address Journal of Agriculture, 19 Journal Bldg., St. Louis, Mo.

BOOK-KEEPING, SHORTHAND, TYPEWRITING and TELEGRAPHY. GYMNASIUM and AUDITORIUM. Free Employment Bureau. CATALOGUE "G" FREE. J. F. Spalding, A. M., President.

I do is to milk two cows every night and morning, and sometimes I go about a quarter of a mile after the cows. I enjoy reading very much and I have quite a collection of good books. I received fifteen books last Christmas, but I have not read all of them yet, as I don't have enough time. Perhaps I am an unwelcome visitor and if I am I'll not write again.

Those who do not approve of girls working in the fields will not be the last in saying that Mrs. Beryl is a welcome visitor. It is good for us to hear what the young folks think about things. Personally, I wish that every meeting might be brightened by the fresh faces and the fresh voices of the young men and young women who are such an important part of the family.

A number of other things along this line must not be held over until our next meeting, which promises to be unusually interesting. Mrs. Mollie Buckman will close the program this week by giving us a few words on the timely subject of canning tomatoes. By the way, can anyone give us the recipe for rummage pickles? Mrs. Gowcock asks for it:

Wash tin cans and have lids well fitted. Scald good, sound, fresh tomatoes, and as you skin them press them with the palm of the hand into the cans, without cutting the tomatoes. When enough cans are full, lay the lids on the cans and set them in a dripping pan and set in the oven. When they have cooked until juice fills can they are ready to seal. These are fine.

Dressmaking and Millinery—No. 530.

Sylvia Silverthorne, Muscatine, Iowa.

[All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.]

Some hints as to the general outlines of the coats and jackets to be worn during the approaching seasons were given in a recent paper, and now that the garments themselves are on display the materials may be mentioned with some certainty. We have been assured that plaids are to be shown exceeding favor in all fabrics, and in all manner of types from the tiny check in two tones to the broader plaids in a combination of tones or even of colors, and yet with it all we were scarcely prepared for the great predominance of these in the wraps of the various kinds, from the short, jaunty

jacket to the coat of three-quarter or full length. The idea is not at all new, as we had these some years ago and came to think them just the thing, but just now we are hesitating a little about adopting anything so striking in a coat that must serve at least two seasons. Some of us will perhaps decide upon something that may be worn even longer without attracting unfavorable notice. I noticed a costume consisting of medium length coat and pleated skirt that combined blue and green in the plaid, varying shades of the two colors being seen. It was very pretty and stylish looking. Different shades of brown, some of these shading almost to black are combined in the same way. I noticed a three-quarter length coat in empire style, in plain, dark red, proving that the red coat will be with us again.

D. L. MUSSELMAN, Pres.

205 Musselman Bldg., Quincy, Ill.

As we usually purchase our heavy winter wraps ready-made it is scarcely worth while to enter into details as to trimming, etc., but it is well to get a general idea beforehand of what we may "look for" when we are ready to purchase.

No. 5411 pictures one of the favorites of the moment in the way of a blouse or shirt waist for general wear, such designs be-

[5411—Shirt Waist or Blouse, 32 to 42 bust.]

ing especially adapted to heavy cotton fabrics that are worn so much in the fall, and also to the flannels that are being made up now to wear when the cool days come, or even for the cool evenings that are with us from time to time even early in the season. The short sleeves are still the favorites even for the purposes mentioned, but there will usually be some provision

[5421—Girl's Dress, 6 to 12 years.]

made for the added length in the way of an attachable cuff. Or a full length sleeve may be made instead. The rolling collar is easily transformed into a standing one over which a separate collar may be worn. Pattern No. 5411 is cut in sizes for a 32, 34, 36, 38, 40 and 42-inch bust measure.

The novel little dress pictured in No. 5421 shows some charming features, with its medium long waist, its chemisette, and its box-pleated skirt. Further novelty is noticed in the manner in which the dress is trimmed, although the trimming is very simple. In the pattern there are fronts and side-fronts, backs and side-backs, the back edge of the fronts and backs being trimmed, then the side portions joined to these by means of tabs and buttons that play the part of trimming. There are also tabs that turn back from the edges of the cuffs, and that drop down on the pleats below the belt. These may sound difficult, but they are in reality very simple, and the pattern provides for it all, and there are instructions for the work of putting together.

Pattern No. 5421 is cut in sizes for girls of 6, 8, 10 and 12 years of age. Send eleven cents in money (not stamps)

for any patterns wanted, these or others. Address all orders to Sylvia Silverthorne, Muscatine, Iowa.

THE INTERNATIONAL SUNDAY-SCHOOL LESSON

Third Quarter. Lesson IX. Luke XVIII, 1-14. Aug 26, 1906.

The Rich Young Ruler.

A special, though sad, interest attaches to all the incidents of Jesus' last journey to Jerusalem. He had healed the lepers and blessed the children, and now, almost under shadow of His cross, in point of time only four weeks removed, comes this subtlest of interviews with the rich young president of some synagogue.

The man was like one thoroughly incased in armor. Every piece was burnished with diligence and disposed for effect. He stood panoplied cap-a-pie. But beneath all this splendid, impregnable, moving fortress lurked a disquiet spirit, that felt itself not quite secure in spite of all, else he would never have come to the Nazarene rabbi.

Jesus just condescends to enter the lists, and tilt and foil with this knight of legality on his own ground and by his own methods. First of all, He will bring him, with all his boasted goodness, face to face with the absolute goodness of God. He adroitly puts a significance upon the hollow term of polite address which the user of it never dreamed of. In the blazing light of Divine perfection the vaunted armor of self-righteousness is sadly dimmed.

But since the inquirer will be perfect by his own exertion, Jesus holds before him the unyielding, flinty table of the law, and cries, "Do and live!" The legalist, thinking only of the letter, could say, "I have kept it." Yet spite of this vaunted literal obedience, there is a dread sense of insecurity.

The Master knew all the while the weak spot in his brave and glittering armor. He has only been toying with and testing His opponent so far. Now He brings His lance to rest to make the deadly thrust. "Sell all, give all!" "If you really want the treasure of heaven, give up the treasure of earth."

Gossner quaintly says "a man may pledge and stake his head a hundred times, but if anyone were to proceed to take it from him, he would feel for the first time how it sticks to him." In the dread concussion of Jesus' word, the rich young magistrate realized for the first time how he was wedded to his wealth. It was as much a part of him as his head was. He would as soon have parted with the one as the other.

Jesus was holding up with steady hand the first table of the law that required a supreme love of God which would expel any idol. In the flashing light of that divinely engraven Sinaitic tablet, the ruler discovered that Mammon filled his whole heart. The revelation was thorough. Not a word needed to be added. Equivocation was impossible. A heart was revealed to itself. It found itself destitute of the very essence of religion—supreme love of God.

Crucial moment that! The compass-needle of a soul wavered between heaven and hell. Alas! alas! when in a moment it came to rest, it pointed steadily toward perdition. What a loss! The dread unrest, extreme enough to bring this man of high rank to the despised Galilean; and to bring him, not like Nicodemus, but in the most public place and manner. That unrest might have been instantly removed by the absolute assurance of happy immortality. Riches held by fraillest tenure—wealth, the sport of the natural elements and standing temptation to human rapacity, were then and there deliberately preferred to treasure laid up where moth and rust do not corrupt, and where thieves do not break through and steal.

No wonder the Master-teacher availed Himself of such a didactic incident. He quotes the proverbial description of the impossible to indicate the extreme difficulty of a happy outcome in this and similar instances. As easily could their largest domestic animal pass through the smallest orifice with which they were familiar, as a rich man enter heaven. He will not enter at all except by means of that regenerating grace which enables

him to break the enchanting spell of mammon and love God with a supreme affection.

Analysis and Key.

1. A subtle interview. Meaning of universal application.
2. A knight of legality; the young ruler. Disquiet of spirit leads to Jesus. An impetuous inquirer.
3. Condescension of Jesus. Meets on his own ground. Uses his own methods.
4. Relative goodness made to face absolute goodness.
5. The legalist bidden to "do and live." 1.ferred to the law.
6. Obedience averred. Jesus' admiration of ingenuousness.
7. The weak spot touched last. Crucial command: "Sell and give!" Self-revelation. Lordship of Mammon recognized.
8. Failure in final test.
9. Jesus' caution against undue love of wealth.

The Teacher's Lantern.

Alas! the genius of the rich young ruler is not yet extinct. The world contains as many, if not more, moralists than ever. The refrain still greets our ears: "All these have I kept." They are on the best of terms with the ten commandments.

Under bold front, however, disquiet vents itself in the query, "What lack I yet?" There is conscious deficiency. If an iota is wanting, all is lost; for how shall an imperfect morality effect a perfect salvation? Cause must equal effect.

Morality seeks to fortify itself with added works—"Some bold stroke of righteousness, some grand supererogation." But what do these amount to when the very source of these is evil? They spring from love of self, not love of God.

Morality fails in the crucial test of a complete surrender to God. All the legal doings of a lifetime did not empower the young man to lift his eyes to heaven and cry: "Even so, Father; for thus it seemeth good in Thy sight."

Where morality fails, grace succeeds. The thing impossible to man (in a state of nature), is possible to man when God works in him to will and do of his good pleasure.

Size of a bank account, amount of real estate, bonds and stocks, is not the question. But attitude of the heart—that is the test. If a voice should sound from heaven, "Sell all and give all," are these material things held so lightly that compliance with that hypothetical voice would be possible?

Nay, have these things already been surrendered to God? Are they held in trust for Him? Is the principle of Christian stewardship recognized and lived up to?

Touchstone for all, not rich alone, is here. The poor may be as ardently attached to the wealth they covet as the rich to that they actually possess.

Not dollar out of pocket, but grace in heart, is what God wants. What are our worldly things to the Proprietor of the universe? Moral qualities of the soul are more precious to Him than rivers of oil or cattle on a thousand hills. A literal surrender would have been nothing apart from the spirit in which it was made.

Our Greek word for sin signifies, literally, "to miss the mark." One as certainly misses it by falling short of it as by going beyond it. Failure in supreme love of God is as certainly sin as actual transgression of the law.

Is it small matter that we fall short in our love for that Being who, above all others, should have the supreme affection of every rational soul? He has created, preserved, redeemed? Such love for Him is the very essence of religion.

One may speak with tongue of men and angels, and have gift of prophecy, and understand mysteries and knowl-

Direct from the Mills to You

BEACON-ITE
LONG LIFE ROOFING

We Pay the Freight

When you buy roofing you expect it to last, don't you? You don't want to be incessantly patching little leaks after every rain. Isn't this just what you are doing now? You have had some experience with tin and shingle roofing. Are you satisfied with their lasting qualities? BEACON-ITE is a long wool fibre thoroughly saturated with a secret preparation that makes it absolutely water-tight.

It will not rot or rust. By buying direct from the mills and putting it on yourself (we furnish all necessary nails and cement free), Beacon-ite is the most inexpensive roofing you can buy. If you want a roofing that will last and need no patching, write to-day for FREE samples of BEACON-ITE.

BEACON-ITE MILLS, 1105 N. 2nd Street, St. Louis.

Save all the Grain

Belle City Small Threshers are so low priced the farmer can own one and thresh any kind of grain when it is ready, at less cost than to stack it. Light enough to take anywhere; strong enough to do any work. Compact, durable, guaranteed. Big illustrated catalog free. Send for it.

edge, and have mountain-removing faith. One may literally do what Jesus required of the rich young ruler, and even suffer martyrdom in addition; yet if all this could be conceived of as being done without a supreme love of God, it would be profitless, and as meaningless as a clanging cymbal.

Think you the Savior's test extreme in its severity? Providence is yet daily applying it. Call to ministry, call to philanthropy, halt in amassing wealth to disperse it as an almoner of God—this is Jesus' saying yet, "Sell and give!"

Pity the sorry plight of the rich young ruler. Yes! But have a care, we are not in the same plight ourselves. The natural man is so ready to exclaim "Anything but that, Lord." Rest assured that the Searcher of hearts will never lay His hand on anything short of the idol, and nothing but the new birth will enable us to surrender it.

EACH TUESDAY THIS YEAR

THE CHICAGO GREAT WESTERN RAILWAY will sell homeseekers tickets to points in Alberta, Manitoba, Minnesota, North Dakota, Saskatchewan, western Ontario and Wisconsin at rate of one fare plus two dollars for the round trip. Remember, THE CHICAGO GREAT WESTERN RAILWAY is the only line from this section which runs three solid trains daily to the Twin Cities. Also remember that on the return trip you can take any one of our four trains, making it certain that you will not have to wait but a short time for connection at St. Paul and Minneapolis. Shortest time, best equipment, best service and connections. Call on or write to E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

OUR SHEEP DEPARTMENT

THIS department is edited by a gentleman who has long made the management of sheep a special study. He will be pleased to answer, in this department, all questions of general interest relating to the care of the flock and other kindred topics. Address inquiries, communications, etc., in relation to sheep to this office.

SHEEP AS WEED KILLERS.

The battle has raged against weeds and in many localities the weeds have come off victorious. This is largely because the means of battling against them has not been of the right character, or has not been pursued with that vigor which would cause their destruction. Men have been devising all sorts of methods to kill and keep down weeds, even offering chemicals for that purpose. War on them has been waged night and day and in many places even Sunday has not afforded a respite.

In no other way can man fight weeds with as little labor and as much ease as he can with a flock of sheep. Sheep take kindly to eating weeds of almost all kinds. Stubble fields can be picked over by flocks of sheep and but a few weeds will go to seed to sow trouble for another year. It is not an unheard of thing to learn of sheep being turned in the growing corn where they will under ordinary conditions do more good than harm. Occasionally a sheep will get too free with the growing corn, or one will be found that has become educated to do mischief, and it may be necessary to resort to some prohibitive measures with such individuals, but as a rule these are scarce. With lambs there is seldom any trouble in a corn field. Rape can be sown the last time the corn has been cultivated to help out in this direction and the benefit be of a double purpose.

We would not be understood as advocating that sheep are to be used solely as weed killers, for they will not give that satisfaction desired if confined solely to weed extermination. In some localities it is claimed that sheep are kept only for that purpose. Sheep will be "worked" so hard that they will not make the gains necessary and there will be a loss in that manner. The average sheep takes to eating weeds very much like a duck takes to water, but there cannot be the gain that the average successful man would like his flock to make. Weeds of themselves do not have sufficient nutrition to produce the gains that can be obtained by good pasture and a feeding of the grains. A flock that has been "worked" pretty hard must show that it has not come up to its best possibilities.

Almost all weeds that grow on western farms can be eradicated by a continued pasturing of sheep and if the proper management is pursued there will be no loss in gains made. Some of the most pernicious weeds on farms have been exterminated by flocks of sheep where the matter of weed destruction has never entered the mind of the owner. Keeping sheep for profit, there comes a profit in this manner that has not been taken into the calculation.

FROZEN MUTTON TRADE.

The great plains of Australia, New Zealand and Argentine being adapted to sheep pasturing and little else permits a transaction of an immense business in wool and mutton. In recent years the frozen mutton business has become one

of great importance. A London report says: "The supplies sent from Australia were the largest we have received from these colonies since 1900. Compared with the imports for the first quarter of 1905, the total for the quarter in the current year shows an increase of 42.90 per cent, and amounts to 350,580 hundred weight. It will be interesting to place this quantity in comparison with the total for the same period in 1902, 82,637 hundred weight, for nothing can better indicate the enormous and rapid recovery in Australia from the disastrous consequence of the drought."

The New Zealand supplies are the smallest for many years. The quantity imported was but 137,977 hundred weight, or rather less than half that imported during the same period in the previous year.

The Argentine supplies during the past three months were 120,877 hundred weight, or 3.93 per cent more than during the same period of the previous year. This quantity is not a record one for the period under review, as it was exceeded in the first quarter of the year 1904 by about 10,000 hundred weight. It will be of interest to note as showing how rapidly the supply of dead meat follows the stoppage of the live sheep and cattle shipments to mention that in the first quarter of 1903, when live sheep were being sent from the Argentine, the supplies of mutton from that country were 87,479 hundred weight, as against 120,877 hundred weight when no live sheep are being sent.

THE GREEN FOUNDRY & FURNACE WORKS.

Mr. Samuel Green, the founder of this institution came to Des Moines in 1869 and opened a little foundry just back of where the present establishment is now situated, and for several years he, with two workmen, was able to supply the demands of the trade. At that time the work consisted principally of job work made to order. However, in 1887 it was decided to commence manufacturing furnaces, and consequently a set of patterns were made and put into the sand, and some few of these furnaces were sold. But it soon became evident that the article which at first seemed so perfect was far from supplying to the trade what they had prided themselves on having—a perfect furnace. Consequently new patterns were made and again it was found necessary to alter and renew the patterns in order to be up to date, to take advantage of every new feature and to give the best article for the least money. Nineteen years have elapsed since the making of the first furnace patterns and today there is not a remnant left of the old style or form. Six different styles of furnaces in fifteen sizes are now turned out, and every part of each furnace has received hours and hours of study and thousands of dollars have been expended in workmanship and material to revise and make these patterns as nearly perfect as possible. Every part must be perfectly fitted, must be constructed with no loss of labor in order to make the price reasonable, and every part must be tried for strength and durability before it could be put upon the market and guaranteed. It became evident in a short time that the amount of smoke travel in the ordinary furnace was not sufficient and would not readily take care of the fuel used in this part of the country. Consequently the radiators

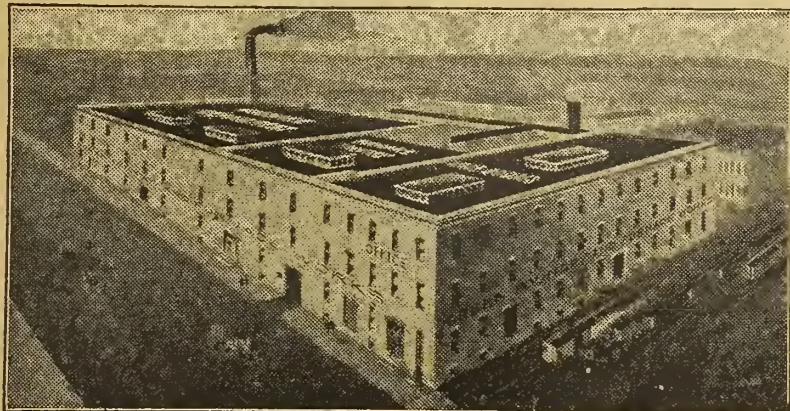

were increased in size, and the inside surface made smooth to prevent the soot from adhering to the sides. The radiator in the cast furnace was made absolutely seamless to prevent any possibility of gas or smoke escaping. The steel furnace must be constructed in the same manner, and with the same care that a steam boiler is made. In a construction close enough to prevent steam or water from escaping no gas or smoke could leak out. Every part of every furnace, the ash pit with its depth; the howls, heavy, durable and large; roller grates with their three sides, giving three fire surfaces to prevent their warping; the bodies of the furnaces with their gas tight chutes and large feed doors; the radiators, constructed to extract every particle of heat from the smoke and thus make a big saving of fuel, had to be built and rebuilt, fitted and refitted, tested for strength and durability, workmanship and practicability before being placed upon the market. The Green Foundry & Furnace Works now covers an area of 42,540 square feet of floor space. The large foundry with the iron room, coke room and cupola, the pattern room which is a fire proof vault where thousands of dollars' worth of patterns are stored, the machine shop where the fitting is done, the shipping room from the side door of which the car load orders are filled, and the store room for the heavy iron castings, are all situated on the first floor of the building. On the second floor are situated the steel furnace department where the steel is rolled, punched and riveted; the pattern shop where the tedious hours are spent in the construction of every small original pattern; the register room and the office. The third floor is devoted entirely to the tin shop and ware rooms for pipe and fitting necessary for the installation of every furnace. Every year brings new customers. Business is done all over the western country, shipments being made as far south as Georgia, Tennessee and Arkansas, north to Wisconsin and west to the coast. Desirable representatives, men who have a thorough knowledge of the furnace business are secured as far as possible, in each town, through whom the furnaces are sold and through whom they are installed. These men if at all deficient are given instruction wherever necessary. The number of cubic feet in each room to be heated are accurately figured, and pipes sufficient to supply the necessary warmth are installed and an accurate total of cold air, equal to the total of hot air is returned to the furnace to be heated, any microbes or impurities destroyed and the air again sent into the rooms, fresh, pure and healthful. Visitors are always welcome at this institution, and while you are in Des Moines, plan to make this one of the attractions. They are located just one block east of the Rock Island depot, and they will be glad to show you anything and everything about the plant. If you have never seen the red hot, melted iron as it is taken from the cupola it will pay you to go in and take a look. When buying a furnace ask your dealer for a Green furnace. If he does not keep them, write to us for descriptive catalog. It tells all about our furnace. Read our advertisement on page 12 of this issue.

LOW EXCURSION RATES TO NEW ENGLAND AND CANADIAN POINTS VIA THE C. & N.-W. RY.

Tickets on sale daily until June 30th; also on July 4th and 18th, August 8th and 22d and September 5th and 19th at one fare plus \$2 for fifteen-day tickets, or one fare plus \$4 for thirty-day tickets. 640 ACRE FREE HOMESTEADS IN WESTERN NEBRASKA

This is an opportunity that will not last long and is worth investigating.

WILL HELP YOU LOCATE—I am employed by the C. B. & Q. Ry. Co. to help intending settlers find desirable free Kinkaid homesteads. More than 1,000 persons have made land filings in western Nebraska during last three months. Best lands are going fast.

SPECIAL OPPORTUNITIES—Lands that are NOW BEING CANCELLED on reports of the Special Agents of the Government are generally desirable homesteads. I keep track of all of the cancelled lands for the benefit of the patrons of this Bureau.

NEXT EXCURSIONS—I will personally conduct excursions as follows:

TO SCOTSLUFF, NEB., SEPT. 4, 1906.

TO ELLSWORTH, NEB., SEPT. 18, 1906.

TO MULLEN, NEB., OCT. 2, 1906.

TO HYANNIS, NEB., OCT. 16, 1906.

at which times I will have with me township plats showing the homestead land in those localities.

RATES—Very low round-trip homeseekers' excursion rates to all points in western Nebraska.

NEW FOLDER FREE—Write today for our new folder with map of Nebraska, telling all about the 640-acre free homesteads, what the lands are valuable for, and how to acquire title. Address

D. CLEM DEEVER, Agent Burlington Route,
Homeseekers' Information Bureau,
1004 Farnam Street, OMAHA, NEB.

The Homestead and The Homemaker,

WE WANT YOU TO SEE THE MAC FURNACE AT THE IOWA STATE FAIR

This is It--For Homes, Schools, Churches.

You Can Make
Your Whole House
Comfortable by
Heating it With Our

MAC FURNACE

and if you knew how comfortable it would make your home during the winter months it wouldn't take much talk on our part to have you install a Mac furnace this fall.

You Can Use Straw,
Cobs and Brushwood for
Fuel as Well as Coal

and it will thus materially reduce your coal bill. We could tell you much about this furnace and give you many arguments why it would pay you to install it in your house, but we simply want you to see the furnace itself. May we not hope that you will look up our exhibit and let us explain it to you?

Our exhibit will be in Power Hall, just east of the race track.

Our new catalog will be ready for distribution by fair time, and we want you to be sure to get a copy of it. We'll be glad to send it free to anyone who is interested. Write for one, mentioning The Homestead. It explains the system of hot air or furnace heating, besides telling you all about the Mac. Address,

Mac Furnace Works, 111 E. Court Ave., Des Moines, Ia.

CHICAGO MARKET LETTER.

Messrs. Clay, Robinson & Co. write as follows under date of August 17th:

Supplies of cattle this week number just about the same as last week, but show a decrease of 7,000 head as compared with a year ago. The market had a good active tone throughout for all desirable kinds and as high as \$6.75 has been paid for choice heaves, this being the top price of the year to date. It is quite evident that there is more or less of a scarcity of desirable fat native heaves and we look to see all such sell at strong figures. Feeders having steers of good quality on hand that require a month or two longer feeding will not make any mistake in our opinion to hold and fatten them, as we believe they will be fully justified in the outcome. There has also been a good inquiry for desirable native cows and heifers, but the medium natives have had to meet sharp competition from the western rangers. Among our sales the past week was a load of Hereford two and three-year-old straight grass native heifers at \$4.50. We also sold a big string of South Dakota range

\$6.85 yesterday. The market is on a strong basis with not very much prospect of going much lower.

Water Under Air Pressure.

To the Editor of The Homestead:

In compliance with a recent request in your paper, I will say that I have in successful use a pneumatic water supply system. It consists of a steel tank four feet in diameter and ten feet long and holds about 1,200 gallons. It has an eight-foot windmill on a forty-foot tower and a combination air and water pump with an automatic attachment for regulating the water supply.

In starting three months ago we pumped air until the gauge showed ten-pound pressure, then pumped water until it showed twenty-five pounds, the tank being about one-fourth full. By keeping the tank about one-third full we have sufficient pressure yet to force water to bath tub in second story, to barn and hog lot 250 feet away, to kitchen sink and also to flush the closet. A storage tank in the bath room, supplied by a force pump connected with a cistern; a range boiler that has a supply pipe to the bath tub and kitchen sink, give us a water supply that exceeds our expectations—one that every farmer who is out of debt ought to have.

Peoria Co., Ill. William West.

A Simple Pig Conditioner.

To the Editor of The Homestead:

As the pig crop is now about half grown, the annual complaint of swine diseases is again heard, and we see many formulas and preventives spoken of in the agricultural papers of the corn belt.

For the benefit of any of the readers of this paper who are interested in the production of pork I wish to give a simple conditioner that was used by me for some five years in my herd of pure-bred hogs:

Charcoal, made from hard wood or cobs 1 bushel
Ashes, hard wood 1 bushel
Sulphur 1 gallon
Salt, common barrel 1 gallon

Pulverize the charcoal; then mix with the ashes. Mix the salt and sulphur and then carefully mix all, so as to get the sulphur evenly mixed through the charcoal and ashes. Put in a dry place where hogs can have access at all times, and watch how regularly they will take a bite and walk on, seemingly satisfied. I know of good hog men who have used this in cases where hogs were dying from swine troubles, and have had them report that it seemed to give more relief than anything else used. A little starvation is also a most excellent remedy when the pig raiser finds his hogs not doing well.

A. T. C.

HALF RATES TO DES MOINES.

The Great School For Farmers' Children.

....LANDS AND HOMES FOR SALE....

FOR SALE Excellent Iowa Farm. Price \$62.00 Per Acre.

As good a farm as there is in Iowa, containing 567 acres, in Kennebec township, Monona county. It is five miles from Onawa—county seat—and two miles from Thurin, both good railroad towns. I will sell for \$62.00 per acre if taken soon, part cash and balance on time at a reasonable rate of interest. Crops reserved. The house is a good frame of about six rooms, brick foundation, cemented cellar, etc. The barn is large, with brick foundation, and is almost new, has "clean-to" shed 12x32 feet. There are ample cribs, bins, etc., hay scales, good wells and windmill. The farm is well fenced and will divide into three farms nicely. All buildings are well painted and in good condition. About 300 acres will be under the plow this season; the remainder is splendid hay land, with the exception of fifteen acres of good timber land along the west line, which is the Little Sioux river. For stock or grain the farm has no superior anywhere. The soil is deep and a very rich, dark loam, easily worked, no rocks, no sand. As the Northwestern Mutual Life Insurance company, of Milwaukee, renewed a small loan for five years on the above described land June 29th, 1906, there can be no question as to perfect title. I refer you to any bank or commercial agency in Omaha, Neb., or Council Bluffs, Iowa, as to my reliability. The farm to be appreciated must be seen. All inquiries cheerfully answered. Address,

Z. T. LINDSEY,
OMAHA, NEBRASKA.

IOWA FARMS

Write for State Map, Booklet and Weather Report. Sent Free. **BAZEL J. MERK,**
Chillicothe, Missouri.

You can make Money in the Southwest

The light shaded portions represent very fertile sections in the Southwest.

Opportunities for making money abound in the Southwest. One of the surest sources of profit lies in the certain increase in land values, within the next five years. Good rich farm land, capable of raising 30 bushels of wheat to the acre, can now be bought in the Southwest for from \$3 to \$10 an acre. The same land 5 years hence will bring \$25 to \$50 an acre. Settlers are going into the Southwest by the thousands and it is only a matter of a few months when the actual demand for this rich land will force the price much nearer to what it is really worth.

Now is Your Opportunity!

You can sell your present farm—pay off the mortgage and have enough left to buy a big farm in the Southwest that will make you independent in a few short years!

The "Coming Country" Free!

The "Coming Country" is a very interesting paper published monthly and devoted to the Southwest. It will post you on conditions in the Southwest better than anything that you could read. I'll be glad to have the publisher place your name on the mailing list and send you a free copy of the paper regularly for one year. Write now to

S. G. LANGSTON, Sec'y., M. E. & T. Land Bureau, 306 Wainwright Bldg., St. Louis, Mo.

MISSOURI LAND

IS BETTER at present prices than a gold mine. Come and we will take pleasure in showing you. 509 acres well improved, all kinds of fruit and the best of water, and the low price of \$40 per acre buys it. 220 acres three-fourths of mile to Kirksville. As good prairie land as you will find in Missouri. Fair improvements. This is an ideal lying farm and \$65 per acre buys it. 80 acres, 2 miles from Kirksville, nice improvement, a lovely small home at the slaughter price of \$60 per acre. 82 acres, one-fourth mile to Kirksville, good improvements and as near an ideal home in every respect as can be found, and we are only asking \$90 per acre for it. 132 acres one-half mile to Kirksville, good improvements, all kinds of fruit, no better land in the state, every foot can be farmed with any kind of machinery. This looks good to anybody, but it is better than it looks and we are putting the low price of \$80 on this ideal home. 180 acres, 90 rods to Kirksville, good building, good fence, all kinds of fruit, the best of water and worlds of it, cistern in house, in fact, everything is right. No better or finer lying land in the state. \$70 per acre will buy this home.

ISAAC A. NOVINGER & SONS, KIRKSVILLE, ADAIR COUNTY, MO.

P. S. WE are not real estate dealers, we own the land herein described and furthermore our home is not for sale. We simply have more than we can handle.

HOMES AND FORTUNES

are both to be had in the fertile Panhandle of Texas. There is no better climate or soil to be found on the face of the earth than that of the Panhandle. You can raise just as large crops on its fertile acres as you can in Iowa or Illinois, and you can get better prices for them. There is no better place to live—water is good and plentiful, winters are mild, and everything works to the success of the farmer and stock raiser. A few years ago land in your locality was selling at half, or less than half, what it is bringing today, and many people who know have made fortunes by their investments in lands. Those same opportunities are now to be had in the Panhandle of Northern Texas. If you buy here at once for investment you are sure of doubling your money in the next two or three years, for the immigration coming here now is bound to bring prices to much higher levels. Satisfy yourself that the panhandle is the garden spot of the earth by seeing it, but first write for our literature which tells you how to see it to the best advantage and at the least possible expense. We don't want you to buy our lands until you are satisfied, because a well-satisfied customer is the best advertisement we have. We can offer you your choice from 100,000 acres in the very Garden Spot of the Panhandle at attractive prices and terms. Write for pamphlet to
THE NORTH TEXAS LAND COMPANY, 100 Market St., Texline, Texas

WE BUILD YOU A HOUSE FREE OF CHARGE

and sell you fertile land at a low price and on easy terms, within 25 miles of St. Paul and Minneapolis. This is the greatest proposition ever made to readers of this paper. You have your choice of 40 acres or more out of two million acres of the splendid lands of Northwestern Wisconsin. The price is only \$7. to \$12. an acre, and to give you a good start we will build your house on the land. The finest climate in the world, pure soft water, ample rainfall, fuel for years on your own land, near to the finest markets. This with a FREE HOUSE and land that will grow the FINEST KIND OF CROPS. What more can you ask? Write TO-DAY for MAPS and FULL INFORMATION.

603 Opera House Block AMERICAN COLONIZATION CO., Cumberland, Wisconsin

IOWA LAND

At \$100 an acre will produce no more than the same grade of land in the Texas Panhandle. I have two sections of rich, level prairie land near city of 3,000 people, either of which I will sell for \$12 per acre, ½ cash, balance easy terms. If this land doesn't double in value within 2 years and meantime make you twice as much as Iowa land for every dollar invested I will pay your railroad fare both ways. The stock land will sell you round trip ticket for about \$25. Address,
E. C. WILLIAMS, CASHIER DALHART NATIONAL BANK, DALHART, TEXAS.

CANADA WHEAT LANDS.

PARADISE Valley, Northern Alberta, the finest farming country in the world; wheat runs 50 bns., oats 100 bns. to the acre; cattle shipped last month averaged 1,600 lbs., fattened on grass; beautiful park country with clumps of trees, mostly open prairie, gently rolling; lakes of good water, ample rainfall; deep black loam topsoil, clay subsoil; a few good agents wanted; \$8 to \$12 per acre, easy payments. Write for maps and route to **W. T. Stevens, Mgr. Paradise Valley Land Co., 220 Endicott Bldg., St. Paul, Minn.**

Farm Lands For Sale.

THE cheapest and the best on the market. These lands are in Minnesota and S. Dakota in fourth tier counties north of Iowa. Soil and land is like Iowa. You can raise anything in these parts you can in Iowa. Corn last year went 50 bushels per acre, wheat 25, oats 40 to 75. Timothy and clover does well in these parts. Fruit does well here. Good water and a healthy climate. We have some well improved land near town, good buildings, price \$40 per acre. Other good lands with fair improvements \$30 and raw lands as low as \$20. These are as good stock and grain parts as Iowa. You who want farms don't fail to invest in our lands. Buy ticket over C. & N. W. R. R., take receipt, bring the same to us and on any purchase we will refund the money. Write for particulars.

I Can Sell Your Real Estate or Business NO MATTER WHERE LOCATED PROPERTIES and business of all kinds sold quickly for cash in all parts of the United States. Don't wait. Write today describing what you have to sell and give cash price on same.

LIVE STOCK SALES

Flynn Farm Short-horn Sale.

As per announcements from week to week in The Homestead that the Flynn Farm Company would hold their annual sale August 16th the sale came off and was successful throughout. More than two passenger coaches loaded with visitors came out to the Flynn farm over the Milwaukee road. Every arrangement was made for the comfort of the visitors and a sumptuous noon-day lunch was provided by the Evans Cafe of Des Moines. Mr. Evans has been furnishing these lunches for the sales at the Flynn farm for many years, but he says he has never fed so many people on any former occasions. Buyers were present from Arizona, Illinois, Minnesota and Iowa. Iowa took in the bulk of the cattle at good, fair prices. The day was the hottest of the season; notwithstanding this fact the crowd remained good natured, and Colonels Woods, Bellows, Guy and Mossman all did effective work as auctioneers. The first three divided honors in the box, while Mr. Mossman did most excellent service as ring worker throughout the entire sale. The cattle presented for this sale were in splendid breeding condition, not overdone, but their flesh being largely natural flesh made on the grass. The offering from the standpoint of quality and breeding in its entirety was not the equal of the 1905 offering, which accounts for the lesser average. However, from every point of view the sale was a success, and the Flynn family were well pleased with the result. It has always been the aim of this establishment to want the purchasers to get their money's worth at Walnut Hill. Some splendid bargains were in store for the judicious purchaser, which were taken advantage of. That old-time Short-horn breeder, Mr. George Lyle, of Newton, Iowa, was replenishing his herd to the extent of eight head, buying the most valuable things in the offering. Mr. Lyle was also the next highest bidder on the beautiful roan Kirklevington cow, Kirklevington Countess. The fight for this Bates cow, which topped the sale, lay between Judge Emory Cobb, of Kankakee, Ill., and Mr. Lyle. It will be remembered Judge Cobb topped the bull sale at Walnut Hill last season. Mr. F. M. Marshall, of Blackwater, Mo., was present and was a good bidder on some of the better class of cattle. Our subjoined detailed report of where the cattle went, the prices obtained and post-office address of all purchasers paying \$100 or over will be of interest to the Short-horn world. The splendid eulogy delivered to the memory of Mr. Martin Flynn, the founder of this establishment, by Col. F. M. Woods, was very timely and fitting in honor of the memory of one of the grandest characters and best Short-horn breeders in America.

SUMMARY.

45 females sold for \$7,250; average, \$161.11
 9 bulls sold for 1,385; average, 176.11
 54 head sold for 8,835; average, 163.60

Duncan's Sale of Short-horns.

The sale of Short-horns held by Mr. H. C. Duncan, of Osborn, Mo., on August 15th, drew a goodly number of breeders, but the buying spirit was hardly what the cattle merited. Mr. Duncan had every reason to expect a higher average, but that veteran breeder had listed his cattle and those in attendance bought them at their own prices. Had Mr. Duncan held his sale later in the season after the summer farm work is over, better prices might have prevailed, but be that as it may, Mr. Duncan parted with his guests with as cordial a hand shake as was bestowed on each arrival in the morning. The totals and the averages do not look so bad. The bull buyers seemed conservative when the quality of this end of the offering was considered. The eight bulls sold averaged \$246.25. Magnet, the Cruickshank herd bull, went at the bargain price of \$350, Mr. G. P. Simpson, of Blockton, being the buyer. The Golden Drop bull, Golden Headlight, sold for \$500, the top of the sale, and went to Mr. J. J. Kone, of Wisner, Neb. Mr. M. L. Logan, of Lineville, Iowa, secured a bargain in the nine-months-old Orange Blossom bull, Orange Magnet. The females seemed to be in fair demand and the thirty-nine head sold for an average of \$154.61. The top in females was paid by Messrs. Hall Bros., of Carthage, Mo., for the Violet heifer, Maple Hill Violet 15th, a two-year-old daughter of Magnet. She will be mated with the son of Choice Goods that heads their herd. He, too, is a Violet. Mr. M. L. Logan secured a great bargain in the Cruickshank Victoria cow, Victoria of Glenwood 14th, with heifer calf at foot. Col. Geo. P. Bellows opened the sale and after a short talk introduced Mr. B. O. Cowan, assistant secretary of the American Short-horn Breeders' Association. Mr. Cowan's address was appropriate and inspiring. Following is a list of all sales over \$100:

Magnet, five years, sire Pure Gold, G. P. Simpson, Blockton, Iowa \$350
 Victoria of Glenwood 14th, seven years, sire Violet Spur, and c. c., M. L. Logan, Lineville, Iowa 425
 Maple Victoria, one year, sire Headlight, R. E. Mauphin, Pattonsburg, Mo. 305
 Gloster of Maple Hill, four years, sire Victorious, and c. c., N. H. Gentry, Sedalia, Mo. 255
 Ury Maple 3d, one year, sire Headlight, A. W. Barker, Clio, Iowa 205
 Ury of Maple Hill, six years, sire Baron Dudding, and b. c., H. R. Clay, Plattsburg, Mo. 400
 Orange Blossom of Wildwood 5th, nine years, sire Golden Victor, T. J. Wornall & Son, Liberty, Mo. 175
 Maple Hill Orange Blossom, two years, sire Headlight, Bartlett Herd Company, Phoenix, Ariz. 180
 Orange Headlight, one year, sire Headlight, same 125
 Orange Magnet, one year, sire Magnet, M. L. Logan 400
 Albino, five years, sire Grand Victor, Geo. Bothwell, Nettleton, Mo. 240
 Maple Hill Violet 16th, two years, sire Magnet, Hall Bros., Carthage, Mo. 450
 Maple Violet, four years, sire Malcolm, T. J. Wornall & Son 315
 China Rose, four years, sire Grand Victor, and b. c., N. H. Gentry 255
 Golden Headlight, one year, sire Headlight, J. J. Kane, Wisner, Neb. 500
 Good Enough, one year, sire Headlight, John Skinner, Trenton, Mo. 260

 8 bulls 1,970; average, 246.25
 47 head 8,390; average, 178.51

William Smiley's Short-horn Sale.

The Short-horn breeders of the corn belt have reason to congratulate themselves over the condition existing throughout the middle West. The very successful sale of Mr. H. C. Duncan, of Osborn, Mo., August 15th, and the Flynn Farm sale of the 16th, and the successful sale held by Mr. Wm. Smiley on his farm near Malcom, Iowa, on the 17th, bear witness to the fact that the frightful heat of midsummer does not prevent lovers of Short-horns from being present at and purchasing desirable Short-horn cattle whenever and wherever offered. The crowd at the Smiley sale was not as large as at the sales held the two preceding days. However, the cattle were taken at good remunerative prices and at the close of the sale witnessed as equally satisfactory prices, breeding and quality of stock considered, as had been secured during the entire week. Col. Geo. P. Bellows did all the selling, assisted in the ring by Mr. James McIlrath, each of which labored industriously to secure the high dollars for the stock being offered. Contrary to the rule at the Flynn sale bulls were not in as good request as the females. Mr. James Duffus, of Malcom, was the heaviest purchaser of the Scotch cattle and secured the plums of the sale. It was rumored that Mrs. Duffus instructed her husband which ones to buy. However this may be, the splendid herd of Scotch cattle owned by Mr. and Mrs. Duffus were materially strengthened by these judicious purchases. Mr. N. A. Lind, of Rolfe, Iowa, and T. R. Silliman, of Colo., contributed much to the success of the sale. Mr. Smiley has a goodly number of young Short-horns left from which to propagate another herd. The following list of prices bear witness to how the cattle were appreciated and where they went. We append the buyers names and post office addresses of all who paid \$100 or over for their purchase:

FEMALES.

Imp. Daybreak's Princess, five years, sire Daybreak, N. A. Lind, Rolfe, Iowa \$220
 Princess B., one year, sire Nonpareil Conqueror, James Duffus, Malcom, Ia. 250

 42 head sold for 4,277; average, 101.55

Earles' Short-horn Sale.

The initial sale of Burwood Short-horns held on Tuesday, August 7th, brought out a large number of the most prominent breeders of the country. Dr. Earles had selected for this, his first annual, sale a fine lot of cattle and they were appreciated by the breeders present. While no high prices were paid, satisfactory returns indicated that the demand for good Short-horns prevails throughout the entire country. The Flynn Farm Company, of Des Moines, Iowa, topped the offering, paying \$730 for the six-year-old Scotch cow, Sapho. Col. F. O. Lowden, of Oregon, Ill., secured Golden Coin, a five-year-old Scotch cow, at \$435, and was a persistent bidder on many of the best lots. Mr. Frank Harding, of Waukesha, Wis., secured the Marr-Emma cow, Walnut Hill Emma, with heifer calf at foot by Scottish Victor, at \$425, and was a liberal bidder throughout the entire sale. Mr. W. I. Wood, of Williamsport, Ohio, secured the Scotch cow, Rosa Fame 2d, with fine bull calf at foot by Lovat Champion, at \$255. Messrs. Carpenter & Ross, of Mansfield, Ohio; Mr. H. F. Brown, of Minneapolis, Minn.; and Mr. A. Chrystal, of Marshall, Mich., were liberal bidders and did much toward making the sale a success. The bull offering was topped by Dr. B. O. Nobles, of Milwaukee, Wis., who paid \$205 for Nonpareil of Sunnyside, a four-year-old son of Imp. Nonpareil Victor. Colonels Bellows, Jones, Barclay and Walker conducted the sale in a very satisfactory manner. Below is found a list of animals selling for \$100 or over:

FEMALES.

Sapho, calved Feb. 16, 1900; sire Prince Armour, Flynn Farm Company, Des Moines, Iowa \$730
 Imp. Roan Ruby 36th, calved March 8, 1901; sire Mountain Archer, C. E. Anderson, Sherry, Wis. 390

McGavock's Good Short-horn Offering.

The grand lot of Short-horn cattle sold at Geneva, Neb., by the well-known sale manager, Mr. W. C. McGavock, of Springfield, Ill., was possibly as strong an offering of females as we will see sold in the state this season. The offering consisted of pure Scotch and Scotch-topped cattle. Mr. McGavock selected as strong an offering as you would wish and the buyers were treated to some real bargains in the female offering. The Scotch cattle were not selling for near their value. The sale made the average of \$117.50 on entire lot. The top price of the sale was \$260 for the good bull, Bapton Gloster, got by Bapton Sovereign and out of an Imp. 12th Duchess of Gloster cow. The bull was taken by the well-known breeder, Mr. E. J. Hayes, of Hampton, Neb. Mr. Hayes will use him at the head of his royally-bred cattle. The lot of bulls included in the sale were ready sellers at good prices and outsold the females very much, although the females were a very much stronger lot and deserved better prices. The crowd was out for bulls and they got them. The sale was somewhat handicapped by a severe rain storm which lightened the bidding. Col. T. C. Callahan officiated on the block and did his usual good work. He was assisted in the ring by Col. Ray Page, of Friend, Neb., and Colonel Porter, of Geneva. Mr. McGavock is to be congratulated on the offering brought to Nebraska. Below we give a list of sales of \$100 or over:

No.	Name	Price.
1	E. J. Hayes, Hampton, Neb.....	\$260.00

Belcher's Dispersion Sale.

The dispersion sale held by Mr. G. L. Belcher, at Carrollton, Mo., on August 16th, drew a goodly number of horse men from over Missouri and a few breeders of Short-horns. The attendance of Mr. Belcher's neighbors and many friends was good and they bought the large end of the stock. Had Mr. Belcher selected a later date a larger attendance of breeders from a distance might have resulted, but as his beautiful home at Walnut Ridge had been sold and as Mrs. Belcher's health calls for a change of climate at once Mr. Belcher was forced to make the sacrifice just at a time when his years of labors as a breeder were about to show returns in accordance with his labors. The interest in the horse sale held in the forenoon was good, bidding was freely indulged in and the prices were satisfactory to Mr. Belcher. Twenty-one head sold for \$3,000. The brown stallion, Mac B., topped the sale at \$360, going to Mr. S. W. Brady, of Orrick, Mo. Other sales were as follows:

Simmonaliss, br. m., W. E. Thomas, Bogard, Mo.....	\$190.00
Colebrity, br. g., Ed. Allamang, Tina, Mo.....	207.50
Mary Magdalene, ch. m., E. F. Dawson, Carrollton, Mo.....	165.00
Lucy Snow, ch. m., N. Williams, Lone Tree, Mo.....	167.50
Eilly Ba Hoy, h. g., W. E. Hudson, Carrollton, Mo.....	155.00
Norvallis, b. f., L. Stout, Mound City, Mo.....	105.00
Celest, blk. m., A. L. Lyon, Carrollton, Mo.....	100.00
Caleb, cb. g., E. W. Kimball, Carrollton, Mo.....	160.00
Calhoun, hr. g., W. R. Turner, Plymouth, Ill.....	130.00
Carroll, br. g., same.....	120.00
Algomah, h. g., R. L., Plummer, Hale, Mo.....	162.50
Northwest, b. g., Ed Allamang.....	115.00
Madge, ch. m., Alex Turner, Carrollton, Mo.....	140.00
Madaline, ch. f., E. F. Dawson.....	112.50
Martha, ch. f., W. F. Belcher, Carrollton, Mo.....	150.00
Lucy Snow, ch. m., N. Williams.....	167.50
Minnie Hudson, ch. f., W. C. Cowherd.....	152.50
Eilly Hudson, ch. c., N. Williams.....	105.00

In the afternoon the Short-horns were sold and went largely to Mr. Belcher's neighbors. The prices were hardly what Mr. Belcher had reasons for expecting. The top price was \$120 paid by Mr. C. F. Dickinson, of Bogard, Mo., for the hull, Gold Coin. Mr. H. C. Duncan, of Osborn, Mo., who was a liberal bidder and helper, secured the top female, Ruth Simplicity. Among the other buyers were J. S. Settles, Carrollton; Thomas Mitchell and Son, Bosworth, Mo.; W. E. Thomas, Bogard, Mo.; A. R. Carey, Carrollton; W. O. Miller, Carrollton; H. Cowherd, Carrollton; W. C. Cowherd, Rhodes, Mo.; Herbert Scott, Carrollton; A. L. Lyon, Carrollton; R. D. Miles, Norbourne, Mo.; J. B. Stanley, Carrollton; Sam Reed, Carrollton, and L. D. Minnis, Norbourne, Mo.

The Trone Sale.

There was a good sprinkling of outside breeders at the sale at Willow Stock farm near Rushville, Ill., August 14th, but the bidding was very weak and uninspired and while the average was very satisfactory there were a number that went at ridiculously low prices. The following is a list of a few of the sale:

No.	Name	Price.
1	F. M. Myers, Eldora, Iowa.....	\$100.00
2	Geo. Mead, Rushville.....	38.00
3	McNeil Bros., Bowen, Ill.....	30.00
5	Peter Schenck, Yates City, Ill.....	85.00
6	Ed Edmonson, Newark, Texas.....	70.00
7	Peter Schenck.....	31.00
14	W. H. Shoup, Augusta, Ill.....	36.00
25	Turner Abel & Son, Rochester.....	50.00
25	J. B. Davis, Fairview, Kan.....	70.00
26	W. T. Harris, Morganfield, Ky.....	190.00
27	Geo. Mead.....	36.00
28	O. E. Knight, Whitehall, Ill.....	26.00
29	Mr. Lee, Rushville.....	26.00
36	Thomas & Hogsett, Golden, Ill.....	67.50
37	W. E. Brown, Cambridge, Kan.....	42.50
39	Harry Rieggen, Petersburg.....	26.00
43	R. J. Harding, Macedonia, Iowa.....	50.00
50	M. W. Greer, Rushville.....	40.00

Gardner Dispersion Sale.

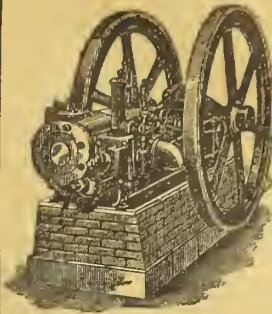

A good attendance at the dispersion sale of the Baby Beef herd of Aberdeen Angus cattle, the property of Mr. C. H. Gardner, of Blandinsville, Ill., which occurred on Tuesday, August 14th, at Galesburg, Ill., witnessed one of the most important events in Angus history. The offering was topped by Mr. F. L. Sullivan, of Afton, Iowa, who secured the two-year-old son of the champion, Rosegay, Vala's Rosegay 63745, at \$2,000. Mr. Sullivan is to be congratulated upon securing this good bull, and the coming shows will no doubt see many ribbons tied on this bull, if shown. Messrs. M. P. & S. E. Lantz, of Carlock, Ill., topped the female portion, paying \$615 for the imported Erica cow, Imp. Equality of Heatherton. Mr. E. T. Davis, of Iowa City, Iowa, secured a bargain in the imported Erica cow, Imp. Environ of Finlaring. Colonels Jones and Igo conducted the selling in a satisfactory manner, and were ably assisted in the ring by Messrs. McGavock and Judy. Below is found a list of animals selling for \$100 or over:

TWO ENGINES FOR SALE

One twelve-horse "Standard" gasoline and one thirty-horse Frost automatic steam engine, both in A1 condition and will be sold at a bargain. The gasoline engine is complete with all accessories, including one fifty-gallon gasoline tank, one large water circulating tank, one burner tank, one Bunson burner, one exhaust box, spark plug, spark coil and switch, six-cell battery, wire, etc.; also a complete set of sight feed oilers. This engine is adapted for every purpose where power is required. The gasoline is pumped automatically and controlled by a needle valve, the surplus gasoline returning by gravity to the supply tank. A sight feed shows the operator the amount of gasoline supplied at all times. The governor is of the ball pattern, providing positive control and uniform speed. The speed may be varied from twenty-five to fifty revolutions without stopping the engine for adjustment. This engine is practically new and in first-class condition in every way; was built by the Des Moines Gas Engine & Electric Co., Des Moines, Iowa, from whom parts and supplies may be obtained at any time. The steam engine is a Frost, automatic, slide crank, 8x12, left hand, rated thirty horse power, speed 250 revolutions per minute. Fly-wheel drive, 48x10; three-inch throttle; outboard bearing with adjustable sole plate. This engine is in prime condition, will operate on a 2 per cent variation and would be suitable for helted generator or any other service where steam power can be employed. Also advantage and will soon save its cost in connection with the above engine. Address for price and full particulars,

13 bulls sold for 4,127.50;	average..	317.75
54 head sold for....10,807.00;	average..	201.00

THE IOWA LIMITED.

The Rock Island lines showed a great deal of tact and cleverness in naming their new "Fast Express" to Chicago "The Iowa Limited."

This train places the Rock Island competitors in the "hack row" and is Des Moines' "pet train."

Leaves Des Moines 10:55 p. m., arrives Chicago 8:15 a. m. On the return leaves Chicago 10:00 p. m., arrives Des Moines 7:00 a. m.

The equipment is superb—new coaches and chair cars, Pullman's latest sleepers and mission style diners—electric lighted. While on the subject of trains we must mention the other good trains.

The Chicago local leaves Des Moines at 6:45 a. m. and arrives in Chicago at 7:35 p. m.

The Rocky Mountain Limited leaves Des Moines at 7:50 a. m. and arrives Chicago at 5:15 p. m.

The Colorado Fast Mail leaves Des Moines at 12:40 noon and arrives Chicago at 10:25 p. m.

The Chicago Express leaves Des Moines at 5:25 p. m. and arrives Chicago at 7:00 a. m. The Eastern Express leaves Des Moines at 9:35 p. m. and arrives Chicago at 7:17 a. m. Coming back from Chicago it is just as you desire it.

Leave Chicago.	Arrives Des Moines.
7:30 a. m.	9:00 p. m.
8:30 a. m.	6:00 p. m.
10:00 p. m.	7:00 a. m.
10:32 p. m.	9:00 a. m.
11:30 p. m.	11:00 a. m.
2:15 a. m.	11:00 a. m.

The arrangement for sleeper Chicago to Des Moines on "Fast Mail" train leaving Chicago at 2:15 a. m. is especially made for those who desire to take in the theater and

LOW ONE-WAY RATES VIA UNION PACIFIC FROM Missouri River Terminals (KANSAS CITY TO COUNCIL BLUFFS, INCLUSIVE) EVERY DAY

SEPT. 15, TO OCT. 31, 1906.

\$25.00	to San Francisco, Los Angeles, San Diego, and many other California points.
\$25.00	to Everett, Fairhaven, Whatcomb, Vancouver and Victoria.
\$25.00	to Portland, Astoria, Tacoma and Seattle.
\$25.00	to Ashland, Roseburg, Eugene, Albany and Salem, including So. Pac. branch lines in Oregon.
\$22.50	to Spokane and intermediate O. R. & N. points to Wenatchee and intermediate points.
\$20.00	to Butte, Anaconda, Helena, and all intermediate main line points.
\$20.00	to Ogden and Salt Lake City, and intermediate main line points.

For full information inquire of

J. W. TURTLE, G. P. A.,
313 W. Fifth St.,
DES MOINES, IOWA.

get home before noon the next day. The sleeper is open for occupancy at 10 p. m. There is nothing too good for Des Moines people and the Rock Island lines are surely giving them what they want.

LOW RATE EXCURSIONS.

The Missouri Pacific Railway and Iron Mountain Route will sell round trip tickets to points in Texas and Louisiana for \$20.00 from St. Louis and \$25.00 from Chicago on the first and third Tuesday of each month. Proportional low rate will apply from other points; also one fare plus \$2.00 to points in Indian Territory, Arkansas and Missouri, and \$25.00 from Chicago to Pueblo, Colorado Springs and Denver with limit of twenty-one days except to points in Louisiana, Arkansas, Texas and Indian Territory which are limited to thirty days, stop-overs going and returning.

Mexico: Less than one fare for the first and third Tuesday. On certain dates, one fare, long limit, stop-overs going and returning.

California: One fare for the round trip on sale certain dates.

Hot Springs, Ark.: Commencing June 1st to September 30th, one fare plus \$2.00, good thirty days, on sale daily.

Remember the Missouri Pacific Ry. and Iron Mountain Route reaches the principal points in the above named states without change of cars.

For descriptive literature and other information, address Ellis Farnsworth, D. P. A., 186 Clark St., Chicago, Ill.

FIELD NOTES.

Hereford bulls are offered for sale by Mr. B. F. Clark, of Albia, Iowa.

Large Yorkshires are offered for sale by Mr. F. Rabaler, of Leigb, Neb.

Mr. J. D. McDermott, of Anita, Iowa, offers a few richly-bred Scotch bulls for sale.

Mr. Geo. H. Miller, of Harlan, Iowa, will hold a public sale of Short-horn cattle on February 6th.

Some splendid young Aberdeen Angus bulls are offered for sale by Messrs. White Bros., of Perry, Iowa.

Look out for Mr. M. S. Moats, of Randolph, Neb., and his herd of Durocs at the Nebraska State Fair.

Mr. J. W. Reynolds & Son, of Defiance, Iowa, will be at the Iowa State Fair with a nice bunch of Durocs.

Messrs. Norrish & Bevington, of Kingsley, Iowa, are offering three good Duroc boars for sale that are herd headers.

October 25th is the date set by Messrs. Rice & Lindsay, of Clarion, Iowa, for a public sale of Short-horn cattle.

Mr. T. T. Spicer, of Ridgeway, Mo., is offering a 160-acre improved farm for sale in his advertisement on page 16 of this issue.

Mr. F. H. Long, of Manning, Iowa, is now booking orders for the "big" Poland Chinas. Read his advertisement on page 26 and write him for a pig.

Mr. H. E. Mayhew, of Letcher, S. D., is offering farms for sale located in Sanborn county, of that state. His advertisement appears on page 17.

The Butler Land Company, of Butler, Mo., announces on page 17 that they have bargains in Butler county farm lands. Write them for their list.

Eighty nice Duroc Jersey pigs at most reasonable prices and from the most popular blood lines are offered for sale by Mr. W. A. Peterson, Lyons, Neb.

Mr. D. J. Wilson, of Bloomfield, Neb., is offering for sale a half section of land situated six miles northeast of Crookston. His advertisement appears on page 16.

A highly improved Oceola county, Iowa, farm, consisting of 240 acres, is offered for sale by Mr. W. D. Creglow, of Remsen, Iowa, in his advertisement on page 16 of this issue.

Sixty thousand acres of choice alfalfa land in the Texas Panhandle, close to railroad, are offered for sale on easy terms by the Butler Land Company, of Butler, Mo. For further information, write them.

A ninety-nine-acre improved Iowa farm located adjoining the city of Bloomfield is offered for sale by Mr. L. H. Bates, of that place, on terms to suit buyer. His advertisement appears on page 16 of this issue.

Nettie Crane, proprietress of the Bob White poultry farm, of Blencoe, Iowa, is offering Single Comb Buff Orpington eggs and Single Comb Brown Leghorn eggs for sale in her advertisement on page 10 of this issue.

Cement posts ought to "set" thirty days before planting. Hence, it is important to get catalog of molds from Equitable Specialty Company, 714 I. L. & T. Bldg., Des Moines, Iowa, now. See advertisement on page 5.

Mr. O. E. Osborn, of Weston, Iowa, and Mr. R. J. Harding, of Macedonia, Iowa, owners of the great Duroc Jersey boar, Ohio Chief, will be in evidence at the Iowa State Fair next week and desire to have all the breeders call around and see them.

One of the best 240-acre stock farms in the state of Iowa is offered for sale by Mr. Frank Blissell, of Dexter, Iowa. It is well improved and is only two and one-half miles from town. It must be sold and therefore can now be bought for \$60 per acre.

It is cheap and the man that gets a move on him will get a bargain. Mention this paper when writing. See page 17.

It is announced on page 17 by the owner, Mr. Benj. Lammers, of Lockwood, Mo., that the Red Bird Stock Farm, consisting of 160 acres, is for sale. If you wish to buy a good stock farm this is an opportunity that should not be overlooked.

Mr. L. O. Hailey, of Ava, Mo., announces that he will sell a 160-acre \$4,000 farm for \$2,500, in his advertisement on page 16. The farm is quite fully described in the advertisement, but for the asking Mr. Hailey will send complete description, pictures, etc.

The advertisement of the Edgeton Kennels, of Manson, Iowa, offering thoroughbred Scotch Collie pups and brood bitches for sale appears on page 10 of this issue. They also have Duroc Jersey and Chester White pigs and bred sows and fancy chickens for sale.

Mr. Wm. Lampmann, land and immigration agent for the Oregon Short Line R. R. Co., at Omaha, Neb., requests of this paper to write him for full information about Idaho irrigated lands. His advertisement containing blanks to fill out for this purpose appears on page 16 of this issue.

The Lembi Land Company, of Salmon, Idaho, are offering irrigated farms, both large and small, for sale in their advertisement which appears on page 16 of this issue. It will be to the interest of the readers of this paper who are contemplating locating in the West to look up this advertisement.

Mr. J. D. S. Hanson, of Hart, Mich., states that Oceana is one of the most productive counties of Michigan. He has farms for sale ranging in price from \$10, \$20, \$30 to \$50 per acre of all sizes and will sell them on easy terms. Write him for his list. His advertisement appears on page 17.

Homestead readers who wish to prepare for flowers next spring should read the advertisement of the Jewell Nursery Company, of Lake City, Minn., which appears on page 11 of this issue. They are ready to send out their autumn catalog of tulips, hyacinths, narcissus, crocus, jonquils, and a full line of imported bulbs.

Messrs. A. L. and U. S. G. Lynch, of Mt. Airy, Iowa, write us that they will reserve all their Ohio Chief pigs for their public sale October 15th. They now offer for sale their herd boar, Corneracker 14205. He is a good breeder and they have a nice crop of pigs from him. They will be at the Iowa State Fair, where they will be pleased to see their customers and friends.

We are informed that no material damage was done by the recent fire at the Omaha Commercial College. It will in no way interfere with the operation of the school. Prompt action on the part of the fire department prevented a serious blaze; but for its efficient work one of the most beautiful structures in Omaha might have been burned. Students will find everything in perfect order when the fall term opens, September 3d.

We note that Messrs. E. L. Nagle & Son's, Deep River, Iowa, herd is doing nicely. Sales have been very satisfactory and everyone pleased. Messrs. Nagle will be ready to meet all their old customers as well as any new friends at the Iowa fair next week. They will be found in barn 4, pens 151 to 158. Better look them up and see the kind raised by them—twenty-five to look over. Chester fanciers will find them on hand with good stuff. On page 23 is the advertisement.

Messrs. Edmonds, Shade & Co., of Kingsley, Iowa, breeders of Duroc Jersey swine, in sending in copy for advertisement found on page 23, write: "We have about 100 spring and fall male pigs for the trade this fall by American Royal and fifteen other leading sires. The spring pigs are all early March farrow and well grown. Also a good lot of yearling Hereford bulls. We show Herefords and Durocs at Des Moines, Hamline and Interstate fairs. Would be pleased to meet our friends and patrons."

Mr. F. M. Huff, of Afton, Iowa, a breeder of Duroc Jerseys, has a nice lot of youngsters coming on for the fall trade. Mr. Huff has an Ohio Chief boar at the head of his herd that undoubtedly will do good. He has length and bone to suit, and appears in a thrifty condition. While the Grand View herd is not a large one it speaks well for its owner. Mr. Huff is not the oldest Duroc farmer in the business, but he has the right idea. At a future date his advertisement will appear.

The following from Mr. Jas. H. Robinson, of Harper's Ferry, W. Va., to the Lawrence-Williams Company, of Cleveland, Ohio, in regard to the efficacy of Gombault's Caustic Balm in case of snake bite, is to the point: "Would say I have used your Gombault's Caustic Balm for snake bite and it has given me much satisfaction, and would say as a liniment I have never found anything to equal it. I most highly recommend it to any and all who have stock of any kind. I will say again any person having stock cannot afford to be without it."

The Cruickshank bull, Baron Foxglove (a Brawith Bud), will be at the Iowa State Fair and for sale. This splendid son of Imp. Fancy's Pride is offered for sale by Mr. E. R. Silliman, of Colo, Iowa, his owner. He is a rich roan, in breeding fix only, as he has been in heavy service all season. Mr. Silliman is taking this fellow to the state fair, where those looking after choice herd bulls can have the opportunity to see him and pass judgment. He is priced cheap and our readers will do well to keep this in mind. The announcement appears on page 23.

On October 3d, Messrs. Watson Bros., of Creston, Iowa, will sell forty-five head of Duroc Jersey boars, gilts and brood sows with litter, and it is one of the best offerings the boys have ever made. There will be fifteen boars in the sale, the pick of this season's raising, and there are pigs here that will and should go to the head of good herds. There will be one choice boar and two gilts by the great prize-winning boar, Keep On and two good gilts by Proud Advance. They also sell two good boar pigs and one gilt by Addy's Choice Goods, and will also include a couple of boars and a gilt by Harding's Proud Advance. Several of the young boars will be

sired by a son of Proud Advance, and a grandson of Echo King. Some of the matured sows will be sired by old Parnell Banner and Red Lark and will have litters of pigs at side. It will be a good offering and the breeders should remember to attend their sale. See the boys at the Iowa State Fair and they will take pleasure in showing you a bunch of their pigs.

Messrs. J. Crouch & Son, proprietors of the Lafayette Stock Farm, of Lafayette, Ind., write that they have just recently imported a large number of high-class German coach, Percheron and Belgian stallions, making the number imported in the last six months 308 head, which they claim is more than any one firm, and with but one exception, twice the number imported by any firm in the same length of time. Among the last importation are prize winners in Europe and they advise us that they can show prospective buyers the largest number of stallions ever offered by one firm.

On November 27th Mr. Delmar, McCann, of Kennard, Neb., will make a public sale of Short-horn cattle at his home farm, at which time he will sell forty head of imported Cruickshank, Canadian-bred and Scotch-topped cattle. Included in this sale will be a choice lot of cows and heifers, and a good bunch of young bulls. It will be an offering that should attract breeders, as there will be some very choice things in the sale. In due time we will have more to say about the sale, but breeders should keep it in mind, therefore it will be a good place to buy good cattle.

The proposition placed before the readers of this paper in the advertisement of Mr. E. C. Williams, cashier of the Dalhart National Bank, Dalhart, Texas, is one that it seems to us should be very attractive to any reader contemplating moving to a warmer climate. Mr. Williams has two sections of rich, level prairie land, located near a city of 3,000 people, that he is offering for sale at a very low price and on terms, stated in the advertisement, which are very reasonable. It will pay the interested reader to refer to the advertisement on page 17 and after reading it write Mr. Williams for further particulars.

Mr. W. F. Hooker, of Northboro, Iowa, one of the representative Percheron breeders in southwest Iowa, showed a nice bunch of mares, stallions and colts at the Shenandoah fair last week and got the following premiums: First on mare and her produce; first on yearling filly; first on yearling stud colt, and first and second in suckers. He also got second on grade stud colt. At the head of his stud is Veranger 48918, a horse imported by Mr. M. L. Ayres, of Shenandoah, Iowa, and he has proven himself to be a great breeder. Mr. Hooker has a good bunch of mares and is meeting with success in being able to produce a lot of winners.

Mr. Harman Gruver, of Brewster, Minn., one of the foremost Duroc Jersey breeders in that state, writes as follows: "My pigs have done exceptionally well. They have not been stuffed or pampered, but have had the run of a clover pasture. Some of my best stuff was sired by Gruver's Orion, the sire of the harrow I won second on at the International Live Stock Show last year, and he himself won second at the Minnesota State Fair in class and was only in breeding condition. I predict he will do no worse this year. When it comes to length, bone, depth and color he certainly has these qualities, and transmits them to his offspring." Mr. Gruver has a grand good bunch of hogs. We have seen them and we can recommend them to readers of The Homestead. Write him and get his price on a good pig.

On page 23 in this issue will be found the announcement of Rookwood Berkshires owned by Prof. C. F. Curtiss, of Ames, Iowa. This is Professor Curtiss' own personal property, maintained on his own farm several miles distant and entirely separate from the I. A. C. farm. Professor Curtiss is offering for sale a choice lot of early spring hogs and gilts of superior breeding and of unusual size and quality. He is also offering for sale two splendid Scotch-bred Short-horn hogs from six to ten months old. Some of these pigs offered for sale were sired by the prize-winning hog, Royal Majestic, the \$450 boar at the head of the Ardmore farm herd, while the grandsire of these choice pigs is Premier Duke 2d. Some of these pigs are out of exceptionally large smooth sows, weighing 550 pounds each. Certainly this is an opportunity to secure some gilt-edged Berkshire blood from a very reliable breeder and one of the best judges of live stock in America. Mr. John W. Ogle is manager of the Rookwood farm and is a very practical, painstaking man. All correspondence should be addressed to Rookwood farm, Ames, Iowa.

There are two classes of people in the north central states who are looking for lands outside their immediate vicinity. The young man who is the coming home builder of the country is casting about to find the best portion of the continent in which to settle and build his fortune and rear his family. This young man wants cheap lands and long terms, which combination will enable him to work out his fortune and become independent in his later years. The other class of citizen who is casting about for land is the investor; he is looking for a location where lands will rise in value, not necessarily at a rapid pace, but he wants to be assured that the rise will come; although it may be gradual it must be sure. There are thousands of these two classes to be found in the central states at this time; trains going west and north and south are loaded with them, all possessing the same idea—to get good land cheap. Some of them accomplish their purpose and others make a dismal failure of their attempt to find a home or fortune. But there is one locality where a large percentage of these homeseekers and investors have gone, and where they have been satisfied, and that locality is the Panhandle of Texas. When you find a man who has invested in the Panhandle you find a man who is satisfied, whether he be investor or homeseeker; there is not one single investor to be found who has put his money into Panhandle lands during the last few years but who has either taken a profit or can sell his land at an advance over the price paid for it which

will make him a good profit; there is not a single man to be found who has bought a home in the Panhandle and settled on it but who is satisfied and has a desire for more Panhandle land. It is seldom you find such conditions in any country and it certainly speaks well for the Panhandle. The North Texas Land Company, of 100 Market St., Texline, Texas, has recently placed on the market over 100,000 acres of the best raw Panhandle land. If you are a homeseeker or investor, this company will be pleased to tell you how best to see the Panhandle and become acquainted with its good qualities. Write them for full information, after reading the advertisement on page 17.

On October 22d, the eighth annual Poland China sale of Mr. A. O. Stanley will take place at Sheridan, Mo. He writes: "I will put in fifty head of the large, heavy-boned kind, with plenty of quality, that have proven money makers for the buyers at my previous sales, as well as for myself. They are the kind that go out to the fairs and win, and when in the other breeders' sales are always at the top. My herd is now headed by Joe Profit 36249, bred by Mr. Ed Klever, of Ohio. Sheridan is on the Chicago Great Western, just four miles from the Iowa-Missouri state line. Watch for further notice of the sale."

Messrs. P. S. & S. Barr, breeders of Poland China swine and Short-horn cattle, of Davenport, Iowa, in sending in a new advertisement, found on page 27 of this issue, write: "We are offering bargains in Short-horn cows and heifers, bred, or with calves at side by Double Standard Polled Durham hogs. We recently visited six of the prominent Polled Durham herds of Indiana, Illinois and Ohio and purchased two of the best herd hogs in the United States. We consider these cattle cheap when bred to such high-grade hogs. We have Poland Chinas ready to ship."

Mr. August Voge, of Portsmouth, Iowa, will be at Des Moines next week with Crimson Wonder I Am 2d, possibly the best son of the noted sweepstakes winner, Crimson Wonder I Am. He will show him there and he is a credit to his owner and his sire, and should add materially to the reputation of Mr. Voge as a Duroc Jersey breeder. Mr. Voge has a lot of good pigs by him, also some excellent pigs by Tip Top Notcher, Ohio Chief 2d and Perfection Boy. He will have some of these with him to show the boys what he has at home. He will make a boar sale October 9th, at which time he will sell the best of the year's crop, and on January 19th he will make a brood sow sale.

Mr. Delmar McCann, of Kennard, Neb., one of the most popular young Duroc Jersey breeders in the West, is now offering forty head of Duroc Jersey hogs for sale. These are mostly sired by Chief of Chiefs, a son of the noted boar, Winchester Chief, and are out of Gold Dust Jim and Surprise sows. He can sell a good stretchy, well developed and well-bred pig at a figure at which the boys can well afford to buy. Anyone sending him an order can rest assured that they will get the kind of a pig described and it will be better than they can expect for the money. Try him with an order and be convinced. Kindly mention The Homestead when writing. See page 23.

Mr. H. H. Hatcher, of Shenandoah, Iowa, showed Durocs at the Shenandoah fair last week and got first premium on litter sired by his herd boar, Hatcher's Marti. He also got second on a boar pig by Jim's Critic, a son of Glendale Critic. He showed a nice bunch of pigs, all of which go into his sale at Clarinda, Iowa, September 27th. He will be associated with Messrs. Harry Pfander and Wm. McClelland in the sale and they will sell thirty-five boars and fifteen sows. Mr. Hatcher will sell fifteen to seventeen head of hogs in this sale and we can assure Homestead readers that they are worth going after. In fact the entire offering in this sale is away above the average and the boys expect to make one of the good sales of the season.

Mr. J. E. Wehr, of Portsmouth, Iowa, will be at the Iowa State Fair with a show herd and will have with him one of the best sons of old Proud Advance. He has the best head and ear on him that we have ever seen on a Proud Advance boar, and he has other admirable traits to recommend him. His back is broad and his ham is deep, while he is up on his pins and is an excellent young boar. Mr. Wehr will take four good fall hogs with him, two fall gilts, four spring hogs and four spring gilts. He will show a daughter of Ohio Anna 8th in the under six months class, and will fill several of the other classes. He will make a fall sale on October 20th, at which time he will offer an excellent lot of boars and a few sows. Look him up at the state fair next week and he will be pleased to show you his hogs.

Mr. Matthew Long, of Marshfield, Mo., advertises his 282-acre farm for sale on page 16 of this issue. The advertisement gives a very accurate description of the farm and its improvements, but Mr. Long, in writing us in regard to it, says: "The farm is much better than my advertisement represents it. It is included on the government map by soil experts as of the best. The public road from Marshfield through Buffalo to Kansas City is on the west side of the farm, and the road from Marshfield through Lebanon to St. Louis runs on the east side. My reason for wanting to sell is my age." Mr. Long has recently lost his wife, to whom he had been married sixty-three years, and wishes to retire from the farm. He was state senator in the Twelfth and Thirteenth General Assemblies of the state of Iowa, and secretary of the State Insurance Company, of Des Moines, Iowa, for twelve and one-half years. Anyone writing to him for more particulars in regard to the farm can rely upon his statements.

Those who are contemplating the holding of fall sales of blooded stock of any breed will doubtless find it to their advantage to secure the services of a practical, well-informed live stock auctioneer. Such a man is Col. Ralph W. Barclay, of Mason City, Iowa. Colonel Barclay has had a very successful season and has sold from Jan. 1, 1906, to July 1st, more sales than ever in his history. During the month of March alone he sold \$46,600 worth of live stock,

and his inquiries for fall sales are coming from Portland, Ore., to the province of Ontario. Colonel Barclay has been reared in a "fine stock cradle" and after devoting his entire life to the work should be and is in a position to render service of the most satisfactory character. In addition to his other qualifications he is a graduate of the Iowa Agricultural College at Ames, having spent much time in animal husbandry, thus specially fitting himself for his chosen life work. His announcement appears in The Homestead at all times.

The Prairie Glen herd of Durocs owned by Mr. A. L. Mossman, Radcliffe, Iowa, is doing nicely. The writer visited at the above place and was agreeably surprised with the present crop of pigs. Pigs are ready to go sired by Al's Chief 43327 and he by the 1,000-pound boar, J. J.'s Chief, first at the Indiana State Fair last year. A nice lot of youngsters to go are sired by A. L. Advance and other good boars. Mention is made here of the boar, Tientsin 17261, used successfully by Mr. Mossman. He is an excellent individual throughout and sires good pigs. This boar is now for sale and ought to be placed in some good herd. Breeders in search of Ohio Chief boars will find two sons in the Prairie Glen herd to go. Ohio Chief boars such as these two are not found every day and will undoubtedly find ready buyers, those especially having well-bred Durocs. Mr. Mossman has eight November males of rare quality, three of these of the Top Notcher strain. Write for his prices, mentioning The Homestead. His advertisement appears on page 25.

TRUMAN'S HORSES AT IOWA STATE FAIR.

The Truman Pioneer Stud farm, of Bushnell, Ill., one of the greatest importing firms in America, will have a very fine exhibit of their horses at the Iowa State Fair next week. A cordial invitation is extended to readers of this paper to inspect their horses, and Messrs. Truman will be pleased to meet their many friends and customers during the week.

BUY GOOD FARMS IN THE PANHANDLE COUNTRY.

Messrs. T. Carrabine & Co., of Kansas City, Mo., offer on page 16 attractive bargains in lands in the Panhandle of Texas. The above-named company make most liberal terms to those who wish to buy and we would request that the readers of this paper who contemplate buying Texas lands write to Messrs. T. Carrabine & Co., whom they will find to be reliable should they have any dealings with them. When writing kindly mention The Homestead.

THE CLOVER WAVE DUROCS.

One of the herds that has a great lot of choice Duroc Jersey boar pigs for sale is the Clover Wave herd owned by Messrs. Stowe & Gingrich, of Hamburg, Iowa. They have pigs by Red Orion and Duroc Standard, as well as by other well-known hogs. These are out of some of the very best sows ever sold, and have behind them the blood of the winners. If any of our readers want a topsey, well-bred boar they can get one from the above firm. There is no better herd in the West and no more reliable or responsible breeders. Write them at once or see them at the fairs.

A. F. RUSSELL TO SELL DUROCS ON SEPTEMBER 20TH.

Mr. A. F. Russell, of Savannah, Mo., breeder of Duroc Jerseys, claims September 20th for a sale of boars and gilts. Mr. Russell within the past year has made some valuable additions to his good herd and the boys who are looking for the blood of the most popular Durocs known to the breed will find them in Mr. Russell's sale. A litter out of a full sister to the \$1,060 S. E.'s Model, a daughter of the Illinois champion, Buddy K., and some Tip Top Notcher stuff with Mr. Russell's good line of stuff will afford buyers a most excellent opportunity. These hogs are bred right, fed right and will be found right on sale day.

THE J. I. CASE PLOW COMPANY.

Special attention is directed to the advertisement of the J. I. Case Plow Company, of Racine, Wis., which will be found on page 4. The thousands of the Case plows that are scattered over the corn belt furnish the best evidence that this company is making a durable, easy-running, easily-adjusted plow. Improvements, however, are the order of the day with this company, and their J. I. C. self-leveling, high-foot-lift sulky is almost perfection itself. One movement of the foot-lever will raise this plow from six inches below the surface to six inches above it. The highest-priced talent obtainable has been employed for years by this company for no other purpose than to suggest improvements for the J. I. C. plows. As a result, farmers have placed within their reach a perfect working plow and one, if reasonably well used, that may be passed on to posterity, so well and so durable is it made. The company has recently published what they call their farmers' encyclopedia. This is a cloth-bound volume containing 146 pages. It is sent to all applicants who will enclose ten cents for packing and postage. Address J. I. Case Plow Works, Dept. J-22, Racine, Wis.

THREE GOOD YEARLING POLAND CHINA BOARS FOR SALE.

On page 23 of this week's Homestead will be found the advertisement of Mr. W. W. Wheeler of Harlan, Iowa, who offers three good yearling Poland Chinas hogs for sale. They combine size with quality and are good, stretchy, well developed hogs. The largest one is Thicket's Best 109371, grandson of the Ohio sweepstakes boar, Thicket's Haska Chief. Here are his dimensions: Length 54, heart 55, flank 58, weight 375, bone, 8½ inches. The breeder who is looking for size and quality had better buy this fellow. Another good boar he offers for sale is Thicket's Improver, much the same breeding. He measures 53, heart 56, flank 53, weight 360 and has 8½ bone. Corrector's Best is a grandson of old Corrector and a promising boar. Mr. Wheeler also offers forty springs boar pigs for sale. These are sired by Surprise Wonder 5th 103097 hy Surprise Wonder 4th, dam Miss Longfellow

I put MACBETH on my lamp-chimneys as I am satisfied to be known as the maker of the only good lamp-chimney

There are other lamp-chimneys, but their makers fail to own them. It's no wonder.

My Index is useful to everyone who owns a lamp, and it's free.

Address, MACBETH, Pittsburgh.

by Chief Price, the 1,000-pound boar. He also has pigs by Sunshine Chief 76813. Both of these boars he purchased of Mr. Peter Mouw, and are great big fellows. He has as nice a crop of good, lengthy, big-boned pigs as we have seen this year. These pigs are out of sows that will weigh from 500 to 700 pounds. If you want a pig from the big strain of Poland Chinas Mr. Wheeler has them. He also has twenty yearling sows for sale. He will be pleased to bear from Homestead readers, but would be better pleased to show them the pigs.

THREE YEARLING DUROC JERSEY BOARS FOR SALE.

Mr. W. W. Wheeler, of Harlan, Iowa, offers three splendid yearling Duroc Jersey hogs for sale, good enough to head any herd. One of these is Scarlet Wonder 46319 by Pericles, dam by the great Tolstoy. Carmine Wonder 46321 is sired by Tolstoy and is out of a granddaughter of Phil Clark. The other is a grandson of old Duroc Challenger. These are three good ones and are bred in the purple. Write Mr. Wheeler or go and see them.

BUY GOOD FARMS IN THE PANHANDLE COUNTRY.

Messrs. T. Carrabine & Co., of Kansas City, Mo., offer attractive bargains in lands in the Panhandle of Texas. The above named company make most liberal terms to those who wish to buy and we would request that the readers of this paper, who contemplate buying Texas lands, write to Messrs. T. Carrabine & Co., whom they will find to be reliable, should they have any dealings with that firm. When writing, kindly mention this paper.

HOWE SCALES—WHY THEY ARE IN GENERAL USE.

"You think of buying a set of scales. It's a matter to which you are giving serious and careful attention. You do not expect to buy more than one set of farm scales in a lifetime. It's too big an investment to repeat every few years. It is, therefore, very important that when you settle this matter you settle it right. For if you go wrong, your regret will not be occasional. Expense for repairs and exasperation over unreliable weighing, or failure to weigh at all, will soon remind you of your error every day. It's just this careful consideration that the Howe Scale Company welcomes. Because we offer you scales that have stood the test of time under every condition." Extract from Howe Scale Company's booklet. See advertisement on page 7.

C. A. WRIGHT, THE STOCK FEEDER MAN, TO SELL DUROCS.

Mr. C. A. Wright, of Rosendale, Mo., "The Stock Feeder Man," claims October 17th for a public sale of Duroc Jerseys. Mr. Wright has bred the Durocs for a number of years and it was through his study of how best to serve the young porker, that the "Wright" pig feeder was studied out and brought into use. For uniformity of size Mr. Wright's pigs certainly prove that the "Wright" pig feeder is the thing. Mr. Wright extends a cordial invitation to all hog men, poultry keepers and those interested in feeding calves to call at his headquarters at Iowa State Fair next week. A sample of Wright's Durocs will be on exhibition, as will also full-sized hog feeders, chicken and calf feeders. Mr. Wright says come one, come all; he wants to show and to prove that the Wright feeders are the feeders of the world. Remember his sale date and watch these columns for future announcements.

HOW TO VACCINATE CATTLE AGAINST BLACKLEG.

Blackleg is such a disastrous disease that we want to warn our readers against it. If there is none of it in your neighborhood you may consider yourself lucky, but at the same time be on the lookout for it. Cut this article out and paste or pin it in a place where you can refer to it. There is almost sure to come a time when you will want to know about blackleg, what it is and what to do for it. Blackleg is a fatal disease of young cattle. Very few recover from it, and so far as is known no medical treatment will do any good after the animal is attacked. The only thing to do is to prevent it by vaccination. Vaccinate in the spring and in the fall, even if there are no signs of the disease and none in the neighborhood. It's the mere question of saving money, of spending a dollar to save \$10 or \$20. The question is not, "Can I afford it?" but, "Can I afford not to?" A few calves or yearlings lost would pay for many vaccinations. By using Blacklegoids, vaccinating is made so easy, safe and sure that there is no good reason for not doing it. There was a time when to vaccinate meant grinding a powder in a mortar, mixing with water, filtering, measuring and injecting with a hypodermic needle. This required a great deal of time and even then was not accurate. The quickest, surest and safest way of doing the work is with Blacklegoids. With these there is no dose to measure, no liquid to spill. A Blacklegoid is a little pill of blackleg vaccine, one pill is a dose. To use it, simply put it in the hollow needle of

the injector, thrust the needle under the skin of the calf, push the plunger and the work is done. Because they are so easy to use and effective, Blacklegoids are perhaps the best known and most widely used blackleg vaccine. Write the manufacturers for a little folder about blackleg, which also gives further information about Blacklegoids. It is free. Address Parke, Davis & Co., Detroit, Mich., and mention The Homestead.

NOVINGER & SONS HAVE SOME DESIRABLE SHORT-HORN BULLS.

The firm of Messrs. Isaac Novinger & Sons, of Kirksville, Mo., breeders of Short-horns, advise us that they have several young bulls just coming of serviceable age. Seven of these are straight Scotch, some of the reliable Scotch-topped sort and all good and from their best blood cows. In former years this firm have enjoyed a good trade on bulls and this year they have a line of bulls that are superior to any former crop. Mr. Novinger, senior, invites inspection of these and of the herd.

S. J. MILLER, IMPORTER OF PERCHERONS, LANDED JULY 26TH.

Mr. S. J. Miller, of Kirksville, Mo., importer of Percheron and French Coach horses, landed home July 26th with the best lot of horses that have been brought over in some time. This, Mr. Miller says, was conceded by seven importers who came on the same boat. In Mr. Miller's importation are a pair of prize winners, both two years old, and weighing 1,790 pounds each. A few mares were brought over. Mr. Miller says the prices in the old country are higher than ever before and for horses of the quality of this importation he was forced to pay some long prices. Mr. Miller's importation came through in fine condition and he asks his old customers and all who contemplate purchasing, to make him a visit, look over his horses and get prices on them.

SOME GOOD POLAND CHINA FALL BOARS.

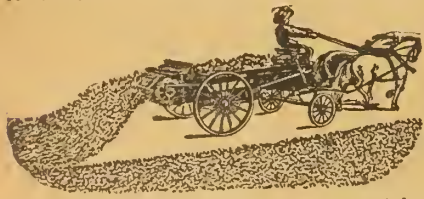

Mr. A. F. Graves, of King City, Mo., proprietor of the Lyndale herds of Short-horns and Poland Chinas, has a number of fall boars that should go to parties who want the most profitable type of Poland China. They are the stretchy sort, with well-sprung ribs, good bone, are from big litters and have quality with size. The blood lines, too, are good and good ones only will be sent out. The Lyndale herd of Short-horns can supply some good young bulls. Among these are some pure Scotch, a pure Bates and a few nicely Scotch-topped fellows. These are from cows Mr. Graves bought when founding his herd of Short-horns. They come from such herds as the Bellows Bros., the Flynn Farm Company and other good herds. See page 27 for advertisement of the Lyndale herds and remember that nothing but the best will be allowed to go out to customers.

RENSHAW'S DUROC JERSEYS.

Mr. Austin Renshaw, of Blair, Neb., one of the well-known Duroc Jersey breeders of the West, offers forty head of choice boars for sale through this week's Homestead. These are sired by Junior Jim, the first-prize yearling boar at the Nebraska State Fair last year; Long Alix, a litter brother to the great sweepstakes sow, Alix 2d, and by Glendale Critic, the well-known winner and sire of winners. Mr. Renshaw's boars are not only bred along the most popular lines, but they have been well grown out and he has many herd-heading propositions among the bunch. Some of the best boar pigs are out of Lady Alix, one of the best daughters of old Alix, and there are six of these. He has 120 spring pigs this year, and he has some very choice gilts among the number. He will be pleased to bear from any of the breeders who want a good boar pig and be has a number that should have a good outcome to them. Write Mr. Renshaw and tell him what you want, and kindly mention The Homestead.

A MANURE SPREADER THAT SPREADS.

The National Manure Spreader, manufactured by the Enterprise Windmill Company, of Sandwich, Ill., is noted for its lightness of draft as well as for its unbreakable

qualities. Some of the mechanical principles involved in the construction of the National Spreader do away entirely with annoying breaks. Two average horses can handle this spreader, though it holds sixty-five bushels of manure. Our readers are requested to write this company for further information concerning price, guaranty, etc., after reading advertisement on page 11.

A GOOD NEBRASKA SHORT-HORN SALE.

On September 7th, at O'Neill, Neb., will occur one of the good Short-horn sales of the season when fifty head, contributed by Messrs. D. J. Cronin, O'Neill, Neb.; W. M. McLemore, Kearney, Neb.; A. J. Stonebraker, Royal, Neb.; and D. L. Pond, Inman, Neb., will be disposed of at public auction. The cattle are in good condition, but not pampered, and the offering throughout is a representative lot of Short-horns. Mr. Cronin is putting in twenty-four head of females, all heifers, excepting three. They are mostly Bates breeding from the Martin Flynn herd. Mr. McLemore is putting in ten head of bulls and six heifers, and they are a very worthy lot. Mr. Pond sells four females and one bull and Mr. Stonebraker three bulls and two cows. Mr. D. J. Cronin, the manager of the sale, writes as follows: "The bull offering is a strong one, consisting of one aged bull and fifteen one and two-year-old bulls. These are good, thrifty, well-developed bulls and are the kind that farmers, breeders and ranchmen will want. The females are as good a bunch as has ever been sold in the West, and are worthy the attention of the most discriminating buyer. They are particularly worthy of notice by those in search of females combining beef qualities with that very desirable milking

trait that so many Nebraska Short-horn men are now looking for. The sale will be held on the fair grounds, O'Neill, Neb., on Friday, of fair week, and everything will give way to the sale." Those wanting catalogs should write to Mr. D. J. Cronin, Mgr., O'Neill, Neb. Kindly mention The Homestead when writing.

IS IT CHOLERA?

This question has worried many farmers this year. There are diseases in hogs that are not cholera or swine plague, but over 90 per cent of the diseases which kill the herds of hogs is cholera or swine plague in one form or another, and it is a ten to one shot that it is cholera. Cholera and swine plague are frequently found in the same herd. The best breeders and feeders of the country say that the Snoddy treatment cures and prevents the disease which is so common. Such men as P. W. Peterson, Vermilion, S. D.; O. S. West, Paulina, Iowa; Dave Rankin, Tarkio, Mo., and many other prominent breeders and feeders have used this treatment for years and very highly recommend it. It is not only a cure and preventive, but is also the greatest worm destroyer and health and thrift producer known. Full particulars, together with circulars containing a hundred endorsements from the big feeders and breeders and a nice little book full of valuable information sent free. Address the Snoddy Remedy Company, Box 852, Des Moines, Iowa.

MISSOURI LANDS OFFERED BY THE OWNERS.

In our land department on page 17 Messrs. Isaac A. Novinger & Sons, of Kirksville, Mo., offer some rare land bargains. We wish to assure our readers that the firm of Messrs. Novinger & Sons are not real estate dealers in any sense of the word. They breed Short-horn cattle and Poland China hogs and are offering this land because, as they state, "they have more than they can handle." The writer has on various occasions, when visiting their herds on the home farm, seen these lands and we think they are being offered at such prices as should move them at once. No better community is found any place than where these lands are located. The school facilities are the very best and all of the land is in easy distance of Kirksville, conceded to be one of the very best towns in northern Missouri. The country as a stock and grain country is hard to excel and this is what has made the town of Kirksville the thriving little city that it is. Messrs. Novinger & Sons state plainly in their advertising what these farms are like and the prices they are being offered at, so turn to the advertisement and if interested write them now, as they are sure to go to someone hunting a good home.

W. H. SCHNELLE & SON OFFER FULL BLOOD AND HIGH-GRADE ENGLISH SHIRE STUD COLTS.

Mr. W. H. Schnelle & Son, of Lemonville, Mo., have an advertisement on page 27 in which they offer six high-grade two-year-old English Shire stud colts, four coming yearling butter-bred Holstein bulls and prolific Duroc Jersey swine. The stud colts are all the get of Nelson 4534, a black stallion that Mr. Schnelle, Sr., says was as good a sire as he has owned in the twenty years of his breeding operations. Three of the colts are blacks, two are bays and one is a gray. They are all big, strong fellows, well quartered and have the bone. Messrs. Schnelle are offering them at prices that they think should move them. The Holstein bull calves are richly bred and their ancestors have butter records ranging up to thirty-eight pounds and eight and one-half ounces in seven days. These are also priced where those wanting Holsteins can afford to buy. Duroc Jerseys are also bred and Messrs. Schnelle have some useful young boars to sell. They have issued a cat catalog which gives full particulars of all the stock offered and would be glad to mail one to all who are sufficiently interested to write. Kindly mention this paper when writing.

THE "FONTAINE" SHOCK BINDER.

We desire to direct the attention of the readers of this paper to the advertisement of Mr. J. P. Lawrence, general sales agent of the American Shock Binder Corporation, whose address is 1100 North Levee, St. Louis, Mo. The American "Fontaine" Shock Binder is a strong windlass, weighing only three pounds, made of the best wood, malleable iron and manilla rope, with a ratchet attachment which will last a life time. It saves labor and twine and binds tight. From a booklet furnished by Mr. Lawrence we copy the following: "One man alone can operate it perfectly, and with it can bind shocks as rapidly as twelve or fifteen men can cut and set up the corn. One pound pressure on the handle pulls sixteen pounds on the rope, so that one man with it can easily apply a pressure of over 600 pounds to the top of a shock, thereby compressing it so tight that it will not fall or be blown down, and will not get wet inside when it rains. This binder draws both ends of the rope, so that the shock is compressed evenly without being pulled over to one side. Success in saving corn and feed, when cut and shocked in the field, depends upon the shocks being properly bound when first put up. If not tightly bound the shock will get into a twist, when the stalks begin to dry and fall and be much injured by getting wet all through when it rains. One method of binding a shock is for two men to draw a rope around it while a third man ties the twine. One man with the American "Fontaine" Shock Binder does the work of these three, and does it much better by binding the shock much tighter. This binder is of great advantage in stacking small grain, for drawing a rope tight around the base of the stack, so that it will not spread while the stack is being finished. Draw the rope just below the bands on the bundles and remove after the stack is finished. Cutting down corn is much better than pulling fodder and cutting tops, because: First, it saves labor, for your corn and feed both are gathered by going over the field once; second, it secures at least twice as much feed because when cut green all the shock and boot and most of the stalks are eaten by the stock; third, the feed is more easily saved in rainy weather. Fodder and tops before being stacked are much

PILES NO MONEY TILL CURED.

FISTULA, Fissure, Contraction, Ulceration and all Rectal Diseases treated on a positive guarantee of permanent cure.—Established 29 Years.—See thousands of prominent names with statements that they paid nothing till satisfied of a cure in our free 352-page illustrated treatise, also our 132-page illus. book for women; both sent free and postpaid.
DRS. THORNTON & MINOR, 3969 Olive St., St. Louis, Mo., and 1010 Oak St., Kansas City, Mo.

injured by one rain, but feed saved by this plan, if the shocks are properly bound, will not be injured by rains. A farmer saving corn by this method is not dependent on the weather, as he can cut and shock until it commences to rain, and go to cutting again soon after the rain stops." See the advertisement on page 11.

IOWA LAND THEIR SPECIALTY.

We wish to call attention to the advertisement of the "old reliable" Burkholder Land Company, of Creston, Iowa, on page 16 of this issue of The Homestead. They are very enthusiastic concerning Iowa lands, which they consider the very cheapest lands on earth today, all things being considered. They claim that while their lands range in price from \$30 to \$100 per acre they are much cheaper in reality and worth more than the best cheap boom lands when it comes to raising fat steers, horses, hogs, corn, oats, timothy and clover and blue grass pasture, or any other kind of crops. They also state that when any judicious, conservative man wishes to make an investment in lands in which there is no risk, and in which he can depend at all times as being a good investment, he comes right back and buys good black Iowa land. This he knows is all right and will double itself in at least twenty years, and at the end of that time if he does not care to sell, it will be something worth keeping. They sell their lands on their merit, and ask the very closest investigation from those wishing to buy. They solicit those who are looking for a home to come to Iowa and get the best. And those who are looking for an investment come to Iowa and get something tangible; better than a bank account, or bonds, is a tract of good Iowa land.

MANLEY & CO. LOSE YOUNG JOHN.

One of the best herd boars owned by Messrs. M. H. Manley & Co., of Lyons, Neb., went the heat route last week. This was Young John, a son of Long John, and he had been used with much success the past two years in the herd. As a sire he had fair to become one of the best in the West, and his get were just coming into public view. Two of the best sows in the Manley herd are sired by him as well as a couple of fall boars. They had been fitting him for the fairs and the intense heat was too much for him. The boys will be out to the Iowa State Fair and also at the Nebraska State Fair. They will show Junior Jim and he will be one of the hogs that will make this the strongest two-year-old class that has ever been brought out. He has been well fitted and will trot into the ring one of the proudest and toppest boars of the show. They also have a hard proposition in a two-year-old sow and they will show a good fall pig. They will also have a number of good things with them and will be pleased to have the boys call and see them. These gentlemen will make a public sale on September 18th, at which time they will offer the pick of their boar crop, together with a few good sows and gilts. In our next week's issue we will tell our readers just what goes into the sale and we can now promise them something good in the way of Duroc Jersey boars. Look them up at the fairs the next few weeks.

HIGH-CLASS ANGUS AUCTION AT HAMLIN.

The inaugural auction of the Minnesota State Fair at Hamline, September 4th, promises to be of unusual merit. Mr. W. J. Pickard, of Richland Center, Wis., who has been purchasing some of the good cattle sold at public auction at Chicago and is establishing a choice herd, catalogs a half dozen splendid specimens for this sale. The double Blackbird bull, Belsbazzar 2d, bred by M. A. Judy, heads the list. He is a grandson on both sides of Imp. Prince Ito, the \$9,100 Highland Society champion bull and sire of the undefeated Prince Ito 2d. He was a year old last September, sired by Blackbird Ito, the first prize yearling at the World's Fair at St. Louis, and was out of Blackcap Ito, that was sold in Chicago at public auction at \$1,000 when a calf. Blackcap Ito was out of Imp. Blackberry of Advie that was also auctioned at something over \$1,000 and she was by Kidnapper, a Ballindalloch K. Pride bull and sire of Mux of Giamis, one of the greatest of all Smithfield champions. No better bred bull could be found than Belsbazzar 2d and individually he is difficult to fault. Two double Erica heifers are included by Mr. Pickard and as the Ericas are just now the best selling family of the breed and these are good ones, they should not lack for bidders. A four-year-old Queen Mother cow sired by the double Blackbird bull, McHenry Blackbird 16th, is included by Mr. Pickard, along with a Mina and an Annie Laurie. Mr. W. J. Miller, of Newton, Iowa, one of the leading show men of the breed, includes a high-class young bull, Mayor of Metz, that should prove a winner at this show. His sire, Black Prince of Estill, was by Imp. Prince of Kerrera and out of the champion and record-breaking cow, Lucia. Estill, that sold for \$2,800. The four-year-old cow, Metz Ogarita, is a sister to a champion steer shown at the World's Fair at St. Louis, and she represents the blood of the famous Heatherton herd. While Mr. Miller has exhibited great breeding herds he has also brought out each year fat steers with his exhibit that have proven winners in the hottest competition. The catalog throughout of this auc-

ABOUT THE SOUTH

"About the South" is the name of a 64-page illustrated pamphlet issued by the Passenger Department of the

Illinois Central R. R. Co.

in which important questions are tersely answered in brief articles about

**Southern Farm Lands
Mississippi Valley Cotton Lands,
Truck Farming, Fruit Growing,
Stock Raising, Dairying,
Grasses and Forage, Soils,
Market Facilities,
and Southern Immigration**

along the lines of the Illinois Central and Yazoo & Mississippi Valley railroads, in the states of Kentucky, Tennessee, Mississippi and Louisiana, including the famous

YAZOO VALLEY

of Mississippi.

Send for a free copy to J. F. Merry, A. G. P. A., I. C. R. R., Dubuque, Iowa. Information concerning rates and train service to the South via the Illinois Central can be had of agents of connecting lines, or by addressing
A. H. HANSON, G. P. A., Chicago, Ill.

tion is rich in blood lines and individually the offering is exceedingly attractive. Mr. W. C. McGavock, of Springfield, Ill., will be glad to mail catalog.

WESTERN NORMAL COLLEGE.

A reporter for The Homestead was recently shown through the Western Normal College at Shenandoah, Iowa, and while we had often heard of this widely-known institution, we were not prepared for the surprises that attended our visit. The college is really ten associated schools, each school complete and of the very highest character in all of its work. Space does not permit description of the separate departments, but we feel that we owe it to our readers to give a few general facts which impressed us most. This school, of all other independent schools of the West, stands unique and alone, for while they have (every one of them, we believe) had their financial reverses and change of management and consequent loss of public confidence, this school has uniformly maintained its remarkable prosperity and has never had a financial reverse and always an increasing and ever-widening patronage and larger public confidence. Its twenty-fifth anniversary will be celebrated at the close of next year. The year beginning September 4th will be its twenty-fifth year. It has, in this period of wonderful growth, sent out more than fifteen thousand students all over the country, east and west, and has the proud record of training more farmers' sons and daughters of this middle West than any other one school. From the roster of the students in the college office we were impressed with the immense popularity of the school among the farmers and their children. These young people from the farm in large numbers choose the business course and the shorthand course and are soon prepared for entering business offices as bookkeepers, stenographers, cashiers, etc., and with their sturdy rural life-blood they are sought by city employers in preference to any others. Many others of these young people take lines of training for teachers' certificates and become independent, successful teachers in public schools and some of them in colleges; still others prepare themselves in music and earn large financial rewards from their art. This wonderful school seems to be a training station for the recruits who are to reinforce the great industrial and intellectual army for the world's daily work. We were impressed that no better surroundings or more healthful situation for any school could anywhere be found. Every department is equipped with the most substantial and most modern fixtures and appliances and furniture. Our reporter could think of nothing lacking to make the work of this school more thorough and effective. So successful has the school been in the past that it now pays the student's railroad fare, an unheard-of thing in the history of schools until about two years ago it made its announcement. Sixteen states were represented in the attendance the past year and representatives of these states have furnished a flattering testimonial published in the complete bulletin of the college. These bulletins are different from those of the average school. We wish every young person reading this brief account would send for one of them. They are mailed free. They are sure to impress every reader with a higher estimate of his own possibilities. The large plant of the institution affords ample accommodations for their nearly 1,000 students annually, and with their fine faculty

of professional men and women and their practical courses of study, and their exceedingly low rates of expense, and even then the repayment of student's railroad fare, and with the thousands of friends and former students representing the successful results of the training of this school, and with many more advantages we might name, we predict a still larger attendance of students through the next year, their quarter centennial, than the institution has ever before had to cross its threshold within a single year. We want all young people who are thinking of school this fall to write to Pres. J. M. Hussey, of the Western Normal College, Shenandoah, Iowa, for a complete bulletin, referred to above, before deciding where they will attend.

IOWA HERD OF DUROC JERSEYS.

The above title is the name of one of the excellent Duroc herds of Iowa. Mr. A. T. Sundell, of Paton, Iowa, is the proprietor. Many of our readers will probably feel more acquainted with this herd when mention is made that Mr. Sundell is the successor to Messrs. Wm. Roberts & Son's herd that was so well and favorably known. At the head of this fancy-bred lot of Durocs stands the grand herd boar, Lord Roberts, bred by Messrs. Roberts, by Long Tom 921 by Iowa Tom 8015 (A.). Lord Roberts' first dam was Viola Roberts 22474 by Venice 7321 (A.), second dam Zoo V., the dam of Zoette, the \$1,275 R. J. Harding sow. Lord Roberts is assisted by King West, a well-bred individual, and of a prolific family. King West is out of a litter of nine pigs. His sire is King Perfection by Banker Boy II. 1205, and dam being Lovely Lady 38528 by Duroc King 7327 (A.). The present crop of pigs are sired about half and half, Lord Roberts strain and King West blood. At present Mr. Sundell can place eight well-backed, strong-boned, fancy-bred fall boars. Four of these are sired by Sundell's Fancy, a boar out of a litter of seven. Sundell's Fancy is sired by Owen 13449 by Duroc King, his dam being Brindle 42064 by Frank 7327 (A.). Breeders should bear in mind that Sundell's Fancy was third premium boar in six months class at Iowa State Fair, 1904. It is worth while to look over such a herd of Durocs as the one located at Paton, Iowa, and known as the Iowa herd of Duroc Jerseys. A nice, growthy bunch known as the "Cherry Sisters," four in all, will be shown by Mr. Sundell at the Iowa fair this coming week. They are sisters to Admiral, a King West product by King Perfection, and will show just what King West can do. These four will be entered in the eighteen months old class. Watch for them. Color is uniform throughout the entire herd, and hack and foot stand out well. This is one of Mr. Sundell's hobbies and he gets that right. See the advertisement on this page and write for his prices. Orders now booked for spring pigs. When writing him kindly mention The Homestead.

WAYSIDE SHORT-HORNS.

Mr. Geo. H. Burge, of Mt. Vernon, Iowa, will be present at the Iowa State Fair with a choice collection of Short-horns from the Wayside herd. Mr. Burge is a well-known character at the leading stock shows and at the present day a show of Short-horn cattle in Iowa with Mr. Burge or his cattle absent would certainly be lacking in its attractiveness. As has been many times stated, Mr. Burge is an energetic, self-made man, endowed by nature with a keen eye for the perfect form of animal of the modern type. Mr. Burge was well prepared in early life to engage in the breeding of fine stock with success assured, being a thorough, practical, self-made man, doing his own work, currying, feeding, exhibiting his own cattle, has given him an experience equaled by few men. Not being born with a silver spoon in his mouth Mr. Burge has had to feel his way and improve his herd as the means earned by himself would permit. At the Iowa State Fair his exhibit will be on hand, but owing to severe and serious illness in the family, which has been prolonged, Mr. Burge himself may not be able to be present. The cattle, however, will be there and are for the purpose of showing to the world the character of Short-horns that Mr. Burge will sell in his public auction on October 5th. Practically the entire show herd will be included in this sale. Mr. Burge will exhibit two Short-horn cows fresh from the pasture. One is a very neat, tidy cow, called Annabel. This is a cow weighing 1,600 pounds

and as the Scotchman would say, a typical "Lady Cow." The other cow is Flora Dell, a daughter of Gwendoline Lad. This is a cow of great substance and now weighs 1,760 pounds. She is the dam of two of the show helpers in the sale, namely, Floradora and Florella. The last named is a fancy senior heifer calf. Old Money Musk will again head the herd and is as fit to do it as ever. This is certainly a remarkable bull. He has been in heavy service all spring, as many as three cows per day being bred to him, and yet he weighs 2,225 pounds. A very choice helper that will be shown is Silvery Nonpareil, a daughter of Money Musk and out of Silver Mist. This is a strong heifer and one that will have to be reckoned with in her class. Mr. Burge will show both an aged and young herd. Baby Boone is a fancy show calf of that famous show-yard family of Nerissas. She has natural born show-yard character as well as perfect show-yard development. This is probably the choicest thing that Mr. Burge has ever produced in the female line and perhaps the strongest bull calf ever produced by Mr. Burge is the splendid Nonpareil called The Trumpeter. He was calved December 15th and weighed 760 pounds at seven and one-half months of age. He, of course, is by Money Musk, as is the entire young show herd. This calf possesses an exceptionally fine herd, strong in his crops, back and loin. His hip bones are entirely hid and impress one that they are of the type of the choicest Aberdeen Angus in this particular. It has been many a year since a bull calf has been shown with as little prominence of hips or hip bone as this fellow. This beautiful show calf will also be included in the sale October 5th, as well as the show cow of last season. On the above date Mr. Burge will sell nine bulls and thirty-five females, sixteen of them pure Scotch. His herd of cattle should be looked after at the state fair by those contemplating the purchase of strictly choice Short-horns this fall, as the sample at the state fair will suffice for the remainder to be sold. Mr. Burge's announcement appears in the columns of The Homestead at all times.

HEREFORD AUCTION AT HAMLINE,

MINN.

It can be truthfully said that no breed of cattle has better adapted itself to American conditions and environment than has the Hereford and it can also be truthfully said that no breeders of any breed on this side of the waters have so rapidly and steadily improved their cattle since their importation to America as have the breeders of the "whitefaces." The breed represents today early maturity, thick-fleshed and easy-feeding qualities as likely no other breed does and we wish to emphasize the fact that the auction to be held under the auspices of the state board of agriculture of Minnesota on September 5th at Hamline, Minn., during the state fair, represents the type that is up-to-date and intensely the present-day Hereford. Mr. Tom Smith, of Crete, Ill., sends a half dozen entries, mainly the get of Columbus 29th, one of the best sons of the noted Columbus, the sire of the celebrated Dale. Messrs. Zander & Tong, of Goodenow, Ill., consign a yearling show heifer by the noted sire, Blackstone, bred by Messrs. Gudgell & Simpson, sired by Lamplighter, and representing throughout his pedigree an intensification of the blood of Anxiety 4th. Mr. H. J. Fluck, of Goodenow, Ill., sends three head from his noted herd. They consist of two females and one bull, and are said to be animals of exceptional quality. The bull calf in the Fluck consignment named Robert Hur was calved Nov. 10, 1905, sired by Ben Hur 159675, and out of an imported dam that had five crosses of the noted Horace in her pedigree. Mr. David H. Powers, of Delavan, Wis., includes a son of Blackstone and two sons of the imported bull, John Price. We wish to call special attention to the bull, Prosper 180483, consigned to this sale by Mr. J. C. Andras, Jr., of Manchester, Ill., that was sired by Perfection Yet, a son of the celebrated Perfection. This bull is entered for the show and is confidently expected to be well within the money. There are numerous show cattle among the sale entries and the state board of agriculture and Mr. McGavock, who has been chosen to manage the sale, have made great efforts to present an unusually attractive offering. In addition to those mentioned above, the following well-known breeders are consignors to the auction: R. A. Wilkinson, Crookston, Minn.; G. H. Hoxie, Thornton, Ill.; A. R. Haven, Greenfield, Ill.; The Cosgrove Live Stock Co., Le Sueur, Minn.; David Boss, Zumbro Falls, Minn., and H. F. Mussen, Grant Park, Ill. The catalog will be mailed on application to W. C. McGavock, Springfield, Ill.

The Wabash, "The Banner Route," has arranged for the following low rates, available to the public:

New York and return \$30.15 from Des Moines, on sale August 28th, 29th, good until September 4th, account reception of W. J. Bryan.

Los Angeles and return, on sale September 3d to 14th, inclusive, \$54.25, good until October 31st.

Buffalo, New York, and return, October 10th, 11th, 12th, \$24.15, final limit October 19th.

Toronto, Canada, and return, \$23.55, account Sovereign Lodge I. O. O. F., final limit October 21st.

For further information address F. C. McMillan, D. F. & P. A., or L. R. Davis, P. & T. A., 512 Walnut St., Des Moines, Iowa.

CHEAP RATES TO PACIFIC COAST.

Commencing September 15th and continuing until October 31st, the Iowa Central will have on sale reduced rate one-way tickets to California, Oregon, Washington, British Columbia, Utah, Montana and Idaho. Rates \$15 below regular fare. Call on Agents for particulars or address A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

WATERLOO AND RETURN \$1.50.

On Friday, September 7th, the Chicago Great Western Railway will have a special train, leaving Des Moines 6:10 a. m., to Waterloo, at rate of \$1.50 for the round trip. The Thomas Orchestra will give one

Combination Short-horn Cattle Sale

O'Neill, Neb., Sep. 7, 1906,

From the herds of

D. J. Cronin, O'Neill, Neb.; W. W. McLemore, Kearney, Neb.;
A. J. Stonebraker, Royal, Neb.; D. L. Pond, Inman, Neb.

50 Head. 16 Bulls, 34 Cows and Heifers.

The cattle offered will be an excellent lot of good, useful Short-horns. The females, all of which are helpers excepting three, are very largely of the milking strains, while the bulls are as good a lot as have ever been offered in the West. There will be one aged bull and fifteen one and two-year-old bulls. The entire offering is a representative one and we extend a special invitation to farmers and breeders to attend. Sale begins at 10 a. m. during the fair. Write for catalog. Address,

T. C. Callahan, Auct., D. J. Cronin, Mgr.,
O'Neill, Neb.

IT NEVER FAILS

The test of years has proved that Spavin can always be cured by the application of

DEAN'S Magnetic Sweat Ointment

It quickly removes all blemishes or blemishes from Horses or Cattle and makes cauterly or firing unnecessary. Spavin, Ringbone, Curb, Splints, Puffs and all unnatural enlargements quickly succumb to this powerful remedy. It neutralizes all acid poisons and sweats them out of the system through the diseased parts, and you can work your horse while using it, without any bad effect.

Most druggists sell

Dean's Magnetic Sweat Ointment

If yours does not we will send you a bottle prepaid with full directions, on receipt of 50c. in stamps or money.

OLNEY & McDAID,

Sole Manufacturers,
114 Sixth Ave., Clinton, Iowa.

Home- Seekers' Rates

ONE FARE PLUS \$2

For the round trip with minimum of \$7 every Tuesday during September, October, November and December, 1906, inclusive, from St. Paul and Minneapolis to points in

Minnesota, North Dakota, Manitoba, Western Ontario and the Canadian Northwest

and on the first and third Tuesdays during September, October and November, 1906, to points in

Montana and Idaho, Northeastern Oregon, Eastern Washington and Eastern British Columbia.

See the finest agricultural lands in the Great Northwest. Low rates afford an excellent opportunity to secure a farm in a rich and growing country, where yields are large, where excellent markets are near at hand and where irrigated districts present splendid opportunities and sure crops. Tickets bear final return limit of 21 days, with liberal stopover privileges.

SOUTHWEST The Land of BIG CROPS and PROSPERITY

Are you making as much off your farm as you ought? No doubt you are making all you can. The trouble is the land costs too much. It takes too much money to buy a big farm, and so you are trying to make a living on a small farm, or perhaps you are renting one and paying a good share of what you raise, in rent. Wouldn't it be better to go where the price of good land is so little that you can own a big farm—where every acre of ground is working for you and all you raise is paying you good profits?

There are thousands of acres of fertile land in the Southwest along the line of the Cotton Belt Route that can be bought for from \$3 to \$10 an acre. This land is increasing in value each year.

See the Southwest at Small Cost

A trip to the Southwest would convince you that your best interests lay in settling there. The trip can be made at very little expense. On the first and third Tuesdays of each month you can purchase a round trip ticket to any point in the Southwest on or via the Cotton Belt Route at very low rates. Stop-overs will be allowed for you to examine any locality you are interested in.

Write at once for free copies of books describing this wonderful country and for full information about cost of tickets, etc.

SURED by 1 Am Pottawattamie, a grandson of the great Nebraska Belle, Pericles and other noted boars. Our prices are always right. Write us. Address.
J. W. Reynolds & Son, Defiance, Iowa.

CHOICE YOUNG DUROC JERSEY HOGS

OF BOTH SEXES at reasonable prices. Address
W. J. S. Taylor, Hameston, Iowa.

DUROC JERSEY HOGS

Dispersion of the Famous Gold Dust Herd of Durocs.

HAVING decided to close out my Gold Dust herd of prize winning Duroc Jerseys, I now offer to the public, at private treaty, my entire crop of spring boars. They are sired by Tip Top Notcher, grand champion at World's Fair, acknowledged by most competent judges to be the best Duroc boar in America, and sold at the record breaking price of \$5,000; Ohio Chief 11, one of the best sons of Ohio Chief; Champion Paul, a son of the noted Oom Paul; and Fancy Orion, an exceptionally good son of the World's Fair winner, Orion Chief. I am keeping my sows and spring gilts for closing out sale on October 24. I am keeping nothing back and my entire herd will be disposed of at private and public sale. Write for prices and descriptions at once if you want a herd boar from Gold Dust herd. Address,
GEO. W. SECKMAN, RIPLEY, ILLINOIS.

Grand Valley Herd of Duroc Jerseys.

WILL have fifty head of Perfection Chief 28367 pigs and fall yearlings to sell after Sept. 1st, including Fancy Perfection 47967 and Perfection Chief Jr. 45827, the two best sons of Perfection Chief ever sired. Look for Pollock and the Perfection Chief herd at the fairs Iowa, Minnesota and Kansas City Royal.

D. J. POLLOCK, THAYER, IOWA.

Prairie Glen Herd of Duroc Jerseys

I AM now offering the best lot of Duroc Jersey boars I have ever bred; large, growthy, mellow, smooth fellows, with lots of bone and plenty of quality. Good enough to head the good herds and do the breeder good. Sired by such boars as Al's Chief 43327 N, 15723 A, he by J. J.'s Chief 12445 A; first at Indiana state fair last year, a thousand pound hog, he by Winchester Chief 10077, he by Morton's King 3875, Tientsin 17261, Imp. Wonder 43381, A. L. Advance 4331, Odebolt Chief 33271, a son of Perfection Chief 425 hog, Pleasant Hill advance No. 44251, and other good sires; last but not least, Ohio Chief, two sons of this great sire and show boar. Tientsin No. 17261 for sale, sire of some of my best. Satisfaction guaranteed. Come and inspect, or write me. Prices reasonable, quality best. Address,
P. S.: Eight November males of rare quality; three Top Notcher bred.

A. L. MOSSMAN, RADCLIFFE, IA. TELEPHONE 88-3.

125 Duroc Spring Pigs For Sale Cheap

I AM making very reasonable prices on our crop of spring pigs. The pigs are very thrifty and represent the blood of the great Gold Dust Jim, Belle's Echo by Echo King and out of the great Nebraska Belle. Others sired by Red Knight, first and sweepstakes boar at Neb. '05. The pigs will be sold at prices to suit the purchaser. We have the blood lines as well as the strong individual points. Our aim has always been toward the best obtainable. We will hold our sale of brood sows in February. Remember we are advertising to sell. Write us your wants and we will do the rest.

O. E. MICKEY, OSCEOLA, NEB.

TWO CHOICE OHIO CHIEF LITTERS FOR SALE.

70 Head of the Toppest Duroc Jersey Pigs.
I AM offering for sale two very choice Ohio Chief litters out of a granddaughter of Echo King and Al-Sar-Ben 4th. I also have pigs by Crimson Wonder Jr., Orion 2d and Leather Stockings, out of daughters and granddaughters of Nebraska Belle, Echo King and other noted sows and boars. I have the best blood lines known to the breed and I have a grand good lot of pigs. If you are looking for a herd header write or come and see me. I also breed Shire Horses and Aberdeen Angus Cattle. Young stock for sale at all times. Address
W. D. PITTMAN, LAKE CITY, IOWA.

STOCK for sale of both sexes, sired by the great
Pride bull, Baltimore of Glendale 24275.
J. Nissen, Meservey, Cerro Gordo County, Iowa

The New State
of Oklahoma

Bigger than Missouri, as big as Ohio and
Indiana combined, with a soil teeming with
all the crops that any state raises, OKLA-
HOMA (the new state) is destined to oc-
cupy first rank in a few short years. Here
at the present time over a million people
are duplicating the life which is going on
in Illinois and Indiana. Their houses, their
towns and their schools are newer, but in
nothing else do their surroundings differ from
those in other states. Their cities and
towns are growing and expanding with the
impetus of a fertile soil, and a pushing,
wide-awake citizenship. Her settlers, main-
ly from the older states, see the virtue of
encouraging enterprises of every kind and the
needfulness of getting more and better fa-
cilities, of getting more hands to develop
the country.

In brief, conditions today are simply these:
OKLAHOMA is in need of nothing save peo-
ple. More men are needed in the cities
and towns; more farmers for the vast areas
of unimproved land not now yielding crops
of which it is capable. There are open-
ings of all sorts, for farmers and artisans,
for mills and manufacturing plants, for small
stores of all kinds.

Your Opportunity Now

The opportune time is now while the land
is cheap. The country is fast settling up.
If you purchase land now you will soon see
grow up around you a community of pros-
perous energetic men who, like yourself, have
seen the brighter possibilities of OKLAHOMA
and have taken advantage of them.

If you are in any way interested in OKLA-
HOMA I'd like to send you a copy of my
free paper, "The Coming Country."

On First and Third Tuesdays

of each month you can make a trip to OK-
LAHOMA exceptionally cheap. Round-trip
tickets good thirty (30) days will be sold by
all lines in connection with the M., K. & T.
Ry. at very low rates. From Chicago to
Oklahoma City the rate is \$24.55; from St.
Paul, \$26.25; from St. Louis, \$18.30; from Kan-
sas City, \$12.25. The tickets permit of stop-
overs in both directions via M., K. & T. Ry.
If your nearest railroad agent cannot give
you the rates, write me for particulars.

VOL. LI. NO. 35.

DES MOINES, IOWA, AUGUST 30, 1906.

WHOLE NO. 2563.

THE WINTER WHEAT SEED BED.

We would like to say a last word for this season on the subject of preparing a seed bed for winter wheat. The one principle that should be kept in mind at all times is that a winter wheat seed bed should be firm below, though the surface ought to be uniformly fine.

In order to bring this condition about plowing should be done early, as has frequently been recommended in these columns. We admit, however, that it is sometimes impossible to do the work at the right time, and we know that there are thousands of stubble fields that are yet to be plowed in preparation of a seed bed for winter wheat. In such a case the next best thing must be done, namely, that the harrow should be freely used after plowing. Where a roller is available the seed bed may be brought into more ideal condition if this implement is alternated with the harrow than will be the case if the harrow alone is used. However, in the absence of the roller an almost perfect seed bed can be made with the harrow. It may be necessary to go over the soil as much as half a dozen times in order to bring it into the right condition, but it should be remembered that the labor expended this fall will be profitable labor.

In working the soil down in order to get it firm after plowing the surface is brought into almost ideal condition. The seed may then be uniformly covered and the crop will start evenly. To follow this up and take advantage of all the work that is done in preparing the seed bed one should use the drill in seeding. There seems to be some natural advantage that has not really been explained in sowing winter wheat with the drill. It means not only the even distribution of the seed and uniform covering, but drill-sown grain seems to be heaved out with greater difficulty than that which is sown broadcast. As to time of sowing, this must depend on the location. Each community usually has this matter sized up correctly and the best guide to go by is the experience of those who are most successful in the community. Generally speaking, it is our opinion that it would be better if more wheat were sown earlier than is the usual custom. We have never seen an instance where a growth of six or seven inches in the fall hurt the crop, but have known many cases where the yield was increased as much as ten or fifteen bushels by a good fall growth. We have in mind one instance where a field of twenty acres yielded more than forty-seven bushels per acre and the grain weighed sixty-two pounds per bushel as it came from the thrashing machine. This crop made a growth of several inches the previous fall and no winter killing whatever took place. On the same farm wheat sown three weeks later yielded a little more than half the amount

mentioned above. A good top means a strong root, and throughout a large area of the winter wheat belt this strong root is an absolute necessity if maximum yields are to be expected.

Where wheat is sown early a comparatively light seeding is better than a heavy one. Five pecks of the Turkey Red variety will usually be plenty thick enough. Indeed, where the drill is used the custom in some localities is to sow only one bushel per acre. Where it is sown broadcast, however, even six pecks will not be too much.

DRY OR SOAKED FEED FOR HOGS.

Throughout the central West hogs are to a large extent taken through the summer and fall months on pastures, together with such slops as are available from the kitchen and dairy, with the possible addition of a little grain daily. However, as corn begins to harden the new crop is resorted to in most instances, and unfortunately the temptation is a little too strong to feed new corn alone. If every farmer in the corn belt could be persuaded to feed his fattening hogs a little slop daily, composed of bran and shorts or the cereals ground with the possible addition of tankage or oil meal, it would unquestionably prevent a heavy loss from disease. Not that corn contains any germ disease, but as a rule it heats the system and makes the animals much more liable to an attack when the germs of disease are introduced.

Just how supplemental foods should be fed, whether dry or wet, is a matter that is frequently debated. Some time ago the department of agriculture prepared a bulletin in which this subject was treated. A number of experiments are cited and data given showing the gains made from the foods used, both

wet and dry. The conclusions given in this bulletin are as follows:

These results show an advantage of slightly over 2 per cent in favor of soaking as compared with feeding dry. The results at Ottawa and in Missouri are worthy of particular notice. Grisdale calls attention to the fact that in the Ottawa experiments a loss is shown by soaking ground grain, but the whole grain returned the better gains when fed soaked, and suggests that the result from soaking meal may not be so marked as from soaking whole grain. The Missouri results seem to present contradictory evidence in the second test, when four-fifths of the ration was whole wheat.

Two experiments carried on at the Illinois Experiment Station to compare soaked and dry shelled corn gave rather indefinite results. Four pigs, fed in pens, were used in each case, two being fed on soaked shelled corn and two on dry shelled corn. They had no other feed. The first test lasted from April 23, 1889, to May 27, 1889; the second from June 10 to July 22, 1889. In the second trial the pigs were well fattened when the experiment commenced. Sixty pounds of corn were put in water at one time, at the rate of one bushel of shelled corn to about eight gallons of water, and taken out as needed for feeding. The daily gains favored the pigs on soaked corn in both tests; but in the first test there was an advantage of about 4½ per cent in favor of soaking, while in the second there was an advantage of about 6½ per cent in favor of the pigs on dry corn.

Many experiments on this subject scarcely go directly to the point. In most cases all the feed has been fed either in the form of slop or, on the other hand, dry. In practical operations where one is anxious to get large gains on hogs successful feeders know that a hog will do better if some of his feed is fed dry and part of it in the form of slop. We have no hesitation in saying that the average fattening hog that is being finished on corn will make considerably larger gains if, in addition to the corn, a good feed of slop is fed once a day. This is true when new corn is being fed as well as when the corn is hard.

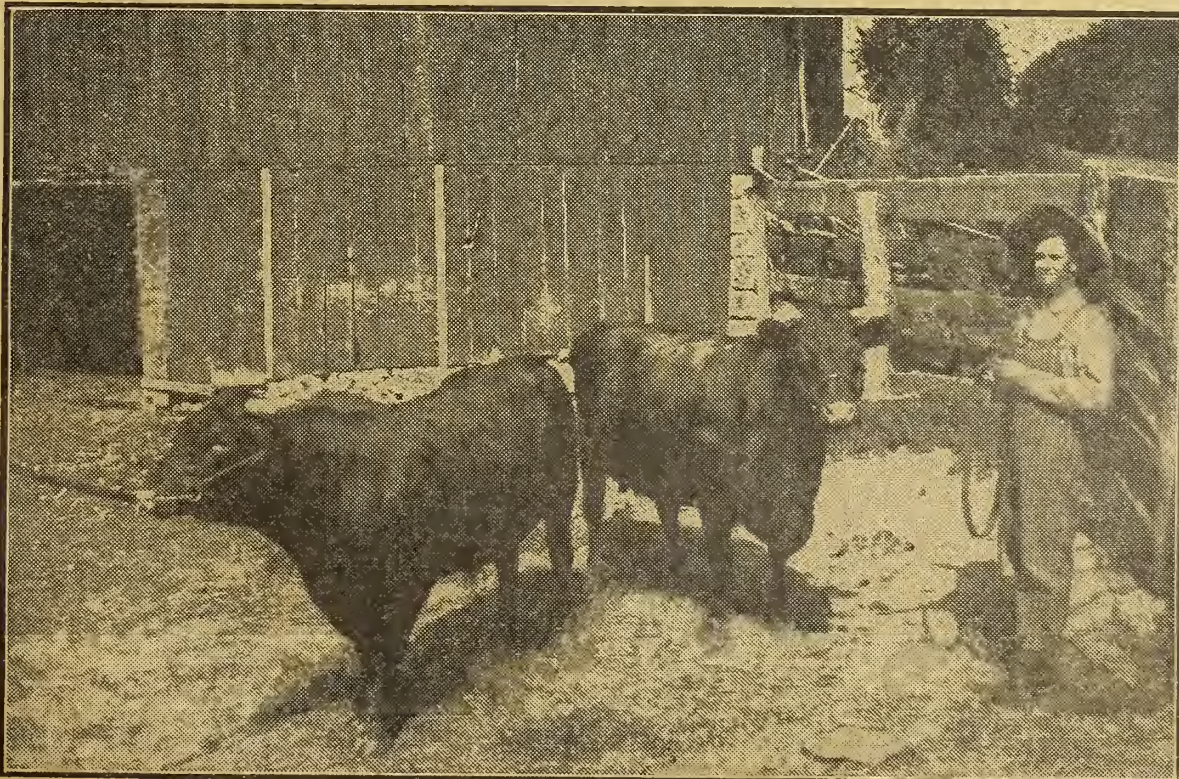

The slop itself, in addition to being of equal feeding value, if not greater than the dry grain, seems to contribute to a better assimilation of the other part of the ration. This is particularly true if one adds considerable variety, making up, for example, a slop composed of such grains as bran and shorts, together with some of the rich meals like oil meal or tankage. It seems to act very much in the same way that a feed of roots does for the steer or cow. Although roots contain 80 or 90 per cent of water, yet they have a feeding value very much higher than would be indicated by their chemical analyses. It may be that it gives the system power to assimilate a larger percentage of other foods, but whatever it is we have always held to the opinion that a good slop fed before it is sour acts very much in the same way. We conclude therefore that the experiments showing an average of 2 per cent in favor of soaking grain do not exactly cover the point, and we have no hesitation in stating that 10 per cent greater gains may be made from a given amount of food if part of it is fed in the form of slop.

ABSURDITY OF SHOCK THRASHING.

The harm is already done this year and not one penny's worth of crop loss can be retrieved by anything that is said on the above subject at this time. The thought of mentioning the subject out of season, as it were, has been forced to our attention as the result of observation.

We have in mind fields of winter wheat, early oats and barley that have been standing in the shock for a period of six or seven weeks. Practically speaking, there have been whole weeks when the crop was sufficiently dry to put in-

to the stack, but the thrashing machine was waited for with the result that thousands of fields may be found today with sprouts several inches long coming out of the sheaves. We do not deny that possibly one farmer in five in every thrashing neighborhood succeeds in getting his grain thrashed from the shock at the right time, but a year like this brings grief to the other four. When you have once helped a neighbor to thrash directly from the shock it seems like uphill work to afterwards turn in and stack your own grain. Usually the machine covers a considerable distance in a very short time during the first part of the season, catching a farmer who is ready here and another there. This results in discommoding the whole scheme and it leaves farmers in most instances in a predicament. We are unable to place an accurate estimate on the loss that is annually caused by allowing grain to remain in the shock too long, but we do not believe it would be too high to say that the loss amounts to

The above illustration of the Cruickshank cow, Victoria of Meadow Farm 4th, and her yearling son, Victor Knight, show the kind of Short-horns that go in M. L. Logan's sale at Lineville, Iowa, on September 18, 1906. Victoria of Meadow Farm 4th was got by Baron Gold Dust 3d and is out of Victoria of Meadow Farm by Lord of Linwood, then follow such sires as Earl Marshall, Favorite, Roan Gauntlet, Pride of the Isles, Champion of England, etc. She sells with bull calf at foot got by Victor Knight, a Cruickshank Violet bull got by the \$1,000 Baron Dudding. Victor Knight is of the same breeding and is one of the choice young herd bulls to be sold this year. See page 24 for Mr. Logan's advertising. He sells forty-four head, over one-third of which are straight Scotch.

10 per cent of the small grain crop raised in the corn belt.

The argument may be advanced that in many cases help is so scarce that it becomes necessary for neighbors to combine and thrash from the shock, and this may be partly true, especially where one man is trying to operate his eighty acres or quarter section farm himself. We have been in exactly that predicament many times and have always succeeded in changing work with a neighbor so that each of us has for years been fortunate enough to have our grain in the stack in good season, thus escaping entirely any injury that might afterwards come to the grain on account of bleaching in the hot sun or on account of the injury wrought by rain.

The subject is not a congenial one to deal with in an agricultural paper, because we realize that most farmers, even though they do not stack, feel that they are doing the best they can under the circumstances. We appreciate the fact that no man argues against the principle of stacking grain, the practice of thrashing from the shock being, seemingly, forced upon many on account of scarcity of help, inability to stack well or other causes.

The loss this year will, in our opinion, be enough experience for a great many who had planned to thrash in the shock, and we shall not be surprised if stacking grain in the future will greatly increase.

SOME SUGGESTIONS ON CEMENT STRUCTURES.

A subscriber from Cass county, Iowa, sends the following communication:

I wish you would give me a little information on the making of cement structures, such as posts, walls, sidewalks, etc. I have had a little experience that has cost me dearly. Made a good many posts and find that they are not as good as I had expected. Some of my neighbors tell me that I put them in the ground too early. I do not think so, as they were more than one month old when they were set. Some say that you should keep cement wet while hardening. Is there anything in this theory? How long, in your opinion, would it take a cement fence post to dry so that it is fit to use?

There is one principle that should be kept in mind in the making of cement structures, namely, that the hardening process is assisted by the free use of water. If drying takes place too fast, there seems to be a sort of chemical action which takes place between the cement and sand which results in reducing the adhesiveness of one particle to the other. Where moisture is present, this is prevented and the outcome is a stronger structure.

We think the trouble in the case of these weak posts was due to putting them in the ground too early. An illustration that has been brought to our attention recently will throw a little light on this subject. A cement manufacturing concern made a number of cement blocks for sidewalk purposes, two and one-half inches thick, in the month of October. The following June it became necessary in the laying of a sidewalk to cut one of these blocks in two. In the center the cement was found to be as green and soft as the day it was put in the block. From this it will be apparent that in the matter of two or three weeks posts will only be dried on the outside, so that the strength of a mere shell covering is all that one can expect. Those who have had most experience along this line claim that it requires twelve months' seasoning before posts should be put in the ground. For the first few weeks, water should be poured over them once or twice a day, as this prevents such chemical action as referred to above, which results in weakening the posts.

In the case of floors it is always advisable to keep them damp, wherever possible, for a few weeks. Sidewalk builders who have made a record in towns and cities always made a practice of keeping their new walks covered during the first few weeks, and the covering is soaked with water every day. While in the West recently we observed that the builders of sidewalks made a practice of covering their walks with soil after the cement had set about twenty-four hours. The soil was afterwards wetted and kept in this condition for several days, and upon inquiry we found that this practice had prevailed in that city for many years and that up to date no trouble had been experienced in sidewalks cracking or shelling.

Do not be deceived in what you buy but turn to page 5 and see what the Litchfield Manufacturing Company have to say in their continued story.

Early Selection of Seed Corn.

BY C. RAY MOORE.

Corn improvement has attracted great attention in the past few years, and the more progressive and enterprising farmers in all the corn belt states now realize that time spent in improving the corn crop in any way is time profitably spent.

They say "necessity is the mother of invention," and this is just as true in the agricultural world as in the mechanical.

The rapid rise in land values throughout the corn belt has made increased production necessary, for the farmer of today cannot hope to acquire and pay for \$75 land by following the same methods his father employed in purchasing land at \$10 and \$15 per acre.

And it is this very necessity for increased production which has been largely instrumental in causing men to invent or study out new ways of increasing the yield and quality of our corn.

All through the past spring and summer, your paper has devoted much space to discussions of the proper methods of cultivating the growing crop. This was eminently practical and proper, but our work of this sort is finished for this year. The only chance for improvement is to take those steps which will lead to greatest improvement in next season's crop.

At this time of the year, the corn-grower can go through his fields and determine to a large degree the relative importance of the different factors which have influenced the growth, and which will soon influence the yield, of his corn crop.

A careful observation of the different fields will doubtless furnish evidence of some instances when his neglect or carelessness has brought about certain conditions which will have a tendency to lower his yield of corn per acre, and so reduce his profits proportionately. It may be that the mistake was made when preparing the seed bed, or possibly in the subsequent cultivation, but more likely the field is showing the effects of planting seed of poor vitality.

Even though a careful count of the stalks per hundred hills should show a reasonably good stand of corn, yet if many of the stalks are rather weakly, they will not produce good ears, and the yield will be greatly reduced. This condition is much more common than we sometimes imagine, and it is almost always traceable to the planting of seed which was weak in vitality.

Could we trace these unprofitable plants back to the parent seed, we would find that the grains from which they grew had not sufficient vitality to produce strong, vigorous stalks. So we can see that the planting of unhealthy seed is largely responsible for the poor yields so often obtained, and this condition will never be improved until farmers pay more attention to selecting and storing their seed corn.

It is now a recognized fact that the individual stalk is the basis from which all improvement in our corn must come. So in selecting the ears for our next year's seed, we must select them at a time when the ear and stalk can be observed together, and the best time to do this is about the time the corn has reached the dent stage, while the stalk is still vigorous and green. Our plan is to go through that part of the field where the grower knows his best corn can be found, and carefully observe the ears, together with the stalks on which they are growing.

The first thing to notice is the height of the ear from the ground. Very low ears usually mature earlier than the main portion of the crop, while the very high ears are later maturing. When seed from these high and low ears are planted together, indiscriminately, there will be great unevenness in time of tasseling and silking, which results in poor pollination and a crop of nubbins.

While if ears of a uniform height are selected, say ears that hang about even with the waist, the tassels will appear at practically the same time, and this invariably results in a larger and better lot of corn. It is easier to husk, too, if all the ears are borne at a height of three or four feet from the ground.

Next notice the foliage and size of the stalk. A strong, vigorous stalk,

showing broad leaves, and a large, healthy tassel is preferred. And then, last of all, observe the apparent size and character of the ear. Avoid ears which seem to taper too rapidly, especially. We do not pick the ear at this time. Our reason for this is that we do not think it best to remove the ear from its stalk at this period of its growth, as the ear has not yet received its full amount of strength and nourishment from the stalk.

If the ear is husked at this time, it is very hard to dry it out properly, and where two ears touch each other on the rack or wire, there is likely to be moldy grains. Then, too, when the corn is picked from the stalk before it has absorbed its full quota of nutrients, it will not have sufficient plant food stored up about the embryo or germ, and next season, when the grain is put in the ground, it will send up a weak, sickly stalk, or perhaps none at all, if conditions are unfavorable at sprouting time.

While working on this preliminary selection, we do not pull back the husks which protect the ear, as this would allow the fall rains to rot the grains, or the grasshoppers to chew them.

It being so early in the fall, of course we could not pay much attention to the character of the grain, so we must merely select two or three times as much seed as we expect to need, and then after the corn is husked, we can throw out those ears which have poor grains.

But perhaps my readers are wondering what is the use for all this work of early selection, since we do not husk the ears at this time. Our plan is this: Instead of husking the ear at this time, when it has not yet received its full share of food from the plant, we mark the ear by breaking over the tassel and upper part of the stalk, and bending this down to the ear. Then leave these ears on the stalk until say, the first half of October, when they can be husked and stored. They will then be sound, bright ears which have been allowed to mature and dry on the stalk, and are full of vitality and able to produce strong, healthy plants.

This method of selecting and marking the ears at a time when the habits of the stalk can be observed, is becoming more popular every year. Some growers use other methods in marking the stalks, but the one described above is very simple and satisfactory. Much of the improvement which will be made in corn in the future will come through the use of the above described method of selection. The ordinary farmer thinks he is too busy to bother with breeding blocks, detasseling, etc., but this much is certainly within his reach. If every farmer in the corn belt could be induced to select his seed corn in this manner, the value of the corn crop would be increased one-half the first year.

We all know what a loss it means if we are compelled to select seed after it has been damaged by freezing, or what is even worse, to have to select it from the crib at planting time. Why, then, do we, so many of us, go on year after year in the same old rut?

THE SQUEALING PIG.

We have been very free to advocate the policy of feeding farm animals liberally under practically all circumstances. Of course on a subject of this kind it is impossible to make a sweeping statement that is applicable in detail to animals of all ages.

During the next two months there will be heavy losses due to cholera or swine plague. These diseases, although not as common as they were formerly, are breaking out here and there throughout the central West. There may be a difference of opinion among men as to whether the disease can be checked when it once gets into a herd or not, but all will agree that the best policy is to keep it out if it is at all possible.

It is a sensible thing to feed growing pigs or even hogs lightly when there is cholera or swine plague in the neighborhood. The squealing hog is usually a healthy hog, and while it is practicable to feed a little grain every day along with pasture so as to keep young pigs growing well, at the same time comparatively little grain will do the work.

The method of handling and the con-

ADVANCE

**30 Days' Free Trial
of Advance Fence**

Send for as much as you need and use it 30 days. If it isn't satisfactory in every way, return it. We pay all freight. Buying fence this way makes sure of getting exactly what you want or it costs you nothing. We sell direct to you, which saves you the retailer's profit. Our peculiar method of weaving makes the stay wire a part of the whole fence. We don't cut the stay at top and bottom, or anywhere else, but weave it in for many rods without end. That puts giant strength into the fence. Get our fence book and factory prices.

Advance Fence Co., 3485 Old St., Peoria, Ill.

duct of a bunch comprised of 150 pigs that were swept away by cholera a month ago may be taken as a typical instance showing how the disease takes hold when conditions are favorable. These pigs were fed about all the grain they would eat while sucking, and they were kept on what is ordinarily called heavy feeding after they were weaned. At no time were they equal to the task of cleaning up the troughs at feeding time, though some time during the day they succeeded in eating up everything that was placed in the troughs. They were in a state of constant satisfaction, so far as the food supply was concerned, and, as the owner expressed it after they were swept away with cholera, "they never knew what it was to equal."

Seemingly, before cholera germs were introduced some of these pigs got off feed and seemed to dry up, as it were. They poked around with their noses on the ground and their tails hanging straight with an exceedingly tucked up appearance of flank. The manure was hard and dry, though after a few days they began to scour and a comparatively short time ensued between this date and death.

We believe this was an instance where hogs were overfed, their digestive system being thrown out of order by the extravagant use of food. This was followed by a sort of feverish condition and, as described above, loss of appetite so that conditions were ideal for the development of disease when the germ became lodged in the system. We do not say that hungry, vigorous hogs will never take cholera, but we do believe that in nine cases out of ten keeping them active and not supplying much grain during the first four or five months will tide them over.

New corn is now being fed and there is a little danger attending the feeding of the new crop. The only advice we can give as to the feeding of new corn is to go cautiously. An ear a day for the first week when pigs have had little or no grain is plenty. In the course of ten days or two weeks a little more may be fed with safety. One should take at least a month or six weeks to get them onto corn, and even then when handling pigs five or six months old there is no sense in giving all they will consume. It is better to keep their appetites keen right through until cold weather approaches, though of course before that time enough may be fed to put on good daily gains.

As a closing word, we would like to advise the use of a small amount of mill feed or rich meals. Even if a slop is only fed two or three times a week it will do much by way of contributing to health and vigor. Hogs will relish it greatly and there will be no difficulty about using a little coal tar disinfectant in the slop. When hogs are on full feed the disinfectant usually makes the slop so unpalatable that it is not eaten, but just a little now and then seems to answer an exceedingly important purpose. By using a little disinfectant inside and plenty of it in the hog quarters, and if, in addition, their blood is kept cool, as will be the case if fed as described above, one may reasonably expect to escape disease.

KANSAS CITY AND ST. JOSEPH.
ROUND TRIP
\$3.00—\$3.00—\$3.00

Saturday, September 8th, at 10:30 p. m., the Chicago Great Western Railway will have another popular excursion to St. Joseph and Kansas City from Des Moines at rate of \$3.00 for the round trip. Tickets are good only on special train on above date and good to return leaving Kansas City at 11:30 p. m. and St. Joseph at 2:12 a. m. Sunday and Monday nights following. Sleeping car berth rate \$1.00. Special coaches reserved for ladies and gentlemen, for which seat checks are issued in advance when tickets are purchased at City Ticket Office, 514 Walnut St., Des Moines, Iowa.

Farm Furrows

Turned by a Practical Farmer.

No greater mistake can be made than guessing and then calling it thinking.

He who leaves the leaves of the clover plant on the field robs the cattle of the best part of the plant.

A seven-foot mower is a fit companion to the hay loader, as it is just the width required so the loader can take up a swath at a time.

It certainly looks like a wasteful practice to buck away the straw at thrashing time and burn it. There are so many uses to which straw can be put that it does not look right to see it burned.

Red kerosene is the latest fad. It takes the place of a piece of red cloth placed inside the bowl of the lamp. I don't know whether it is as dangerous as the "red lemonade" we see at circuses or not.

Contrary to the views of some people we always work up the waste apples into cider to be used for various purposes. In this way we have been able to get some income out of what would otherwise be waste.

I would much rather have grain in well made shocks than in a poorly built stack. Stacking is almost one of the lost arts. Farmers will have to learn to stack. Scores of them never knew and yet they make attempts.

Sam says a neighbor of his is so economical that when a glass is broken he fills the windows with bed clothing and things. He says they have to remove the clothing from the windows of a cool night so the beds can be dressed.

Some people are ready to condemn a whole orchard just because some small boy of the family is indiscreet enough to fill himself with green apples and a doctor has to be called. What is needed is a little well directed parental influence in cases of this kind.

If every farmer would be as persistent in cleaning the roadsides of weeds as the railroads are in keeping their right of way clean, it would add greatly to the beauty of the country. Compare some of the public roads with the railroads and the former suffers by comparison.

A grove that has been neglected is an abomination. A dense growth of burdock and other noxious weeds cannot add beauty to a grove. It is better to keep the trees well trimmed and cut out so grass can grow there. If kept for a windbreak weeds cannot be of any material help.

There is no use talking about making a wet farm contribute its full share unless it is tile drained. I recently paid a visit to a level country where every farm showed on its face whether it had been tiled or not. Owners of wet farms can do no better than to drain at the earliest possible moment.

A farmer had a small patch that he planted to sweet corn late in the season. A neighbor asked him what he was doing that for, at the same time venturing the opinion that it was to prevent the growth of weeds. He was told that was the prime reason; but he thought the sweet corn stalks would come in handy

for the cows during the period when grass was short and feed scarce. A man who has cows soon realizes the value of sweet corn as a supplementary feed.

Some newspaper articles I attempt to read would not be very long if I were to overlook the introduction and the conclusion. It is curious that some people can't tell what they know and quit. They spend a column trying to show what they are going to say and another telling why they have said it.

Hog cholera is not a phantom to be brushed away with a hope that it will not reach your herd of swine. It is just a question as to whether the germ is introduced or not. When one has done all he can along precautionary lines, he will probably get caught after all, but the careful man generally comes out ahead.

The best hired men I ever had in my farm experience were men who would stay with me only two or three years; then they were able to go to farming for themselves or took up some other vocation with greater opportunities. The man with good habits and especially the industrious habit can get his own price as a hired man.

A road drag is a simple device, but it requires some intelligence to run it. One must know the condition of the soil in the roads and select the proper time to use it. I recently passed over a road where a drag had been used at the wrong time. After a rain is the time to use it when the ground is quite wet, keeping up the work as it dries.

Some people never get acquainted with the workings of a hoe because it requires so much elbow grease. I recently saw a man working a hoe that caught the weeds going and coming. It had two edges and he pushed and pulled, catching weeds both ways. An illustration of this hoe will be published sooner or later in our hints department.

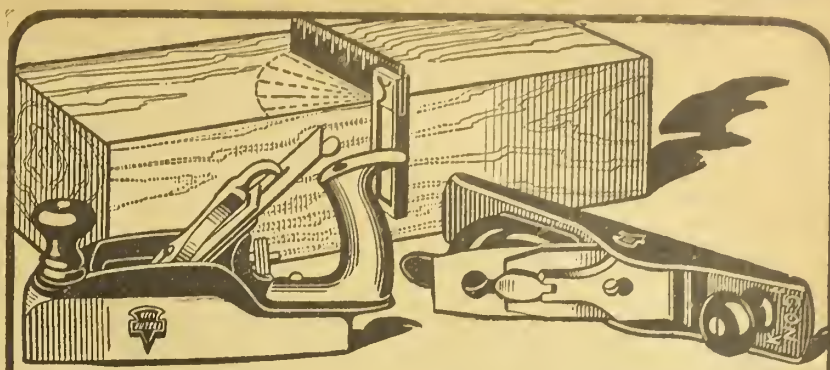

Many of the sons of toil of the present generation do not know the first principles of binding grain by hand. They came on the stage of action since the introduction of the self-binder and have never acquired the art. It is amusing to see some of the grown-up sons trying to bind an occasional bundle that happened to be thrown off unbound.

There seem to be a number of ways of hanging up harness. Some farmers are as indifferent about this as it is possible to be. I recently saw a method pursued by a painstaking farmer that is not unlike that used by firemen in cities. The harness is strung up above the horse. I liked the plan very much. Another hangs his harness in vacant stalls so that there is no bending or breaking of the leather.

A great many people who have never known the meaning of the word "tired" will spend three months at some pleasure resort resting. There is such a thing as knowing how to rest when one is tired, but as a rule the one who most needs rest knows nothing about the science. Look at Russell Sage, who never took a rest of any kind and his labors were most arduous. The farmer who can rest without any pecuniary loss is a prince. We are learning more of the value of rest as the days go by.

In the exclusively wheat growing districts I observe that nothing but basket racks are used. At thrashing or stacking time each man throws on his own load and no one builds it. When the basket is full the load is on. I recently watched a thrasher at work in a northern locality where eight teams and men hauled in the unthrashed grain and four men hauled the thrashed grain and that was all the men required besides the thrashers. No men on the straw at all. The straw was allowed to pile up and was burned soon after thrashing.

The automobile scare is much more serious than I thought it to be. Horses will become accustomed to them if properly educated, but the manner in which some of them are operated is a menace to life and limb. I saw an automobile going along the highway recently at a high speed. It met a farmer whose horses became frightened and turned his vehicle over, but fortunately did no damage. The automobile driver passed rapidly on. There ought to be some law that will automatically turn an auto over under circumstances like these. In Germany teamsters carry fire arms and

True Tools

You can't square up a block with a lop-sided plane—saw straight with a buckled saw or bore a clean hole with worn-out bit. To do a good job you must have good tools. That's the reason men who have used and studied tools a lifetime insist on having

KEEN KUTTER

QUALITY TOOLS

They show their excellence not only in actual use, but at first glance—the "hang," balance, finish and careful adjustment being apparent. Keen Kutter Tools include not only Carpenter Tools but a full line of Farm and Garden Tools—Forks, Hoes, Shovels, Gardentrowels, Grass-shears, Rakes, Manure-hooks, Pruning-knives. To get the best tool of its kind simply ask for a Keen Kutter. For 37 years Keen Kutter Tools have been sold under this mark and motto:

"The Recollection of Quality Remains Long After the Price is Forgotten."

in a case of this kind the tires are punctured with lead.

A reader of this paper writing from Adams county, Iowa, says: "A few weeks ago I noticed an item in 'Farm Furrows' which would lead us to think that there have been no improvements in the kitchen in the past twenty years. Twenty years ago we carried our water 150 yards to the kitchen, did our washing and churning by hand. Today our water is piped to the house and flows in boiler and tank by simply turning a valve; the churning, separating of milk and washing are all done by a gasoline engine placed 120 yards away from the kitchen, the same engine being used to grind feed, pump, and turn grindstone, etc. Well, it is just handy, that's all." I wish every farm home could have the most up-to-date equipment like this one. All do not, I am sorry to say.

SPECIAL RAILROAD RATES VIA MINNEAPOLIS & ST. LOUIS R. R.

Special round trip homeseeker rate of one fare plus \$2 to Minnesota, North and South Dakota and Canada every Tuesday. Similar rate first and third Tuesdays of each month, September to November inclusive, to Montana, Idaho, Washington, Oregon and British Columbia.

Cheap round trip summer tourist rates to points in Minnesota, North Dakota and Puget Sound points; also via Great Lakes.

Low one-way colonist rates to western points on sale daily September 15th to October 31st. Please note rates from Des Moines to a few of the more important stations: Billings, Mont., \$19; Helena and Butte, Mont., \$24; Spokane, Wash., \$26.50; Portland, Ore., Seattle and Tacoma, Wash., Vancouver and Victoria, B. C., \$30. For further information please call on or address W. E. Adams, Dist. Pass. Agent, or D. E. Sansburg, City Pass. Agent, 512 Walnut St., Des Moines, Iowa.

HARVEST RATES.

The Minneapolis & St. Louis Railway will sell daily, during August, harvest tickets at special rate of \$14.50 from Des Moines to principal Minnesota and Dakota points, such as Fargo, Grand Forks, Minot, Devil's Lake, etc., with special certificate returning. We will also sell round-trip rates daily, until September 30th, good to return until October 31st, to Fergus Falls and return, \$15; Detroit, Minn., and return, \$16.30; Minneapolis, N. D., and return, \$19.20; Devil's Lake, N. D., and return, \$19.75. Two solid

THE CEMENT WATER TROUGH.

Many inquiries have recently been received from subscribers asking for information concerning the utility of and also methods for constructing cement water troughs. In reply to these we possibly cannot do better than quote from a recent work published by the Atlas Portland Cement Company, of New York City, as follows:

Watering troughs may be made with or without reinforcing, but troughs without reinforcing should have a greater thickness of concrete. Troughs may be built with a solid base or set on bench blocks. One of the sizes in common use is eight feet long, two feet wide at the top and one and one-half feet at the bottom, and one and one-half feet deep, all inside measurements, which may be varied to suit convenience.

Select a level piece of ground and build well braced, bottomless box form from two-inch stuff, the inside measurements being eight feet eight inches long, two feet eight inches broad and two feet one inch deep. Ram the ground hard inside the form. Grease the form well and put in a layer of concrete, one part Portland cement; two parts clean, coarse sand and four parts broken stone, mixed to jelly-like consistency, two and one-half inches deep, and tamp well. Place a sheet of woven wire fabric over the concrete, letting it come to within one inch of the top of forms at sides and ends. Put in two and one-half inches more concrete over the bottom, and ram lightly to bring mortar to the surface, and smooth it carefully. As soon as it is laid and before it has begun to set, put the inner form (well greased) in place, taking care to keep it at equal distance from the sides and ends. The inner form should be made of two-inch stuff and slightly wedge shape. The outside dimensions may be as follows: Eight feet long, one and one-half feet deep, two feet broad at top of trough and one and one-half feet broad at bottom. Fill in the spaces between the two forms with soft concrete, tamping lightly or puddling. Remove forms next day, or as soon as concrete will bear pressure of thumb, and smooth off irregularities in surface, then, as soon as hard enough not to crumble, paint with pure cement mixed as thick as cream.

Inlet and outlet bores may be made by putting pieces of pipe in place before filling in the concrete, or a greased, tapering wooden plug, to be drawn out when concrete has set.

A trough with a solid concrete base should be made in the same general way, the forms carried up to the desired height of trough and the reinforcing imbedded in the concrete a few inches from the inside. Troughs should be protected from the sun and currents of air for several days and kept wet by sprinkling.

Concerning the insertion of pipes for inlet and outlet it may be said that it is a simple matter to insert a 1½-inch pipe with coupling in the bottom of the trough while the cement is green, having the top of the coupling just flush with the floor of the cement. Into this may be screwed a short stand-pipe, which should be nearly as long as the tank is high. This allows for overflow of the water when the tank is nearly full, and when it is unscrewed the tank may be quickly emptied.

Many persons advocate the practice of mixing a good deal of wire in the walls of the tank. This unquestionably adds strength and possibly may prevent the cracking of the sides of the tank in cold weather.

It will be noticed in the description of the inner form given above that the width of this form is two feet at the top and one and a half feet at the bottom. Some advocate making the walls of the tank at the base even thicker than this, it being claimed that the walls of the tank should be at least six inches thick at the top and from one foot to sixteen inches at the bottom. This of course means that considerably more ma-

terial will be required in making the tank, but it almost makes it unbreakable when the water in the tank freezes.

KANSAS CITY MAN OFFERS PREMIUM ON BLACK CATTLE.

Some time ago the announcement was made that Mr. A. Weber, of Kansas City, had offered a cash prize of \$500 for the best carload of fat Angus and Galloway steers averaging 1,400 pounds or upwards, to be exhibited at the American Royal Live Stock Show this year. After making this liberal offer Mr. Weber was approached by those looking after the interests of the Herefords and Short-horns, and he gave his promise that a similar sum would be given for Herefords and Short-horns at the 1907 American Royal Show. In other words, Mr. Weber has given already to the American Royal Management \$1,000, one-half of which is to be paid to the owner of the best carload of fat Angus or Galloway steers shown at this year's American Royal and one-half to the best carload of Hereford or Short-horn steers exhibited at the American Royal in 1907.

This premium of \$500 is likely to attract the attention of outside feeders. Already Iowa and Illinois breeders have indicated their intention to compete for it. What Mr. Weber has in mind will undoubtedly be brought to pass, namely, that of encouraging steer feeders to make an extensive exhibit of their fat animals.

TAKING EDUCATION TO THE PEOPLE

A very marked change has been made in the attitude of the "common people" toward educational questions in recent times. The universities and colleges have always been regarded as institutions suited for the instruction of the well-to-do or rich. Today there are many signs which indicate that these institutions are to serve first and foremost the working people. Not that the number in attendance at these institutions is to be largely and suddenly increased, but rather that education shall be taken to the homes.

This is indicated by the establishment here and there throughout the central West of what are known as the short courses. The matter is brought to our attention at this time by an announcement which comes from Mt. Pleasant, Iowa, in which one week has been set apart by the citizens of that town during which time a course in corn judging, live stock judging and domestic science will be given. This school begins December 17th, next. Prof. C. F. Curtiss will have charge of the stock judging, assisted by Prof. R. K. Bliss, while the well-known specialist, Prof. P. G. Holden, and his assistants will give instruction in the matter of corn and grain judging.

It must be apparent to even the superficial observer that an occasion of this kind furnishes an opportunity to hundreds of young men to acquire valuable information relating to subjects in which they are interested at home, who would be utterly unable to give the time and bear the expense necessary to attend the agricultural college. Education is for the masses, and a course of this kind indicates that they are coming into possession of their own.

VALUE OF SENSIBLE DISINFECTION.

In a bulletin recently prepared by the Indiana Experiment Station this subject is discussed at length. Attention is called to the fact that the object of disinfection is to kill disease germs. Sunlight is the natural disinfectant and should be employed wherever it is possible, both for the prevention of disease and the stamping out of same. Sound logic demands that the greatest possible amount of light be admitted into stables and animals' quarters. We now quote from the bulletin referred to:

Steam generated to a pressure of twenty pounds may be carried inside the barn or stable by means of a hose and a jet directed upon every part of the walls, ceiling, stable fixtures, and floor. This is quickly done and not expensive, as a thrasher engine can be bired at almost any place. Burning may be employed in some feed lots.

Among the chemical agents which may be used is a one-fourth of 1 per cent solution of formaldehyde applied with a spray pump. The application of a 2 to 4 per cent solution of coal tar disinfectants, such as cresol, or carbolic acid, may be made in the same manner and are not so disagreeable to apply. Every part must be thoroughly covered.

An excellent disinfectant, one always obtainable, is turpentine. This may be sprayed or painted on the same as the others. It is a little too expensive for use upon a large place. Another is good, fresh whitewash. There are many places where this should

If you are to put a new roof on your barns, poultry houses, outbuildings, or even your residence, use the "Grand Old Roofing"—RUBEROID. You can apply it yourself. We furnish Free all the necessary fixtures. No experience required.

During the hot summer Ruberoid will not melt because it contains no tar. It will stand the cold of winter because it retains its pliability indefinitely. Sparks or burning brands will not ignite it.

For your own safety, look for the registered trade mark "RUBEROID," stamped on the under side every four feet. None other is genuine. Send for samples and Booklet L.

Sole Manufacturers

100 WILLIAM STREET

NEW YORK

Chicago Offices, 188-190 Madison St. Cincinnati Offices, Union Trust Bldg.

have the preference. It kills germs, holds them whenever they may be caught and lightens dark places. The material can be applied with a spray pump or brush and hurried or incomplete work can be seen as the job progresses or after it has been finished. It has the other requisite so much in demand, cheapness.

There are a number of other disinfectants, but it is better to use those which are least liable to cause injury to the buildings, to be poisonous to stock or harmful to those making the application. We consider the use of formaldehyde the most objectionable of those recommended because of its being so irritating to the nose, eyes, lungs and to the hands.

Harness should be disinfected by first washing with soap and water, and then with the cresol solution, and finally rinsed with water. Blankets can be disinfected best by placing in a tub or a barrel and covering with boiling water. Robes or things which might be injured by the heat or soaking, can be placed in a tight box and a small quantity of formaldehyde placed inside on some cotton (four tablespoonsful to a space equal to that of a flour barrel).

In case an animal be buried, as a result of anthrax, blackleg, hog cholera, swine plague, corn stalk disease, tetanus, or any other soil or water borne disease, the best disinfectant is lime. The lime should be fresh, be broken up into small lumps, and a half barrel be used directly upon the body of a full grown cow or horse. Antiseptic solutions, such as cresol solutions drain away before they accomplish the desired result. Crystals of copper sulphate may be used for the disinfecting. All bedding and litter containing germs of diseases which live on the ground or in water should be burned. The litter from animals infected with glanders, influenza, tuberculosis, strangles or parasitic infections, will be perfectly safe if deposited on cultivated ground, but should not be deposited upon grass land or pasture fields.

We have no hesitation in advising the free use of the coal tar disinfectants in the place of some of those mentioned. The advantage of these over some of the others is that they are absolutely harmless when brought in contact with the skin or hair. Indeed, many farm animals need an application of this kind occasionally in order to cleanse the skin. If a good disinfectant were kept on hand on every farm of the corn belt, we believe it would prevent millions of dollars loss every year, by contributing to the health of animals and by preventing the spread of contagious diseases.

SELECTING SEED CORN EARLY.

Elsewhere in this issue will be found a communication on the subject of selecting seed corn, by Mr. C. Ray Moore, of Kellerton, Iowa. This may be called our first attack on this subject for the season of 1906. We hope that every one of our readers will take the time to read Mr. Moore's article. His method of selecting corn will be acknowledged by the great majority of farmers to involve a little too much labor to be practicable, at the same time we believe that it would be profitable for every man in the corn belt to carry out the plan of action laid down by Mr. Moore.

It is exceedingly important, as he points out, that seed be chosen from stalks that are uniform in height and that bear the ear at a uniform distance from the ground. At the same time where this precaution is taken, some work must be done before the plants have wilted and at such a time seed is too immature to be picked. By bending over the top of the plant so as to

attract attention later on when the seed itself is selected, one can more quickly than in any other way fix in the crop the characteristics of leaf, stem and location of ear that are desired.

We invite a free discussion on this subject during the next few weeks, in the hope that this will bestir our readers to do a little better in the future than they have in the past. We do not deny that it is possible in many instances to select corn at husking time with reasonable expectations of having results satisfactory, but at the same time, we are confident that the practice of storing corn early will greatly increase in the future.

The only way to have good fruit is to pay attention to the little details. There are so many diseases of fruit trees which if taken in time could be easily cured, but the trouble is that farmers do not notice the start of these diseases. When they are noticed they are so far advanced that they are hard to cure.

It is a fine thing to have the telephone central girl call up the farmers along the various lines and give the weather prognostications for the next twenty-four hours. This is done in many localities.

"Price Is Not the Whole Thing" with the thoroughly up-to-date farmer. He knows the best is the cheapest and buys the Litchfield machinery. See their advertisement on page 5.

VERY LOW RATES TO CHATTANOOGA, TENN.

Via the North-Western Line. Excursion tickets will be sold September 16th to 17th, inclusive, with favorable return limits, on account of Regimental Reunion, Anniversary Battle of Chickamauga. Apply to agents Chicago & North-Western Ry.

ST. JOSEPH AND RETURN.

Account of Interstate Live Stock and Horse Show the Chicago Great Western Railway will sell tickets to St. Joseph, Mo., and return at rate of one and one-third fare on September 22d to 29th, with good return limit. For full information apply to E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

PIKE'S PEAK CELEBRATION.

For the above occasion the Chicago Great Western Railway will sell round trip tickets from Des Moines to Denver, Colorado Springs and Pueblo at rate of \$19.25. Tickets good to leave September 19th to 22d and return until October 15th. Call on E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

CURRENT EVENTS AND COMMENTS

The Pennsylvania railroad has recently been experimenting with the use of steel passenger and mail coaches. The result of the experience has led this company to begin at once the building of new steel coaches. For some time the postoffice department has been endeavoring to make arrangements with railroads for the construction of steel cars, this being desired on account of the greater protection which such cars would be to the mails, as well as to the clerks. For the past six months a steel mail car has been run on the Erie road and it has been exceedingly satisfactory. A steel coach weighs somewhere in the neighborhood of sixty tons. There are those who are of the opinion that the day for manufacturing wooden cars has passed.

The business situation in the United States, according to a statement recently made by the Commercial National Bank of Chicago, is all that could be desired. Letters from leading banks, according to this statement, in all central cities, show, without exception, that the outlook is entirely satisfactory. Banks throughout the whole country report a strong, healthy and active demand for money at firm rates, and while there is no prospect of recession in interest rates, money is, and probably will continue to be, abundant for legitimate business needs. The rate bill is not feared if it is properly administered. Even in the opinion of railroad men, it will correct abuses and result in good to the railroads as well as to the public.

The latest news from Valparaiso, S. A., indicates that at least 2,000 people have lost their lives in the earthquake and fire, and a conservative estimate of the financial loss places it at \$50,000,000. About 10,000 workmen are now employed in clearing away the ruins and in searching for the bodies of those who lost their lives. It is stated that up to date 150 robbers have been shot. The sale of food and clothing is strictly in the hands of the government officials, and merchants detected in the act of selling foods at even fixed prices are compelled to close their stores.

Mr. A. Elmer Ashbrook, secretary of the Kansas City Horse Show Association, died of apoplexy on Wednesday of last week. Mr. Ashbrook is one of the best known heavy-harness horsemen in the corn belt, having been secretary of the Kansas City Horse Show since its organization. He leaves a widow and three children.

The first gun of the State Fair campaign was fired on Monday morning of this week when the gates of the Iowa State Fair opened under the most favorable auspices that have ever attended an opening. More animals were entered at this fair than ever before and the machinery exhibit covers twice the acreage that it has heretofore. The attendance is likely to be a record-breaker, as indicated by the number of visitors that came to Des Moines during the last of the week.

DAY BY DAY

Agricola

The constant raining is hard on the early grapes. Moore's Early is bursting. Every bunch seems to be damaged. A red grape, name unknown, is affected also.

The vines are very full of bunches, especially the Concord. It pays to enrich the vineyard. The vines become luster and the bunches larger. We have red, black and white grapes, and the Concord, and all seem to be equally prolific.

The Wyant plums are heavily laden. It is not a large fruit, but it is ripe when the other varieties are done, and some of them forgotten. A farmer might as well have all such things as are going. At least we will, the Lord willing.

Now is the time to clip the raspberry bushes if you want them to branch, and don't need the tips for planting. The

rains are helping the berry clumps a good deal more than one would think.

Now, too, the ladies should pinch off the chrysanthemum initial buds so that they can branch. There is no flower more welcome at our house in early winter than the chrysanthemum. It is grown in various colors.

The early planted corn is denting. The early sweet corn is too hard for the table. We usually plant a lot in drills for fodder. Stock enjoy it amazingly.

Melons are plentiful in market, but the red core watermelon is not always good when it is red. The core becomes red before it is fit to eat. This we found out by sad experience.

We are so confident of the ability of Iowa soil to grow anything in the temperate zone that we have ordered a lot of blueberries for spring planting. We will bury them root and branch for winter and plant them in the spring.

We raised persimmons once on another farm. They did well. We will try it. They may not bear in our lifetime, for as a rule they are of slow growth.

But a level-headed man will think of others, and of later days. He may not enjoy the fruit of some of his planting, but his sons and daughters may and probably will. So we plant in hope.

We are on the lookout for rabbits. Last winter they damaged the berry rows. They invariably girdled the best canes. We went in the spring and cut them all out, and it made quite a large brush pile. We have already got three scalps. Last winter we got twenty-two.

Peaches are cheaper than we have known them for several years. They are the best fruit in America.

We saw them growing in the woods in Mississippi. Somebody had dropped a seed there. There is a lot of poor, yellow land in that state.

One of the finest settlements we ever saw was on Wood river in Nebraska. It was occupied by some sort of a colony. They had a sawmill which ran by wind. The crops showed that the folks there were thorough-going farmers.

There was a sensitive plant which grew wild on the prairie. We have often wished that we had some seeds of it. The curious plant was, and is yet, the greatest vegetable object we have ever seen.

We remember hankering for a farm on the prairie just north of Grand Island. It was all open when we saw it. We were so young that we couldn't find our mustache. It hadn't emerged from the lip, though it was probably there.

There are often a great many virtues about a human being. Some appear after a while, and some never appear. Strange!

The old soldiers have recently gathered at St. Paul, Minn. If we are any sample, they will feel like being hauled around instead of marching. How anxious in 1862 they were to have us enlist!

We ourselves were a callow school teacher and when we went before the doctor he pounded us where he supposed our lungs and liver were. We talked to him in the suit that Adam and Eve wore before they tailored their aprons from fig leaves. Finally after making us jump and turn handsprings, he said that we would do.

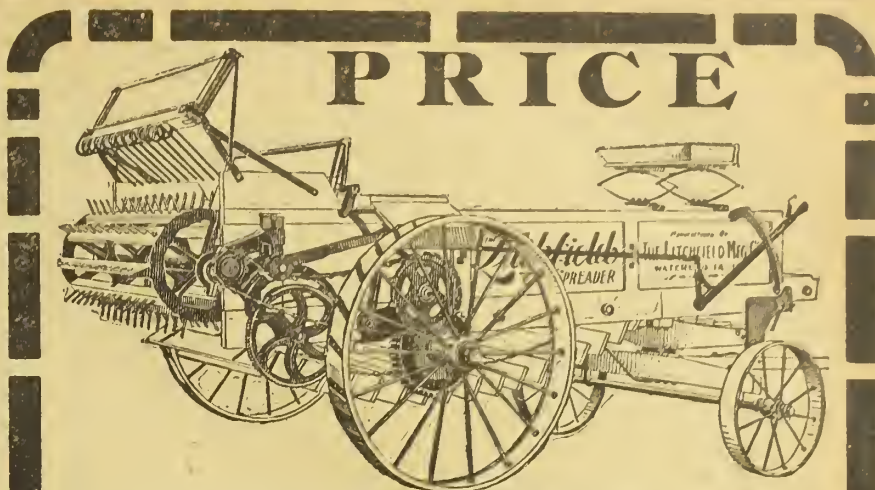

We served from July, 1862, to February, 1866. Earned a commission twice. Was on the staff of Gen. Frank Wheaton, to whom Rhode Island has lately erected a monument.

Well, the other day we thought our little pension should be increased. So we went to the doctor appointed to examine candidates for pensions.

He made us strip stark naked, for I suppose he had a curiosity to see how a seventy-year-old body looked. He must have reported it first class, for we have never heard from it.

This is one veteran who will never apply again. We were promoted to lieutenant in the Eleventh Ohio cavalry for doing duty well, the commission says.

We keep as heirlooms letters and the portraits of three generals at whose head-

PRICE

IS NOT THE WHOLE THING.

WE always admire a close buyer. It usually indicates a man who will appreciate a good thing when he gets it and who will take care of it. At the same time we like to see him a good buyer. If we can sell our Manure Spreaders to close buyers and good buyers, we prefer them every time for customers. We say to our customers, however, "Do not lose sight of what you are buying when you are figuring on what you pay for it."

Ordinarily, a horse is worth more than a dog, and a wagon worth more than a wheel barrow. So do not let the price of the dog fix the value on your horse, because if you do you may get a dog instead of a horse, or possibly may have to push a wheel barrow where you intended to ride in a wagon.

When you buy a Litchfield Spreader you get spreader value and not something else. The Litchfield Manufacturing Company has made farm machinery for twenty-seven years and the farmers of this western country have bought their machines. We are today selling to sons whose fathers bought Litchfield's goods during a previous generation. This is because for every dollar charged they got a dollar's worth.

It is to maintain this reputation that the Litchfield Spreader is built as it is today, with the high-class steel wheels in place of the cheap wood kind, which might answer the purpose. It is for this same reason that two and three-sixteenths-inch cold-rolled steel axles are used in place of the one and three-fourths-inch common steel, as many other manufacturers are using today. This is why the expensive, endless conveyor, with its no-choke system of sections is used in place of the half length, returning conveyor like we find in most other spreaders.

It is to maintain this reputation and strengthen it that these Spreaders are built with the modern style of expensive heater wheel construction and the new, improved Spreader body at the rear, also the adjustable pole for center or side hitch, the wide-faced tires on the wheels, the direct system of drive from both wheels and the general, all-round construction that makes this machine the best that we know how to produce. "Seeing is believing" and if you will take occasion to see this machine operate you can appreciate our statements.

Watch this space next week.

THE LITCHFIELD MFG. CO., P. O. Box A388, WATERLOO, IOWA

quarters we served. They are beginning to be regarded as precious heirlooms by our youngsters.

Nearly seventy old soldiers from near us were at St. Paul, the majority being retired farmers, which fact we learned by investigation.

Kansas Weather and Crops.

To the Editor of The Homestead:

The weather this week has been about as we would have made it. There has been a breeze all the time, but not too much. For three mornings it was cloudy and misty, otherwise it has been a good week for getting the prairie hay up without damage. This work is getting well along with most of us. Some have already finished, and more will get through this week and the first of next. The grass is beginning to ripen on the ground, an indication that the hay put up from now on will not be as good quality as it would have been if cut earlier.

While the weather has been dry, it has not been drying here in eastern Kansas to the extent of having any effect on the corn crop. There is still moisture right at the surface in the corn fields, and when it is this way there need be no fear that the corn is not doing the best it is possible to do. If newspaper reports are to be believed, however, a section of the state in the vicinity of Jewell county is needing rain quite badly. One report from that section speaks of the farmers cutting corn. Corn cutting will be late in this locality, later than it was last season, when it was much later than ordinary.

It is probable that there will not be the usual acreage of corn harvested for roughness this year. In the first place, there are not the cattle to be fed, and all corn is well eared this year, which would require heavy husking from the shock, work that no one craves, unless it is absolutely necessary to do it. There is an abundance of hay here in this locality, and everything sowed for roughness such as cane, millet and kafir corn will make a heavy crop, so there will not be the call for corn fodder, except for spring feeding. We have found that nothing in the way of the fodder kind can beat Indian corn for spring feeding. Cane is all right up to the holidays, and kafir is good until well into February, but after that corn fodder is best.

All day yesterday the sun played hide

and seek in and around the clouds, and it looked for a time as if it could not miss giving us a soaking rain. It made all with hay down rustle to get it up, and no more grass was cut. Last evening, too, it looked as if it might rain before morning, but this instalment must have been meant for someone else, perhaps for those who need it. It is hay weather again this morning, but rain is still expected within the next few days.

Henry Hatch.

Coffey Co., Kansas, Aug. 24th, 1906.

THOUSANDS OF MEN WANTED AT ONCE TO HARVEST THE CROPS IN MINNE- SOTA AND THE DAKOTAS.

Low rates in effect from all points on the Iowa Central Railway. Tickets for sale daily August 1 to 31, 1906.

Splendid wages are offered, ranging from \$1.75 to \$3.00 per day, including board. For rates call on agents or for full particulars address A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

LOW EXCURSION RATES TO NEW ENGLAND AND CANADIAN POINTS VIA THE C. & N.-W. R.Y.

Tickets on sale daily until June 30th; also on July 4th and 18th, August 8th and 22d and September 5th and 19th at one fare plus \$2 for fifteen-day tickets, or one fare plus \$4 for thirty-day tickets. Stopovers allowed at Detroit, Niagara Falls and other intermediate points. Full information at 401 Walnut St., or C. & N.-W. passenger station.

THOMAS ORCHESTRA CONCERTS, WATERLOO, IOWA, SEPT. 3D TO 8TH.

The Chicago Great Western Railway will on September 3d to 8th inclusive, sell tickets to Waterloo at one fare for the round trip. Return limit September 10th. Other attractions. Apply to E. J. Sawyer, City Ticket Agent, 514 Walnut St., Des Moines, Iowa, for further information.

EXCURSION TICKETS TO GERMAN VETERAN FESTIVAL AND REUNION OMAHA, NEB.

Via the North-Western Line, will be sold at reduced rates August 31st to September 2d, inclusive, limited to return until September 4th, inclusive. Apply to agents Chicago & North-Western Ry.

MAKE A SUCCESS OF YOUR TALENTS.

The opportunity of your life is awaiting in the new towns on the Chicago Great Western Railway. Openings in nearly all lines of business. Write today to E. B. Magill, Mgr., Townsite Department, Omaha, for full information and copy of "Town Talk."

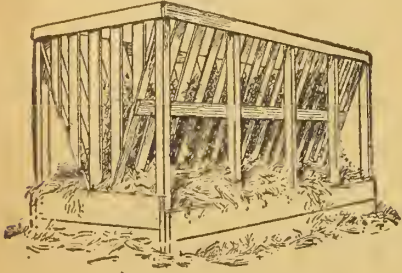

FISHING AND CAMPING.

Tickets are on sale daily to Madison Lake, Waterville and Elysian, Minn., via the Chicago Great Western at rate of one fare and one-third for the round trip. Full information from E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

HINTS, SUGGESTIONS, DEVICES AND CONDENSED LETTERS FROM CORRESPONDENTS.

One of our subscribers asks for some suggestions concerning the making of hog crates. He recently had the problem of making the crate for a 1,000-pound hog to wrestle with, and found that his ideas were not very clear on the subject. The editor of this department will be glad to receive suggestions on this topic. Let specifications be as clear as possible, and do not hesitate to make rough drawings. If you make the idea clear, our artist will see to it that the drawing comes out right.

In the accompanying illustration is shown a roughage feeding rack that is used with considerable success upon the Nebraska Experiment Station farm, where it was photographed last winter

by a representative of the Prairie Farmer. The corners of the rack stand between seven and eight feet high, with a plank-sided bottom. The width is about four feet, and length can be whatever may be desired. The general plan of the work is brought out in the accompanying illustration.

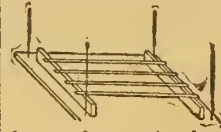

The Twentieth Century Farmer gives the following: "The manure carrier shown herewith is a very efficient one. It is used in this case for carrying the manure from a cow barn. It consists of a large iron bucket with the bottom hinged and fastened to the bucket, when closed, with a spring snap. The bucket is carried in and out of the barn on a track which is placed so that when the doors are closed it leaves a very small opening around the track. The track is supported on the outside of the barn by

timbers bolted together near the top, carrying the track under their intersection. The track is placed so that it is slightly down grade from the barn to the place where the manure is dumped, so that the bucket runs out by its own weight when loaded. A rope is attached to the running device to pull the bucket back into the barn. A cord is also attached to the bottom of the bucket, which by pulling will cause the bottom to drop and allow the manure to fall out. Between the track-running device and the bucket there is a pulley supplied with ropes which will allow the bucket to be raised and lowered. The bucket can be let down upon the floor, loaded and then pulled up ready to run out and be emptied. An economical way to dispose of the manure is to have a wagon so

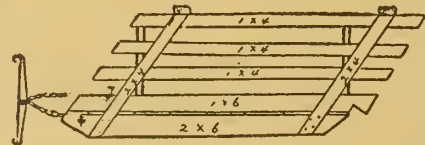

placed that the manure can be dumped into it and hauled directly to the field. Better still, if the farmer has a spreader it can be placed to receive the manure and can then be spread upon the fields. In this case it is hauled economically and easily. It also saves much of the disagreeable part of manure handling. The bucket need not be touched after it is loaded in the barn. This device is in use on the farm belonging to William McCarthy, New Hampton, Iowa."

Mr. Leman Place, of La Salle county, Ill., writes the Farmers' Review as follows: "In fighting lice I have found the

droppings board and roost shown in the drawing came in handy. The droppings board is simply a platform of any size large enough to accommodate the fowls. It is suspended from the roof by four wires and hangs about two feet above the ground. Then I lay 2x4-inch pieces upon it that are just long enough to reach across. The roosts are laid on these. The platform or droppings board should hang out about six inches from the wall and can be held in place by hooks attached to the wall. The roosts and 2x4 pieces are laid on but not nailed. This makes cleaning easy, for they can be simply lifted off and the droppings scraped off into a basket with a hoe. Afterwards the roosts and 2x4s are replaced, when they can be treated with kerosene, which will kill the lice."

Mr. W. F. Schultz, of Kansas, sends the Breeder's Gazette the following: "I have the best chute for loading hogs and calves into a wagon that I have ever seen. It is made like a sled, and can be used for hauling a hog a short distance by putting endgates in slides railed in for that purpose. The illustration

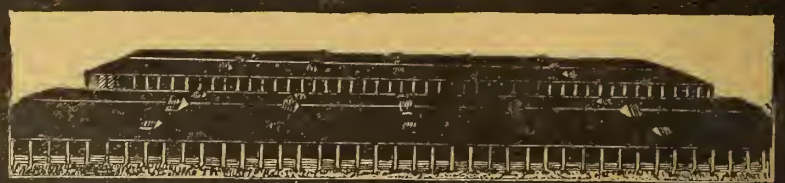

shows one side. Use a sixteen feet two inches by six inches, making the runners six feet nine inches long; one-inch by six-inch and one-inch by four-inch should be eighteen feet long to cut to advantage. Cut floor boards two feet long, and nail an inch apart. The angle for the end cut and standards can be found by placing one end into the wagon. Bore holes and use stay chains to pull by. It is light and convenient. I am a farmer, not a draftsman."

Hog troughs with swinging partitions are recommended by Robert S. Shaw of Michigan in the annual report of the State Board of Agriculture. The usefulness of these partitions is that when they are swung back the pigs are shut away from the trough while the feed is being put into it, and then when swung back in place the pigs have access to the trough. In speaking of the device illustrated in the cut, Shaw says: "This is no new invention for the device, with many modifications, is used in numerous farmers' piggeries. The only wonder is that it is not more universally used. The top of this swinging partition consists of a two-by-four from which the three-foot partition made of inch boards swings by hinges. This partition is held in place at all times by a half-inch iron rod which slips up and down in staples, being received at the bottom in holes bored in a hardwood cleat nailed across the center of the trough. This fastening

100 000 Square Feet of Black Diamond Roofing

Millions of rolls are in use all over America, giving satisfaction to thousands of owners. Black Diamond, properly coated, is giving better service than any of its rivals, because it is made of pitch and wool-felt materials that are proof against moisture or weather action. Some roofings contain materials that

Storage Sheds of Chippewa Beet Sugar Co. 100,000 sq. ft. of Black Diamond Roofing.

will actually dissolve in water. Look over the free sample that we will send you, if you ask for it, and see the good weather-resisting materials we put into "Black Diamond."

10 WEEKS FOR 10c

The Oldest and Best Known Agricultural Weekly Paper in the West.

The Journal of Agriculture

Established 1866.

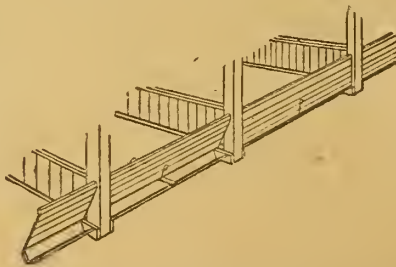

THE JOURNAL OF AGRICULTURE is a weekly journal that every farmer, every gardener, every stock raiser, every man and woman interested in poultry or the products of the soil, will need and read from cover to cover. No dry rot, no long-winded articles by city farmers who do not know the difference between a "pumpkin tree" and "watermelon bush," but short, meaty, interesting, useful, reliable and sensible matter in all departments throughout. Besides well written stories of fiction, travel and adventure, current news in condensed form, handsome illustrations, timely cartoons, terse comment on live topics, wit and humor, it contains departments concerning the care and handling of all kinds of farm stock, floriculture and gardening, cooking, hints about the house, veterinary department, poultry, dairying, bees, young people's department, correspondence columns and the LATEST ACCURATE MARKET REPORTS giving the prices of Live Stock, Grain, Seeds, Vegetables and Produce in the leading markets, thus keeping its readers well posted as to what their products are worth and enabling them to get the top price for them.

To introduce THE JOURNAL OF AGRICULTURE into thousands of new homes, we will send it every week for TEN WEEKS FOR 10c. Address Journal of Agriculture, 19 Journal Bldg., St. Louis, Mo.

BINDER TWINE FOR CORN HARVEST

AUGUST POST, MOULTON, IOWA.

prevents the pigs from moving the partition at any time. If the pens are over ten feet in width the swinging partitions are too cumbersome to

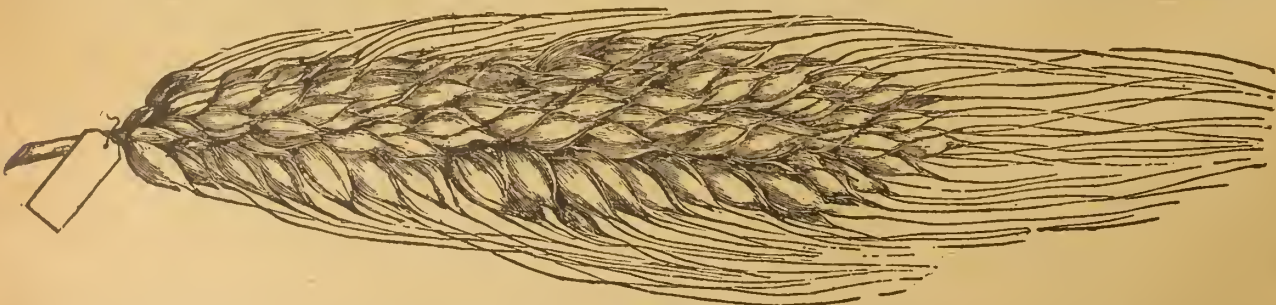

work well. They should not be made to swing into the pen past the edge of the trough when fastened or the pigs will soon gnaw the edge of the bottom board off. These partitions are made to swing back until they stand straight up

overhead resting at the ends between the posts. This permits pigs to be driven out or in, or the cleaning of the pens from the alley. In this case doors connecting the alley and pens were purposefully omitted. The troughs were made of two-inch hemlock, constructed in a V shape, one side being two-by-ten-inch material and the other side and ends two-by-eight. These troughs are simply toe-nailed in between the division posts so that they can be removed easily and replaced when necessary. We like the V shaped troughs in preference to any flat-bottomed sort, in the piggery, because the pigs can clean them more readily and thoroughly and there is practically no contact at the floor except for the short end pieces; as a result filth and moisture do not accumulate beneath them. On the under side of the V shaped trough, next the alley, the floor is always dry and on the pen side it can be cleaned thoroughly and is always exposed to the air. Hemlock troughs last from two to five years, or even longer, particularly if protected by a strip of band iron on the inner edge. Sloppy feed does not chill or freeze in wood troughs as readily as in cement or metal. We like the flat-bottomed troughs for out-door feeding; where they are moved about frequently, they are not upset so readily as the V shaped ones. We also like low sided, flat-bottomed troughs for weanling pigs."

SPECIAL EXCURSION RATES TO COLORADO, UTAH AND THE BLACK HILLS, Via the North-Western Line. Beginning June 1st excursion tickets will be sold daily to Denver, Colorado Springs, Pueblo, Salt Lake City, Hot Springs, Deadwood, Lead and Custer, S. D., etc., good to return until October 31st. Specially low rate round trip tickets to these and other points, with favorable return limits will be sold the first and third Tuesday of each month until September 18th, inclusive. A splendid opportunity is offered for an enjoyable vacation trip. Several fine trains via the North-Western Line daily. Apply to agents Chicago & North-Western Railway.

"RATEKIN'S NEW MALAKOFF WINTER WHEAT."

This new variety of winter wheat was imported by that enterprising seed firm, the Ratekin Seed House, of Shenandoah, Iowa, five years ago, direct from Russia. Since then it has been introduced by them into about every wheat growing state in the Union, and everywhere it has made a most enviable record, as one of the hardiest varieties, as well as the most productive variety on record. In fact, the original seed obtained by them, grown almost 10,000 miles away, produced a yield the first year of an average of almost forty-five bushels per acre. Since then and everywhere they have sent it, it has maintained a similar record, and in many places has made a yield of as high as sixty to sixty-two bushels per acre. In a private letter to this paper they say: "One of our own good farmers has just thrashed 1,140 bushels of this wheat from twenty acres of measured ground, an average of fifty-seven bushels per acre, every bushel of which will weigh out from sixty-three to sixty-five pounds per struck measured bushel. Every farmer reader of this paper who is at all interested in the growing of winter wheat would do well to write them for their winter seed wheat catalog. It will be sent free with a sample of this wheat by mentioning this paper. The address is Ratekin Seed House, Shenandoah, Iowa. See their advertisement on page 11 of this issue."

VETERINARY MATTERS

PROFESSIONAL veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of \$1.00. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

SYMPTOMS AND TREATMENT

GROWTH.

I have a yearling colt which has a growth on its ankle. It seems to be a form of wart and came about a month ago. Is now about the size of a hen's egg. Please tell me how to remove it.

You do not say whether growth is red raw or covered with hair, so we are at a loss to know what it is. If it is wartlike, without hair, paint it with glacial acetic acid once daily while colt is kept tied so that he cannot bite part. Write again later if this treatment does not prove effectual.

TESTING FOR TUBERCULOSIS.

I wish to inquire through your veterinary department how to test cattle for tuberculosis. What is the law regarding herds afflicted with the disease?

It would be safest for you to employ a veterinarian to conduct the test. It consists in taking three experimental temperatures with thermometer inserted in rectum of cow for three or four minutes, to determine the normal temperature. This is done after the cows have been kept in stable for six hours, and the same day at nine or ten p. m. each cow is to have a two and one-half cubic centimeter dose of tuberculin injected under the skin of her neck or back of elbow. Next morning, commencing at six o'clock, the temperature of each cow is to be taken, and again every two hours until four or five temperatures have been taken and set down. If there is a rise of one and one-half

degrees above the normal temperature of the previous day, as a result of the injection of the tuberculin, the cow is to be considered "suspicious" and retested in three months; if her temperature rises two or more degrees above normal and remains abnormally high for several hours, she is tuberculous, and should be dealt with accordingly. You can obtain particulars as to the law relating to tuberculosis by addressing a letter to the State Veterinarian, Des Moines, Iowa.

PIGS COUGHING.

Please advise me what to do for my three-month-old pigs. They cough all the time, are dry in the hair and quite constipated. They have a good, dry bed to sleep on and I feed them soaked shelled corn and ground oats, with middlings and milk for swill. They eat heartily of the corn, but do not seem to like the swill very well.

Keep them off dusty pastures and stop feeding ground oats and corn. Substitute slop of middlings, milk, flaxseed meal or tankage and limewater. Treat for worms, as advised recently in these columns.

ABNORMAL HORN DEVELOPMENT.

I have a yearling Hereford steer that has a horn enlarged at the base. It first made its appearance in April and is now about twice normal size. It seems to itch, for the calf keeps scratching it all the time. Near the base of the horn it looks dark, as though it had begun to decay on the inside. The calf is in a thrifty condition and I want to dehorn this fall, but do not know whether it would be safe or not. Will you tell me through the columns of your veterinary department what course to pursue?

Pus sometimes forms in the horn base and causes pain and itching. Without an examination, we do not care to advise dehorning in this case, and would advise you to have an examination made by a local veterinarian.

LEUCORRHEA.

We have a mare that we cannot get with foal. She comes in heat every fifteen or eighteen days, at which times she throws off a thick yellowish substance for about two weeks. We have bred her several times, but with no effect. Would you advise using the yeast mixture? She has had a colt before this trouble began.

By all means, use the yeast mixture, and repeat once a week until the mare ceases to throw off abnormal discharge from vagina. A diseased condition of the membrane lining the vagina and womb is present, and we cannot say for certain that the yeast treatment will cure it, as that plan is still in the experimental stage. She will not conceive, however, before the trouble is cured, and if she does not recover from use of yeast mixture, better have her treated by a veterinarian.

ARTHRITIS.

I have a twelve-year-old mare that is very lame in the second joint of left hind leg. She has been this way about two months, and I first noticed it on hitching her up to drive. She was a little lame when I first started, but seemed to get over it; however, the next morning was much worse and has been very lame ever since. The leg is now swollen to the hock joint and she holds it up a good deal. Yesterday I stuck a knife into the place, but nothing but blood came from it. She was in good flesh before she became lame, but has gone down in flesh until she is quite thin. I am sure that no bones are broken, but would like to have you advise me what can be done for her.

The case is a serious one, and you may have complicated matters badly by using the knife when pus was not present. It is likely that there is deep-seated inflammation of the joint, and such cases respond unsatisfactorily to treatment. Poultice parts with antiphlogistine or other plastic dressing for a week; then wash off, and when dry, after removing hair, blister the joint with cerate of cantharides if lameness is still pronounced, and repeat in two or three weeks.

SWELLING—GARGET.

(1) A mare, which had a young colt, got cut on the wire fence. A few days after one hind leg became swollen and she could not step on it. Now she can walk and the swelling has gone down, but the muscles of the hip are wasted away. (2) Have had several cows come in with swollen udders. The udder inside of the skin seemed very much swollen. You could get one or two drams of milk and then have to wait a while for more to come. The last one was so badly swollen that I could get no milk. I bound smart weed on the udder and pumped wind into it. In this way I got one teat so that I could get milk from it with a milking tube, but couldn't get milk from the other three teats. Is this trouble contagious, and how should it be treated?

(1) You do not say if the barbed wire cut injured the leg that swelled. If it did, there was infection and that came from lack of proper treatment with antiseptic lotions. A solution of one ounce of sugar of lead and six drams of sulphate of zinc in a pint of water makes a good lotion for use on barbed wire wounds. It seems more likely that the mare suffered an attack of lymphangitis

Kills Hog Lice

Chloro-Naphtholeum Dip will quickly kill Hog Lice and all other insect pests. It will prevent and cure Hog Cholera. It is the best disinfectant for hog pens. Cures all parasitic and germ diseases of Cattle, Horses, Hogs, Sheep and Poultry, and heals their cuts, sores and wounds.

Chloro-Naphtholeum Dip

proves its worth before you pay for it. I will send you a gallon, express prepaid, for a two-weeks' trial. If it doesn't kill hog lice in two weeks, you don't owe me a cent. Is that fair? Won't you try a gallon at my risk?

E. TAUSSIG, President, WEST DISINFECTING CO., 21 East 59th St., New York City.

Is happy because he is being FREED from Lice that torture and torment. August, September, October, are best months to dip hogs to kill lice. DIP-OLINE, the best Hog Dip, works quickly and thoroughly. IT KILLS HOG LICE, destroys all disease germs, prevents HOG CHOLERA, saves loss, keeps your hogs healthy and growing. Every hog-raiser needs it. DIP-OLINE is easy to use; the cheapest hog insurance you can buy. Write for booklet and enough dip to make a gallon, FREE.

MARSHALL OIL CO., Box 7, Marshalltown, Iowa.

A Whole Medicine Chest.

A bottle of DEAN'S KING CACTUS OIL in time of emergency saves many dollars.

PROF. DEAN'S

KING CACTUS OIL

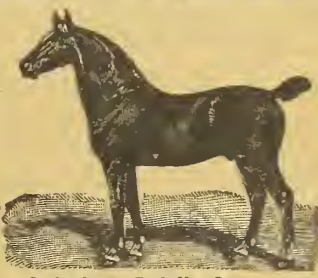

Will heal the worst barbed wire cut without leaving a scar if used in time. We have thousands of testimonials that prove this fact. Every owner of live stock should keep it on hand, for it is a positive cure for cuts, sprains, bruises, old sores, swellings, open wounds, harness and saddle galls, etc.

KING CACTUS OIL is equally valuable for ailments of the human race. It is magnetized and soothing, pleasant to apply and heals a wound from the bottom up.

Sold by druggists in 15c., 50c. and \$1 bottles, \$3 and \$5 decorated cans. Sent prepaid if your druggist cannot supply you by **OLNEY & McDAID, Clinton, Iowa.**

Warranted to Give Satisfaction.

Gombault's Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for

Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunions from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

The Lawrence-Williams Co., Cleveland, O.

A \$2 package guaranteed to cure any case of Heaves or Money Refunded. Sent prepaid on receipt of price.

Veterinary Editor The Homestead.

CONSULTING VETERINARIAN. Advice at prescription by mail, \$1.00.

Bog Spavin

Cure the lameness and remove the bunch without scarring the horse—have the part looking just as it did before the blemish came.

Fleming's Spavin Cure (Liquid) is a special remedy for soft and semi-solid blemishes—Bog Spavin, Thoroughpin, Splint, Curb, Capped Hock, etc. It is neither a salve nor a simple blister, but a remedy unlike any other—doesn't irritate and can't be imitated. Easy to use, only a little required, and your money back if it ever fails.

Fleming's Vest-Pocket Veterinary Adviser

describes and illustrates all kinds of blemishes, and gives you the information you ought to have before ordering or buying any kind of a remedy. Mailed free if you write.

FLEMING BROS., Chemists, 210 Union Stock Yards, Chicago, Ill.

OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

LAW QUESTIONS CONSIDERED.

POINTS OF FISH LAW.

A Subscriber, Giving, Iowa.—(1) Are people allowed by law to fish with a trot line in the state of Iowa? (2) Are people allowed to sell fish which they catch?

Answer.—(1) Any person may, between the 15th day of May and the 15th day of November, use not more than one trot line in a stream, and extending not more than half-way across the same. (2) It is lawful for any person to sell the fish which he lawfully catches, but if he takes them unlawfully, the selling of them is also unlawful.

CONTRACT OF A MINOR.

A Subscriber, Florence, Kan.—I sold a pony to a boy sixteen years of age. His elder brother told him he would loan him the money to pay for it. The boy came and got the pony and said he would bring the money the next Saturday, but when he went to his brother for the money the brother said he could not spare it. What can I do to get my money?

Answer.—You cannot get the money by law. A boy sixteen years old cannot make a binding contract. The most you can do is to get back the pony. If possible, persuade the boy and his brother to return it, without litigation.

WARRANTY AND REPRESENTATION.

A Subscriber, West Union, Iowa.—A. bought a mare from B. at public auction. The mare was warranted to be sound and represented to have been bred and safe in foal and service fee followed. Upon these representations A. paid a big price for the mare. After he took her home he found that she had the heaves, but did not make complaint to B. about it for two months or more. The mare also proved to be not in foal. Can A. recover damages from B?

Answer.—He can recover damages on both causes; that is to say, because the mare was not sound as she was warranted to be, and also because she was not in foal as she was represented to be. The fact that A. did not complain for more than two months would not prevent such recovery—it would only prevent him from rescinding the contract. He cannot now compel B. to take the mare back, but he can keep her and get damages as above stated.

SALE OF A COW.

A Subscriber, Spencer, Iowa.—In October, 1905, I bought a registered Angus cow at a public sale. She was due to have a calf on the fifth day of February, 1906, but did not have it till March 6th, and it was a pure red calf, with a white spot on its forehead. It looks like a Short-horn or Jersey. It cannot be registered, and is worth about \$3 to me. If it had been a black calf it would have been worth \$50, for the cow was supposed to have been bred to an imported bull of great note. Have I any recourse against the breeder who sold me the cow?

Answer.—It depends wholly upon the contract you made with the seller. If he in that transaction represented that the cow was bred to the imported bull you mention, when in fact she was not, then he is liable to you for whatever damages you have sustained, which would be the difference between the value of the red calf and the value of one from the imported bull.

CONTRIBUTION — GARNISHEE — JURISDICTION.

A Subscriber, Elk City, Kan.—A. and B. lived in Kansas. A. gave his note for \$400, bearing interest, due in six months, to a bank. B. signed the note as surety. A. sold his farm to C. and moved out of the state. C. paid part cash for the farm and gave A. his note for \$450, due in five years without interest, secured by a second mortgage on the farm. A.'s note to the bank became due and he refused to pay it. B. paid it and sued A. in justice court and garnished the debt which S. owed to A. A. answered to the justice that he owed A. \$450. A failed to appear at the trial and the court gave judgment in favor of B. and against A. for \$400. Before the trial and judgment B. published notice of summons for thirty days, as required by law, in case of a non-resident defendant, and during this time A. canceled the note that C. owed him, and released the mortgage. (1) Has B. lost his claim against A.? (2)

Is C. bound to pay the \$450 or any of it into court under the garnishee process? (3) In case C. fails to pay the money into court, what steps should B. take?

Answer.—(1) He has not. (2) We think not, for the reason that the justice of the peace had no jurisdiction of the case. A justice of the peace in Kansas has no jurisdiction of a suit upon a money claim for more than \$300. (3) In case C. fails to pay the money according to the order of the justice, B. should employ a lawyer to investigate the can-

cancellation of the debt from C. to A. We think such cancellation and release were probably fraudulent.

HARVEST HANDS—NORTHWEST.

For parties of five traveling together on one ticket, The Chicago Great Western Railway will have on sale the entire month of August tickets at rate of \$14.50 per capita to nearly all points on the Great Northern, North Pacific and Soo Lines in Minnesota, North and South Dakota. On the return trip, rate will be \$1.50 higher. For full particulars address E. J. Sawyer, 514 Walnut St., Des Moines, Iowa.

A Pioneer Breeder of the Middle West

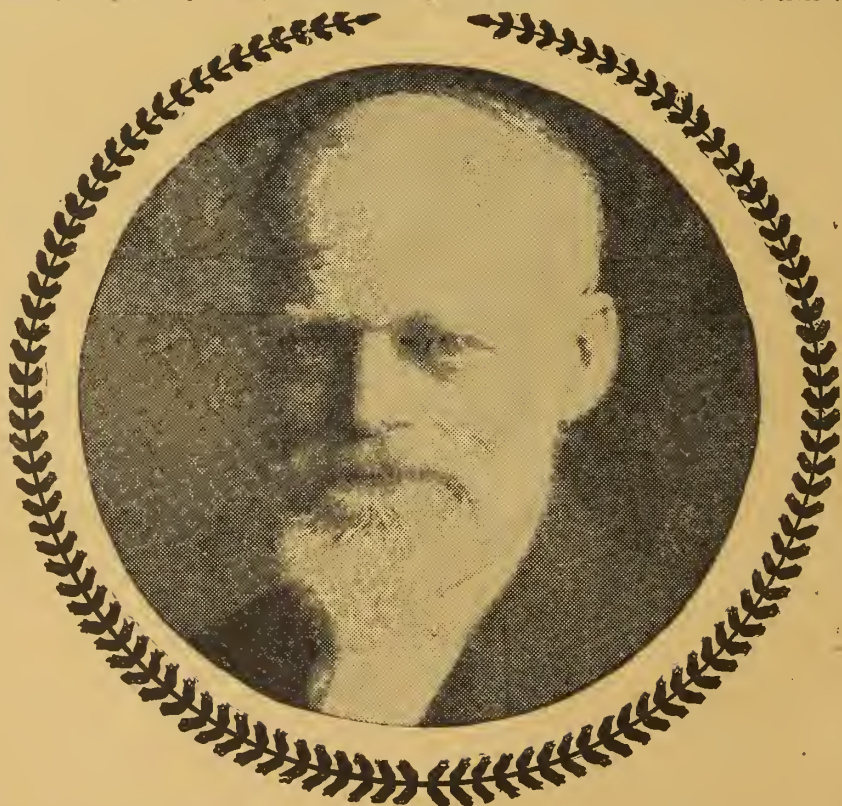

Frank Bellows, a New Englander Who Has Stood For High Ideals and Broad-Gauge Methods in the Live Stock World.

One of the grandest figures among the men who have laid the foundations of the live stock industry of the corn belt is that of Mr. Frank Bellows, who, honored and beloved by a wide circle of friends and admirers, is spending the evening of a useful life at his home in the city of Maryville, Mo. When the history of pure-bred stock in the middle West shall be written, the part played in its development by this high-bred New Englander in the state of his adoption and its influence upon western live stock interests generally will be accorded high recognition.

Frank Bellows was born July 11, 1830, at Woodstock, Vermont. His father, George Bellows, was a native Vermonter, by occupation a blacksmith. His mother's maiden name was Mary Breckenridge. She was a lineal descendant of a family that became quite prominent in our national affairs. Frank was one of a family of eight children, all of whom he has survived. At the age of seven, desiring to relieve his parents of the care of a part of a large family, he left home, joining a sheep driver, and ever after-

settled on this land and undertook his first job of farming on his own account. Through his energy, honesty and promptness in dealing with the railroad officials he won their friendship and eventually paid for 320 acres of this land of his own selection, upon which the railroad company released him from the balance of the contract.

On February 16, 1861, he was married to Miss Mary Ann Dilling, second daughter of Mr. and Mrs. George Dilling. To this union have been born nine children, six sons and three daughters, all of whom are living. In 1865, the family moved to Missouri, settling on a farm near Guilford, in Nodaway county. Here as a farmer, stock raiser and stock buyer, he was uniformly successful. In 1883 this farm was sold and in March, 1884, he purchased and moved to what was later known as the Valley Home Farm, located adjoining the corporate limits of Maryville. This farm he and his sons made famous as a fine stock breeding establishment. Short-horn cattle, draft and road horses and Poland China hogs were the breeds handled. In 1904 Mr. Bellows decided to retire from the

wards unaided made his own way in the world. He received no school advantages, but learned to read through instruction received from his associates and companions.

After embarking in the big, wide world at such a tender age, he spent several years on a farm doing chores and odd jobs for board and clothes. Looking for larger worlds to conquer, he left the farm and went to Hartford, Conn., where he secured a job driving a hack at \$8 per month and board. After two years' service he was engaged by a competing line at \$2 per month advance. This was boy's pay, but his services were so satisfactory that when the first pay day rolled around his pay was advanced to a full man's salary. During this time his reputation for promptness, alertness and courtesy was being established and it was not long until he was promoted from driver to the more remunerative position of head porter at the Eagle Hotel, at a salary of \$1,000 per year. This position was held until the hotel property was sold, after which he went to New York city and secured a position as an omnibus driver, working sixteen hours per day.

At the age of nineteen he gave up driving and joined the exodus of "forty-niners" for the gold fields of California. He sailed from New York on the North American, a three-masted sailing vessel of 1,800 tons burden, going around Cape Horn, encountering a severe storm lasting forty days, which carried them into the Antarctic regions. The journey from New York to San Francisco consumed 137 days. He first engaged in surface mining near Auburn, north of Sacramento, later moving to Forest City, where he bought an interest in the Don Say Mining Company. His mining enterprises met with fluctuating success and failure. In 1856, he sold his mining properties and returned to New York by boat, crossing the Isthmus of Panama. Landing in New York with some money and hearing of the fertile prairie lands of central Illinois, then being offered by the Illinois Central Railroad, he went direct to Chicago and contracted for a large tract located in Champaign county. He

activities of life and sold the farm. He then purchased property in south Maryville, on which he built a pretty home, preparing to spend his remaining days amidst pleasant surroundings, enjoying his family and the fruits of an honest, well-spent life which had gained for him a host of true and loyal friends.

Frank Bellows is appreciated by all who enjoy his acquaintance as a quick and independent thinker, who holds peculiarly high ideals regarding true manhood and honor. With him his word is his bond and no consideration would induce him to deviate one iota from what he conceives to be right. Although as a boy he received no schooling, yet he has been an extensive reader and is an exceptionally interesting, entertaining and instructive conversationalist. He is very fond of his friends and possesses a peculiar faculty of both making and holding friends. He has always been interested in boys and young men and has ever been ready to advise and help those in need of encouragement. He is decidedly enterprising and public spirited. He never fails to take a lively interest in local good government and educational affairs. He was from the early days a devotee of good stock and was one among the early introducers of blooded stock in his community. His enthusiasm for a good animal has never waned and he has always been sufficiently broad gauged to recognize merit wherever found, regardless of whether it was in the breed of his choice or not. He has a keen eye and is a critical judge of individual merit. These qualifications, together with his social characteristics and hospitality, have enabled him to gain recognition as one of the foremost promoters of improved methods and improved stock of his time. He has taken care to inculcate in his children the importance of industry and a wholesome respect for the real things of life. He is tenacious for what he considers his own rights and generous in his recognition of the rights of others. He is staunch as a friend and devoted in his family relations.

BEFORE YOU BUY A MANURE SPREADER

SEE that its frame and sills are made of oak; that it has a ball and socket joint on front axle to prevent racking and twisting and steel braces and steel truss rods to guard against warping and sagging. See that the apron does not run backward and forward on hilly ground but insist on a positive and continuous apron drive.

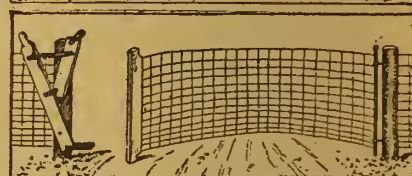

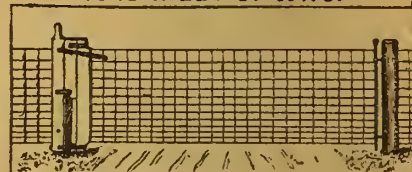

See that it is practically automatic and so simple that any boy who can drive a team can run it as well as any man and control its every operation without leaving the seat. The

Appleton Manure Spreader

has all these improved features and many others equally important. Write to-day for free catalogue and special prices and terms.

OUR DAIRY DEPARTMENT.

Cow's Milk as a Food for Man.

By C. Larsen.

Fresh, pure and sweet milk is preferred as a food to any other substance known in nature as a natural food, or a food not prepared by man. It is a natural product intended as a food for the young of the mammalian group. Primarily the milk from cows was utilized solely for their young. Owing to the skill and judgment of man in selection and breeding, the milking qualities of cows have been developed to such an extent that the cow's milk now serves in a large measure as the food for man, and we find that both production and consumption of milk is steadily increasing.

According to United States statistics we produce over one billion gallons of milk annually, and about one-third of it is consumed directly. Undoubtedly a considerable portion of milk is consumed in rural districts of which no records can be obtained. The greatest average per capita consumption of milk reported for any one city is two pints per day, and the least average daily consumption of milk per capita is about one-third pint.

The reasons why milk is used extensively as a food, and why it should be used still to a greater extent are as follows:

(1) Fresh milk is palatable and relished by most people. The different components of milk are present in such proportions as to produce the flavor suitable to the majority of the people. Milk, in order to have its best flavor, should be produced from healthy cows, fed on food that will impart the best flavors to milk, and kept and handled under as clean conditions and pure surroundings as possible.

There has been considerable talk about milk carrying various contagious diseases. Undoubtedly some cases may be traced to this source, but the same may be said about any other food. Fresh milk produced from healthy cows is more wholesome and healthful than any other food known.

Certain feeds affect the flavor of milk. Some feeds impart bad flavors to milk; others good flavors. The most common feeds that produce ill-flavored milk when fed to the cows, are wild garlic and onions, weeds of various kinds, cabbage,

rape and turnips. Feeds that produce desirable flavors in milk are grass in the summer, good, sweet, cured hay and corn fodder, bran and carrots during winter.

Milk is a food and should be handled and cared for as such. If this were kept in view all the time during the production and handling of milk and cream, there would be little or no complaint in regard to the poor quality of cream, butter and cheese. It is only a short time ago since the writer was told that a certain farmer used his cream and milk cans for hauling swill for the hogs, and that the cans received only a superficial rinsing before these same cans were again used for holding cream. During the milking process, in many instances, more care would be taken if the milker realized it was a food product. How many housewives would approve of having all their dainty food products handled in the same manner, and under the same conditions, as some milk and cream are handled? Even the bachelors (who are perhaps the most careless class of cooks) would hesitate in approving methods of handling and cooking of food similar to those used in milk and cream production. When meat and bread get old and deteriorated, they are not used, nor sold to anybody to use as a food, as are milk and cream.

Owing to the ease with which milk and cream deteriorate, special care should be taken in order to have it in a palatable and healthful condition. Keep milk cold and pure.

(2) The three chief classes of nutrients necessary to sustain the body are found in milk in proper proportions so as to render it most serviceable as a food. First, those substances which produce energy, fat and heat in the body; second, those which produce muscles, tendons, hair, hoofs, horns and some fat; third, the substances which produce the bones of the body.

The following table shows the composition of milk and how each component is utilized in the body:

Milk.	Water, 87%.....for water in body.	
	Total Solids	Solids not fat 9.1%
		Minerals .7% (bones body)
		Protein { Curd } Muscles { 3% } Tendons { Albumen } Hair { .5% } Hoofs { .5% } Horn
		Fat 3.9% Sugar 5% Heat En'ry fat

All of these constituents of milk except fat are in solution or semi-solution, thus rendering it easily digestible. For convalescents and for children whose masticative and digestive organs are not very efficient, fresh milk is especially suitable. The substitution of cow's milk for human milk in infant feeding is a very interesting study, but space forbids a discussion of this phase of the subject.

(3) The third and chief reason why milk is used as a food and why it should be used to a still greater extent is that milk is a cheap food.

Not long ago a once prominent educator said that "milk has a much greater food value than is shown from chemical analysis. The chemists' figures and experimental evidence show that skim milk, for instance, has a value of about twenty-five cents per hundred pounds, but in practical feeding it has a value of 100 per cent more than this, because in no other way than by feeding milk can the same results be obtained. If I did not have the good, sweet milk, I could not raise the calves and pigs that I do."

The same logic may be applied in the use of milk for raising children. The writer believes, however, that the only right way is to compare the cheapness of milk as a food, with other foods. When this is done, it opens up a large prospective field. Compared with beef, for instance, about twice as much food value can be bought in the form of milk for the same amount of money.

In many instances milk and cream are

considered luxuries, and used sparingly by the members of the family. This ought not to be so, for milk, if liked, is one of the best, cheapest and most healthful foods known to man.

The Rolfe Short-horn Sale.

The sale of Short-horn cattle at Rolfe, Iowa, on August 22d, made by Messrs. Claus Johnson & Sons, A. G. Hewlett, Thos. Fisher and M. P. Hancher, brought out a fair-sized crowd, composed very largely of breeders from Iowa and Nebraska. The thrashing season being at its height kept many of the local people from attending. The top price of the sale was \$245 for the Scotch cow, Mina of Oak Ridge 2d, and she was purchased by Mr. J. H. Graham, of Spencer, Iowa. The top price for bulls was \$200 for the young Mysie bull, Mysie's Lad, and he was purchased by Mr. B. G. Stark, of Livermore, Iowa. The average of the sale on about fifty head was \$78. The cattle were quite young and many of them were in thin condition. Below we list those selling for \$100 and over:

COWS.	
Mina of Oak Ridge 2d, six years, J. H. Graham, Spencer, Iowa	\$245
Lady Countess 2d, six years, J. W. Sadtler, Ottosen, Iowa	135
Gauntlett's Queen 3d, one year, P. D. Fuller, Sutherland, Iowa	150
49th Duchess of Walnut Hill, five years, W. H. Berry, Indianola, Iowa	100
Red Annie, five years, F. A. Shaefer, Raleigh, Iowa	115
Wild Eyes 3d, eight years, J. W. Sadtler	125
Wild Eyes 33d, three years, same	125
Wild Eyes 34th, two years, F. A. Shaefer	105
Daisy Belle 4th, three years, J. W. Sadtler	105
BULLS.	
Mysie's Lad, one year, B. G. Stark, Livermore, Iowa	200
Choice Goods Ury, ten months, Jacob Ophine, Thor, Iowa	130

Creamery property at Mt. Carmel, Ia., for sale, including necessary buildings, grounds, machinery. M. J. Berger, Sec., Carroll, Ia., R.2.

CHEAP R. R. RATES VIA M. & ST. L.
Every Tuesday homeseeker round trip tickets to Minnesota, North Dakota and Canadian Northwest, also first and third Tuesdays to Montana, Washington, etc., at one fare plus \$2.00.

Summer tourist round trip rates to Minneapolis and St. Paul, also to points in Minnesota and North Dakota on sale daily after June 1st, return limit October 31st.

Special round trips daily June 1st to September 15th to Portland, Seattle, San Francisco and Los Angeles.

For particulars call at the M. & St. L. ticket office, 512 Walnut St., Des Moines, Iowa.

The Wabash, "The Banner Route," has arranged for the following low rates, available to the public:

Los Angeles and return, on sale September 2d to 14th, inclusive, \$54.25, good until October 31st.

Buffalo, New York, and return, October 10th, 11th, 12th, \$24.15, final limit October 19th.

Toronto, Canada, and return, \$23.55, account Sovereign Lodge I. O. O. F., final limit October 21st.

For further information address F. C. McMillan, D. F. & P. A., or L. R. Davis, P. & T. A., 512 Walnut St., Des Moines, Iowa.

NEW YORK. CHICAGO.

OVER 5,000 BRANCHES AND LOCAL AGENCIES.

A Very Lame Excuse

Is that offered by other Cream Separator concerns, when they tell you that even though they do not extract all the cream what they leave in is not wasted because it goes to fatten the pigs. This is a fallacy. Professor Haecker, of the Agricultural Department of the University of Minnesota, declares that there is as much food value in skim milk as in whole milk. Therefore, the cream remaining is wasted.

You prevent all this waste by using

Iowa Dairy Separator

What you want is every particle of the cream, and this is exactly what you get with the "IOWA." Write at once for catalog 25 and full information, which will come free by return mail. Address,

The Iowa Dairy Separator Co.,
Waterloo, Iowa.

BUTTER-BRED Holstein bull calves, 6 to 8 months old, sired by Prince Inka, (13 A. R. O. daughters), and out of A. R. O. dams, \$50 each. No females now for sale. G. C. Mosher, 605 Bryant Bldg., Kansas City, Mo.

Great Western Railway sells tickets via all steamship lines on Great Lakes in connection with their line to Chicago, or St. Paul and Duluth. From this time until September 1st is the time to sail the lakes and see Duluth, Superior, Isle Royale, the Copper Range, Sault Ste Marie, Mackinac Island, Detroit, Toledo, Cleveland, Erie, Buffalo, Niagara Falls and other points of interest. Call or write for full information. E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

NEW ENGLAND AND CANADIAN POINTS.
The Chicago Great Western Railway will sell round-trip tickets to the above points at very low rates on certain dates this summer. It will pay you to call on city ticket agent, 514 Walnut St., Des Moines, Iowa.

Lost Strayed or Stolen—One Cow

That is about what happens each year for the man who owns five cows and does not use a Tubular cream separator. He loses in cream more than the price of a good cow. The more cows he owns the greater the loss. This is a fact on which Agricultural Colleges, Dairy Experts and the best Dairy men all agree, and so do you if you use a Tubular. If not, it's high time you

did. You can't afford to lose the price of one or more cows each year—there's no reason why you should. Get a Tubular and get more and better cream out of the milk; save time and labor and have warm sweet skimmed milk for the calves. Don't buy some cheap rattle-trap thing called a separator; that won't do any good. You need a real skimmer that does perfect work, skims clean, thick or thin, hot or cold; runs easy; simple in construction; easily understood. That's the Tubular and there is but one Tubular, the Sharples Tubular. Don't you want our little book "Business Dairy men," and our Catalog A. 121 both free? A postal will bring them.

The Sharples Separator Co.
West Chester, Pa.
Toronto, Can. Chicago, Ill.

POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

RATIONS FOR LAYING HENS.

No one appears to have found just the only feed for laying hens. Many very successful men have a good ration which they feed and so long as it is satisfactory they do not make attempts to find a better. Some of the various state experiment stations have been experimenting along this line and we give a few of the results: "As regards the general food requirements for poultry, W. P. Wheeler, of the New York Experiment Station, in a recent summary based on station work, points out that the construction of the digestive apparatus of poultry and other birds indicates extreme efficiency and a capacity for rapid work. Like any complicated and delicately adjusted apparatus, he suggests that "it should not be overloaded nor violently disturbed when running at high pressure. It may be said to run at high pressure while the extremely rapid growth of young birds occurs, and during the extended laying season, for the resulting products call for an uninterrupted supply of food and the transformation of all material that is available. It should be borne in mind that 'growth and egg production can only be sustained by the food in excess of that required to support life.' * * * Hens in full laying seem to require rations which have a larger relative content of protein and ash, and show an increase in fuel value of 15 to 40 per cent, according to size, over those required for maintenance."

According to Professor Wheeler's estimates, when the egg yield is assumed to be 100 per year, the production of a pound of eggs requires 4.56 pounds of digestible organic nutrients in the food, and each pound of increase in the egg yield above this limit required 5.1 pounds of digestible organic nutrients.

As a sample of a ration which would correspond to the requirements of the

standard mentioned above, Professor Wheeler suggests the following for hens weighing five to eight pounds: cracked corn, one pound, wheat, .75 pound, corn meal, .75 pound, and .5 pound each of wheat middlings, buckwheat middlings, and animal meal, with .66 pound of fresh bone and .75 pound of young green alfalfa.

The natural food of poultry consists of grains, insects, green forage, and grit, and accordingly in domestication it is reasonable that they should be fed cereal grains and other milling products, such animal feeds as meat meals and skim milk, and should also receive an abundance of green feed or such substitutes for it as roots or steamed clover. Oyster shells, grit and an abundance of clean drinking water are also prime requisites.

In the United States corn is a favorite feed for chickens, though, as Professor Wheeler states, common grains "seem practically interchangeable and many grain by-products can be freely substituted for different whole grains or for each other, and all combined as desired."

The Massachusetts station has compared corn with wheat and corn with buckwheat, beef scraps or other animal feed constituting a part of the ration in every case. As regards corn and wheat, the results for several years have not been entirely consistent, though on the whole the egg yield on both grains has been satisfactory. In a comparison of corn and buckwheat, the egg yield has been rather small with the advantage decidedly in favor of the corn.

In a test at the Utah station the egg yield on a wheat ration was better than on corn, though both grains were fairly satisfactory. Substituting sunflower seed for most of the corn did not materially affect the egg yield, though the cost of feed per dozen eggs was somewhat greater on the sunflower seed ration.

In Ontario, an important poultry region where the winters in general are more severe than in the United States, wheat, according to Prof. W. R. Graham of the Ontario Agricultural College, is the most popular feed. Corn, he states, is not used there to so great an extent as in the New England States, though he believes that its use is justified and might be profitably extended. Owing to its high fuel value and fat-producing qualities, it is an important addition to winter rations. According to Professor Graham—

"Oats should be a first-class food for poultry but, owing to the large percentage of hull, they are not relished by chickens, and for this reason they are somewhat indigestible. When ground, they are used pretty freely in mash food; also, the rolled and granulated oatmeals are used for feeding young chicks. The ground oat, without the hull, is used extensively for fattening fowls.

"Barley, either whole or ground, is very good. It has rather too much hull; but otherwise it is a satisfactory food. It is considered by many to be next to wheat in point of value.

"Buckwheat is very popular as an egg-producer in districts where it is grown extensively. Some difficulty is at times experienced when first feeding it to fowls in getting them to eat it, but this is usually overcome in a day or so, if other feeds are withheld. Boiling the buckwheat will sometimes start the birds to eat it. After the birds once get accustomed to its appearance, it is much relished by them. Ground buckwheat is an excellent food to use in a fattening ration. It is somewhat like corn in its fattening properties, and therefore it is better for winter than summer use.

"Shorts and wheat bran are both used extensively in making mashies, or soft foods. They are excellent foods to use in maintaining the health of the flock.

"The relative merits of whole grain and of ground grain made into a mash have been studied from time to time. The practice of successful poultry raisers and the results of numerous tests show that to secure the best results the day's rations should be made up of both sorts of feed. In experiments at the West Virginia station better results were obtained with both old and young fowls 'when about one-third of the grain ration was fed ground and moistened than when all of the grain was fed whole and scattered in the litter.'"

LOW RATE EXCURSIONS.

The Missouri Pacific Railway and the Iron Mountain Route will sell round-trip tickets to points in Texas and Louisiana for \$20

— for Pigs in Clover

Swift's Digester Tankage

Clover-fed pork is cheap pork. If pigs on clover or alfalfa pasture are fed Swift's Digester Tankage daily, the quality of the pork will be improved and the cost greatly reduced.

It Brings Results

Swift's Digester Tankage will make summer hogs weigh better, ship better and Sell Better. Tankage-fed hogs nearly always top the market. We have printed a Little Book, "Protein for Profit." Let us send it to you.

HORTICULTURAL TOPICS

THIS department is conducted by an experienced horticulturist. All questions relating to horticulture will be answered if of sufficient general interest to warrant a reply in this department. Communications and inquiries upon horticultural topics should be addressed to this office.

Marketing Fall Apples.

To the Editor of The Homestead:

The prospect for a good crop of apples, particularly the autumn varieties, is very good at this time in most localities. The great scarcity which has prevailed the past year should insure a good price for all the marketable apples. Yet many growers are certain to meet with disappointment this year as usual, and a feeling prevails among those who have a fair quantity of apples for sale, that whenever there are enough to be worth while, the prices are so low there is no profit. The consumer sees conditions from a different viewpoint, and this year, as in any year, a good product is sure to bring a fair price.

The reason why the average farmer gets a low price for the apples he brings into town is that they are in such condition that they are not worth more than what he gets for them. This is brought about through no defect of the fruit itself, but because of the defective methods of handling and failure to appreciate certain principles upon which successful apple marketing depends.

One of the first errors is to mix all kinds of apples, sound and wormy, hand picked and windfalls, autumn and winter, in one bag or basket. In it you may find some that are fit for eating, others which are suitable for canning, some that are best for cooking, and others which are good for nothing. The average customer cannot distinguish between a Yellow Transparent and a windfall Ben Davis, and taking a number of apples at random from the lot which she has purchased, attempts to use them for any one of the half-dozen common uses, with a result so unsatisfactory that she gives up the attempt with disgust.

In the first place, the variety should be kept separate, and each should be sold for exactly what it is suited for and nothing more. Wolf Rivers are

O. L. Chase

I Am the Paint Man

EIGHT-YEAR GUARANTEE—TWO GALLONS FREE TO TRY—6 MONTHS' TIME TO PAY

MY PAINT is a new paint—made in a new way—sold on a new plan. It is unique. My paint is unlike any other paint in the world. It is made especially for you after your order is received, and I pack your order in hermetically sealed cans. I ship my thick pigment, which is double strength, freshly ground, in separate cans, and in another can I ship the pure, old process Linseed Oil—the kind you used to buy years ago. Any child can stir them together. This is the only possible way that you can get fresh paint for your work, and fresh paint is the only good paint.

I sell my **O. L. Chase Made-to-Order Paint** direct from my factory to you at a very low factory price. You pay no paint dealer's or middle man's profits. It is the most economical good paint made, for first cost, and because of the extraordinarily long wear, it reduces the average of your painting bills at least fifty per cent. I pay all freight on six gallons or over. I allow you to try the whole

order to paint your buildings. After you use it, stand off and look at it. If it is not entirely satisfactory and as represented in every way, the paint will be yours free.

No other paint manufacturer ever made such a liberal offer, and I make it because I manufacture the best paint ever put on the market. I go even further. I will sell my paint on six months' time to responsible people if desired. This gives you ample time to test its value.

Back of my agreement for quality, I also put a guarantee for eight years, the longest ever put upon a paint, and back of that is my \$50,000 bond. Before buying paint, be sure and send for my paint book. It will not cost you a cent. It is the finest paint book ever issued. It tells the whole of my paint story in the most convincing and common sense argument, and with it comes big samples of all colors to choose from. Drop me a line at once. I will be glad to forward you the booklet, with a copy of my written guarantee, etc.

Yours truly, **O. L. CHASE, The Paint Man,**
701 Olive Street, St. Louis, Mo.

fair canning apples, but the man who sells them for eating apples is not worthy of the confidence of his customers. Windfall apples should be separated from hand-picked; the former must be used immediately, the latter may be kept for some time, if necessary.

Apples should never be marketed in sacks. No apple can be put into a sack, carried, handled, loaded and hauled to market without becoming bruised to such an extent that its appearance, quality and keeping will be very seriously impaired. Boxes or baskets, though not so convenient, are much more satisfactory, and with proper care and handling apples thus treated may be taken to market in the finest shape.

If one wishes to obtain a good price, he must sell good goods. It pays to sort apples, rejecting all bruised, undersized and misshapen ones. Such may be used for some other purpose, as for cider or to sell to a less particular trade.

It pays to be honest in selling apples as in any other fruit. Anyone who will, may fool a buyer who is not a keen observer, but he cannot fool the same person twice. Where one is not a large grower, the most satisfactory results are obtained from having a good line of retail customers. With such one may be certain of a good market for any amount of first-class produce. In the larger cities, a person who has good produce in the proper packages, carefully picked and sorted, can, if he observes proper business methods, and uses honesty in all his dealings, have a trade which will furnish him a market for all he has to sell, and at a price far above that paid to the average grower for the average product. Franklin Brown.

The Family Pig.

To the Editor of The Homestead:

The pig, or rather pigs, I have in mind in the above title are the pen of pigs kept by the small farmer, fruit grower, or suburbanite, who does not breed hogs, but thinks it profitable to keep one or more to consume the swill from the kitchen and the unmarketable fruit, vegetables, and general waste.

For a number of years I have been feeding from one to five pigs in a small pen near the house with most gratifying results in the production of fine pork. Those results I attribute to a few simple rules, easy of execution, but requiring intelligent observance. First of all is the question of where to build the pen. Two considerations should govern this—nearness and ease of access and the protection of the house from offensive odors, sights and sounds. I built my pen to the northeast of the house, from which quarter the wind rarely ever blows, and directly behind the closet, which hides it from view and provides a good board walk the greater part of the way. As for sounds, it may be said that the pigs should never be allowed to become hungry enough to squeal, and that promptness on their part in reporting any dereliction of the feeder should be accounted a useful quality. The construction of the pen calls for but little and cheap material, provided certain essentials are furnished. In dimensions eight to ten feet square is large enough for three or four pigs. First lay a floor of plank. This can be two-inch oak raised well up on good sills, or it may be refuse inch stuff laid on rails, scantling, or anything at hand, and little, if any, above the ground. Positively at least half the pen must be floored for the trough and bed, as I regard this as the most important feature. The trough I put preferably on the west or south side, and upon the floor so that the pigs may have firm footing while eating. It should be very strongly made out of two-inch stuff and firmly fastened in place. Ties should

GINSENG is a money making crop. Why not grow it in your garden? Our stock is northern grown. We can start you. Roots and seed for sale. Write us today; literature free. Gilbertson Nursery Co., Address, Dept. C., St. Ansgar, Iowa. (Est'd. 1878).

WANTED Salesmen to introduce the world's wonder in fruits. Burlbank's new stoneless plum (miracle). Choice of territory. Cash weekly. We give the best proposition offered salesmen. Oregon Nursery Co., Detroit, Michigan.

be nailed across the top to divide it into sections and give each pig room and protection from his neighbor. It is better to mortise these in and they help to strengthen the trough.

Next, board up a corner on the north side tightly so no wind can enter. If very cold, bank it with earth or anything that will exclude the cold, and roof it with plank. Then fasten a broad plank along the side of the trough so it will come through the side of the pen far enough that the swill can be poured on it and carried directly without waste into the trough. With such a plank as long as the trough the feed can be poured in at different places and the strongest hog cannot monopolize the best place as is the case where a narrow chute is used to convey feed to the trough. It is an improvement to cover this plank, or planks, if two or more are used, with tin to keep the pigs from gnawing it and to make a smoother slide. Thus arranged the feeder can pour in the swill from the outside and avoid lifting the bucket over the fence and watching a chance to pour it between the expectant heads, which he often involuntarily baptizes. The pen is now completed, with the exception of a little bedding straw, to be used only in quite cold weather, and an old broom to clear water out of the trough. Of course, as above described, this pen can be built in a permanent and substantial manner of good lumber or it may be constructed of odds and ends lying about. In either style the essentials of floor, roof, and bed can be secured. The next thing is to get the pig, or pigs, and I would caution on two points: spare no money and trouble in getting good stock. I get mine twenty miles away, from a friend who breeds thoroughbreds, and

generally has some that are off color or deficient for shipping purposes which he is willing to sell at reduced prices. Secondly, never get one pig more than you can keep full at all times. I prefer to buy them when of thirty or forty pounds weight, though this is a matter of indifference.

In regard to feeding I would emphasize the value of absolute regularity, both as to time and quantity. I feed three times a day, though twice a day would do when pigs are well grown and they are accustomed to it as a rule. Never omit a feed; give them only what they will eat up clean; increase the feed as they grow; never let them get hungry enough to squeal between meals. These are all good rules.

As to the kind of feed, the principal part is the kitchen swill, into which I stir shorts enough to slightly thicken it. On this ration alone the pig will thrive, but in the winter it will pay to cook turnips, cull potatoes, peelings, and such wastes, and in the summer to pick up the wind-fall and wormy fruit. A pig thus fed will make wonderful gains in weight, not less than two pounds a day, and the choicest quality of pork. Pigs penned in April should weigh 400 pounds in November, and penned in November will make an equal gain through the winter. But take the same pigs and put them in a pen without a floor that they will soon root into a quagmire, without a roof to shelter them from cold rains and sleet and snow, without a dry bed where they can sleep warmly, and with a trough with one end up and the other down and half full of mud, and your profits will be a minus quantity; besides, the owner of such hogs should be prosecuted for cruelty to animals. L. R. Johnson.

OUR HOME DEPARTMENT

ALL communications intended for this department should be addressed to Post Office Drawer 1127, Kansas City, Missouri.

AMONG OURSELVES.

Before commencing the program proper, there is something I should say. I thought it was understood pretty generally that all communications for the press must be accompanied by the address of the writer, not necessarily for publication, but as a matter of good faith, but I am all the time receiving anonymous letters. This last week I have had half a dozen, some of them written on both sides of the paper. One of these had a postscript which said the full name would be given if desired. It must be given, if the writer wishes to see her letter in print. Several girls who say they work in the fields and are not ashamed of it, are evidently ashamed to have me know who they are, for they sign only initials, and M. R. T. took the precaution to carefully erase the name of her postoffice, which was printed upon the envelope she used. It is quite possible some of the writers of unsigned letters are unacquainted with newspaper usage. The writer who "presumes that the thing we Among Ourselves are aiming at is the capture of that slippery eel, happiness," could have no reason for concealing his or her name. Neither could M. H., whose charming little letter of appreciation for my editorial passing on Dr. Van Dyke's "Wood Magie," gives me much pleasure. Some of these letters I should very much like to use, and will use if the writers will take the trouble to send me the omitted address; otherwise into the waste basket they must go. While I am speaking on this matter, let me suggest that where there is fear that the name be not erased or torn off before the manuscript is sent to the printing office, it can be placed on a separate slip of paper. This is such a big country, there are so many persons of the same name, that a name tells very little, if anything, in the majority of cases. I wonder that the friends have the horror that most of them seem to have of having their names published, but I respect their feelings and never publish the name when requested not to do so.

And now to our program, which promises to be of unusual interest. Last week we should have had the conclusion of some Bird Notes by Mrs. Cornelius. Let us have them now:

Another joy of that spring was in finding Wilson's ornithology in our public library and, after some scheming, getting the use of it for two weeks. It helped solve many of my problems, even if it is an old book, and made from eastern observations. July 5th—I verily believe the birds are coming to me. A Maryland yellow-throat came into the peach trees at the back door. Hearing a high, rich "wee chee, wee chee, wee chee," I slipped out and saw him as plainly as if I had him caged. He either did not see me or was utterly indifferent, for I examined him as long as I cared to follow his leisurely track through the weeds and low branches. He even stopped to dress his feathers. Such a beauty! Slender, graceful, warbler shape; yellowish olive above, yellow rump, clear yellow throat and breast, shading to ash, and the startling black velvet mask, with ash line above. And I remember how hot and tired I was, canning berries, when I heard his call; and how that few minutes rested me and gave me new thoughts. I think I even smiled at the mischief which baby hands are so sure to do when left alone for a few minutes. April 8th—

It was amusing to see the birds waking up this morning. Sparrows and juncos had lodged in the hedge. There would be a faint chirp, a stretching of one wing and leg, a shake all over, a stretch on the other side, a half-sleepy bit of song, then birdie hopped to a higher twig and was ready for breakfast. Of course I was out so early letting my birds out of their coops. June 2d—Another red letter day. I have solved the woodland mystery which has puzzled me for twenty-five years. It is the wood thrush, and truly his other name, bell bird, is suitable. I am sure I have often seen the birds and taken them for thrashers. Ah, I well remember the walks of that summer. In my arms was always the tiny baby, so frail it seemed she could not live the summer through. Could you now see the round-faced, tanned little maid who trotted beside me this morning to show the next baby her first bird's nest you might believe with me that perhaps that summer outdoors saved her life. Enough to show how a busy housewife followed up her "fad," and it is such a beautiful fad that no matter what new interest rises she always comes back to this one with the old zest.

Mrs. Cornelius has evidently eaten of the magic berries described by Dr. Van Dyke. There must be others. Let us hear from them. The circle is very much stirred up over Aunt Ruth's remarks a few weeks ago, but before we take that matter up we shall hear Mrs. M. C. S. D. on a point introduced by Mrs. McKelvie, and since discussed by several of the friends:

It is time for someone to rise and set to rights a few subjects lately touched upon in our circle. Some of the sisters seem to think the men in need of defense. I am sure that Mr. J. B. Young and all other good and right-minded men understand the references by Mrs. McKelvie and others to the trying experiences of farmers' wives to refer to homes where such conditions really exist. Among individuals we frequently meet with one who considers it a virtue to profess ignorance of existing evils. The wise person looks with a clear eye upon human life in general and individual character in particular, and discerns the facts. Acquisitiveness is a mental faculty the normal exercise of which promotes the welfare of society and the happiness of home life. But it is a fact that many men allow themselves to be brought too fully under the influence of that faculty and after years of such living they become incapable of exercising the noblest qualities of manhood. Incapable to so great an extent that it becomes possible for a man to treat with indifference, perhaps with rudeness, the one having first claim upon his kindness and generosity, his wife, the mother of his children. Under such circumstances a woman's degree of physical endurance determines her ability to continue in ordinary health and also to provide for herself an income through chicken raising, etc. Because one woman can accomplish a great amount of labor about her home in one day it would be unkind indeed to assume that every other is able to do the same. Every clear-minded member of this circle knows that many a woman who would be delighted to have a hammock and other articles for ornament and pleasure about the home, finds that her every dollar is needed for necessities. The culture of ornamental plants in a yard where no fence is provided and where stock have occasional range should not be attempted. A hog seems to think some lovely shrub has been grown for the purpose of providing him a feast. In these cases two questions arise: How the husband may be led to understand the wife's feelings and circumstances and to realize the extent of his duty toward her, and what course is best for the wife to pursue?

I have suggested to Mrs. M. S. C. D. that she come again and reply to the questions she has asked. The circle will thank me, and look forward to her return, I think.

The matter of women working out-of-doors seems to touch a goodly number of our readers. Letters have poured in. For today's meeting I have decided to give first place to states from which we hear less often than some others. "An Oklahoma Wife," friends:

I read in the August 2d Home Department the article on girls hoeing in the garden, making hay, etc. Let me ask the sister where we find the healthiest women in the land. Is it among the wasp-waisted piano players and those who entertain at social functions, or is it among the girls who go out into the open air and exercise their muscles as well as their brain? If all of our ladies or girls were like the sister there would be many chores gone undone. There would be a great quantity of stuff to go to waste that is now saved by daughters of farmers putting their shoulders to the wheel at the proper time. We who have been raised on the frontier pity the poor girl who has not enough strength to get out into the field when necessary and drive a mowing machine or a binder, or even a plow. I have seen girls in summer time who could and did drive their fathers' binders and mowing machines, thereby saving \$2.50 per day, or perhaps a crop, and in the winter I have seen one of the same girls teaching a school. On Sundays she could play an organ, if not a piano, as well as most of our girls. And when she took upon herself the care of a home and children she was physically able to go through with it with very little inconvenience. Then, sister, look if you please at our German neighbors and see the girls of their race. They live outdoors, work outside and breathe the pure air of heaven, and enjoy the sunshine, and while they may not all have as much refinement as the basket ball and piano players they have what is of more importance to themselves and to our nation—

BOYLES COLLEGE, 1804 HARNEY ST., OMAHA, NEB.

good health. They are bringing into the world big, healthy boys and girls that have muscle and brawn, while the little wasp-waisted creatures are giving us poor, sickly children, which, if continued long enough, will make of us a nation of degenerates. If all of our daughters were sure of marrying rich and sure of being able to keep the riches they did marry, then it might not be so necessary for them to assist in the work, but riches often take unto themselves wings and fly away, or the "gude mon" of the house lays him down to sleep and leaves the widow with a mortgage on her property and a family to feed and clothe; then she needs to know something of a more substantial nature than basket ball or how to plunk, plunk, on a piano.

It will be admitted that "An Oklahoma Wife" supports her view with both spirit and good judgment. Mrs. Mead, of Colorado, seconds her ably:

I am moved to contribute my mite in defense of the woman who does outdoor work or allows her daughters to do it. The woman or girl who does a reasonable amount of outdoor work will have good health and steady nerves—things possessed by comparatively few women. Of course, the amount of work done should be regulated by the worker's strength; and a woman is far less likely to overdo when in the field than she is at housework. I am country-bred and have worked outdoors all my life, and can do almost anything from setting a hen to mowing hay or breaking a colt; in fact, have broken a good many colts, both to saddle and harness, and never broke one that proved untrue in any way. Have plowed, hced, cultivated, picked up potatoes, in short, all kinds of work that comes a farmer's way. I have a family of three children, ranging in age from eight to twelve, and they have been raised to know better than to interfere with the possessions of neighbors when visiting and to obey when told anything. My son takes care of his own room; can get a plain meal and wash dishes; and my daughters are learning "men's work." A woman who can handle a team and understands the ins and outs of the farm work is very much more independent than her sister who has to take her husband's word for it that he "can't spare a horse for her to drive to town." If a woman works in the field a man should be willing to return the compliment and help in the house. Also a woman must neglect her housework to a certain extent when in the field or she will overdo. I have not suffered in any way that I can see by doing men's work. Some claim it makes a woman coarse and mannish, and some women who work outdoors certainly cannot be classed as refined, but is it the work or inherent characteristics that cause the lack of refinement?

Supporting Oklahoma and Colorado,

comes Michigan, in the person of Mrs. King:

I wonder if the readers of the Home Department would care to hear from Michigan. We enjoy reading this paper very much. I think Mrs. Larsen must have all she can do and more than she ought to do. Does she get a rest in the winter when her husband does not have so much to do? I do not see why Aunt Ruth need be ashamed of us women who work outdoors and help our fathers and husbands any more than we need be ashamed of the women who sit in the house and play the piano and read dime novels and take patent medicine, and think the men are good for nothing but to wait on them. I, for one, do not think it a disgrace to work in the garden, hay or corn fields any more than I think it a disgrace for husband to help me wash, or cook, or wash dishes when I have more than I can do. You girls need not be afraid to learn to milk the cows. I would not give much for the man's sense if he did not appreciate the woman or the girl that could milk when he had to work late and was tired out, as much and just a little bit more than he did the one who jumped up from the rocking chair or couch to empty the water pail.

And now Nebraska, represented by Mrs. Rose Barker:

In response to Mrs. Walker's suggestion to jot down our thoughts, will you allow an interested reader to come into the circle? In reply to Mrs. Belle Larsen's question, "Shall mothers allow their daughters to do general outdoor work?" It depends upon the woman. If the girl has been highly educated she will probably not be able to do it, if she is willful, which is doubtful, for if you look the matter square in the face much of our modern education incapacitates its subject for hard labor or physical endurance. See the foreign women in our midst, used to toil indoors or out, and contrast them with the average high school girl calling many of life's duties drudgery; yet someone must perform the tasks in order that the household machinery may move smoothly. The same task taken hold of willingly is lightened by half. The help question is the most serious one which confronts the farmer and his wife. Teach your daughters to be willing to assist in the outdoor work when necessary at least, and your sons just the same, to perform many tasks about the house, that each may be willing to do whatever the hand findeth to do. In later years they and their loved ones shall rise up and call you blessed.

To my very great surprise, no one has rallied to the direct support of Aunt Ruth. I say direct support, because incidentally some of the letters received recently do support Aunt Ruth's posi-

dion. This week we shall have one of these, from Mrs. Lawrence, of Kansas:

Too often do we hear the cry from the women of our farmer folk, "How I hate the farm. Work is never done with here. We have no time for rest or recreation." Dear sisters, let me tell you there is a remedy for all this—just resolve to attend to your household duties alone and worry not about outside affairs. What if the crop is to be made; what though the men are anxious to get to the field, are you not doing your part toward making the living when you keep the machinery of home and life running smoothly, preparing the meals for famished men, keeping the clothing in readiness, and attending to the hundred and one duties which fall to the lot of the careful housewife? All this tends to make the home attractive and restful to the weary ones when the day's labor is ended. I ask, why should the woman be expected to leave her own pressing duties to wait on the men because they are anxious for an early start to their own work? "Wife, you better feed the calf this morning, turn the cows in the back pasture, be sure and send water to the field about 10," and the like. I contend that it would be just as reasonable for the wife to say, "Here, John, I have much to do today, will you wipe these dishes, sweep the kitchen, please," etc. "You can work a little faster in the field to make up for lost time." As to pin money I say decidedly that in my opinion the wife and daughter should be entitled to the egg and chicken money as a small recompense for their increasing labors during the year. Does the husband or brother go to town with empty pocketbook? No. Neither do they ask for money. They are supplied with proceeds from some farm product. And why should not the wife and daughter have the same privilege? Perhaps I am biased in these matters. Would he interested in hearing the opinions of other readers on this subject.

Next week we shall have a continuation of this matter. Before then, perhaps the women who agree with the stand taken by Aunt Ruth, without perhaps going as far as she does, will join her in protesting against women working in the fields.

Mrs. Myrt has a word for us on a subject which has, for those who look below the surface, a not indirect bearing upon the one under discussion:

Just how many children a woman should bear to fulfill her duty along that line should be settled by one—herself. No one else should dictate the number. I believe it is the earnest desire of ninety-nine women out of 100 to become a mother at some period in their lives. And having given birth to one child, nine-tenths of these willingly go down a second time to the very door of death that theirs may not be an only child, that their homes may be filled with childish prattle. Again and again, helpless babes are given birth till their very lives have been sapped out of existence. If a woman is physically able to become a mother every year or eighteen months and give each and every child the proper care and training, she is indeed fortunate—a woman to be envied. But the great majority of wives and mothers have not the strength and vitality to carry them through this trying ordeal without becoming sooner or later physical wrecks, nervous, broken down, or old before their time. Let each woman become a mother only just so often as she feels herself able, both bodily and spiritually, to give to the world a child of which she need not be ashamed. When each child is tenderly looked for and welcomed, when each mother consecrates her unborn to God and strives to give it the best of herself

that it may be sound in body and of an intelligent mind then the world will grow better. Is not our child, well born and properly raised, better than two, or even four, handicapped with disease or a sluggish mind? God pity poor, tired, nervous mothers, worn out with child bearing and child rearing.

We have had a number of letters of late, which it would be well if husbands and wives read in company. Mrs. Myrt's belongs to this class.

A couple of requests of a material nature bring us to earth again—to the kitchen, rather. "A Subscriber" asks for a recipe for making wine from wild grapes, and Mr. Prouty, of Greenfield, asks on behalf of the farmer with a big apple crop, how vinegar can be made at home.

HOME AND HOME MAKING.

LITTLE HELPS BY THE WAY.

Some murmur when their sky is clear
And wholly bright to view,
In one speck of dark appear.
In their great heaven of blue;
And some with thankful love are filled
If but one streak of light,
One ray of God's good mercy gild
The darkness of their night.

—R. C. Trench.

One of the secrets of happiness is the using of little pleasures. So many wait for the larger blessings, and because they seldom or never come, miss all the joy. The deeper happiness comes gently and silently, and we need the discerning power to see it.—Every Other Sunday.

DON'T GIVE UP.

Sorrow came to you yesterday and emptied your home. Your first impulse now is to give up and sit down amid the wreck of your hopes. But you dare not do it. You are in the line of battle, and the crisis is at hand. To falter a moment would be to imperil some holy interest. Other lives would be harmed by your pausing. Holy interests would suffer should your hands be folded. You must not linger, even to indulge your grief. Sorrows are but incidents in life and must not interrupt us. We must leave them behind while we press on to the things that are before. Then God has so ordered, too, that in pressing on in duty we shall find the truest, richest comfort for ourselves. Sitting down to brood over our sorrows, the darkness deepens about us and creeps into our heart, and our strength changes to weakness. But, if we turn away from the gloom and take up the tasks and duties to which God calls us, the light will come again and we shall grow stronger.

PEGGING AWAY.

Men seldom mount at a single bound
To the ladder's very top;
They must slowly climb it, round by round,
With many a start and stop.
And the winner is sure to be the man
Who labors day by day;
For the world has found that the safest plan
Is to keep on pegging away.
You have read, of course, about the hare
And the tortoise—the tale is old—
How they ran the race—it counts not where—
And the tortoise won we're told.
The hare was sure he had time to pause
And to browse about and play;
So the tortoise won the race because
He just kept pegging away.

—F. H. Sweet.

TRUE ENOUGH.

"That's a hornet nest. Don't go near it," said the farmer, who was showing the city boarder over the place.
"We got one of 'em at home," stated little Sammie Henpeck.
"You have?"
"Yes. I heard papa tell Mr. Sports that he stirred one up every time he stayed too late at the lodge as soon as he got into the house."

THE RIPE CUCUMBER.

Ripe cucumbers make delicious sweet pickle, catsup, chowchow and other good dishes. To use them for sweet pickles, pare, seed and cut up seven pounds of them. Boil in vinegar and water, half and half, after adding a little salt, until they are clear looking, but not overdone; drain them in a colander; then to one pint of fresh vinegar add three and one-half pounds of sugar and let it come to the boiling point; add the cucumbers and scald them; drain them again and when cool put in a jar with a sprinkling of stick cinnamon, cloves, allspice, mace and a few kernels of black pepper; sprinkle also a few raisins between the layers of pickle; then pour the juice or the sirup of vinegar and sugar over them and seal the jars. This pickle will be ready for serving in a few days. A good chowchow is made as follows: Peel enough ripe cucumbers to make three quarts when chopped; chop fine and add one and one-half quarts of white onions, also peeled and chopped; salt the pickle to suit the taste; put it in a coarse bag and drain it for twenty-five hours, after placing a heavy weight over it; when well drained add two ounces of white mustard seed, two finely-chopped green peppers and one tablespoonful of ground black pepper; mix all thoroughly together and add enough vinegar to cover them; put them into a stoneware jar and add a little grated horseradish and a few nasturtium seeds. The following recipe is for an acid preserve or pickle that is well liked served with roast mutton or almost any roast: Peel firm, ripe cucumbers; remove the seeds and cut them into slender strips about an inch wide and three or four inches long; put them into enough cold vinegar to cover them and let stand twenty-four hours; then drain them and just cover again with fresh vinegar, and to

OAK STOVE HEATER,
For All Kinds of Fuel.

Oven Thermometer

every quart of vinegar add two pounds of sugar.

GRAPE JUICE.

Select choice, sound Concord grapes. If you buy them use none that are broken or moldy; pick from the stems, wash, place in a colander for the dirty water to drain off, then place in a white enameled preserving kettle. To each ten pounds or six quarts of the stemmed grapes add one quart of cold water; place over the fire and boil gently for ten minutes or until the pulp is thoroughly cooked and broken. While the grapes are cooking, frequently stir with a wooden spoon. Remove from the fire and express the juice through a cheesecloth bag; replace over the fire, add a very scant half pint of granulated sugar to each quart of juice; remove any scum that arises. When the sugar is dissolved and the liquid has reached the boiling point, strain through a cheesecloth or jelly bag; replace over the fire to keep it very hot while bottling. Bottle, cork and seal. Use bottles that have been thoroughly cleansed with water as hot as can be safely used. They should be filled while warm. To prevent them from breaking while filling place in them a clean wire of sufficient length to extend into the funnel. In using fruit jars instead of bottles a large spoon is better than wire. Do not use a wooden spoon. Do not allow grape juice to remain in a tin vessel one minute. If the hot juice is strained into a crock, the crock should be previously thoroughly warmed or moderately heated to prevent breaking. Keep in a cool place.

RELISHES.

Pickled Onions.—Peel small silver onions and put them in a pan of boiling water. When they look clear take them out with a strainer ladle and place on dry cloth. When quite dry put them in a jar and cover with hot, spiced vinegar. When cold weight them down and cover closely.

Cold Catsup.—One-half peck ripe tomatoes, skinned, two red peppers and two large onions, all chopped fine; add one cupful grated horse radish, one-half cupful salt, one-half cupful white mustard seed, two tablespoonfuls black pepper, one cupful brown sugar, one teaspoonful each ground cloves and mace, two teaspoonfuls ground cinnamon, and one quart cider vinegar; mix well, but do not boil.

Chili Sauce.—For Chili sauce use ripe tomatoes. To each eighteen allow two and one-half cupfuls of vinegar, one cupful of sugar, chopped green peppers enough to make one cupful, three onions chopped fine, two tablespoonfuls of mixed ground spices, cloves, allspice and cinnamon; boil all together until a rich sauce is formed and the flavors are so well blended that no one is especially distinguished from the rest; pack in small jars and store in a cool place.

Governor's Sauce.—One peck of green tomatoes, four large onions, six red peppers, one teaspoonful grated horseradish, one teaspoonful each of cayenne and black pepper, one teaspoonful mustard, one-half cupful sugar; slice the tomatoes and sprinkle over them one teaspoonful salt; let lie all night; then drain well and simmer all together until cooked through; seal immediately.

Dressmaking and Millinery—No. 531.

Sylvia Silverthorne, Muscatine, Iowa.

[All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.]

The tie of maline that has a big, fluffy bow and ends at the throat is again fashionable, and while most of us would prefer this in snowy white, fashion is setting the seal of her approval on brown for the purpose. And this, too, without regard to the color of the costume with which it is to be worn. As we have been used to seeing this maline it is very perishable stuff, but it is now to be had in a water-proofed kind that will bear perspiration as well as such usage as would be required of it for the purpose mentioned. This variety is called malinette. Maline or malinette is also being extensively used for large boas such as were very fashionable a few years since. One having time and skill in such lines may make one for herself at small expense, or they may be purchased ready to wear. For general wear black is usually chosen, but for evening or for any

"dress" affair tints and colors, as well as white, are favored.

Mention has been made of the various forms in which the coat for fall and winter wear will come to us, and it is well to bear in mind what modes one may select from and yet be fully up to date. Designs will be given from time to time, each of which will be stylish, but not more so than will be other types that we may be able to show at once.

Many of these outer garments will be built on the Empire lines, and a design for one of these is shown herewith. As pictured, it is cut in the half length, but if the garment

[5419 Empire Coat, 33 to 40 Bust.]

is wanted either longer or shorter the length may be added to or taken from as desired. No. 5419 is cut with fancy yoke and there are pleats at front and back. The fronts are full length, while the side fronts are joined to the yoke portion. There is a small shawl collar. The sleeves are cut in elbow length and finished with a hand and cuff, and are also extended by means of a deep cuff that may be worn or omitted. The trimming is of banding and applique, but in this any

[5418 Fancy Pleated Skirt, 22 to 30 Waist.]

variation is admissible, even stitching being as much the vogue as trimming as in former seasons. For early fall wear the coat may be of taffeta or any of the usual silks, or any of the light-weight jacket cloths, or it

SHOTGUN SHELLS FREE

AS A GUARANTEE that our less powder, loaded 12, 16 and 20-gauge shotgun shells are the HIGHEST GRADE MADE IN THE WORLD, and will shoot stronger, kill farther, make better pattern and penetration, give less smoke and recoil, and give better satisfaction in every way than any other shotgun shells made, although our special price are about one-half what others charge, WE MAKE THIS GREAT FREE OFFER:

WE WILL GIVE ANYBODY one full large size box of shotgun shells FREE TO TRY.

OUR SPECIAL PRICE for smokeless shells is 39 cents per box of 25; \$7.25 for a full case of 500; much less than others charge for black powder shells, about one-half what others charge for smokeless shells that will not compare with ours.

FOR OUR BIG FREE BOX TRIAL OFFER, and for our inside prices, on a postal card offer, or in a letter to us simply say, "SEND ME YOUR AMMUNITION OFFER," and the great offer will go to you by return mail, postpaid, together with our new Sporting Goods Catalogue, showing metallic rifle and revolver cartridges at 19 cents per 100; \$5.00 revolver for \$2.69; \$5.00 rifles for \$1.69; \$5.00 breech loading shotguns for \$2.28; \$25.00 double barrel hammerless shotguns for \$9.95. Don't pay three prices. Write for our ammunition offer today. Address, SEARS, ROEBUCK & CO., CHICAGO

LIGHTNING STOPPED

FROM burning out phones or houses or shocking people during thunderstorms by the J. W. Pedigo Lightning Arrester. It disconnects your house and phone from outside wires. So safe and simple a child can operate it. Easy to install. Cuts and circulars free. Agents wanted.

J. W. PEDIGO,
LUCAS, IOWA.

may be of the suiting if a coat and skirt suit is to be made. For later wear the usual heavy-weight cloths will be used for such garments, but if undertaken by the home dressmaker a loose weave should be selected as likely to give better results. Pattern No. 5419 is cut in sizes for a 32, 34, 36, 38 and 40 inch bust measure.

A fancy pleated skirt in one of the favorite modes of the fall season is pictured in No. 5418. It is cut in nine gores, extensions on each of these forming the pleats. The panels are separate and are stitched into place. As shown, these panels are of lace, dyed to match the material, the medallions being treated in the same way. If made of

the material the panels may be trimmed in any way liked, or simply stitched about their edges. No. 5418 is cut in sizes for a 22, 24, 26, 28 and 30 inch waist measure.

Send eleven cents in money (not stamps) for any pattern wanted, these or others. Address all orders to Sylvia Silverthorne, Muscatine, Iowa.

PLEASANT FIELDS OF HOLY WRIT

SAVE for my daily range

The International Sunday-School Lesson.

Third Quarter. Lesson X. Luke XVIII, 35; XIX, 10. September 2, 1906.

Bartimeus and Zaccheus.

[Note: For evident reason, attention is confined to the latter part of the lesson prescribed.]

Jericho!—what stirring scenes the name recalls: Rahab and the spies, all saved by a rope of significant color; Joshua meeting the angel with drawn sword; Israel's march about the city to ram's-horn accompaniment; Achan's troublesome wedge of gold and Babylonish garment; Elisha healing the spring of waters; the school of the prophets; not to speak of the Oriental splendor of Herod and his son Archelaus! But for ethical purposes, every other incident connected with this City of Palms must give place to Jesus' interview with Zaccheus.

It was a busy day in that commercial city, the revenues of which were esteemed a gift a Roman triumvir might appropriately bestow upon an Egyptian queen as a love-token. A singing pilgrim caravan from Galilee and Perea was in passage for the Passover at Jerusalem. The presence in it of the Wonder-worker who had so lately raised Lazarus gave an unusual interest to what was otherwise a familiar incident. As it was, the whole populace poured out, and hedged the street on either hand.

The chief collector of revenue heard that Jesus was passing. As he sat there at the receipts of customs, with accounts spread out before him, there was a tumult of conflicting emotions in his heart. We may almost hear his soliloquy, "Jesus, who spoke the parable of the Pharisee and publican, who has eaten with publicans, who has ordained one to be His apostle; Jesus, so near, and for the last time, too, for the Jews will surely kill Him on this visit to Jerusalem—I will see Jesus!" On that resolution a soul's destiny turns. Daybook and ledger are closed, office locked, and Zaccheus sallies forth.

A less resolute soul, one less fertile in resource, would have retreated before such hindrances. An impenetrable human wall; nobody inclined to show the odious tax collector slightest courtesy; rather to improve the opportunity to elbow and jostle him. But Zaccheus remembers the Egyptian fig-tree far down and in the middle of the thoroughfare. He runs and climbs into the low fork of the tree. Doing so, he violates the eastern notion of decorum, and makes himself more than ever the target for gibe and epithet. But what does that amount to, so only he sees the Friend of publicans? One smile from Him will repay all.

As the confused sounds of the approaching throng grow more distinct, so does a holy purpose in the heart of Zaccheus. It might express itself in the words, "If Jesus only calls me, I will forsake all to follow Him." His master passion, avarice, most subtle and imperious of all, has received its death-blow.

Before he ever left the fork of the tree, Zaccheus was far beyond the young rich ruler. No need of Jesus testing him with the command, "Go sell all, and give all." Can this man, whose life has been one of social ostracisms, believe his ears? In defiance to popular feeling and established etiquette, does Jesus invite Himself to his home? Will the great Rabbi actually enter a house, the threshold of which no self-respecting Hebrew has ever crossed? Fears he no ceremonial defilement?

It is no mistake. Jesus is looking up with smile of recognition and eyes of love. In a transport of joy, this outcast son of Abraham descends, and embraces, in all the fervor of a new affection, his self-invited Guest. Arm in arm they walk toward his tabooed home, while the opprobrium that once rested on Zaccheus falls with augmented weight upon Jesus. Above the confused and threatening roar of general disapproval can be heard at times the clear and ringing indictment, "He hath gone to be a guest with a man that is a sinner."

In the portal of his lordly manor Zaccheus pauses. He is grieved at the imputation cast upon his new-found Master—grieved that he himself is cause of it. He stands forth, and, with wave of hand, asks the attention of the ill-humored throng. In substance he says: "You call me sinner. I have been such. Having lost all prestige among you by accepting office under an alien government, having no longer any reputation to support, I have yielded to the insidious allurements of my odious position, and have at times made false depositions to increase my revenue. I call you to witness that in every such instance I will make fourfold restitution. When this is completed, I will give half of the remainder to the poor. You say Jesus is going to be the guest of a sinner. Granted! But not of an unrepentant sinner, reveling in ill-gotten gains. A sinner, yes; but one who brings forth fruits meet for repentance."

As if to seal this protestation with Divine authority, Jesus lifts His hands and solemnly declares absolution. "Saved! saved! Both he and his house; because he is a son of Abraham, not only by nature, but by grace through faith. He proves his lineage from the father of all the faithful. You have called him sinner. Well, the very end and aim of My mission is to seek and save sinners. I call you to witness My success in this instance."

Analysis and Key.

1. Zaccheus: his city, office, fortune.
2. A desire, a hindrance, an expedient.
3. Jesus' recognition and request. Zaccheus' compliance.
4. Popular disapprobation.
5. Changed nature of Zaccheus. Evicted by his pledge.
6. Jesus' commendation.

The Teacher's Lantern.

Zaccheus was the Benedict Arnold of Jericho, and all that region. He was esteemed a traitor to his country, a renegade from his church. This incident is full of cheer to social outcasts, whether such justly or unjustly; they are still sought of Jesus.

His church is to be like Jesus' self in its obliviousness to public contempt of individuals. Whether that contempt has any foundation in fact or not, it is still an immortal soul, which Jesus loved, for which He died. Let Jesus' church, like Jesus' self, still seek and save the lost. He resolutely ignored all distinctions of social caste when a soul was to be won.

We can enter into social relations with sinners when the end and aim of it is

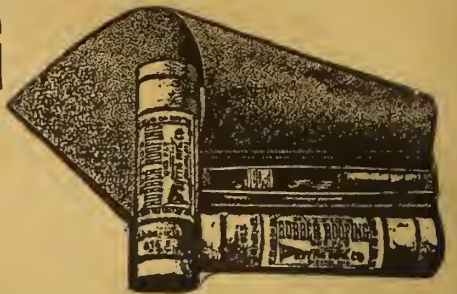

You cannot be well unless your stomach and bowels are right.

The thing to right them is

At your druggist's.

Jayne's Sanative Pills

ROOFING THAT WILL LAST.

What the farmer wants for roofing is something that will keep out the water and wind and can be put on easily by himself. After making a series of tests covering a period of several years we have prepared Huttig's Ready Roofing, which we know to be the best quality of roofing ever offered for sale. Our reasons for this are that our roofing is made from the best quality of felt thoroughly saturated with Trinidad asphalt. The treating of this felt with asphalt is what makes the Superior brand of our roofing. Another thing in its favor is that it can be used for the sides of the building as well as the roof, as it keeps out the cold of winter and the heat of summer. When you use Huttig's Rubber Roofing you do not have to repair it every year as is the case with many roofings. There is no wear out to the Huttig brand; it will last for years. Those who have used it find that it is much cheaper than shingles in every way and so easily put on that anyone who can drive a nail can lay his own roof. We have sold great quantities of our roofing to farmers and stock breeders and in many instances they have come back for a second order. We want every reader of this paper to know what Huttig's Rubber Roofing is like and you can find this out by inquiring of your dealer. If he does not carry our roofing just drop us a line and we will send you sample and at the same time tell you all about its different uses. Write to.

Huttig Manufacturing Co.,

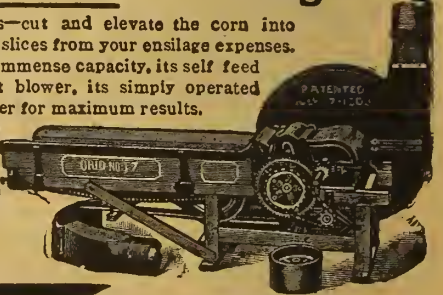

Muscatine, Iowa.

How About YOUR Ensilage?

"OHIO" Ensilage Cutters cut two ways—cut and elevate the corn into silo at an amazing speed; and cut off huge slices from your ensilage expenses.

How does it "cut" expenses? By its immense capacity, its self feed mechanism, its power-saving direct draft blower, its simply operated silage distributor, its minimum use of power for maximum results.

Silage as a milk and beef producer is far superior to grain. Our book "Modern Silage Methods" (10c) tells all about it. Our Ensilage Cutter Catalog will easily convince the man who wants the best. Send for it. Manufactured only by
The Silver Manufacturing Co.,
Salem, Ohio.

Try My Scale 30 Days Free

You need it, Mr. Farmer, Elevator Man or Grain Dealer. Brand new 1906 model Knodig Pitless Scale, sold direct from the factory, costs you just half the price of a pit scale. And it's a better scale. No pit with rotting lumber and rusting parts. Accurate as any high priced pit scale. Tested according to U. S. Standard weights. No notes to sign and nothing to pay till you are satisfied. Write for catalogue.

H. C. GUMBEL, Gen'l. Mgr., National Pitless Scale Company,
201 Wyandotte St., Kansas City, Mo.

that we may save them. A single courtesy will do what an age of self-righteous disdain will not. It will sometimes convert a sinner from the error of his way.

Curiosity may be a means of grace. It is a good thing when the stolid indifference of a community can be broken up, and people inclined to say with Moses at the burning bush, "I will turn aside and see what this thing is."

Grace was magnified in the salvation of Zaccheus. He was a hardened, money-getting man of the world. As Valings finely says: "The corrupt child of an age of corruption and fraud; steeped in an atmosphere of oppression, social suspicion, national aversion; confronted, for the first time in his life, with absolute personal honesty, transparent truth, and single-mindedness—heart and life were changed at a stroke before the burning gaze of Incarnate Honor."

Zaccheus drove the nails into the coffin of his dead vice when he made fourfold restitution and gave half to the poor. Sacred arithmetic, this; heavenly multiplication and division! The camel went through the needle's eye. A rich man got into the kingdom. A public extortioner became the free-handed almsgiver. And the cold heart of a rapacious publican glowed with a new affection.

After assignment—what? Zaccheus' proposition reported on 'change today would produce a sensation. No debtor I know of proposes to revive outlawed accounts with a view to paying them. No assigner, as far as I know, having retrieved his fortune, now proposes to pay the balance on each dollar with interest. Yet does not the Christian principle of restitution carry a man beyond the line marked by the civil statutes? Does not the disciple of Christ recognize a law higher than that of the state?

STILL COLLEGE OF OSTEOPATHY, DES MOINES, IOWA

EXPERIENCED INSTRUCTORS. LARGEST OSTEO-PATHIC CLINIC IN THE WORLD. Three years' course. OSTEOPATHIC INFIRMARY IN CONNECTION. Send for catalog J. This college is thoroughly reliable and is recommended by all the leading citizens of Des Moines. We are in position to take care of patients of all classes. Infirmary will be open all summer. The best of everything. C. E. Thompson, A. M., D. O., president; William E. D. Rummel, A. M., L. L. B., Secretary and General Manager, 1422 Locust Street.

Put yourself in the way of Christ's coming. Take some coign of vantage, some sycamore altitude. Get out of, get out of, the din and throng of the world! Jesus will surely note our effort and reward us. Zaccheus needs speak no word; his action speaks louder than any articulate sound.

Jesus is still in search of entertainment. He stands at the door and knocks. Alas that, of so many places, it must still be said, as of the Bethlehemite inn, "There is no room!"

Oh, the solemn responsibility of heads of families! The household usually embraces the faith of its head. We shall measure the exemplary influence of one who establishes and maintains a home.

HOMESEEKERS EXCURSIONS.

The Iowa Central will sell round trip excursion tickets every Tuesday to points in Minnesota, Wisconsin, the Dakotas, Manitoba, Saskatchewan and the Canadian Northwest, and on the first and third Tuesdays of each month to points in the South, Southeast, West and Southwest. OUR SHEEP DEPARTMENT

THIS department is edited by a gentleman who has long made the management of sheep a special study. He will be pleased to answer in this department, all questions of general interest relating to the care of the flock and other kindred topics. Address inquiries, communications, etc., in relation to sheep to this office.

THE OUTLOOK FOR SHEEP.

The outlook for sheep seems to be most excellent and there is but little abatement in the demand. One importer of sheep brought over a large number of good ones and disposed of most of them before he reached his farm. The demand and prices offered were such that it meant a sale. Some of his regular customers who were awaiting his return were chagrined to find him with so few sheep.

Some representative sheep men have written the Rural New Yorker their opinions of the outlook for sheep, which we append. Mr. L. M. Hartley, of Iowa, writes: "The outlook for sheep is the best ever known; the demand for breeding stock far exceeds the supply and numerous small flocks are being started, particularly in the South and Southwest. One cannot prophesy with any degree of accuracy, but it does not look now as if the business would be overdone very soon."

Mr. H. M. Keim, of Indiana, writes: "In my opinion there is a greater tendency among small farmers to take up a small flock of sheep than there has been in years. The good price for wool is of course a stimulus to the business, and makes it highly profitable. There are still a good many doubting Thomases who are afraid the matter will be overdone. With spring lambs selling at eight cents a pound live at the principal market points, and the supply not nearly up to the demand, it looks to me as though there is a good future for the business. For my part, I am in the sheep business to stay. It has its ups and downs, like every other enterprise, but no man can handle a flock of good sheep intelligently at a loss. The sheep always carries her pocketbook with her. If she dies, her pelt or fleece pays funeral expenses. If she lives her wool in the spring and lambs in the fall bring double revenue. No other stock pays as large a percentage of clear profit on money invested."

Mr. A. J. Klein, of Wisconsin, writes: "According to my opinion, there is very little reason to fear that there will be an over-production of sheep in the near future. It seems as though there are some new flocks started all over the country, but on the western ranges they are losing ground, also in the dairy district there are fewer sheep than there used to be, on account of high price of dairy products, and the high price for mutton these last few years was too tempting to keep many ewe lambs back, and the ewe flock is getting old. The growth of population, with increased demand for mutton, is another good sign for the future of sheep. According to my judgment, there is more money in sheep than any other stock, especially

if the labor question is taken into consideration. All summer, when the dairymen are somewhat tied to their job of milking and taking care of same the sheep men can take it more easy and do so much more farm work in morning and evening when the dairymen will have to be on duty. I have my lambs come in spring before work on the land or spring seeding begins. There is more time to look at them then and they are out of the way and ready for pasture when the time is taken up for general farm work. In winter I feed my sheep on corn fodder and clover hay with oats and bran at lambing time.

The Practice of Inbreeding

To the Editor of The Homestead:

In discussing a subject it is customary to first define its meaning. In this case, that is almost impossible, as very few authors agree as to what constitutes inbreeding. It is generally understood to mean the mating of animals closely related, but the degree of relationship is where the difference of opinion appears. It would seem to us that the mating of animals as closely related as cousins would be close inbreeding.

It has been said that the first fundamental principle of inbreeding is the concentration and conservation of reproductive force in such a manner as to intensify and magnify family characteristics so that each generation becomes more and more conspicuous for its extra development of said characteristics.

Having this principle in mind, it is self-evident that undesirable qualities are intensified as well as the desirable ones, and that it must sooner or later destroy the usefulness. However, it cannot be denied that nearly all the famous breeders who developed our most important breeds resorted to inbreeding to a greater or less extent; but it requires close observation and close selection and a knowledge of form, both interior and exterior, that very few possess. While many have developed great and useful breeds, there are scores of others who have made utter failures resorting to inbreeding, but we generally do not hear from those who fail.

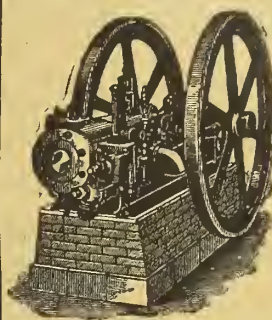

To inbreed, we must have two animals that have only trivial defects, and those defects should not be the same in both; each defect should be offset in the other. Thus it is apparent that such animals are a rarity. So for the average breeder it must seem that it is entirely impractical and a dangerous practice. Inbreeding as commonly practiced produces a weakened constitution, lack of energy, a pre-disposition to disease and a lack of fecundity. Let us take a common example found in almost any community.

A farmer buys sows from a successful swine grower. If it is not convenient to buy a boar or, for economy's sake, a male pig is selected from his own sows and this is continued for four or five years let us note the change. The stock now in the herd is so changed that there is no resemblance to the original stock, except, perhaps, in color. They have lost their original vigor, their backs sag, they are weak in the pasterns, have only a few pigs to a litter and they are weak and have a hard time to pull through, and it takes a long time to fatten them. The case cited above is one that I have had the opportunity to observe, but I dare say there are such cases in every community.

Or we can see it in our own herds where there is an accidental litter closely bred. True, some of them have the fancy points so desirable in the show ring, and by studying the breeding of some of our noted winners we will see that they are closely bred. While it produces a few winners, it also produces a large number of useless hogs, even if their pedigrees are valuable. The craze is to get the name of some noted boar to appear as often as possible in the pedigrees of our hogs, many breeders mating animals closely related without any regard to their individuality. This is not generally practiced by the successful breeders often enough to hurt the breed. We must come to this conclusion—that

TWO ENGINES FOR SALE

One twelve-horse "Standard" gasoline and one thirty-horse Frost automatic steam engine, both in A1 condition and will be sold at a bargain. The gasoline engine is complete with all accessories, including one fifty-gallon gasoline tank, one large water circulating tank, one burner tank, one Bunson burner, one exhaust box, spark plug, spark

coll and switch, six-cell battery, wire, etc.; also a complete set of sight feed oilers. This engine is adapted for every purpose where power is required. The gasoline is pumped automatically and controlled by a needle valve, the surplus gasoline returning by gravity to the supply tank. A sight feed shows the operator the amount of gasoline supplied at all times. The governor is of the ball pattern, providing positive control and uniform speed. The speed may be varied from twenty-five to fifty revolutions without stopping the engine for adjustment. This engine is practically new and in first-class condition in every way; was built by the Des Moines Gas Engine & Electric Co., Des Moines, Iowa, from whom parts and supplies may be obtained at any time. The steam engine is a Frost, automatic, side crank, 8x13, left hand, rated thirty horse power, speed 250 revolutions per minute. Fly-wheel drive, 48x10; three-inch throttle; outboard bearing with adjustable sole plate. This engine is in prime condition, will operate on a 2 per cent variation and would be suitable for belted generator or any other service where steam power can be employed. Also advantage and will soon save its cost in connection with the above engine. Address for price and full particulars,

ADVERTISING NOTES.

Mr. S. M. Strawn, of Valley Falls, Kan., advertises his King and Queen Country of northeast Kansas rather neatly on this page. Write him.

Mr. P. H. Marlay, of Mason City, Neb., has some choice bargains in central Nebraska farm lands to offer Homestead readers. His advertisement appears on this page.

The G. W. Johnson Land Company, of Gary, S. D., have an advertisement on this page of The Homestead. They write that Iowa farmers who have gone up to Minnesota and South Dakota report that they like it up there as well as in Iowa and that they can make as much money farming in that state as they could in Iowa, with one-half the investment. We have had business transactions with the G. W. Johnson Land Company, for some time, and can recommend them as reliable people to the readers of The Homestead. Read their advertisement.

Improved farms at a low price per acre are becoming scarcer and scarcer as the years go by and wild lands at the old-time prices are a thing of the past. About the nearest approach to the low prices, on both improved farms and wild lands, that we know of are those quoted by the Farmers' Land Agency, of Cumberland, Wis., in their advertisement on this page of this issue. All the lands that they are offering for sale lie from two to six miles from the city of Cumberland and within seventy-five miles of St. Paul. If you are interested and want further particulars, address the agency as above.

The McMahon School of Telegraphy and Railway Business, of Arkansas City, Kan., a school under the management of men connected with the greatest railway system in the world, will within a short time move from its present location to new quarters in the recently completed Hamilton-Cullison Block, the most elegant structure in Arkansas City. Elegant rooms have been fitted up especially for this school. Many new equipments will be added. Several teachers who are practical railway employees will conduct the school and keep it up to its present high standard. The McMahon-Sligo School of Telegraphy and Railway Business advertisement appears in this issue on page 4. Look for it, and when writing always mention this paper.

A representative of The Homestead recently visited the great stove works of the Kalamazoo Stove Company, of Kalamazoo, Mich., and had the satisfaction of seeing the greatest stock of stoves and ranges his eyes ever rested upon, and witnessing the processes of manufacture. The Kalamazoo Stove Company have built up their vast business by selling a better stove for the money than the purchaser can obtain from any other source. The concern are absolutely reliable and their stoves the best that modern skill can produce. The writer saw in one great pile over \$100,000 worth of base-burners of one kind, ready to be distributed to all parts of the United States. If you want a high-grade stove or range at a low price, address this strong company as above and they will send you their latest catalog, No. 165. See their advertisement on page 13.

IOWA WORM POWDER DID THE WORK.
Mr. J. F. Edmiston, R. F. D. No. 2, Benton, Kans., under date of Feb. 24, 1906, writes the Iowa Stock Food Company, of Jefferson, Iowa, as follows: "Gentlemen:—I have just come in from my hog lot, forty-eight hours after feeding the Iowa Worm Powder. I saw enough to convince me that worm trouble is what is ailing my hogs. Enclosed find post-office order for two more \$1 boxes of worm powder. Send at once and oblige." This firm ship it on guarantee.

THE HUSKER THAT HUSKS.
Messrs. Smith & Davis, of Ames, Iowa, are manufacturers of the corn husker shown in the accompanying illustration. This is something new, but it has been sufficiently tried so that its utility is absolutely known. Its superiority over the ordinary husking

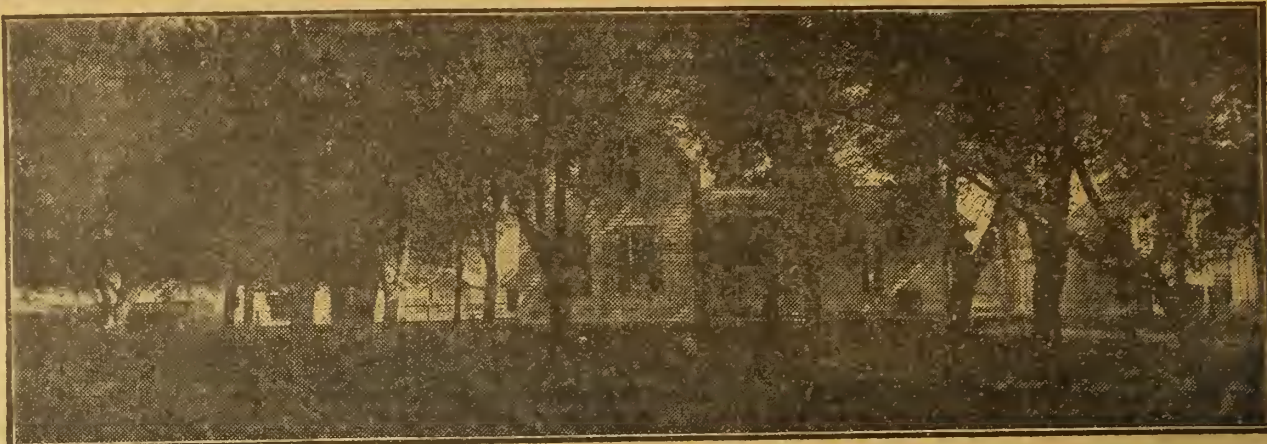

peg is only comparable with the superiority of the grain binder over the grain cradle. It has taken a long time to evolve the perfect husking peg, but it seems as though the "Akin Husker" embodies all the best points. The spring-mounted point is a new, superior feature. It holds firmly in the hand and there is no jar or wrist strain as is the case with the old-fashioned pegs. The advertisement of Messrs. Smith & Davis is found on page 14. We have no hesitation in directing our readers to this firm, and would suggest to all that a supply of these pegs be purchased early. All pegs are guaranteed or money refunded. Address Messrs. Smith & Davis, Ames, Iowa.

HOW WOULD THIS FARM SUIT YOU?

If you look on this page you will find a picture of the buildings on a farm which Messrs. W. H. Slaughter & Co., of Kansas City, Mo., have for sale, and if you make a thorough investigation you will find it is all that the above named firm claim. In fact, Mr. Slaughter will gladly defray the expense of prospective buyers who will come and look at the farm, if it is not in every way as represented. The farm contains 390 acres and only one mile to shipping point, no waste land and many valuable improvements, which are fully told in the advertisement. At the price this farm is offered it cannot remain on the market very long. Mr. Slaughter, who has the sale of the above farm, has been in the banking business in eastern Kansas for a good many years and possibly is better informed in farm land values in eastern Kansas than any other man. About three months ago he removed to Kansas City in order to engage in the real estate business and is making a specialty of A. No. 1 farms, that will prove profitable to the purchaser. Mr. Slaughter prides himself in satisfying his clients. He is positive that the farm he offers for sale in this week's issue will more than please any man who will go and look at it. It will pay you to write Mr. Slaughter at once if you are at all interested. When writing, mention this paper.

LANDS AND HOMES FOR SALE.

The Best Farm Home Bargain We Know Of **PRICE \$40 PER ACRE**

This 390 acres of good land is in Kansas, two hours' ride south of Kansas City. The improvements cost \$6,000. Crops this year were: Corn, 100 acres; oats, forty acres; orchard, six acres; balance of farm English blue grass and clover and timothy, except sixty acres natural bluestem. Windmill with large tank supplies water to yard, barns and pasture.

There is a perfect sod of blue grass and white clover in yard and along fence rows; 160 acres on north side of the road with buildings facing south; 230 acres right across the road with four-wire fence and hedge posts; one mail route, telephone in house; three-fourths mile to school, one mile to station; three miles to one banking town, six to another.

No trades on this, but can give time on half purchase price. Candidly, don't this look better to you than the Pan Handle or Western Kansas? Many come to look at this, but only one will buy. Hadn't you better come to our office at once and let us show you this and a number of other farms at our expense?

Price on this 390 acres, with immediate possession of the buildings if desired, \$15,600.

W. H. SLAUGHTER & CO.,

221 DWIGHT BUILDING,

KANSAS CITY, MISSOURI

Sioux City, Iowa, Aug. 25.—Hogs—Receipts, 4,600; 5¢ higher; range, \$5.65 to \$6.00; bulk, \$5.70 to \$5.85. Cattle—Receipts, 100; steady.

CHICAGO MARKET LETTER.

Under date of August 24th, Messrs. Clay, Robinson & Co. quote the Chicago live stock market as follows:
This week opened with a run of 29,131 on Monday, of which number about 6,000 were westerns. Top reached was \$6.65. The market ruled about steady on the best grades of cattle and about a dime lower on all others, compared with prices on the previous Wednesday. Tuesday's run was 5,096; market ruled weak. Receipts Wednesday, 20,867. A few lots of the prime cattle were steady, with the bulk of the offerings above \$5.50 fully 10¢ lower. Top reached was \$6.50. We sold for Mr. I. N. Atkinson, of Fowler, Ind., thirty-five head of dehorned natives lacking in finish, averaging 1,464 pounds, at \$6.40, and for Mr. Wurzbacher, of Morley, Iowa, one grade Angus yearling heifer, shortage, weighing 640 pounds, at \$6.25, the highest price of the season for a heifer of this weight. Thursday's receipts totaled 7,000. The market ruled slow to a dime lower. With 2,500 cattle on hand today the market ruled steady with yesterday's prices. Although receipts of cattle have been lighter this week the run of butcher stock has been larger in proportion than the previous week. The offering ran largely to common and medium stuff. There has been a shortage of good, heavy cows and heifers and also of good yearlings and these are selling at steady to

WILD LANDS. \$8 to \$18 per acre. Improved Farms, \$20 per acre and up. Fine soil, good climate, good market, plenty of timber. Land all lies from two to six miles from the city of Cumberland. 75 miles from St. Paul. Agents wanted. For particulars address, Farmers Land Agency, Cumberland, Wis.

FARMS—Before buying or selling a farm read "THE FARM ADVERTISER," a hand-book for owners and buyers of real estate. Sample copy, 10 cents. Write Publishers, 106 South Main Street, Dayton, Ohio.

FOR SALE: 180 acres in Harrison Co., Mo. Well improved, hands to town and school. One of the best all purpose farms in Co. T. T. Spicer, Ridgeway, Mo.

FOR choice bargains in farmlands in central Neb. the great alfalfa and corn country, address, P. H. Marlay, Mason City, Nebraska.

strong prices compared with a week ago. Good cutting cows, such as are selling at \$2.50 to \$2.75 are about steady, while common canners are 10¢ to 20¢ lower and very dull sale. Cows selling at \$3.25 to \$3.65 show very little change in prices, but they are very poor in demand. Thin cows, that are a little rough, are almost unsalable as feeders and such cows as had been selling around 2¢ per pound to go to the country are being bought by the packers as canners at \$1.50 to \$1.75 per cwt. There is practically no change in the price of bulls as compared with a week ago. The good kinds are in good demand, but common grades are dull sale. Best veals are steady, tops bringing \$7.50, but other kinds are slow sale and 25¢ to 50¢ lower for the week. Thursday with about 6,000 cattle on sale, there were no eastern orders and the packers had very few. All grades of butcher stuff were very slow sales. Receipts of stockers and feeders this week proved about like last week's offerings—a continued shortage of choice and fancy selected steers of all weights, especially for those weighing 1,000 to 1,150 pounds for a short feed. Values ruled about steady the first three days of this week with last, but the fair to good, as well as cheaper grades, are closing 10¢ to 20¢ per cwt. lower, with prospects of a reasonably good clearance being made at the decline. Stock heifers are selling at the same prices as one week ago.

Receipts of hogs for the first three days of this week were moderate and prices made nice advance. Thursday's supply, however, was too heavy for the demand and values declined 10¢ to 15¢ per cwt. on good hogs and 15¢ to 20¢ on packing grades. Present prices are about 10¢ higher than a week ago today on choice hogs, but packers are lower and slow sale. With 15,000 estimated receipts of hogs today, the market ruled generally steady with yesterday's closing prices. Top was \$6.50, bulk of the good hogs selling at \$6.25 to \$6.35, with commoner grades at \$6 to \$6.20 and packers at \$5.50 to \$5.90. We sold a load of 299-pound hogs at \$6.40, this being the extreme top of today's market on hogs of this weight.

Receipts of sheep were rather limited this week and that class has shown some little improvement, while lambs were rather plentiful and show some decline. Early in the week some strictly prime California lambs, also some good Idaho lambs, reached \$3, but at the close of the week they bought strictly good lambs at \$7.60 to \$7.65. At the present time wethers are selling at \$5.25 to \$5.50, fair to good western wethers at \$5.10 to \$5.25. Choice feeding wethers at \$4.75 to \$4.85, fair to good feeding wethers at \$4.80 to \$4.90, choice two and three-year-old breeding ewes at \$5.40 to \$5.60, choice western ewes at \$5.10 to \$5.15, fair to good western ewes at \$4.25 to \$4.60, feeding ewes at \$3.90 to \$4.25, choice western yearlings \$5.10 to \$5.35, fair to good western yearlings \$5.75 to \$5.90, choice feeding yearlings at \$5.50 to \$5.50, choice feeding lambs at \$7.90 to \$8, fair to good western lambs at \$7.25 to \$7.65, choice feeding lambs \$6.75 to \$6.85, fair to good feeding lambs \$6.50 to \$6.65.

Farm Lands for Sale.

CHEAPEST and best lands on the market. These lands are in Yellow Medicine county, Minnesota, and Peniel county, South Dakota, in fourth tier of counties north of Iowa. You can raise anything in these parts you can raise in Iowa. A good grain and stock country, good water, soil and land is like Iowa. We have some fine improved farms for \$10.00, some good stock farms with good improvements on, \$20.00. Prices range from \$20 to \$40, according to land and nearness to town. Any good farmer can make as much money farming 160 acres here as he can in Iowa. Anyone wanting farm lands, don't fail to investigate these lands. Buy a ticket over C. & N. W. to Gary, S. Dak. Take receipt for ticket. On any purchase we will refund fare.

Geo. W. Johnson Land Co.,
State Bank, Gary, South Dakota.

....LANDS AND HOMES FOR SALE....

EASTERN NORTH DAKOTA

We have just purchased of an eastern estate 6,000 acres fine level land in northwestern Kidder county, immediately adjoining Stutsman county line.

Location—From 10 to 15 miles north of Tappen on the N. P. R. R. A branch of the "Soo" R. R. has been surveyed across these lands.

General Description—The lands lay generally level with just a slight roll. Every foot tillable. Free from stone. Soil black, sandy loam. Fine water can be reached anywhere from 10 to 20 feet.

Easy Terms—Terms are \$3 per acre down, balance 5 to 7 equal annual instalments.

One crop of flax will pay for this land.

Why go 200 miles further west and 30 to 40 miles from the railroad and pay more per acre than we ask?

Come and see the crops near these lands.

Oats yielding 50 to 70 bushels per acre.

Barley yielding 30 to 40 bushels per acre.

Wheat yielding 20 to 30 bushels per acre.

Flax yielding 10 to 20 bushels per acre.

Write for our list giving the full descriptions and prices on this tract and our improved farms and ranch lands, also for large map of the state of North Dakota. We will send them to you free.

WHEELOCK & WHEELOCK, 25 WALDORF BLK., FARGO, N. DAK.

L. O. HALEY, AVA, MO.

MISSOURI LAND

IS BETTER at present prices than a gold mine. Come and we will take pleasure in showing you. 500 acres well improved, all kinds of fruit and the best of water, and the low price of \$40 per acre buys it. 220 acres three-fourths of mile to Kirksville. As good prairie land as you will find in Missouri. Fair improvements. This is an ideal lying farm and \$65 per acre buys it. 80 acres, 2 miles from Kirksville, nice improvement, a lovely small home at the slaughter price of \$60 per acre. 82 acres, one-fourth mile to Kirksville, good improvements and as near an ideal home in every respect as can be found, and we are only asking \$90 per acre for it. 132 acres one-half mile to Kirksville, good improvements, all kinds of fruit, no better land in the state, every foot can be farmed with any kind of machinery. This looks good to anybody, but it is better than it looks and we are putting the low price of \$80 on this ideal home. 180 acres, 90 rods to Kirksville, good building, good fence, all kinds of fruit, the best of water and worlds of it, cistern in house, in fact, everything is right. No better or finer lying land in the state. \$70 per acre will buy this home.

ISAAC A. NOVINGER & SONS,
KIRKSVILLE, ADAIR COUNTY, MO.

P. S. WE are not real estate dealers, we own the land herein described and furthermore our home is not for sale. We simply have more than we can handle.

WE BUILD YOU A HOUSE FREE OF CHARGE

and sell you fertile land at a low price and on easy terms, within 25 miles of St. Paul and Minneapolis. This is the greatest proposition ever made to readers of this paper. You have your choice of 40 acres or more out of two million acres of the splendid lands of Northwestern Wisconsin. The price is only \$7. to \$12. an acre, and to give you a good start we will build your house on the land. Echoes From a Kansas Farm

By Henry Hatch

With some folks as soon as the worry over the crops ends the worry over prices begins. Why worry?

Does it pay to keep cattle on the average-sized farm, where land is worth \$75 to \$85 an acre, for just the price of a calf each year?

It will not be many years ere range cattle will be a part of memory. Then will we be solving the problem of raising beef on land still higher in price, and somewhat after the plan of the "soiling system."

A very small per cent of the brood mares of the country will go over another season without raising a colt. If there is anything in all the available stock doing duty, there will not be a scarcity of horses some day.

For the last four seasons we have not had an extra quality of prairie hay to feed. Each season the weather has kept us from getting the grass cut in time, and it is preventing us this year. When prairie grass stands up in the swath, it is too ripe for the best of hay.

We don't know what others think about it, but we believe all the farmers should black list every insurance company that refuses to meet its loss in full in the late San Francisco disaster. What's the use of having insurance if the companies will not pay as they should?

It seems that all classes of men are taking hold of the organization idea except the farmers. Of course we have what are called "farmers' unions," "societies of equity," etc., but what we mean is the organization that really takes in the whole class, and that really amounts to anything. Will the day come when we will have to organize? It will, unless the other combinations can be controlled.

We are now paying more for our machinery than we did a few years ago. Self binders cost us from \$15 to \$25 more than they once did, and much other machinery in proportion. The grain-buyers and stock-shippers take a wider margin than they used to. It is true that the farmer is prosperous, but how many that you know do not have to spend what they get for needed improvements about as soon as they get it?

It is all right to meet the home dealer half way, but no more. We do that, but it is all we will do. We think it the home dealer's duty to buy of the home producer first. When a farmer has fruit or vegetables to sell, and the home dealer needs them, it shows a poor reciprocal feeling to send to a produce firm in a city for the produce, while the farmer's roots or is fed to the stock. Should such a merchant expect the farmer to trade with him, after such treatment?

Hands to work by the month on farms were never scarcer than now, nor the wages higher. It seems that the young man of today wants to be entirely foot-loose. He does not want to be bound to stay in one place as long as a month. We have known many a young fellow to leave the best of places to work, all because they wanted to "take a little bum." They will go off one or two hundred miles on the excuse of getting high wages, but we notice they bring little back with them.

Our groceryman told us yesterday that he never before paid so much to the packers for his cured and smoked meats as he is paying now. He has to pay more for bacon than when hogs were over \$1 per hundred weight higher than now, yet the packers claim they are making a very small margin. Will the time ever come when the producer can say what he will take for his produce, instead of the middlemen telling us what they will give, then, when they sell, tell the buyer what he must pay? This country supports too many middlemen now and more creep in every year.

Ground we first plowed for the fall seeding of blue grass is already green with the quick growing coat of crab-grass. It will take one and perhaps two diskings to get the better of the

grass before drilling in the seed. Early plowed wheat land is the same. This August has seemed like a chapter from some sea tale, where a storm of "incredible fury" breaks over the scene every other night. Instead of talking dust mulch and "moisture conservation," we again find ourselves ditching to get rid of the surplus water.

It does a person good to take a trip of a few miles this season of the year, even if it cannot be lengthened into a few hundred. A ride in a chair car can be greatly enjoyed. We like to see the different farms as they glide by. The scene has not a sameness to us, as many complain. The person who cannot learn a few things in a trip away from home, even of a few miles, is a natural born dumb-head. The crops with us are so large this year, however, that there will be little time for trip-taking until well along in cold weather, at least.

The Brodsky Dispersion Sale.

A representative crowd of breeders from Iowa and Nebraska attended the L. Brodsky closing out sale at Plover, Iowa, last week, and the cattle, numbering eighty-four head, were all disposed of at good prices. The cattle were in nice condition and the sale began promptly at 10:30 in the morning. The top price on females was \$410 for Ada Marr 8th and cow calf, and she went to Mr. C. R. Steele, of Ireton, Iowa. Mr. Steele also purchased 7th Mysie of Pleasant View at \$385, besides a large number of the best things in the sale. Mr. N. A. Lind, of Rolfe, Iowa, was also a heavy purchaser and secured some of the plums of the sale, as did Mr. F. A. Schaefer, of Raleigh, Iowa. The top price for bulls was \$260 for Baron Marr 4th, and he was purchased by Mr. W. L. McVey, of Rolfe, Iowa. No guarantee was placed on the cattle, as it was a dispersion sale, and this of course kept some from going the limit. It was a good sale, however, and everything was sold at very satisfactory prices. The horses and mares were also disposed of, but their ages prevented any high prices being paid. The average on seventy females was \$136.78, and the average on the entire eighty-four head was \$136.25. Cols. Geo. P. Bellows, Carey M. Jones and Al P. Mason cried the sale. Below is a report of those bringing \$100 and above:

COWS.

7th Mysie of Pleasant View, seven years, C. R. Steele, Ireton, Iowa,	\$385
Pleasant View Mysie 10th, four years, same	305

NOW is Just the Time To Buy an American Manure Spreader

Sold on Time-Under Guarantee-30 Days' Approval Test to Prove Our Claims

THERE are 40% more exclusive features on the American Manure Spreader than any other Spreader on the market. These exclusive features make the American just 40% more valuable than any other Spreader.

And the American Manure Spreader is sold on an exclusive plan—no other Spreader in the world is sold in such a way.

The American is sold direct from our factory to the user under guarantee—with 30 days' Approval Test allowed to prove every claim we make for it.

If it is not exactly as represented, send back the Spreader. We pay all the freight—both ways—and the test won't cost you a penny.

'Twill take just a moment of your time and a postal to send for our big Spreader Catalogue—the finest ever issued. It explains fully the exclusive features on the American—tells why it is the highest grade

machine of its kind made—tells all about our full line of Americans—made in 5 styles and 10 sizes.

It tells all about our exclusive selling plan—tells how we sell our machines on time—giving the American Manure Spreader a chance to help you pay for itself before you have to pay for it.

We want you to have this big Free catalogue.

Now is just the time to buy an American Manure Spreader—for top dressing on meadow and after harvest work. It will save you time and labor—and do the work perfectly—pulverizing and spreading evenly—making the manure cover twice the area as when spread by hand.

Every progressive farmer should own an American Manure Spreader—and should get it now.

With our free catalogue goes a valuable book on the Value, Care and Application of Manure. Take a minute's time and a postal and send for both—they're free.

LOS ANGELES AND SAN FRANCISCO.

From September 3d to 14th the Chicago Great Western Railway will sell round trip tickets to San Francisco and Los Angeles at rate of one fare for the round trip. Tickets have limit of October 31st to return and allow stop-overs west of the Missouri River in both directions. For full information apply to E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

HOMESEEKERS' RATES.

Every Tuesday, via the C. & N.-W. R'y. until December, 1906, to authorized home-seeker points in Wisconsin, northern Michigan, Minnesota, South Dakota east of the Missouri river, North Dakota, Alberta, Manitoba, western Ontario and Saskatchewan. Full information at C. & N.-W. passenger station or 401 Walnut St.

CHEAP RATES TO PACIFIC COAST.

Commencing September 15th and continuing until October 31st, the Iowa Central will have on sale reduced rate one-way tickets to California, Oregon, Washington, British Columbia, Utah, Montana and Idaho. Rates \$15 below regular fare. Call on Agents for

Baby Beef Production With Western Feeds.

BY O. H. ELLING, HAYS, KAN.

Realizing the importance of retaining the fertility of the soil and desiring to be more able to answer requests for information as to the feeding value of various grains, the Fort Hays Branch Experiment Station fed sixty head of calves with feeds that can be grown with a marked degree of certainty in the West. The calves were grade Herefords and Short-horns, steers and heifers. They had been weaned and vaccinated for blackleg just previous to putting in the feed lots. The sixty head, averaging 400 pounds each, were uniformly divided into four lots consisting of ten heifers and five steers to the lot, and each bunch fed a different ration. The steers were raised at the station and the heifers were purchased in the vicinity of Hays.

After taking the average of three successive weighings, the calves were carefully apportioned into lots and each lot of calves was fed roughage for two weeks, after which they were again weighed. These weights of the various lots being sufficiently close, no changes were made and the first grain was fed Dec. 7, 1905, 157 days previous to the close of the experiment.

The four lots of calves were numbered and rations given them as follows:

Lot IV. Fed corn and cob meal and alfalfa hay.
Lot V. Fed ground barley and alfalfa hay.
Lot VI. Fed ground emmer and alfalfa hay.
Lot VII. Fed ground kafir corn and alfalfa hay.

In all the feeding, the alfalfa was placed whole in the bottom of the feed troughs and the ground grain poured over it. The cattle were fed twice daily, morning and evening, the grain and hay being weighed out to each lot at every feed. They were started on feed with all the roughage they would clean up, which was an average of nine pounds per head daily, and with a grain ration of two and one-half pounds per head daily. The quantity of grain was gradually increased and the roughage cut down when necessary. The calves took readily to the feed and at no time during the experiment did any of the lots seem to tire of their ration.

The accompanying table gives the total amount of feed eaten, the pounds of grain and hay required to make 100 pounds of gain, the average beginning and closing weights, and daily average gain per head for the entire period, including the preliminary feeding, or 168 days. There were fifteen calves in each lot:

added to either the barley or emmer rations. And it is not unlikely that, had prairie hay been added to both of these rations during the last seventy days of the experiment, the results would have been still more favorable. The emmer-fed calves, up to within seventy days of the close of the test, showed better gains than either of the other lots.

TABLE II.—The Financial Result.

Lot No.	Calves cost.	Feed cost	Cost of 100 lbs. gain.	Sold for.	Net proceeds.	Profit or loss per head.	Margin between buying and selling price of calves.
IV.....	\$224 92	\$177 14	\$3 89	\$4 75	\$149 11	\$3 13 gain	\$1 00
V.....	222 04	179 95	4 29	4 60	417 25	1 02 gain	85
VI.....	225 56	185 12	4 65	4 35	383 07	1 84 loss	60
VII.....	227 28	202 83	5 01	4 50	410 59	1 80 loss	75

NOTE:—In computing cost of feed, local prices for the various feeds were used, i. e., ear corn 39c per bushel, corn-meal 42c per bushel, corn-and-cob-meal 42½c per bushel, barley 36c per bushel, emmer 36c per bushel, kafir-corn 46c per bushel, and alfalfa at \$5 per ton.

The calves were valued at \$3.75 per hundred weight at the beginning of the experiment, which gives a margin of \$1 for those of Lot IV., eighty-five cents for Lot V., sixty cents for Lot VI., and seventy-five cents for Lot VII., between the selling price of the respective lots at the Kansas City Stock Yards, where each lot was sold on its merits, when the experiment closed, and the purchasing price. The cost of 100 pounds of gain ranges from \$3.89 with the corn-and-cob-meal ration, the least expensive, to \$5.01 with kafir corn as ration, and most costly; the cost of 100 pounds gain with barley and emmer rations being \$4.29 and \$4.65, respectively.

In the slaughter test Lot IV. dressed 56.5 per cent, Lot V. 56.4 per cent, Lot VI. 54.7 per cent and Lot VII. 57.3 per cent.

The price per pound for which the calves of the several lots sold indicates very nearly the condition or ripeness of the cattle at the time of shipment. The percentage of dressed weight, with the possible exception of Lot VII., which dressed out nearly one per cent higher than any of the other lots, compares favorably with the selling prices. The emmer-fed calves did not stand shipping as well as the rest and the shrinkage on the entire sixty head was 4.67 per cent.

Healthy Farm Stock.

To the Editor of The Homestead:
During the many years that I have

Colic is perhaps the most common cause of illness among horses. If not severe, no remedy at all is required, but as the farmer feels more like he is doing his duty when administering something, I might say that whatever he would take for his own relief, will be efficacious for the horse. Something hot and stimulating describes what is needed and I have seen whisky, coffee, ginger and various liniments for internal use all prove effective. Some farmers attribute almost every form of sickness to the "bots," although veterinarians reject such a cause altogether, and pour all sorts of decoctions down the wretched animals, which,

nine times out of ten, have only the colic. I have been a zealot for clover hay and have never seen any bad results from its feeding except when it was damaged by imperfect curing. I have found a strong belief that clover hay was not a proper feed during hard, heavy work, such as breaking wheat ground. I have found also a strong prejudice against feeding fresh green cut fodder at that time and also against turning the horses on pasture at night. But as these things seemed to me to be the most natural and proper diet for the horse I have utilized them for many years without any ill effects. It is true, perhaps, that green fodder and grass will make horses a little loose and "gaunt up" a trifle, but I have always felt it was their natural condition and that their systems were thoroughly cool, clean and healthy and not clogged by impure and heated blood, often betrayed by the rubbing of mane and tail and by the appearance of hard pimples.

In some districts where corn is the great staple, I have seen the teams tied to troughs into which the corn would be shoveled by the bushel. These horses lived almost exclusively on corn, and although the owners admitted it was not the best, they excused it on the score of haste and less trouble; their profits on the crops were large and they figured that they could afford to "burn out" their teams with corn in a short while and buy others. But surely no properly trained farmer could bring himself to follow this wasteful and cruel method.

"Judge the wants and feelings of your stock by yourself," is a very safe motto and will rarely lead anyone astray. The plowman should think of this when he seeks his water-jug every hour or less on a hot day. I think it reasonable and the part of humanity to water teams on very hot days in the middle of the morning and of the afternoon. If they drink heartily, it is good evidence that they want water and should have it. Again, when resting, give the horses as well as yourself the benefit of the shade. Drive them out to one side if necessary. Protect them against the tormenting flies with nets or home-made covers. Watch their shoulders carefully. Keep a rag in a bucket of salty water at the trough and while they are drinking, wash their shoulders. It takes only a minute of time and refreshes the horse, while it cleanses and toughens the skin. At night, do not keep them in the hot stables, but turn them out into the pasture where they can cool off, have a good roll, and graze during the night. In the morning they should always be watered before they are fed. They should also be well curried—not a mere rubbing off of dirt—that is only incidental—but curried because it is healthful and stimulating to them. Currying should not be hurried through with, but done leisurely and thoroughly, going over the entire horse, body, head and legs. If properly done, the horse will greatly enjoy this dressing, as he will plainly show, but do not make him flinch under a sharp comb. Use a stiff brush mostly and a comb only to dislodge dried mud, or on his fleshy parts and not hard enough to annoy him. A kindly, humane and observant eye is the essential quality in a good horse-master.

TABLE I.

Lot No.	Ration	Feed.		For 100 pounds Gain.		Av. per head beginning lbs.	Weights and Gains.	
		Grain lbs.	Hay lbs.	Grain lbs.	Hay lbs.		Av. per head close, lbs.	Gained av. per day, lbs.
IV.	Corn-and-cob-meal and alfalfa.....	22,118	17,624	484	383½	400	704	1.81
V.	Barley and alfalfa.....	17,512	18,349	416	435	395	675	1.66
VI.	Emmer and alfalfa.....	17,174	19,465	430	487	401	667	1.58
VII.	Kafir-corn and alfalfa.....	18,674	20,610	457	505	404	675	1.61

It will be observed from the table that Lot VII. ate more pounds of both grain and hay than any of the other lots, excepting the grain eaten by Lot IV., which received corn-and-cob-meal that weighed seventy pounds per bushel instead of fifty-six as kafir corn. In the column headed "Grain and Hay for 100 pounds Gain" emmer compares favorably with barley, although a trifle more alfalfa was required to produce 100 pounds gain with emmer than the same gain with the barley ration. It required fifty-four pounds more of the corn-and-cob-meal to produce 100 pounds of gain than of the ground emmer, but with the latter 103½ pounds more of the roughage was fed than was fed with the corn-and-cob-meal ration. With the kafir corn ration more pounds of both grain and hay were required to produce 100 pounds gain than with either barley or the emmer rations. It should be stated, however, that both emmer and barley are quite laxative feeds, and when fed with alfalfa hay the tendency is to produce looseness when a heavy ration is fed. Because of the experimental feature of the feeding, nothing to counteract this laxativeness of the rations, such as prairie hay or kafir corn would have been, was

kept stock of all kinds, I have suffered very little loss through disease, and I attribute this not only to some knowledge of the nature of farm foods, but also to a disposition to judge the requirements of the dumb brutes by the requirements of man himself. On rare occasions a mule or horse has had a slight attack of colic, but I never was able to trace this to anything fed, but sometimes to indiscretions on the part of the animal itself. I have always proceeded on the theory that green food was the natural sustenance of the horse and that at all times there should be a caution in the use of corn or of feeds strong in carbohydrates or heating qualities. Consequently I have never fed corn in the unstinted way employed by many farmers, while I have always been careful to see that a part of the food was either green or strong in nitrogenous on bone and muscle forming elements. Thus, during the winter, I always feed some bran or oil meal at least once a day as a laxative or digester, although good clover hay, cow peas, oats and corn fodder are all good adjuncts. A straight ration of corn and timothy as fed by many farmers I do not like, as tending to unually heat the blood and clog the system through excess of carbohydrates.

 FIELD NOTES.
 Mr. W. J. Berger, of Carroll, Iowa, is offering a creamery property located at Mt. Carmel, Iowa, for sale. His advertisement appears on page 9 of this issue of The Homestead.
 Messrs. Wm. H. Schnelle & Son, of Lemmonville, Mo., offer six full blood and high-grade two-year-old English Shire stud colts. See page 24 for their advertisement and write them if interested.
 Remember Mr. O. L. Kerr, of Independence, Mo., the O. I. C. hog man of that state, will hold his next sale on Friday, November 2d, at Independence, Mo. Some sensational O. I. C.'s are listed for this event.
 Mr. J. R. Triggs, of Dawson, Neb., makes the announcement in his advertisement on page 27 of this issue that if the reader is in need of large, growthy Poland China boars or sows that he should write him for prices and descriptions.
 Two Iowa farms are offered for sale on page 23 of this issue of The Homestead by Messrs. Conway & Carey, of Anita, Iowa. One contains 240 acres and is located four miles from Anita and the other has 200 acres and is within one-half mile of Anita. For further particulars read the advertisement.
 Messrs. C. C. Drake & Son, of Terre Haute, Ill., breeders of Poland China hogs, in sending in copy for their new advertisement found on page 27, write as follows in regard to their stock: "Stock are all doing nicely, and are up to weight according to age, and are not carrying any surplus flesh. We have the leading blood lines and individuals. Having sold our farm, we are going to move in December and have about sixty-five head on hand that we want to dispose of. They will be priced at bed rock figures."
 Mr. Frank Iams, the well-known horse importer and breeder, of St. Paul, Neb., writes under a recent date as follows: "I have just returned home with a special train of 120 stallions, the famous 'peaches and cream' boys, making a total of about 200 head in my barns. I have the largest and choicest bunch of any one man in the United States. I have on my selling clothes, and there is a horse show at Iams' barns daily, and there is always something doing. I will have thirty head of beauties at the Iowa and Nebraska State Fairs. Watch Iams' smoke."
 Mr. M. D. Yard, of Crawfordville, Iowa, breeder of Short-horn cattle, in sending in change of copy for his advertisement, found on page 27 of this issue, writes: "My herd is doing fairly well, although the intense heat and the fly pest is pretty hard on them. Frequent additions to the herd make their appearance. The Brawith Bud bull, Bud Royal, by Lavender Royal 135256, a straight Cruickshank, is developing in fine shape and will make somebody a good herd bull. He is a beautiful red, of good size, has strong legs and is lengthy with good top and bottom lines."
 Mr. J. C. Webber, proprietor of Westview Poultry and Stock Farm, of Montezuma, Iowa, writes that he is on the market again with some choice Chester White male pigs. They are of the best stock and breeding that can be procured, the lengthy, heavy-boned hogs he is noted for producing. He has carefully selected a limited number from his herd and will ship nothing but the best of stock. He writes: "Parties wanting a good fall yearling or an early spring pig will do well to place their order early. Our B. P. Rocks and M. B. Turkeys are coming in in grand style, as are also our Imperial Pekin ducks. Can ship Pekin ducks and drakes, either old or young, at any time now." One of our representatives visited his farm and pronounced his hogs, as well as his poultry, at the top of the list. His advertisement and prices will be found on page 23 of this issue. The accompanying unsolicited testimonial is a sample of many received from satisfied customers: "Grinnell, Iowa, Jan.

30, 1906. Mr. J. C. Webber, Montezuma, Iowa. Dear Sir:—I received the sow in good shape and think she is a fine one—just what I wanted; long and good boned. She is as white a hog as I ever saw. Those that have seen her thought she was a beauty, and when I need anything in your line I will buy of you again.—Clint Buchanan."

Mr. T. A. Baldwin will hold his fourth Short-horn cattle and Poland China hog sale at Emmetsburg, Iowa, October 30th, selling forty head of imported Scotch and Scotch-topped Short-horns, consisting of ten bulls and thirty females; several cows with calves at foot and rebred to Imp. Grand View Chief 244020, will be included in this sale. The hog offering will consist of twenty head of young boars and twenty-five head of sows and gilts.

Messrs. Wheelock & Wheelock, of Fargo, N. D., make the announcement on page 17 of this issue that they have just purchased 6,000 acres of fine level land located in the northwestern part of Kitter county, N. D. This land is located from ten to fifteen miles north of Tapeu on the Northern Pacific Railway; and a branch of the Soo Railway has been surveyed directly across the tract which they have purchased. They are offering farms on very easy terms, with five to seven annual installments after the first payment. If interested write for their list, which gives full description and prices on this tract and their improved farm and ranch lands. They will also send free of charge with the list a large map of North Dakota.

With this week's issue we begin the Duroc Jersey advertisement of Mr. H. A. Sexsmith, of Greenfield, Iowa, who now offers some exceptionally choice boar pigs by Ohio Chief, out of the great brood sow, Valley Lady, purchased last winter by himself and Mr. Fred Strong, of Orient, Iowa. He also offers for sale some good boars by Proud Advance, W. L. A.'s Choice Goods and Keep On. He owns the splendid sow, Minnie Watson, a granddaughter of Toy Notcher, and she has seven nice pigs by Stout's Advance. Another good sow owned by him is Lady Mingo, a seven-eighths sister to Helen Blazes, the \$1,000 sow, and she has a good litter by Proud Advance. Write Mr. Sexsmith if you are looking for a herd leader. See page 23.

Mr. Thos. Canfield, of Lake Park, Minn., writes as follows concerning his hogs: "We have already shipped nearly 100 pigs of this spring's farrow and up to date our trade in Yorkshires has amounted to more than twice as much as during the corresponding period of 1905. We had farrowed this spring over 700 pure-bred Yorkshire pigs, so that we are able to supply the trade that comes our way. At the North Dakota State Fair, during the last week of July, we had an exhibit of twenty-two head upon which we won all but two premiums for which we had entries. We expect to show at the Iowa, Minnesota and South Dakota State Fairs this fall, having some thirty head on exhibition, and we should be glad to meet any of our old customers at these fairs and will be pleased to make the acquaintance of many new ones who are interested in this breed." See the advertisement on page 25.

A great lot of Duroc Jersey red pigs, eighty March farrow, is the announcement of Mr. W. J. Hartung, of Maxwell, Iowa. Mr. Hartung has been very successful in pleasing hundreds of Homestead readers with the popular Cherry Blond pigs sent out. This season the crop is better than usual, and some real bargains are in store for the early buyer. Mr. Hartung breeds heavy-boned Durocs, and is very careful to see that they stand well up on toes. Good backs and short, broad heads are noticeable characteristics, bred for generations in the herd. As seen by a Homestead representative recently, the herd must be rated among the good ones of the land. This crop of pigs are by the following three noted boars: Roy Advance, Malcom's Model 2d and Gold Standard. The last named boar is for sale, as are four good fall boars. Mr. Hartung will hold a brood sow sale February 9, 1907. He wishes now to dispose of the boar pigs to Homestead readers at private sale.

Beginning with this issue appears on page 23 the advertisement of Messrs. Clark & Tryon, of Wausau, Neb., who are now offering for sale forty head of fall and spring Duroc Jersey boars. These are sired by Clark & Tryon's Orion, Duroc Challenger's Redeemer and Chime's Advance, and are out of Duroc King, Duroc Challenger and Glendale Critio sows. Clark & Tryon's Orion, the sire of a great many of the pigs, is a son of Kruger's Maid, the \$410 sow that sold in the Manley sale, and she was also the dam of the great sweepstakes sow, Alix, that won wherever shown. The boys have a number of good sows in the herd, among which is a daughter of old Duroc Challenger and out of the noted brood sow, Minerva C. II. that was the best brood sow in the A. T. Coie herd. They are offering some good boars for sale out of these sows and they are pricing them right. They have a nice bunch of both fall and spring boars and these are ready to ship at any time. Write them for prices and kindly mention The Homestead.

On October 26th will be held the Short-horn sale of Mr. A. P. Fuhrmeister, of Churdan, Iowa, and Mr. Theo. Vest, of Jefferson, Iowa. The offering is very largely of Scotch and Scotch-topped cattle, and is made up of unusually good individuals. Mr. Vest is practically closing out and will include his four-year-old herd bull, Scotchman 207626. He is a remarkably good red bull, was imported in dam by Mr. Joseph Wetter, of Liberty, Ind., and was bred by Mr. J. A. W. Mien, of Huntville, Scotland. He will also sell a number of good Scotch cows and heifers and his cattle are an exceptionally uniform and well-cared-for lot of Short-horns. Mr. Fuhrmeister has selected some of his best cows and heifers and will include them in this sale. At the head of his herd stands the richly-bred Cruickshank bull, Matchless Champion 219725, a son of the noted sire, Champion, now at the head of the J. H. Graham herd at Spencer, Iowa. His dam is a daughter of Imp. Royal Don, second dam by Imp. General Booth. All of the Fuhrmeister females will be bred to him and well along in calf. He will sell a richly-bred Missle cow, a daughter of Prince Nonpareil out of a daughter of Imp. Confessor. He will also include a daughter of Cumberland, a richly-bred Violet Bud cow, and she will be one of the best things in the offering. There will be a liberal number of Scotch cattle in the sale, among which will be some good

bulls. The sale will be held at Jefferson, Iowa, and due announcement will be made in a few weeks.

During the Kossuth County Fair there is to be held a combination sale of forty head of pure-bred cattle and forty-five head of pure-bred hogs. The offering of cattle will include Angus, Short-horns, Red Polled and Hereford breeds. The swine will be representatives of the two popular breeds, Duroc Jersey and Poland China. These animals are contributed from the leading herds of the county and will include many prize winners and the produce of prize winners. The sale will be held in a large tent on the fair grounds at Algona on September 14th. The managers of the sale are Messrs. J. P. Schoby, Myron Shenck and M. P. Daw. For catalog address Mr. C. T. Chubbs, Algona, Iowa. The advertisement will be found on page 23 of this issue.

LIVE STOCK SKETCHING.

Many of our readers wish to have sketches made of their stock for use in catalogs and other advertising matter. We take pleasure in recommending Mr. A. V. Lock, of Remington, Ind., who is one of the best artists in the country. He has done work for many of the leading breeders throughout the central West and guarantees satisfaction. His prices are reasonable and he will be pleased to communicate with anyone desiring to have sketches made. Kindly mention this paper when writing him, as per his announcement on page 4 of this issue.

THE HOME OF EXPANSION.

The herd of large, roomy hogs owned by Messrs. H. C. Dawson & Sons, of Endicott, Neb., are as strong as ever. The writer was not at all surprised to find as growthy a lot of hogs as you would ask to see. Several of this hog's get are heading herds and we must say that we never saw as strong a breeder as Expansion. His get of two or three generations show his wonderful bone and size. The grand old hog is still doing service and his get are as much in demand as ever. The cross with Growthy Perfection has produced some very choice things. The entire lot of sows in the herd are growthy. This firm have as strong a show as ever and will undoubtedly be in line for their share of ribbons. They are making good prices on choice pigs.

JENSEN & SON'S POLANDS.

The writer recently visited the well-known firm above mentioned, at their farm near Bellville, Kan. The herd is of the large type of hogs and it is the owners' intention to continue with the hog that gets size combined with quality. The crop of spring pigs are very nice. The herd is headed by Mogul by Blain's Tecumseh and out of Maria's Daughter. This animal is very strong and his get are also choice. He is ably assisted by Grand Chief 2d and a son of Mogul, first and sweepstakes of Nebraska. The sows in the herd represent the blood of the herd boars, Expansion, Chief Tecumseh 3d, L's Tecumseh and Black U. S. Another boar doing service in the herd is Jumbo U. S. by Ohio U. S. This is a very strong hog. His get are good, with plenty of vitality. Messrs. Jensen have some choice pigs sired by above boars and Pawnee Chief, Exwansee, etc. They will hold a sale in the fall. If interested in the useful type of Poland, write this firm.

THE M'KEEVER HERD VISITED.

In reviewing the good herds over the West we stopped at Hubbell, Neb., and found Mr. Wm. McKeever surrounded by a herd of large, roomy Poland Chinas. The spring crop of pigs show the result of good care and blood lines combined. The great herd boar, Expansion C, by Expansion and out of a Corwin-bred dam, is one of the growthiest Polanders we have found. His get are very strong. This herd is there with the bone and feet and has plenty of quality with it. Exwansee is another of the Expansion get that is doing good work in the herd. Boliver also holds forth. The herd of sows are very large and even. They represent the blood of Expansion, Victor, I. X. L. and others of the large kind. Mr. McKeever has as growthy a lot of spring pigs as we have found. He will be at the Nebraska State Fair with his herd header, Expansion C, and a strong lot of his get. They will hold a brood sow sale. Watch our columns for announcements.

ENTERPRISE IN SHORT COURSE WORK.

Practically every farmer in the corn belt is aware of the fact that the short course at Ames, Iowa, in corn judging, live stock judging and domestic science is attracting the attention of all enterprising farmers' sons and daughters as well as a goodly number of the older folks. However, it is not generally known that a branch in this important industry has been established at Mt. Pleasant, Iowa, by the Young Men's Christian Association at that place. A short course in the above branches will be held in the Seeley Y. M. C. A. building at Mt. Pleasant, Iowa, December 17th to 22d, inclusive, co-operating with the Iowa Agricultural College at Ames. The live stock judging contest will be conducted by Prof. Chas. F. Curtiss, dean of agriculture, and Prof. R. K. Bliss, in the new pavilion on the Mt. Pleasant fair ground. The best live stock in southeastern Iowa is promised for this purpose. The corn classes will be conducted by Prof. F. G. Holden, professor of agronomy. The domestic science will be taught by Miss Mary Rausch, of Ames, who is an expert in her line. Evening lectures will be conducted at the college chapel by Dr. A. B. Stierms and Dr. J. H. McNeil, while Prof. Geo. M. Rommel, expert in animal husbandry of the department of agriculture, U. S. A., will be a prominent speaker. One hundred premiums valued at over \$500 will be awarded by Professor Holden in the big corn show. Such enterprise as this is certainly deserving of imitation. It is made possible, however, in this instance, through the untiring efforts of Mr. W. B. Seeley, who has had charge of the erection of the new hundred-thousand-dollar Y. M. C. A. building just completed and dedicated at Mt. Pleasant, Iowa. This is by far the finest Y. M. C. A. building in the entire West, and was built by the bequest left by Mr. W. B. Seeley's brother, Mr. Geo. Lincoln Seeley. The building is very imposing and substantial and has the finest gymnasium in the entire West. It was built, furnished and dedicated, including all appurtenances for the manual training department free of cost to the citizens of Mt. Pleasant, the only

stipulation being that the citizens are to maintain the expense of running it. As both Mr. Seeley, deceased, and W. B. Seeley were reared on the farm and have always lived close to nature and nature's ways, it is altogether fitting that the short course in agriculture should be taken up by this particular association and a permanent home made for it in this beautiful building.

LITERATURE ON THE YORKSHIRE HOG.

The American Yorkshire Club has recently prepared a booklet of fifty pages giving much valuable information on the Yorkshire hog. The secretary of the association, Mr. Harry G. Krum, gives the history in detail of this breed, and especially deals with its introduction into the United States and Canada. Prof. J. J. Ferguson, of Swift & Co., Chicago, has written a paper for this pamphlet, entitled "The Place of the Yorkshire in American Swine Husbandry." Of this breed Professor Ferguson says: "Their strong characteristics are strength of constitution, firmness of bone and ability to reach desirable weights at an extremely early age. Some charge them with being slow maturing in view of the fact that a thrifty Yorkshire will take on weight until the age of four or five years, but compared with other breeds, at the age of twelve months, I am satisfied they cannot be surpassed for rapidity of growth and development." A number of half-tones of prize-winning animals are given in this pamphlet, and it is from cover to cover an interesting and valuable publication. Copies may be had by addressing the secretary, Mr. Harry G. Krum, White Bear Lake, Minn.

W. W. ANDREWS' DISPERSION OF ANGUS CATTLE.

We are just in receipt of the catalog issued by Mr. W. W. Andrews, of Maryville, Mo., for his dispersion sale of Aberdeen Angus cattle. Those who are interested in the doddies should not fail to write today for one, as there will not soon be a better opportunity offered to secure a better lot of choicely-bred individuals than will go in this dispersion sale. Ten head from the herd of Messrs. C. D. Hooker & Son, of Maryville, Mo., are cataloged. On glancing through the catalog we find nine Queen Mothers, five Prides, five Blackbirds (three of these are daughters of the great Prince Ito), the balance being Ericas, Heather Blooms, Western Roses, etc. Mr. Andrews regrets that his failing health forces him to take a needed rest, as he is one of those men who loves his cattle and his whole interest was centered in seeing how well he could grow them. Messrs. Hooker & Son were invited to contribute ten head in order to make a good-sized offering, and they have selected animals of a very high standard and from their best families. The catalogs are ready and these gentlemen will be glad to mail one to any who may be interested. The advertisement starts next week, but address either Mr. W. W. Andrews or C. D. Hooker & Son, Maryville, Mo., and catalog will be mailed promptly. Kindly remember to mention this paper when so doing.

BARGAINS IN HEREFORDS.

Mr. T. P. Whittenburg, of Pleasant Hill, Mo., offers a car load of pure-bred Herefords, one-half of which are recorded, the remaining half being animals that could have been recorded, but through negligence they were not until the age limit was passed. None of these cows are over eight years of age, a pedigree can be furnished with each, and of the twenty-six head only three are bulls, these being bull calves that go at foot. Their breeding is first class, fourteen of the number being by Don Antonio 18327, a grandson of Lamplighter, and out of a daughter of Beau Brummell. The writer has seen this bull, as well as his get, and pronounces him a good individual and as well bred an animal as is found in the herd books. His get are good; they show the Anxiety type and the male who is producing beef stuff would do well to look into this proposition, as Mr. Whittenburg is pricing them to sell. All females of breeding age are in calf to Paymaster, Mr. Whittenburg's Anxiety-Lord Wilton-bred bull that he purchased at Messrs. Gudegg & Simpson's February sale. This should be worth several dollars to the purchaser of the bunch, as it is seldom that one gets a chance to get the service of such bulls as Paymaster. The writer has just seen these cattle and we do not hesitate to urge any man who wants some extremely well-bred and choice individuals that will make money, to go and look at them. As before stated, Mr. Whittenburg is pricing them right, as he has not the room to keep them.

THE WHITE-METZGER SALE AT COUNCIL BLUFFS, SEPTEMBER 15TH.

The opening gun of the Poland China season will be fired at Council Bluffs, Iowa, on September 15th, when Messrs. Geo. H. White, of Emerson, Iowa, and E. M. Metzger, of Fairfield, Iowa, will sell fifty head of their tops, including many of their show winners. Mr. White is putting in twenty-five head, nineteen boars and six sows. Among these will be his two prize-winning herd boars, Standard Perfection and Contractor. Both of these were in the winnings at Des Moines last year. Mr. White also sells two February 8th boars out of Lady Tecumseh, a litter sister to Oakland's Prospect. Three other good boars are out of Spot's Beauty, one of the best brood sows and a daughter of the noted boar, R's Claud. He also sells three fall boars by Proud Corrector that are among the choice things in the sale. He will sell a splendid lot of sows which will have to be seen to be appreciated, among which will be some of this year's show sows. Mr. Metzger also sells twenty-five head, mostly the get of Winning Dude, the first-prize Nebraska State Fair winner, and Nemo L's Dude. He is selling some strictly high-class stuff, both in boars and sows. There are four boars in his offering by Winning Dude, out of Sensation Queen, that are good enough to go anywhere. Both of these boars can be seen at the fairs, as well as two choice gilts that also go into the sale. Dude's Darling is one of Mr. Metzger's good yearling boars out of Goldie U. S. that is among the tops of his offering. He is putting in the tops of his herd and there are some sows in his sale sired by old Nemo L's Dude and Winning Dude that are good enough to enter any herd. The record of these two great boars, both at the fairs and in the sale ring, have made a wonderful demand for their get, and Mr. Metzger never offered a better or a

more choice lot than he sends to Council Bluffs on the 15th of September. Send to either Mr. White or Mr. Metzger for catalog and mention The Homestead.

SCOTCH SHORT-HORN BULLS FOR SALE.

Mr. A. L. Alexander, of Morning Sun, Iowa, has a few good Scotch Short-horn bulls for sale sired by such bulls as Darnley's Best and Highland Chief Jr. Some of these bulls are out of imported Scotch cows. They are not in high condition, and for that reason can be purchased well worth the money that is asked for them. Inasmuch as these bulls have not been specially fitted, have never been and are not now stabled, someone can secure a bargain at a very modest figure in the Scotch herd bull as well bred as the very best by addressing Mr. A. L. Alexander, Morning Sun, Iowa.

MR. O. V. PERRY DISPENSES HIS DUROC JERSEY HERD.

Elsewhere in this issue of The Homestead will be found the announcement of Mr. O. V. Perry, of Riceville, Iowa, announcing the dispersion sale of his Clydesdale horses numbering seventeen head, fifty head of registered Short-horn cattle and eighty head of Duroc Jersey swine. These pigs are by Advance Boy, a son of the International show hog, Advance, perhaps the best Duroc Jersey boar that America has seen in many years. Individual merit by inheritance is the rule on which Mr. Perry has built up his herds. The best breeding does not satisfy him except the individual merit is in keeping with the breeding. These Duroc Jerseys are all royally bred, as well as being of the very best type and conformation as individuals. The modern pork barrel type has been his model. The catalog of this dispersion sale is now out and ready to mail to all who will make application for such, mentioning The Homestead.

IMPORTANT SHORT-HORN SALE.

Farmers are realizing more every year the importance of live stock husbandry. This is the basis of successful agriculture. To restore fertility to depleted soil, cattle are invaluable. To do this, and at the same time pay their way, there are no better cattle than Short-horns—excellent for beef, also good for milk. Those who wish cattle of this excellent breed will have an opportunity to get some that are strictly good by attending the sale, Thursday, September 6th, at Hamline, Minn., during the state fair. These cattle have been consigned from the best herds in the Northwest, and will be found a useful lot. Among them are several imported cows. The blood of many of the best and most noted sires of the breed is represented in this offering. The sale includes the produce of Imp. Bapton Ensign, Nominee, Young Nominee, White Hall Sultan, Imp. First in the Ring, Pitiville Merry Lad, Prince Victor, Straight Archer and other good sires. The sale will be held in the new live stock amphitheater on state fair grounds, Thursday, September 6th, at 1 p. m. For catalog write Mr. B. O. Cowan, assistant secretary, 17 Exchange Ave., Chicago, Ill.

THE LAST CALL FOR THE O'NEILL SHORT-HORN SALE.

Nebraska breeders, and especially those in the western and northwestern part of the state, will be interested in the combination Short-horn sale to be held at O'Neill on September 7th. This sale will be under the management of Mr. D. J. Cronin, one of the best-known western breeders. The cattle will come from the herds of Messrs. A. J. Stonebraker, Royal, Neb.; D. L. Pond, Inman, Neb.; D. J. Cronin, O'Neill, Neb., and W. M. McLemore, Kearney, Neb., and there will be fifty head in the offering. There will be a lot of well-bred and useful bulls in the sale, suitable for farmers and ranchmen, and there are a few that will make good herd headers. A large per cent of the females will be heifers, ranging in age from one to three years of age. The most of these are Scotch-topped on good Bates foundation and are especially well bred in the milking strains of Short-horns. The cattle will be in fair flesh, but not fat, as they have only recently been taken out of the pasture. This sale will be held during the fall and there will be a suspension of business while the sale is going on. Nebraska breeders and farmers who want Short-horn bulls or good cows and heifers will find about what they want in this sale. The catalog is now ready for distribution and will be sent on application. Write for it to Mr. D. J. Cronin, O'Neill, Neb., and mention The Homestead.

SEELEY'S DODDIES.

Readers of this journal are familiar to a greater or less extent with Mr. W. B. Seeley, of Mt. Pleasant, Iowa, and his famous herd of Seeley doddies. It is a well-known fact that Mr. Seeley has been a purchaser of some of the best Aberdeen Angus cattle that have been put on the market in recent years by the best breeders in America. It was a great stroke, in fact a ten strike, when Mr. Seeley secured Blackbird Ito to lead his herd. His sire was the \$9,500 bull, Imp. Prince Ito, and his dam the celebrated cow, Blackbird 15th. One of our representatives has been watching this bull since his purchase by Mr. Seeley with considerable interest. Being bred as he is and carrying the superior individual excellence, with all the marks of a great sire, we had really expected to hear of great results from the use of this bull on the Seeley herd, composed of Prides, Blackbirds, Ericas, Queen Mothers, Baroness and Westertown Rose families. On a recent visit the most sanguine hopes of our field man were more than realized, for the get of Blackbird Ito surpasses that of any sire ever used by Mr. Seeley, not excepting the great 3d Mayor of Estill. The best young bull ever seen on Mr. Seeley's farm is a calf about ten months old sired by this bull; in fact, all of the get of this bull can readily be selected from the remainder of the herd without asking any questions by anyone who has an eye for live stock. The splendid heads, true, even lines and exceeding smoothness at the tail setting are a few of the good qualities that Blackbird Ito stamps upon his offspring with unerring certainty. This young bull referred to is Quo Warranto, calved September 30th. He is a Queen Mother by Blackbird Ito and out of Seeley Queen. Here is a herd header for someone, of the choicest breeding and individual merit seldom equaled; in fact, this bull should have been fitted and taken to Des Moines, but Mr. Seeley is not making any show this

year. The herd is in the pink of condition and is rapidly growing by virtue of its being an up-to-date breeding herd. However, the motive of Mr. Seeley in removing his Aberdeen Angus cattle to his Springfield farm was to excel in quality rather than quantity. About twenty head will form the size of the draft from this noted herd that will go into the Angus sale at the new pavilion in Mt. Pleasant, Iowa, October 21th. Mr. Seeley's announcement appears at all times.

CHOICE BERKSHIRES FOR SALE.

Homestead readers who are in need of a good, choice, heavy-boned, long-bodied, strong-backed Berkshire boar will do well to write Mr. W. B. McTavish, of Coggon, Linn county, Iowa, at once. Mr. McTavish is one of the old-line breeders that has kept abreast of the times in the breeding of good Berkshires. He has maintained that the Berkshire to be at his best must be a hog with more than ordinary scale, size and bone, hence heavy-boned, short-legged, strong, arched-backed Berkshires possessed of extra spring of rib with very short, broad, dished faces, has been his model. This kind is now offered our readers at modest prices, quality considered. Mr. McTavish has been an exhibitor at all the leading state fairs as well as at the international in Chicago, and has never come away without winning the "lion's share" of prizes. His announcement can be found on page 23.

PRITCHARD'S BIG-BONED POLAND CHINAS.

On Saturday, September 22d, the third day's sale of the circuit, will occur the Poland China sale of Dr. H. Pritchard, one of the best-known Poland China breeders in the Elkhorn valley. There are few herds in the West that have had the reputation for as much size and quality as will be found in the Pritchard herd. At the head stands Wisner Chief 76067, one of the best breeding sons of old Chief Tecumseh 3d, and here also will be found Big Tom 2d, a boar that will easily weigh 1,000 pounds in condition, and known as one of the largest boars in the state of Nebraska. He has also used Perfection Keep On, a son of T. R.'s Perfection, and he has pigs by the three boars, as well as by a few boars that have headed other good herds. He puts twenty fall yearling sows into this sale, fifteen fall gilts and fifteen fall boars. They are a growthy, well-developed lot of Poland Chinas, with good heads and ears, plenty of size and ample quality. In the herd will be found some grand good brood sows, undoubtedly as good as will be found in any herd in the West, and many of the things in the sale will be out of some of his best sows. He is putting in a splendid lot of boars, ready for use, and these are as good as will be sold in Nebraska this fall. Write Dr. Pritchard, Wisner, Neb., for catalog and kindly mention The Homestead.

RUSSELL LOSES GLENWOOD CRITIC.

The many friends of Mr. E. Z. Russell, of Blair, Neb., will regret to learn of his losing his splendid yearling boar, Glenwood Critic, considered one of the outstanding young boars of the year. The loss was the result of the intense heat of last week. Those who have watched this hog during the summer had every reason to think he was in the winnings this fall. Mr. Russell will be at the Iowa and Nebraska State Fairs, however, and will have with him his two-year-old boar, Glendale Critic. He has rounded out into one of the smooth two-year-olds and will be liked by many of the breeders who will attend the shows this fall. He will also show another good yearling boar in Critic's Echo, that has been considered one of the good young boars in the West. He will fill several of the other classes and will also take a few good pigs with him. Mr. Russell will make a public sale of thirty-five spring boars and ten choice gilts at his farm on October 8th. Included in this sale will be the yearling boar referred to above, Critic's Echo, and he will be a herd-heading proposition that many of the boys have been in search of. The pigs are a splendid bunch and have been grown out in such a way as will insure the very best results. These are sired by Glendale Critic, Gold Dust Jim 2d and Critic's Echo. We desire to call the breeders' attention to this sale, as there will be a number of decidedly choice pigs in the offering, with a line of blood behind them that insures an excellent outcome, if taken care of. Mr. Russell will be found in barn 16 at the Iowa State Fair and barn 4 at Lincoln, and he will be pleased to have all the boys call and see him.

ANGUS AUCTION AT HAMLINE.

One of the attractive consignments of the Minnesota State Fair sale of Aberdeen Angus at Hamline, September 4th, is that of Mr. S. Melvin, of Greenfield, Ill. Mr. Melvin has sold many high-class cattle at auction and needs no introduction to breeders anywhere. He catalogs for this occasion three young bulls, the first of the get of the double Erica bull, Ecuador, that was bred by Mr. John S. Goodwin, and is one of the best bred of all Trojan Ericas, he being sired by Imp. Equestor and out of Imp. Epaulot. One of these three bulls, Primo 2d, is an exceedingly well-bred Ballindalloch K. Pride from Key of Philadelphia, a daughter of the double Blackbird bull, Blackcap Monarch (a full brother to Black Monk, champion over all breeds in 1897), and the cow, Key of Paris, probably the greatest of all Pride cows imported to America. A two-year-old heifer of the Mina family and a six-year-old cow of the Queen Mother family and both sired by the great Blackbird sire, McHenry Blackbird 6th, are cataloged by Mr. Melvin. One of the largest consignors to the auction is Mr. W. L. Gelbach, of Lancaster, Wis. His entries are strong in the hood of the celebrated bulls, Golden Abbott, Heather Lad 4th, Baltimore of Glendale, Pride of Albion, Lord Woodlawn, Moon Eclipse, Clansman Chief, Guido Knight 2d and Heather Lad 2d. Mr. Gelbach includes eight cows and heifers and four bulls that will do credit to this great market-topping breed in this Minnesota State Fair sale. Mr. P. Abrahamson, of Lanesboro, Minn., is about the only consignor from his state that is supporting the auction with entries. He includes one of his stock bulls, Sunnyslope Jack, that was bred by Messrs. Baker & Smith and sired by Black Keilor 3d, a Blackbird son of the noted Pride bull, Pride of Albion. Mr. Abra-

hamson consigns a young bull and a six-year-old cow of the celebrated Georgina family that produced Moon Eclipse, the bull that made the fame of Mr. B. R. Pierce as a breeder, and the cow is sired by Heather Wellington, a son of the Pierce-bred Young Wellington, the champion bull at the World's Columbia Exposition. Other sires represented are Gardner Regulator, a Queen Mother, bred by Mr. C. H. Gardner, and McHenry Pride 11th, a Pride bred by Mr. McHenry and sired by the famous Heather Lad 4th. Included in the entire offering are some of the best representatives of the famous Blackbirds, Prides, Ericas, Queen Mothers, Minas, Heather Blooms and Georginas. There are show cattle of both sexes and the auction is in every way worthy the support of breeders of the North and West.

MARRS' DUROCS.

Among the young's more progressive breeders of the Duroc Jersey in northwest Missouri is Mr. W. E. Marrs, of Albany. He has been breeding the reds for some two or three years, and prior to his locating at Albany he lived at Lawrence, Neb., where was located the great herd owned by Messrs. Bowman & Fitch. This is where Mr. Marrs gained his first knowledge of the Duroc. He was a close friend of Messrs. Bowman & Fitch; knew the various crosses were made so as to produce the best results, and at Messrs. Bowman & Fitch's dispersion two years ago Mr. Marrs bought sows bred to the great boars, Improver II, and Cole's Duroc, and from them and a few others has grown a herd that is destined to soon stand second to no herd in the corn belt. To mate with the get of these two boars he made a good selection when he secured from Mr. R. J. Harding, of Macedonia, Iowa, the mature boar, Pilot J. 26311, a grandson of old Marti 4395, and out of a sow bred by Messrs. Stribling & Son. Other lines of breeding are found in Mr. Marrs' herd and all are good. On October 23d he will sell his top boars and gilts, about forty-five head, selected from his herd of over 100 head. Breeders as well as farmers will find much stuff in Mr. Marrs' sale that should interest them. Watch for announcements.

VON SEGGERN'S HEREFORDS.

On Friday, September 21st, Mr. J. G. Von Seggern will sell forty head of well-bred Hereford cattle, rich in the blood of Anxiety 4th, The Grove 3d, Columbus, Lamplighter, Hesiod and other noted sires. This is his first annual sale and he is putting up an offering that will be a credit to himself and his herd. There will be thirteen bulls and twenty-seven cows and heifers in his offering. Eight of the cows will have calf at foot by his great breeding bull, Columbus 25th 100912, considered the best breeding son of old Columbus. Every cow in the sale, excepting one, will be bred to him. He now heads the Von Seggern herd and is one of the very best Hereford bulls today in Nebraska and the West. There will be one of his sons and one of his daughters in the sale, and as his get have always been in demand, it is fair to presume that they will be eagerly sought after on sale day. A large per cent of the cattle will be sired by Swinburne 109741, a son of the great Lamplighter, while a few will be sired by Columbus 25th and Major Bouck, a direct descendant of old Lord Wilton. The thirteen bulls that go into the sale range in age from eight to thirty-four months, are a growthy lot and a good, vigorous, well-developed bunch of bulls. The females are a prolific lot of cows, with good backs, and many will have calf at foot. If any of our readers want Herefords here will be a good place to buy them. Write Mr. Von Seggern for catalog and mention The Homestead.

NOW IS JUST THE TIME TO BUY A MANURE SPREADER.

Every farmer knows that after harvest there comes a little lull in the farm work, and at the same time there is an accumulation of manure that should be properly spread at once—either as top dressing for meadow or on stubble ground before fall plowing. Too many farmers give too little thought to the value of their manure crop. And this is wrong, because you can't expect to be eternally taking something out of the ground and never putting anything into it. The up-keep of your farm depends upon the question of fertilizer. As the price of land advances, it is harder to make a farm pay a good dividend and to get the best crops and the best value out of the land per acre, very careful attention should be given to the question of fertilizer. The American Harrow Company, of Detroit, Michigan, manufacturers of the celebrated American Manure Spreader, have been making spreaders a good many years. There isn't any doubt but that the American is the standard of all spreaders, having 40 per cent more exclusive features than any other spreader on the market, and this is a recognized fact by farmers throughout the country. The American Harrow Company have changed their plan of selling. They now sell all their spreaders direct to the farmer from their factory, either for cash or on time, and they allow a full month's free test on every spreader they send out of their factory, to prove every claim they make for it to be true. They pay all the freight, and the buyer takes no risk of buying a spreader that is not as represented. The American Harrow Company are a responsible concern, composed of some of the best-known and most reliable men in the country. Mr. D. M. Ferry, the well-known seedsman, being its president; Mr. R. W. Gelett, a Detroit banker and capitalist, its vice-president, and Mr. W. W. Collier its secretary, treasurer and general manager. Mr. Collier is a well-known implement manufacturer, and was formerly president of the Agricultural Implement & Vehicle Manufacturers' Association, and well known in manufacturing lines. Mr. Collier is also a practical farmer and breeder himself, owning and living on the Elm Dale Farms, near Pontiac. Mr. Collier is probably one of the best-posted men in the country on the question of fertilizer, having made it a study for the past twenty-five years. These well-known men and this well-known concern hold the confidence of the people throughout the country, and their liberal offer of selling their spreaders and their new selling plan is honorable in every way. We recommend that our readers send to the American Harrow Company for their catalog, and also for their val-

uable booklet on the value, care and application of manure. This book is of real value to anyone who owns a farm, and should be in the hands of every farmer, no matter whether he contemplates buying a spreader at this time or not. The book and catalog are free, and will be mailed to any one on request by The American Harrow Company, 139 Hastings St., Detroit, Michigan.

RED POLLED CATTLE TO EXCHANGE.

Mr. C. A. McCartney, of Weldon, Iowa, has thirty-five head of registered Red Polled cows and bidders, sixteen spring calves and one two-year-old bull which he is offering for sale for cash, or in exchange for young mules. His advertisement will be found on page 23 of this issue. If interested, write him for further particulars.

CLOSING OUT SALE OF SHORT-HORNS.

Mr. O. V. Perry, of Riceville, Iowa, will make a dispersion sale on September 11th at his farm near Riceville, Mitchell county, Iowa, of his entire herd of fifty head of choice Short-horn cattle. Mr. Perry has always been tenacious of high standard individual excellence in all animals owned or bred by him, and while these cattle are clean-bred American families, no straight Scotch cattle are offered. The entire herd is red. There is but one animal in the entire herd not a solid red. Such a high standard of individual excellence has been maintained that the young bulls have been taken by the farmers at a very tender age, and while every female in the herd is a producer, yet at the present time there are only two young bulls in the offering. There will be about sixteen calves at foot by sale day, and the remainder of the females will calve by January 1st. The average weight of these cows ranges from 1,400 to 1,500 pounds in breeding condition, and every cow in the herd is a breeder. They are all bred to Sampson 137088, which is the present herd bull and will be included in the sale. From the standpoint of a strictly first-class business herd this one stands without a peer. Mr. Perry invites the farmers of Iowa, Minnesota and Wisconsin to come to his sale and help themselves. He is not anticipating high prices, but believes that the buyers will find a class of stock that will be as profitable to them as they have been to him. This herd has just attained the proportions for which the proprietor has been striving these many years, but continued ill health on his own part, and the recent loss of his life companion, have made this course absolutely necessary. It is certainly a great misfortune for any one to be compelled to give up his chosen life work when just reaching the age of maturity and rare good judgment that would insure success in the future. However, this unfortunate condition which confronts Mr. Perry will accrue to the benefit of the farmers and stockmen of Iowa, Minnesota and Wisconsin, who are tributary and easy of access to Riceville, where these cattle will be dispersed on September 11th. Cols. Sias Igo and R. Dorsey will sell this stock. The catalogs may be had by addressing Mr. O. V. Perry, Riceville, Iowa, kindly mentioning The Homestead.

NEBRASKA'S GREAT THREE DAY SALE SHORT-HORNS, HEREFORDS, POLAND CHINAS.

The Elkhorn valley is one of the richest and most fertile in the state of Nebraska. Located along the Northwestern line of railroad, which traverses this section of country from one end to the other, will now be found herds of cattle and hogs that are destined to become noted in the great live stock shows of this country. In no section of Nebraska or the West have greater strides been made in the improvement of pure-bred stock than will be met with in the Elkhorn country. The interest centers mainly about Wisner, one of the most thriving and enterprising towns in the valley, and in course of a day's travel in any direction you will encounter as good herds and as richly-bred herds as will be met with in any other state in the Mississippi or Missouri valley country. Here they have formed an association known as the Wisner Live Stock Association and have erected a magnificent sale pavilion, wherein will be held the pure-bred sales which will occur periodically from now on. The first of these sales will be held on September 20th, 21st and 22d, among an excellent bunch of Short-horn and Hereford cattle and Poland China hogs will be disposed of. The first day's sale will be composed of fifty head of Short-horns, from the herds of Messrs. S. S. Hall, Pender, Neb.; J. R. Mansfield & Son, Wisner, Neb.; Theo. H. Serck, Pender, Neb., and J. O'Kane, Bancroft, Neb. There will be fourteen bulls and thirty-six cows and heifers in the offering, and it will be as representative a lot of cattle as were ever sold in Nebraska. Mr. Hall, the largest contributor in the sale, sells thirty head, all of which are females excepting one young bull. He is sending a splendid lot of cows and heifers, many of which will have calf at foot by his former herd bull, Oliver Gloster, and many will be rebred again and well along in calf to his present Scotch bull, Morning Star 43730. The cattle that Mr. Hall is offering are largely of the Scotch-topped Young Mary, Young Phyllis, Rose of Sharon, Adelaide and other well-known families, and are a remarkably good lot of individuals. The fact that fifteen cows have calf at foot by Oliver Gloster, his former herd bull, is an indication that they are an excellent lot of breeders. Messrs. J. R. Mansfield & Sons will sell eight head of yearling bulls, all reds, and all sired by Nonpareil King, their well-known breeding bull, and the highest-priced bull in the Westrope dispersion sale. One of these is an especially good bull, has been well developed and is smooth, low and blocky, and he is going to be one of the toppest things in the sale. The others are just as good, only they have not received the attention this fellow has. They are bred along the same lines and will develop as well if they fall into good hands. Mr. Theo. H. Serck sells eleven head, four of which are bulls. Among the number is his herd bull, Merry Lad 160921, a son of Imp. Merry Hampton, and as good a breeding bull as was ever sired by that famous old sire. This bull was bred by Mr. C. B. Dustin, of Illinois, and was out of a daughter of the famous old bull, Lavender Lad. He was originally purchased by the firm of Messrs. L. Mason & Sons, of Pierce, Neb., and formerly headed their herd, and was purchased by Mr. Serck at their disper-

sion sale. He is now six years old and is just as vigorous as ever, and we may add that he is one of the best breeding bulls ever sold in Nebraska. His calves in the Mason sale commanded the highest price and his get in the Serck herd will show for themselves. He also sells three young bulls and seven females. Some of these will have calf at foot by Merry Lad and others will be bred to him. Mr. O'Kane contributes one yearling bull which is a good calf and will show for himself on sale day. Send to Mr. S. S. Hall, Pender, Neb., for catalog, or to any of the contributors to the sale. Kindly mention The Homestead when writing.

DOLLISON'S SHORT-HORNS AND DUROC JERSEYS.

With this issue of The Homestead begins the advertisement of Mr. James T. Dollison, of Sac City, Iowa, one of the well-known breeders of Short-horn cattle and Duroc Jersey hogs. His Short-horn herd is headed by Missie's Duke 3d 211557, a son of King Gloster, dam Missie 1034 by Bandmaster; second dam by the noted Prince President. He is an exceptionally well-bred Missie bull and has sired a lot of good calves. He has a number of well-bred Scotch cows and heifers in the herd, among which is a Missie, a Mysie, a Victoria and an Orange Blossom. The rest of his cows are well Scotch topped, are good milkers and splendid breeders. He now has a couple of good young bulls for sale which he is pricing at such a low figure as will certainly move them if anyone wants a bull. He has about eighty spring pigs sired by Fairview Wonder 44051, a son of Brighton Wonder, which in turn is a full brother to the great Crimson Wonder. He also has pigs sired by Fairview Colonel 25603, a grandson of old Duroc King and by Fairview Major 25607, a son of Lord Roberts. He is now using a boar called George W., a son of the World's Fair boar, Tip Top Notcher. Mr. Dollison has a lot of good pigs, both male and female, which he is pricing right. In fact he prices his pigs so that everybody can afford to buy, and he is making special prices where two or three are taken in a neighborhood, all to be shipped at the same time. Write him if you want a Duroc Jersey boar or a Short-horn bull. When writing him kindly mention The Homestead. See page 23.

M. L. LOGAN'S SALE OF SHORT-HORNS.

On page 24 Mr. M. L. Logan, of Lineville, Iowa, makes his first announcement of a sale of Short-horns to be held at his Caleb Stock Farm, near Lineville, Iowa, on Tuesday, September 18th. Mr. Logan has not gained the prominence in the Short-horn world that many have, but be that as it may, we want to say that Mr. Logan has the cattle. They are as well bred a lot as are often found and we doubt very much if a better opportunity to buy pure-bred Scotch and Scotch-topped cattle will soon be found. Fully one-third of Mr. Logan's offering are pure Scotch, the balance being the reliable Scotch-topped sort and descendants of the imported cows, White Rose, Flora, Miss Severs, Ruby and Strawberry. The majority of these being descendants of Imp. White Rose, a cow whose descendants have always been held in high favor by Short-horn breeders. All are cattle that Mr. Logan has bought with the intention of building as good a herd as is to be found in the corn belt or are the descendants of these. When buying, Mr. Logan has always looked to the individuality of the animal first and as a result he has built his herd along such lines as do not fail to impress all. Pure Scotch bulls have been used and thirty-four head of the offering are cattle Mr. Logan has bred. The bull end of the offering is light in numbers, only six head being cataloged, but these six head furnish herd bull material that should be looked after by those hunting bulls. On account of his retaining so many daughters of the Cruickshank herd bull, Victor Knight, Mr. Logan has decided to sell this bull. He is easily a ton bull in breeding form, is a good red and gets practically all red calves. Individually he is good, being low down, thick and meaty, and over back he is good, showing the desired fullness over crops and the spring of rib. His head and horn are nearly perfect and show the desired masculinity. As a breeding proposition he has made good and the twenty-five head of his get included in the sale will show his value as a sire. He was got by the \$1,000 Baron Dudding, considered the best son of the noted Godoy. Then followed two crosses of Lord Lancaster 5th got by Julius and out of Imp. Mary Ann of Lancaster 7th. The third dam in his pedigree, Athene 2d, was by Imp. Baron Bampton, a son of Roan Gauntlet. Fourth dam Imp. Athene was by Baron Violet, a bull that carried the blood of the world renowned Champion of England and Roan Gauntlet. The fifth dam, Aharilla, was a great show cow, and one Mr. Cruickshank prized very highly, and of the Violet family. The Athene family are also pure Cruickshanks. Mr. Logan feels that he should not part with this bull, but as before stated, he cannot be used in the herd to advantage longer. A yearling son of Victor Knight is listed as Lot 3. He and his dam, Victoria of Meadow Farm 43th, are illustrated on front page. The man looking for a desirable all red Scotch yearling should not fail to investigate this fellow, as he is far better than shown in the illustration. He is an exceedingly stylish bull, well balanced, evenly quartered, has the well-sprung rib, good covering over loin, is low down and is a thick, meaty fellow. Few better yearlings are found. Another exceedingly desirable Scotch bull is listed as Lot 14—Scottish Archer. He, too, is a red, calved October 15, 1905, and a calf that too much cannot be said for. When fully developed he bids fair to make a herd bull the equal of which is hard to find. For a calf he is exceedingly thick, is low down and well quartered, is good over crops and to the touch he is very mellow. He was got by Rose's Dudding, he by the \$1,000 Baron Dudding. His dam, Aconite of Maplewood, was by the Scotch bull, Bridal Archer; second dam, Dauble Aconite, was by the Bellows-bred bull, Aconite Boy, then follow such sires as Vice Royal, 2d Earl of Aberdeen, Pride of the Isles, sire of Imp. Aconite, and other Cruickshank sires. Thus it may be seen that the breeding of this youngster is in keeping with his individuality. Two other desirable young Scotch bulls will be sold, both sons of Victor Knight and both tracing to Imp. Rosebud, bred similar to Golden-drops. A desirable Scotch-topped bull is also

cataloged as Lot 39. He, too, is a son of Victor Knight. In females Mr. Logan has listed as good as he owns. Breeders who want a Scotch cow or two or some of the reliable Scotch-topped sorts should not fail to be on hand. Mr. Logan is selling females that will look well in any herd. Of these we shall say more next issue. Catalogs are ready and we urge all our readers who are interested in good cattle to write now for one and kindly mention this paper.

THE HAMLINE HEREFORD AUCTION.

In sympathy and accord with the onward March of the Herefords in America, the State Board of Agriculture of Minnesota does not stand for retrogression and will hold under its auspices on September 5th, at Hamline, during the state fair, the best of all the Hereford auctions to occur there. Mr. G. H. Hoxie, of Thornton, Ill., will consign daughters of the champion Perfection; Mr. J. C. Andras, Jr., of Manchester, Ill., will be on hand with show cattle by Prince Improver and Perfection Yet, sons respectively of Improver and Perfection; the Cosgrove Live Stock Company, of Le Sueur, Minn., with some sons and daughters of Hamline Hesiod, combining the blood of Anxiety 4th and Hesiod 2d; Mr. Tom Smith, of Crete, Ill., with representatives of Columbus 29th; Messrs. Zander & Tong, of Goodenow, Ill., with daughters of the Gudgeff & Simpson-bred bull, Blackstone; Mr. H. J. Fluck, of Goodenow, Ill., with three head, two females and one bull that are sired by sons of Peerless Wilton 39th, a son of Peerless Wilton; Mr. David Boss, of Zumbro Falls, Minn., with the imported bull, Conductor; Mr. David H. Powers, of Delavan, Wis., with sons of Blackstone and the imported bull, John Price; Mr. R. A. Wilkinson, of Crookston, Minn., with the Wilton-Anxiety bull, Conqueror Wilton; Mr. H. F. Mussman, of Grant Park, Ill., with sons of Prince Wilton; and last, but by no means least, is the consignment of Mr. A. R. Haven, of Greenfield, Ill. Mr. Haven has bred and exhibited quite a number of prize winners, including the champion bull at the McGavock show and sale at Chicago in March, 1904, and he is the largest contributor to this auction. The youngsters consigned to the auction by him are the get of his stock bull, Hummer Boy, a bull of excellent type that was sired by Imp. Weston Stamp and out of Birdie Bly by the Gudgeff & Simpson-bred bull, Boatman. The Gudgeff & Simpson-bred bull, Druid, by the champion, Dandy Rex, and out of a dam by Militant, has also been used by Mr. Haven and his get will be seen in the auction, doing credit to the celebrated Anxiety blood. Grove Wilton, Prince Archibald and Strong Grove have also their get cataloged in the Haven entries. The auction occurs the day after the Aberdeen Angus auction and the day before the Short-horn auction and is one of the attractive events of this great state fair. The best blood of the breed is represented in it and the type that American breeders have succeeded in producing is found throughout.

DISPERSION SALE OF CLYDESDALE STALLIONS AND MARES, SHORT-HORN CATTLE AND DUROC JERSEY SWINE.

The misfortunes of some accrue to the advantage of others. This unfortunate condition of affairs is the predicament in which Mr. O. V. Perry, of Riceville, Iowa, finds himself. A Homestead representative visited Mr. Perry last week and found him in very delicate health, superinduced by nervous prostration; to add to his other calamities he buried his belated this spring and finds himself in his present condition unable to further continue the breeding of pure-bred stock. Everything in the way of stock owned by Mr. Perry is registered. It is even said that the rats about his place are larger and slicker than those of his neighbors. Mr. Perry is a very methodical man in all his undertakings and in establishing his herd of Clydesdale horses he visited Mr. N. P. Clarke, of St. Cloud, Minn., one of the best importers of Clydesdales in America, and secured two mares for the foundation. Both these mares were imported, one of which was Exquisite 7544. She was a dark brown mare with black forelegs and white feet behind. She was bred by Messrs. Kerr & Creig, of Auchengill, Castle-Douglas, Scotland. She was sired by Prince Darnley and he by the Prince of Wales. Hence she is a half-sister to her majesty the Queen's great mare, Bonnie Mary, a prize-winner at the Windsor Jubilee Royal, and it may be said that she is also a half-sister to Lord Polworth's famous mare, Luxury, that won first at the Highland Agricultural Show at Glasgow, as well as numerous other prizes. This is unquestionably one of the best mares Mr. Clark ever imported. She and a goodly number of her produce are included in the sale. At least four of her produce go in the sale and two of her daughters have colts at foot. The old mare is safely in foal at this time and so are three of her fillies. The other mare with which Mr. Perry started is Princess of Airds 3967. She was bred by Mr. John Currie, of Scotland, and imported by Mr. Clark, her sire being Prince of Airds, he by Good Hope and he by the great Darnley 26th, perhaps the greatest Clydesdale stallion of his day. This mare traces on her dam's side in the third cross to the great Clydesdale stallion, Farmer, and on her sire's side, in the fifth generation, to the same stallion. This mare is also in foal and will be sold. All of the mares and fillies in the offering are bred to Imp. Heir of Fame (11067) 10639. This splendid hay stallion was foaled May 30, 1899. He was bred by Mr. Matthew C. Lurke. His sire was Baron's Pride, he by Sir Evered, he by Top Gallant and he again by the great stallion, Darnley, and the seventh cross leading down to the famous old Clydesdale stallion, Farmer. His sire, Baron's Pride, is at present rated as the best Clydesdale stallion in the world. Practically all of the winners at the leading Scotch shows were descendants of Baron's Pride. This will be the opportunity of a life time for farmers and breeders to secure some splendid Clydesdale mares and fillies, as well as three good stallions, one of which is second to none in America, Heir of Fame. There are thirteen head to be sold, besides four suckling colts, all sired by Heir of Fame, three of which are stallion colts. At the same time and place Mr. Perry will disperse eighty head of Duroc Jersey swine of the richest and best breeding, and fifty head of Short-horn cattle. The half-page announcement appears on page 23.

CLOSING OUT SALE OF REGISTERED

SHORT-HORN CATTLE, CLYDESDALE HORSES AND DUROC JERSEY HOGS

TO BE HELD AT THE FARM, 2 1-2 MILES NORTHWEST OF

Riceville, Mitchell County, Iowa, Tuesday, September 11th.

.....	5347 (95)		

The Clydesdales are of the McGregor and Baron's Pride strains. All N. P. Clarke's prize-winning Clydes, and include the six-year-old imported stallion, Heir of Fame 10639, a son of Baron's Pride, together with seven Baron's Pride grandsons and granddaughters. Four of the mares have sucking colts, including the imported mare Exquisite 7544, a sister to the Queen Victoria top priced mare Bonny Mary, and to Lord Polworth's show mare Luxury; also three daughters of Exquisite and her yearling son by Heir of Fame.

SHORT-HORNS.

The Short-horn offering, numbering fifty head, comprises a good, useful, well-bred lot of cows and heifers, of the beef and milk sort—the kind that have made the Short-horns popular with the farmer. There are forty-seven females, a number with calves at foot and others bred. The three bulls cataloged include the herd bull Samson, which is the sire of some of the calves. A number, including some fine large cows, are sired by the John McHugh bred Secret bull, Sunrise 121295.

100 DUROC JERSEYS.

The Duroc Jersey offering numbers around eighty head, pigs and all. Nearly everything in the herd is sired by the two herd boars, Advance Boy 28769 and Prince 37903, the former a son of Advance and the latter a grandson of Malcom's Model.

SILAS IGO, AUCTIONEER.

O. V. PERRY, RICEVILLE, IOWA.

METZGER-WHITE POLAND CHINA SALE

Council Bluffs, Iowa, Saturday, September 15, 1906.

The Tops of These Two Great Herds Will be Found in This Offering

50 Head in the sale, including the two herd and show boars at the Iowa State Fair, Standard Perfection and Contractor. There will also be some grand good herd heading boars sired by the Nebraska State Fair winner, Winning Dude, as well as representatives of such noted boars as Nemo L.'s Dude, Standard Perfection, Proud Corrector, Contractor and Perfection I know.

There will be a number of fall and spring boars in the sale and they are certainly good ones. They are our "tops," everything having been reserved for this great event. We are also including some of our best sows. These we have selected for this sale with the greatest care and are composed of the choicest gilts of both herds, also good fall sows and a few of our best matured sows. It is by all odds the offering of the year. If you want a herd boar or foundation sows that will do you good you cannot afford to not attend our sale. Write either of us for catalog. Address,

GEO. H. WHITE, EMERSON, IOWA. E. M. METZGER, FAIRFIELD, IOWA.

SALE OF SHORT-HORNS

AT M. L. LOGAN'S CALEB STOCK FARM,
LINEVILLE, IOWA, SEPT. 18th.

Forty-four Head Seven Bulls

One-third of the offering are pure Scotch, the balance are good American-bred families, topped off with good Scotch sires. Among the bulls is my Cruickshank herd bull Victor Knight, Baron Victor, a yearling, Victoria, and Scottish Archer, a short yearling. These are the herd-heading sort. Two other promising young Scotch bulls and a desirable Scotch-topped fellow are listed. I believe anyone looking for a herd bull of the right stamp will do well to attend my sale. The cows are regular producers of good stuff. I desire to call special attention to Victoria of Meadow Farm 4th and bull calf. Few better Scotch cows are found. You are cordially invited to be with me sale day, as I feel certain the cattle will please you. The catalog tells the story, and it will be mailed to all who apply for it, mentioning The Homestead.

M. L. Logan, Lineville, Iowa.

Cols. Bellows and Graham, Auctioneers.

I can also furnish a carload of range bulls.

Prairie Glen Herd of Duroc Jerseys

I AM now offering the best lot of Duroc Jersey boars I have ever bred; large, growthy, mellow, smooth fellows, with lots of bone and plenty of quality. Good enough to head the good herds and do the breeder good. Sired by such boars as Al's Chief 4337N, 15723A, he by J. J.'s Chief 12445A; first at Indiana state fair last year, a thousand pound hog, he by Winchester Chief 10077, he by Morton's King 78725, Tientsin 17281. Imp. Wonder 43861, A. L. Advance 43331, Odeboit Chief 35271, a son of Perfection Chief 425 hog, Pleasant Imp. Advance No. 44251, and other good sires; last but not least, Ohio Chief, two sons of this great sire and show boar. Tientsin No. 17281 for sale, sire of some of my best. Satisfaction guaranteed. Come and inspect, or write me. Prices reasonable, quality best. Address,
P. S.: Eight November males of rare quality; three Top Notcher bred. A. L. MOSSMAN, RADCLIFFE, IA. TELEPHONE 88-3.

125 Duroc Spring Pigs For Sale Cheap

I AM making very reasonable prices on our crop of spring pigs. The pigs are very thrifty and represent the blood of the great Gold Dust Jim, Belle's Echo by Echo King and out of the great Nebraska Belle. Others sired by Red Knight, first and sweepstakes boar at Neb. '05. The pigs will be sold at prices to suit the purchaser. We have the blood lines as well as the strong individual points. Our aim has always been toward the best obtainable. We will hold our sale of brood sows in February. Remember we are advertising to sell. Write us your wants and we will do the rest.

O. E. MICKEY - - - - - OSCEOLA, NEB.

TWO CHOICE OHIO CHIEF LITTERS FOR SALE.

70 Head of the Toppiest Duroc Jersey Pigs.
I AM offering for sale two very choice Ohio Chief litters out of a granddaughter of Echo King and Ak-Sar-Ben 4th. I also have pigs by Crimson Wonder Jr., Orion 2d and Leather Stockings, out of daughters and granddaughters of Nebraska Belle, Echo King and other noted sows and boars. I have the best blood lines known to the breed and I have a grand good lot of pigs. If you are looking for a herd header write or come and see me. I also breed Shire Horses and Aberdeen Angus Cattle. Young stock for sale at all times. Address
W. D. PITTMAN, LAKE CITY, IOWA.

NEBRASKA'S GREAT THREE-DAY SALE

IN THE NEW SALE PAVILION

Wisner, Nebraska, September 20-21-22, 1906

Short-horns, Herefords, Poland Chinas

The Greatest Three-Day Sale Ever Held In Nebraska.

50 Head Short-horn Cattle 50

Thursday, Sept. 20th.

From the Herds of

S. S. Hall, Pender, Neb.
J. O'Kane, Bancroft, Neb.
Theo. H. Serck, Pender, Neb.
J. R. Mansfield & Son, Wisner, Neb.

14 BULLS. 36 COWS AND HEIFERS.

MR. S. S. HALL, of "Hall's Haven" Stock Farm, Pender, Neb., will sell 30 head; all of which are females, except one young bull. These cows are the large, table-backed kind, with lots of scale and are good individuals. A great many will have calf at foot by Oliver Gloster, and nearly all will be bred back to his present Scotch bull, Morning Star 43730.

THEO. H. SERCK sells 11 head; 4 bulls, including his great breeding bull, Merry Lad 160921, by Imp. Merry Hampton, out of a daughter of Lavender Lad; 7 females, some of which will have calf at foot by Merry Lad.

J. R. MANSFIELD & SONS will sell 8 splendid young bulls, all sired by the noted Nonpareil King.

J. O'KANE sells one good yearling bull.

CATALOG now ready. Address any of the above breeders, or

Col. Geo. P. Bel-lows, Auctioneer. S. S. Hall, Mgr., PENDER, NEB.

40 Head Hereford Cattle 40

Friday, Sept. 21st.

From the Herd of

J. G. Von Seggern, Wisner, Neb.

THE blood of the Grove 3d, Anxiety 4th, Hesiod 29th, Lamplighter, Anxiety, Monarch and other great bulls represented.

13 BULLS. 27 COWS AND HEIFERS.

THERE will be sons and daughters of the great bull Columbus 25th 100912, considered the greatest son of old Columbus, in the sale. Twelve cows in the sale will be bred to him, and eight cows will have calf at foot by him.

A LARGE per cent of the offering will be grandsons and granddaughters of the great bull Lamplighter and Hesiod 29th and will be one of the most representative lots ever sold in the West.

THE BULLS range in age from 8 to 34 months and are a representative lot, and are bred along the most popular lines.

THE COWS AND HEIFERS are as good as has ever been sold in the West. All females old enough will have calf at foot or will be bred and well along in calf.

WRITE for catalog and come to the sale

Col. Geo. P. Bel-lows, Auctioneer. J. G. Von Seggern, WISNER, NEB.

When writing to advertisers please mention this paper.

VOL. LI. NO. 36.

DES MOINES, IOWA, SEPTEMBER 6, 1906.

WHOLE NO. 2564

THE DISGRUNTLED EXHIBITOR.

We are in the midst of the state fair season, and possibly the matter of state fairs is in the minds of the farmers of the central West more than any other subject. Important as fairs are to the visitor, they are of even greater importance to the individual exhibitor. Many a man puts a lifetime of service into the breeding of animals in order to gratify an ambition to "win" at some of the big expositions. Incidentally, of course, there is usually profit and pleasure in building up the business, but the great ambition is to come out on top.

The man who has been exhibiting at fairs for years has learned by experience that it never pays to kick, though there never was a large exposition held without bringing a great many "sore-heads" to light. It must be frankly acknowledged, however, that great improvement has been made in this regard over former times. Whether this is due to the fact that judges are more honest than they were formerly or that exhibitors have learned better how to take their medicine, we do not know; but the improvement that has been made along this line is desirable and the thing hoped for most is that the day will soon be here when only judges will be employed who are so capable and so honest that every man in the classes will accept the decisions with grace.

It is a great honor to be able to breed and fit any animal that will win at any of the state fairs of the corn belt, but it is a greater honor, in our opinion, to establish a reputation of being an impartial judge. We have many men in the central West who have established just such a reputation. Their nearest friends get no more at their hands in the showing than do strangers, merit in the animals before them being the only factor considered. We have men who are not even influenced by blood lines, but deal out the ribbons impartially to those who own plainly bred stuff and to those who have the fancy breeding.

In view of these facts, we think that the day has come when exhibitors themselves should learn the art of accepting gracefully the awards as placed by the honest judge. In most cases no loud protest is made, but in his heart the exhibitor in many cases feels resentment toward the man who turns him down, and there are few who feel this resentment without expressing it in some way or other. Of course the day when the exhibitor knocks the ribbon out of the clerk's hand has passed, though we have seen that spectacle more than once. What we need now is that all men down the line shall submit to the judge's decision. It is doubtful if any two men see merit exactly alike, and the owner of an animal should always make some allowance for this difference. He is rarely able to comprehend all the defects of his own animal and to see all the perfections of the other fellow's. We have seen men sore when their animals were almost perfection in form and quality, but fell below the money line on account of lack of scale. We have seen others who had the scale without sufficient finish and yet the owner was unable to realize the importance of combining the two in order to win. The very large animal does not necessarily win, nor does the small, tidy one. It is the medium-sized animal that combines in a high degree sufficient size with abundance of quality, together with a high form of finish, due to skilful fitting, that usually wins out.

There are notable examples of prom-

inent showmen in the central West who come up smiling no matter by whom they are defeated. These men, without a single exception, stand high in the esteem of their fellows. They receive encouragement in their defeat and congratulations when they succeed, and it is this type of men that the young exhibitor should emulate.

There might be instances where the temptation to kick or protest is beyond the power of a human to endure, and while instances of this kind may be found today, it is a matter of great satisfaction to those who follow the live stock business to know that there is less reason for resentment on the part of the exhibitor today than ever before. We take the stand that it is better under all circumstances to accept gracefully the decision of the judges, no matter how difficult its acceptance may prove to be.

CAUSE OF THUMPS AND REMEDY.

A number of inquiries have recently been received from subscribers relating to a trouble that is exceedingly common among young pigs; namely, thumps. Instead of having these inquiries answered, one by one, in the veterinary column, as has been the case during the last few weeks, we hereby quote from a letter written by one of our subscribers:

For some time I have wanted to make some inquiries through the columns of your paper regarding thumps in young pigs. My experience for the past two years is as follows: In the spring of 1905 I fed my brood sows, before farrowing, kitchen slop and corn only and same after farrowing. With this care the sows did not care for the little pigs and in some cases they even would kill them. After the little pigs began to eat, all they got was corn, this being soaked. With that kind of feed I never knew what thumps were. Timothy and clover pasture was always at hand, the sows and pigs having free access to it. Last year the young pigs did not gain as fast as this year.

Now, this year I fed as follows: Before farrowing time I fed my sows equal parts of oats and corn ground together, with salt and ashes mixed in the slop. Then after farrowing they got one-third oats, two-thirds corn, ground, and in thick slop same as before farrowing. This resulted in all the sows owning pigs and making good mothers, with plenty of milk for the little fellows. Then as soon as the pigs began to eat, I made a little pen for them to get into and fed them thick slop of corn and oats ground

in equal parts for morning and noon and corn and barley for night, ground and fed in the same way. Aside from this, they have had shorts, oil cake, stock food, ashes and salt and plenty of lime water of amounts not quite as much as they will eat. They also ran on green stuff at large in the pasture and fields and everywhere.

Now, the question is this, are thumps hereditary or contagious, or neither? Last year I bred from a scrub boar with no paper attached. This year I used a thoroughbred Poland China boar I bought of a neighbor and of the litter of pigs of which my boar was one, one of the pigs died of thumps when about four weeks old. My aim this year was to raise the best hogs I could in the shortest time, with the greatest gain possible, and to do this I have fed a well-balanced ration which is so often spoken of in this paper. I have lost two thumpy pigs and now there are five or six thumpy ones. These are not of the largest pigs, but are about medium size. They generally survive on careful treatment, as directed by you, but why do they get the thumps? They do not get half as much corn as last year. If you can advise me in any way as to feeding my pigs I would be grateful for such advice.

This inquiry was submitted to our veterinarian, Dr. A. S. Alexander, who replies as follows:

We claim and always have held that the tendency to "thumps" is hereditary and that apparently it is induced in susceptible pigs by lack of exercise or any cause leading to derangement of the digestive organs or system. We never saw or heard of a case of thumps in a razor back, rustling, rooting, scrub pig and that sort, too, is less liable to many other ailments to which the modern, pampered, plethoric pig seemingly is heir. Stuffing hogs of all ages on corn in excess of other necessary hone, blood and tissue builders undoubtedly induces such diseases as thumps, but often the effects of such feeding are offset by exercise and green feed, together with the fact that some litters are born into the world especially robust in constitution. In the case where corn feeding did not seem to cause thumps there was plenty of timothy and clover pasture. When the feed was changed the pen was used, but the pigs again had plenty of exercise, so that it is difficult to explain why they suffered from thumps unless it be that they were too richly fed on easily assimilated food and were sired by a boar inheriting the tendency to weakness such as thumps. It seems from the history of the boar that he may have inherited a special tendency to thumps, but if he escaped that trouble himself it is scarcely probable that he would transmit the tendency to his progeny. Under the circumstances we incline to the opinion that the pigs have developed thumps as a result of some irritating cause, such as intestinal worms, which have been absent in the pigs of the previous season. It is known that worms often lead to debility of the system, inducing thumps, and this may be the case with the pigs of our correspondent.

He should kill one of the worst affected, make an examination, and if worms are found treat for their destruction according to directions so often given in our veterinary department.

On general principles, however, thumps is to be prevented by allowing plenty of outdoor exercise, feeding a balanced ration and avoiding any cause of constitutional derangement or degeneracy. Its prevalence indicates the need of fresh blood in the breeding herd, an out-cross, unless the hogs are pure-bred and abandoning the corn-stuffing methods of feeding.

WHERE TO PUT MANURE IN THE FALL.

In spite of the natural advantage of applying manure to land during winter or in the spring it always happens that some farmers can never find the time to haul the manure out until September or October. We know good farmers this year who are in exactly this predicament, and the problem as to where to put it presents itself during the next few weeks.

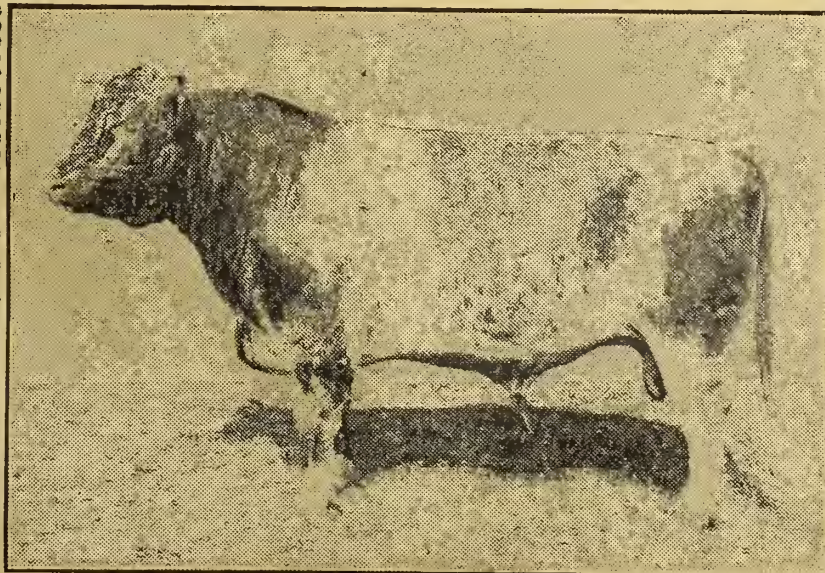

We have always claimed that the ideal place to put manure where one is rotating his crops is on the meadows and pastures. This is particularly true during the winter and in the spring. Even now, an application to the pastures or meadows will improve them wonderfully next year and will not hurt them in the least this year for pasture purposes.

The stubble fields, however, usually get the application this time of year, and we believe that the plan of applying it there is a fairly good one. If the manure is long and strawy it should be applied before the soil is plowed, because in that case it will give no trouble next spring when one puts on the cultivators. However, there are a number of instances in the central West where the cockleburrs are now coming on at a rapid rate, and if time is taken to apply the manure before the ground is plowed the probability is that many of the burs will ripen their seed. In a case like this, we believe that it is an excellent plan to put in the plows and let the manure wait to be applied later to the plowed land. This is by no means a shiftless practice, especially if the manure is somewhat short, because the implement will work it into the surface soil next spring.

As a general proposition it is usually advisable to keep manure near the surface, because the tendency is to leach beyond plant roots. By placing it on the surface and thoroughly stirring it into the soil next spring its full value is utilized by the crop. In other words, one does not have to wait a year or two for its effect to be felt, such as is sometimes the case where long manure is plowed under deeply.

A few loads of manure in the orchard will do good. We do not mean that it should be placed around trunks of trees, but, rather, scattered in a circle under the branches. This affords root protection and it will supply root fertility next year at a time when the tree needs it.

Some inquiries have been received asking information about applying manure to such crops as alfalfa and winter wheat, the idea in this case being to protect these crops against freezing and thawing. In reply to these, we would say that where a manure spreader is available so that light application may be made, it is entirely practicable to put on seven or eight loads per acre. This application will benefit either crop and will not smother out the plants. However, the practice of putting on a heavy application with a fork we do not advocate, because a number of instances have been brought to our attention where a considerable percentage of the

Whitehall-Marshall, Sweepstakes Short-horn Bull, Iowa State Fair.

crop was smothered out by the manure where it was put on in large chunks, as it were. Then again, light manure will sometimes blow during the winter when the ground is bare, and in that case where it piles up the crop is sure to be killed out.

THE HOMESTEAD

A Practical Journal for the Farmer, Stockman, Fruit Grower, Poultryman, Gardener and Housekeeper.

BY JAMES M. PIERCE.

JAMES ATKINSON, Editor in Chief.

ESTABLISHED IN 1855.

Entered at Des Moines Postoffice as second class matter

PUBLISHED EVERY THURSDAY.

SUBSCRIPTION RATES—Single subscriptions, \$1 a year; ten copies one year, \$10, and an extra copy to getter up of club. In clubs of one hundred or more, 25 cents a year. Single subscription three years in advance, \$2; five years in advance \$3; ten years in advance, \$5. Remit by draft, registered letter, postoffice or express money order. In renewing subscription, use same name and initials as address on paper, or explain why you change. In changing your postoffice address, send the old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

Address all communications and business letters to

THE HOMESTEAD COMPANY,
Des Moines, Iowa.

PLOWING CONTESTS.

We doubt if more than one farmer out of ten who lives in the corn belt has ever attended what is known as a plowing contest, and we therefore rise to explain that it is simply a contest between plowmen, the object being to see who can plow a land most skillfully.

In older countries plowing matches are exceedingly common, and these have done much to instill the correct principles of soil cultivation into the growing boys and young men. We say the correct principles of soil cultivation because good plowing is the basis of a good seed bed.

A short time ago one of these contests was held on a farm in Warren county, Iowa, and there were present thousands of farmers from the surrounding country. Most of the contestants used riding plows, the trial being made in stubble land, though as a general thing part of the plowing is done in sod and part in the stubble. These matches or contests have been held in the county referred to above during the last four or five years, and already their effect is noticeable. The young men take greater pride in their work than formerly, and the friendly rivalry that is shown on the day of these contests stimulates all to do their very best work. The value of such contests to a community is apparent by the better quality of the plowing done every day on the farm.

There are men in every county in the central West who are natural leaders. Such individuals are called upon to organize institutes, help along the county fairs, introduce corn contests, etc. To these we would like to suggest that a plowing match would do as much for the agriculture of a county as either an institute, a corn contest or anything of the kind. Each is important, of course, in its own way, but, as said before, the plowing contest is as important as any other one thing.

One has only to examine the plowed fields as he travels through the country to note that there is room for marked improvement in the character of the work. Generally the ridge or "feering" is much too high, this being due to the fact that the first two furrows are plowed practically as deep as the remainder. There is no advantage in this, but on the other hand considerable disadvantage. A high ridge usually means that the crop will be short and light along that strip. This ridge also constitutes an impediment, over which the binder must be trailed every time one crosses the field. By starting in two or three inches lighter than one intends to plow it is not a difficult matter to keep the ridge down so that it is practically level with the rest of the plowing. The third and fourth furrow may be a little deeper and the fifth and sixth usually may be the full depth desired.

Good plowing should be of uniform depth and width, and we never saw a good plowman who did not hold a straight furrow. Only in this way is it possible to finish up the land without having short furrows or depressions due

The Iowa State Fair brought a larger number of visitors to The Homestead's pavilion on the fair grounds and to The Homestead office last week than it has been our pleasure to greet on any previous occasion. They came so fast at times that it was impossible for the members of our staff who constituted the reception committee to meet them all; and some of the hundreds of visitors to the Homestead plant were obliged to make the rounds of the office unattended. All, however, were most welcome, and we trust that as they passed through the establishment, they felt that they were in the house of their friends. A modern publishing plant employs, even in its dull seasons, a small army of workers, and their work is strenuous and absorbing, so that only those who are detailed for the purpose can accord visitors the attention which The Homestead always desires to extend to its subscribers and advertisers when they come to see it. If any were, in the hurry of a busy fair week, overlooked, we trust they will accept the will for the deed and come again.

If cheerful faces, a general expression of contentment and happiness and a hopeful attitude toward the world generally are indications of prosperity, The Homestead's eighty thousand subscribers must belong to the ranks of those whose material welfare is above the average. Well-dressed, generous in their expenditures, keenly interested in the best of the live stock and machinery exhibits and in everything tending toward progress, the farmers and their wives and children who visited The Homestead during the fair were, as someone well remarked of the crowds generally, "the best exhibit" of the great exposition. The social graces are manifest in their bearing and demeanor, and their intercourse with one another and the public. It is pleasant to note the respectful and wholly admirable attitude of husbands and wives toward each other, of children toward their parents and friend toward friend. The country is no longer new, and the amenities of an old settled community are more and more in evidence everywhere.

The friendship of the people of Iowa and the middle West for The Homestead was shown in a thousand ways during the fair. Expressions of appreciation of its editorial and business policies; gratitude for its helpfulness in solving the problems of the farm home; statements of actual saving accomplished by following its advice in practical affairs; in-

to cutting either wide or narrow furrows. No man who plows listlessly will ever raise maximum crops.

In these days when plows are made well-nigh perfect, insofar as it takes the burden from the man and puts it on the beast, it should not be too much to expect the boys and men to keep themselves wide awake when on a sulky plow. Start in evenly at the ends so that when you are through with the field you have a uniform headland to plow. Pay some little attention to the manner in which the horses walk, so that the furrow will be kept straight. It is not too much to ask any man to plow day after day without ever letting a crook get into a furrow.

During the last few years much attention has been given to the improvement of seeds, and seemingly the matter of cultivating has been neglected. This should be turned to at once and interest should be revived in the subject, because it is not difficult to find instances where sensible cultivation would have increased the yield 25 or in some instances 50 per cent.

FARMERS NEED HELP IN THE FAR WEST.

The grape growers of the San Joaquin Valley, California, alarmed at the outlook for the harvest season, have appointed committees to canvass all available fields of labor. There are 350,000 tons of grapes to be gathered, and, by piece work at the wages offered, good workers can earn from \$2.25 to \$3.50 per day. The beet crops along the coast

quiries after the health of individual members of its staff or contributors; personal greetings of its representatives wherever they were met, were among the proofs of a generous clientele's attitude toward their favorite farm paper. "I always know where to find the good, old Homestead," said one. "It is always on the right side as it sees it, and it generally has the common sense and judgment to tell which side is right. It never 'slops over;' never runs after fads; avoids ill-adjudged extremes and hews to the line. Even when I do not fully agree with it—though I generally do in the main—I respect its honesty and admire its fairness in dealing with friend and foe, and its disposition to avoid the wrangles with competitors which mar the pages of so many papers, especially our dailies."

The Iowa Homestead heads the list of farm papers used by Henry Field, the well-known seedsman of Shenandoah, Iowa, leading all others in the number of inquiries received through its advertising and in the volume of cash orders, and being the lowest in percentage of cost relatively to the volume of sales. Mr. Field invested \$275 in Homestead advertising during the last season. The result was 1,077 inquiries and 574 sales, amounting to \$2,581. The highest number of inquiries from any other paper published in Iowa was 413, resulting in 188 sales, amounting to \$1,128.48—less than half as much as The Homestead results. A breeders' paper of national reputation and circulation produced only 508 inquiries, resulting in 171 sales, to the amount of \$920.43, at an expense of \$285.20 to the advertiser. The Homestead is now admitted to be the foremost weekly agricultural advertising medium in the world.

The live stock advertiser is as well pleased with Homestead results as the seedsman, the dealer in lands and other commercial advertisers. "The Homestead's advertising and a timely field note have sold my herd boar and all the big Poland Chinas," writes Mr. W. W. Wheeler, of Harlan, Iowa, in a recent letter. Such statements come to us by scores. They account for the steadily maintained and growing volume of live stock advertising in this paper. The Homestead reaches the best farmers (and the largest number of them) in the richest and most progressive agricultural and live stock region in the world, and therefore has in the highest degree all the elements of a strong medium for advertising pure-bred live stock.

Although, other things being equal, the users of large advertising spaces get the best results, wonderful results are received from many of the small advertisements of The Homestead, especially from standing cards, which remain in the paper all the year round. Mr. L. A. Smith, of Granger, Mo., proprietor of the State Line Fox-hound Kennels, sends us \$7.50 in payment for a small advertisement, and adds: "It was a little ad, but has paid remarkably well. I have sold \$500 worth of dogs from this brief announcement. The Homestead sells more than all other papers put together. You may continue my advertisement till January 1, 1907." One reason why the small advertiser is well pleased with The Homestead is that we are just as careful to give good service to the user of small space as to the advertiser whose business amounts to hundreds of dollars. We appreciate all of our advertising patrons.

The best advertising mediums often have to lose money temporarily because of their very effectiveness. They clean up all the animals or birds a breeder has for sale, and the advertising is stopped; while a neighboring stockman or fancier who uses a medium of smaller circulation, sells out more slowly and keeps his advertisement running. The Homestead, however, never sheds any tears over a defeat of that kind. In the long run, the paper which sells the goods secures the largest advertising business. So, when an advertiser such as Mr. F. E. Garrett, of Lohrville, Iowa, writes that The Homestead has sold all his chickens, and orders his advertising discontinued, we are more than pleased. By the way, Mr. Garrett reports the sale of forty-eight chickens to one man through his Homestead advertisement.

A recent letter from that fine manufacturing concern, the Litchfield Mfg. Co., of Waterloo, Iowa, is highly appreciated as illustrating good advertising results with special farm machinery, such as manure spreaders, feed grinders, corn shellers, wagon endgates and other specialties. "We appreciate very much the good service you are giving us in connection with our advertising in The Homestead," writes the Litchfield Mfg. Co. "It is proving very profitable and satisfactory to us." If necessary to prove the advertising value of The Homestead, we could furnish hundreds of equally strong commendations; but to old advertisers in our columns, this is unnecessary.

line in the southern part of the state are extraordinarily heavy this year, and the labor is most inadequate. Santa Clara Valley reports a prune crop this year twice as heavy as last. The greatly increased demand for timber, both from the east and locally, has caused the mills to run night and day, and has greatly increased the demand for mill men.

The conditions in the city of San Francisco are far from being comfortable. There are numerous instances of subcontractors in the building trades having to throw up their contracts because they cannot secure enough men. The

Building Trades Council has sent out reports that there is a great shortage of men in the city. There is a demand for approximately 20,000 houses to be built in San Francisco. The artisans to do the work are not now to be had. It is estimated that \$500,000,000 will be spent within the next five years in rebuilding San Francisco. This work is even now, in the least advanced stage, being delayed on account of the lack of labor. Fifteen thousand more laborers can find ready employment in the city at once. It is a great opening for ambitious and active young artisans.

Farm Furrows

Turned by a Practical Farmer.

A man who knows whispered to me that the wife of a henpecked man is no spring chicken.

Winter wheat in central Iowa is panning out well. I have heard of many yields above forty bushels per acre.

The farm that is without good well water for the family and stock is worse off than the farm that has too much water in the fields.

Fifteen years ago there was not an exhibition at the Iowa State Fair a manure spreader, a road working machine or a farm telephone.

Buying a spring chicken in the market these days without weighing it is like buying ready made spectacles. You don't know what you are getting.

Blue grass is far better than weeds in the roadside, and I am not sure but what timothy is still better. The latter can be made into hay and thus be worth something.

Some people seem to regard it a pleasant surgical operation to "eat their heads off," and they feel that it is not expensive to keep stock that will do that same thing.

The traction engine, together with its load, can be said to be the farmer's automobile. Note the difference of management while on the highway. When a thrashing outfit meets a team that appears to be frightened, the men stop and assist the team to get by and they do all they can to prevent trouble. An auto driver goes at a break-neck speed and cares but little about how teams

get along or what damage may be done to the occupants of vehicles.

When a man has to patch up his broken buggy, doctor a wounded horse and call a doctor to treat his wife all because of an automobile accident, he has a right to dislike the auto hog.

A wheat drill with a fertilizer carries with it a suggestion that should be talking to its owner to keep up the fertility of the soil. Winter wheat followed with clover means keeping up the fertility.

The chicken business now seems to be the leading business for profit if the manager understands it. Prices were never better for all kinds of poultry than now. In some places they are almost prohibitive.

Did you ever stop to think that if all men were sharp there would be no sale for gold bricks? If all men could successfully launch some scheme there would be no biters, no schemers and no get-rich-quick schemes.

Here and now I desire to state that I know it pays to prepare the wheat ground well. It is most difficult to over-prepare ground for winter wheat. Doing too much work on the surface is next to an impossibility.

The merchant believes in no tick. The sheep man has said "no tick for me." The cattle man in the southwest says "no tick." The jeweler says of the poor watch "no tick." In view of this the tick is certainly having a hard time.

Oats in some localities seem to be heavy. In one instance a measured load of seventy-two bushels weighed out almost 100 bushels in the market. There could be nothing wrong with the scales, as they are not usually wrong in that way.

An Oklahoma farmer has applied for more cobs. He wants a large number of them. He has discovered that there is not room enough on the cobs of his growing corn for the corn, and he is going to supply cobs for the corn to run out on.

It is said that a man has invented some scheme whereby the art of rubbering can be prevented in the party-line telephones. This will be a great help to the efficiency of this very necessary convenience. What will become of the neighborhood gossip?

When a man is busy the weeks go by rapidly and a week is as a day. It appears that a man has no more than finished one important job until another is on hand and a month has elapsed. The man who is not busy has time dragging on his hands.

It may not be possible to incorporate the absolutely ten-hour system on the farm, but it can be approached. There is more to a farm life than that of making money and saving time, even at the expense of arduous labor and excessive application of it.

It is far better to let a neighbor tell of your good qualities than it is for you to proclaim them from the roadside. Keep the fields and crops looking well and your neighbors will do the rest, and if you rest too much they will have a bad name for you.

It is a most difficult thing to interest a man in the alfalfa business by showing him illustrations of plans and in writing articles about its production. The best way is to show him the plants growing. He should see the whole process—seeing is believing.

If the plowman in these furrows occasionally engages in the "cut and cover" business it is no reason you should neglect your plowing. He plows every week of the year—you do not. It is a good plan to plow many furrows out of your brow and cultivate some ideas so that labor of the hands may be made lighter thereby.

There was on exhibition at one of the state fairs, farm electric light plants, consisting of gasoline engine and dynamo, and it is stated that a plant costs but very little to install. This will permit the very best of lights where farmers desire to have them. So far as I am concerned, I am tired of the everlasting smell and bother with kerosene, to say nothing of the danger. The gasoline en-

Harvest 100 Per Cent of Your Corn Crop

Don't go over your field and snap or husk the ears and leave the stalks standing because you will waste 40 per cent of your crop that way.

Get a good reliable corn harvester and binder or harvester and shocker and go over the field just at the right time, cutting the whole crop and thereby securing the full 100 per cent of its feeding value.

That's the only way you can get all the profits you deserve because at the time of maturity the feeding value of the crop is almost equally divided between the ears and the fodder—60 per cent is in the ears, and 40 per cent is in the stalks, leaves and husks.

Government Experiment Stations have been pointing this out to farmers time and time again in their bulletins, and other high authorities have been preaching and teaching it for years. As a result, a lot of farmers have doubled their profit on corn. How about you?

It has been proved by practical experience and chemical analysis that fodder, when cut at the right time, properly cured and then run through the shredder, has a feeding value about equal to good timothy hay.

High authorities place the value of such stover at \$8.00 a ton. An average stand will yield at least two tons of stover, which will mean \$16.00 an acre extra to you over the old practice of husking or snapping in the field.

Understand, you don't have to find a market for your shredded fodder to make the extra profit—you can sell

your hay and feed the stover. The hay crop for 1906 is very light, and the demand for roughage is going to be greater than the supply in many localities—therefore you can readily sell all of your hay at a good price, and feed your stock shredded fodder which is as good as hay.

Can you afford to lose that \$16.00 worth of feed to every acre and gather only 60 per cent of your crop when hundreds of other corn growers are getting it all—cutting a 100 per cent crop, by using a binder or shocker?

Don't expect to get this stover value unless you use the binder or the shocker at the right time—when the ears begin to glaze. The stalks that are left standing in the field after the corn has reached maturity decrease rapidly in feeding value, and the wind and frost and sun soon reduce them to little more than woody fibre.

Take a lesson from the dairyman who makes ensilage. He considers the binder a necessity. You will, too, if you apply the same business principles to your corn crop as you do to your other operations.

When the stalks are once cut and cured, they lose none of their palatable and nutritious food elements. Then, sometime in the fall or winter, whenever most convenient, you can run the crop through the husker and shredder.

Start to investigate now. You haven't much more time in which to get ready. Don't put it off. Get that extra 40 per cent this year.

YOU HAVE A CHOICE OF

Milwaukee, Osborne, McCormick, Deering and Champion Corn Binders; McCormick, Plano and Deering Huskers and Shredders.

In each of these machines you have all the advantages made possible by the unequalled manufacturing facilities of the International Harvester Company.

The International Harvester Company owns its own timber lands and saw mills, its own iron and coal mines, its own coke plants and rolling mills, from which it produces a large percentage of all raw materials used, selecting in every instance only the best material and working it out in the best way in the above great manufacturing plants. These are advantages which no buyer can afford to overlook.

The International lines are represented by different dealers in your town. Call on them for catalogues and investigate these machines.

International Harvester Company of America, Chicago, Ill.
(INCORPORATED)

Save \$25.00 On FUEL this Winter

\$25.00 is the wages of one man for 30 days. It is 5 per cent interest on \$500.00 for one year. You can save this amount this winter, and every winter that your home is heated with a Cole's Hot Blast Stove.

The big expense in heating your house is the fuel, not the first cost of the stove. You are wasting DOLLARS in high priced hard coal through leaky joints and poor radiating surfaces. You also waste HALF the Gas Half, the best heating half of soft coal, by imperfect combustion.

Cole's Hot Blast Stove holds fire over night with any kind of fuel, even corn cobs, chips, roots and waste material. You always have warm rooms in the morning in which to dress the children and eat breakfast without building a new fire. Our Free Booklet on Scientific Combustion explains fully. Send postal for it today. Tells you all about the nature of soft coal, hard coal and other fuel, and why

Cole's Hot Blast Stove

saves all heat and fuel wasted with other stoves.

Cost of Stove More Than Saved In Fuel Each Winter

Gives cleanliness and even heat day and night with soft coal you never dreamed possible. Use less hard coal and gives more heat than any base burner. Your home dealer will set one up in your house on our guarantee backed by his guarantee, at **\$10 and Up** prices.

GUARANTEE

- 1.—We guarantee a saving of one-third in fuel over any lower draft stove of the same size with soft coal or slack.
- 2.—We guarantee Cole's Hot Blast to use less hard coal for heating a given space than any base burner made with the same size fire pot.
- 3.—We guarantee that the rooms can be heated from one to two hours each morning, with the soft coal or hard coal put in the stove the evening before.
- 4.—We guarantee that the stove will hold heat with soft coal thirty-six hours, without attention.
- 5.—We guarantee a uniform heat day and night, with soft coal, hard coal, or lignite.
- 6.—We guarantee every stove to remain absolutely air-tight as long as used.
- 7.—We guarantee the feed door to be smoke and dust proof.

Built on Honor—Cole's Original Hot Blast was invented after 12 years' continuous experimenting to find a way to save the enormous waste in fuel through the escape of gas and heat up the chimney in the ordinary stove. Our reputation as manufacturers of the Original Successful Hot Blast goes with every stove; and will not be sacrificed by the use of inferior material or cheap workmanship.

Would You Lose \$50 in Fuel to Save \$1.00 on the cost of Your Stove?

That is what you do when you buy a cheaply constructed, putty jointed, showy made stove.

Like all successful inventions Cole's Original Hot Blast has many inferior imitations, avoid them. They all lack our patented top Hot Blast construction, the patented steel collar connection for the elbow casting to stove body, making an everlasting tight joint which cannot open by action of the fiercest heat; the patented compound hinge for ash door, the guaranteed smoke-proof feed door, which prevents dust, soot or smoke from escaping when fuel is put into the stove, and other patented features which are essential to the success of our stove. Do not let any dealer persuade you to buy anything but Cole's Original Hot Blast. See the name "COLE'S HOT BLAST FROM CHICAGO" on the feed door of each stove. None genuine without it.

The best dealer in every town generally has the agency for Cole's Original Hot Blast Stove. Write us for names of local agent and for FREE BOOKLET on the scientific combustion of fuel, which also tells about Cole's Hot Blast. In towns where there is no agent, mail order purchasers are protected by the above guarantee.

COLE MFG. CO., 3234-3244 S. Western Ave., Chicago

gine can be used for other purposes, and thus minimize the expense.

Not long since I traveled a half-day in an agricultural district and never saw a single clover field. It is possible to farm without clover, but it is not possible to farm long without it.

Unless eggs that have been preserved in waterglass are sold to regular egg dealers who know what they are buying, there is little difference in the price paid for them. There is in reality but very little difference in their value, if they have been properly cared for.

Looking over the acres of farm machinery at the fairs, one is led to believe that there is no end to the labor-saving devices to lighten the burden of the agriculturist. It changes the burden only from the body to the pocketbook. It is a question just how far one should go in investing in farm machinery. In this each man has to decide for himself.

There is waste land enough on most farms to pay the taxes, could all waste places be made to contribute as they should. I know of one farm that has ten acres of artificial grove and there is no income from it but trouble in keeping the broken trees and fallen branches from accumulating. Old stack yards, weed patches and brush patches often

are allowed to go from year to year just because the owner does not think.

Some time ago I noticed where a farmer had stacked up a few beans on the roadside. A pole was planted in the ground, some brush then placed about the base and the beans were placed in a stack about four feet in diameter about this pole, with a forkful of hay on top. Beans stacked in this manner will wait until a farmer can have time to thrash them.

EACH TUESDAY THIS YEAR

THE CHICAGO GREAT WESTERN RAILWAY will sell homeseekers tickets to points in Alberta, Manitoba, Minnesota, North Dakota, Saskatchewan, western Ontario and Wisconsin at rate of one fare plus two dollars for the round trip. Remember, THE CHICAGO GREAT WESTERN RAILWAY is the only line from this section which runs three solid trains daily to the Twin Cities. Also remember that on the return trip you can take any one of our four trains, making it certain that you will not have to wait but a short time for connection at St. Paul and Minneapolis. Shortest time, best equipment, best service and connections. Call on or write to E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

LOW EXCURSION RATES TO NEW ENGLAND AND CANADIAN POINTS VIA THE C. & N.-W. R.R.

Tickets on sale daily until June 30th; also on July 4th and 18th, August 8th and 22d and September 5th and 19th at one fare plus \$2 for fifteen-day tickets, or one fare plus \$4 for thirty-day tickets. Stopovers allowed at Detroit, Niagara Falls and other intermediate points. Full information at 401 Walnut St., or C. & N.-W. passenger station.

THE IOWA STATE FAIR

Prosperity is the most important factor that has to do with the making of a successful state fair or exposition of any kind. This, together with up-to-date management, is exactly the right combination. Each played its full part last week and the first state fair of the season far excelled all past records made in the Hawkeye state. In the matter of receipts, a gain of fully 30 per cent was made over the record of 1905, the admission and privileges money amounting to the neat sum of \$100,000.

From start to finish the weather was perfect for exhibitors, for visitors and for the comfort of animals on exhibition. The city of Des Moines handled the crowd better than ever before, and no small amount of praise is due the Commercial Club for the assistance given in finding homes for fair visitors. The practice of arranging in advance for lodging has done much to prevent the congestion of streets during the evening hours by visitors who had not found lodging. Transportation service was improved over former years, as certain changes made by the Des Moines Street Railway Company greatly facilitated the movement of the crowds. Jams of course will always occur when sixty or seventy thousand people decide to go to the same place at the same time, but we venture to say that visitors this year gained the impression that Des Moines was well equipped in her transportation facilities.

The striking feature of the fair was that it was balanced, every department being well filled with exhibits. Possibly records have been made in single departments in the past that would excel the record of 1906, but taking all in all the fair held last week was the climax. The machinery in itself covered practically twenty acres, and the crowds of inquiring visitors who stood around the various machinery exhibits indicated that the farmers of Iowa are in shape financially to invest in labor-saving devices. Almost every manufacturer who made an exhibit declared that never before did prospects seem so bright for future business. The great lack in this department is a mammoth machinery hall, such as is supplied in one or two of the sister states. Other improvements are needed, and needed badly, but we hope in the near future to see a building that will house the greater part of the machinery.

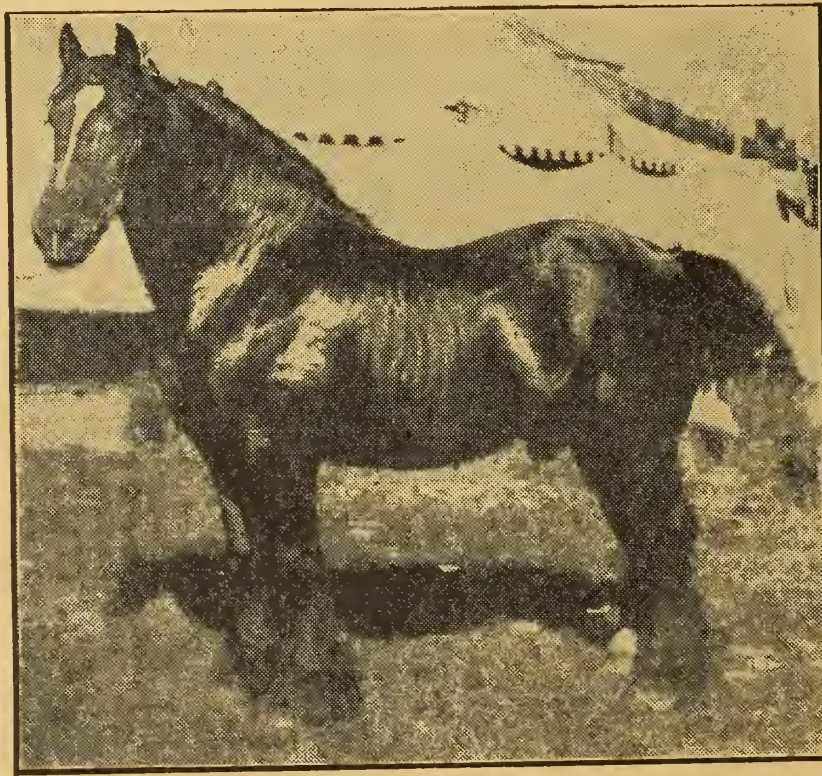

The largest department of the fair was the swine, the showing made this year being simply marvelous both from the standpoint of numbers and quality. Suitable space was not provided for all the exhibits, and the experience this year demonstrated beyond the shadow of a doubt that new buildings are needed in the immediate future. All kinds of temporary structures were utilized for the purpose of housing swine to the almost indescribable inconvenience of the exhibitor. In many cases passageways were not provided, so that entrance to the pens could only be made from the outside. Among the appropriations that the next legislature will make we hope will be found one for new swine quarters on the state fair ground. There was a conflict last winter between those advocating a swine pavilion and those who thought that an amphitheater should come first, the result being that

no appropriation was made for either. The crowds that were turned away from the old amphitheater this year indicated that a new one is an urgent need. It seems like poor business policy to turn away thousands of people every day who desire to pay for seats in the amphitheater. The amount lost each year would certainly pay interest on the investment, and in our opinion build a structure in a very few years.

It was a clean fair, scarcely a feature to be found on the ground to which objection could be made by the most fastidious. Although strongly agricultural in every department, the policy adopted by the management was a broad-minded one, so that people from towns and cities found plenty of interesting sights and much opportunity for instruction. The attractions in front of the amphitheater were high-class, and the exhibition given daily by the flying machine, or airship, proved to be a highly popular feature. We believe that the directors of the state fair are to be complimented for the wisdom displayed in putting on this feature. A flying machine directed hither and thither at the will of man is by no means in the same class as a balloon, because it represents a means of trans-

the agricultural exhibit was up to standard. It was attractively placed, and the visitor who sought information concerning the method of producing any of the products on display could easily acquire same. The fruit display excelled the record of former years, there being more plates of apples, for example, on the tables than have ever before been brought out. The quality of the fruit was good and the exhibit was exceedingly attractive.

We said in the beginning that sensible management had much to do with the success of a fair. In this case the directors of the fair are deserving of the highest compliments for their efforts in giving to the people a clean, wholesome entertaining and instructive fair. It must be a matter of great satisfaction to President Morrow, of the state board, to see the fair brought to so high a degree of perfection under his administration. However, after the people have passed their compliments to the board and to President Morrow, they reserve the right to place a larger share of credit for the success of the fair to the secretary, John C. Simpson. Mr. Simpson has proven himself able to interpret correctly the desires of the peo-

First Prize Aged Shire Stallion, Highland Laddie, Owned by Trumans' Pioneer Stud Farm, Bushnell, Illinois.

portation that is now being studied by experts throughout the civilized world. Professor Hamilton's feats in the air furnished not only entertainment, but instruction.

The plan of issuing a catalog and the placarding of all animals in the ring again proved highly satisfactory from the visitor's standpoint. Further improvement could be made if the rules pertaining to the placarding of animals in the stalls could be enforced. In some instances the class and lot number of the animal were given on the stall, together with the name, weight and breeding, but this was not generally true. It looks to the outsider as though a very small expense would furnish this information and make sight-seeing much more instructive. The example set by Mr. Frank W. Harding, of Waukesha, Wis., might well be followed by all exhibitors, and indeed enforced by the fair association. All of his stalls were labeled plainly, so that the visitor obtained just the kind of information sought.

Unfortunately, the Iowa fair comes too early to make a creditable display of agricultural products of the year, notably corn. In this instance old products must be placed on exhibition. However,

Prof. J. A. McLean, of the Iowa Agricultural College, and was conducted in an orderly and business-like manner. In some instances the classes passed on by the students were the regular entries made by exhibitors, the awards for comparison being afterwards made by the regular judges of the departments. The following is a list of those in the contest and the number of points made by each out of a total of 800:

Name and address.	Total.
Alex. Wilson, West Liberty	538
Howard Stewart, Ainsworth	524
T. Bonar McKee, Indianola	523
Paul C. Taff, Pandora	523
Arthur N. Fogg, West Liberty	514
Milo M. Fantz, Nevada	509
E. M. P. Shaver, Kalona	496.5
William R. Gross, Avoca	496
Ivan O. Hasbrough, Humeston	489.5
Frank N. Crow, Oxford	486.5
Muri McDonald, Ames	484
Roy A. Wood, Soldier	476
Leroy L. Shoemaker, Corning	472.5
Phil A. Igo, Indianola	465.5
Thomas McCall, Ames	460.5
Albert W. Weston, Audubon	459.5
Ralph E. Van Fossen, Adel	456
Carl N. Kennedy, Ankeny	455
Robert Campbell, Ames	454
L. E. Osburn, Bedford	449
Robert S. Plager, Grundy Center	448.5
E. J. Packer, Marshalltown	448
Perry R. Sior, Melbourne	447.5
C. H. Reeve, Geneva	441.5
Een Walker, Swan	441
T. R. Reynolds, Pleasantville	434
Wallace Ashby, Des Moines	431
Roy Walker, Swan	427
O. W. Karns, Pleasantville	409
Lec Jeffries, Mitchellville	400
Paul R. Bemis, Bondurant	384
Monroe S. Dutcher, Des Moines	366

As President Morrow is the republican nominee for state treasurer, he will retire from his present office at the close of this year. His place as president of the Iowa State Board of Agriculture will undoubtedly be taken by Vice-president C. E. Cameron, of Alta. Mr. Cameron has served the state faithfully for many years, and would be a fit man to succeed President Morrow. The state fair was a thrifty institution when Mr. Morrow came into office, but under his administration its growth has been marvelous. The state has appropriated liberally for new buildings, while gate receipts admitted of somewhat lavish expenditures in the improvement of the grounds. Many permanent structures stand on the state fair grounds as a monument to Mr. Morrow's term of administration. He demonstrated that a clean fair could be made to pay. The only excuse that has ever been offered for the admission of low-class side-shows or fakers was that the revenue was essential to the building up of a great fair. That, as said before, was disproved by President Morrow and his board of directors during the last few years. His administration reflects creditably on every farmer in the state, because President Morrow comes directly from the farm, his only profession being that of a farmer.

CATTLE.

A close student of the cattle exhibits at the Iowa State Fair would soon comprehend the fact that this was not a record-breaking year. It was evenly balanced throughout, but the dropping out of six or eight of the best herds in the corn belt will be felt by any show. The Martin herd of doddies, from Cburdan, Iowa, was not out this year; the notable Casey and Robbins herds were missed; the Brown, Moody, Clark and Brookside Farm Galloways were not there, while in the Herefords the absence of the Funkhouser and Curtice herds made a noticeable difference to the exhibit of white faces. However, there were new breeders in every class, and in a number of cases herds without records as winners were brought out in excellent form this year, and with honor and credit to the breed carried away many of the coveted ribbons. The cattle department of the fair in its management reflects no small amount of credit on Superintendent Packard. He has succeeded remarkably in giving all exhibitors a square deal; he has put on competent judges and his arrangements facilitate judging to the greatest possible extent and at the same time make sight-seeing in the cattle rings agreeable to visitors. It was no off year in the matter of numbers, but, as said before, the dropping out of ten or a dozen good herds made a breach that was plainly apparent to the old-timer.

SHORT-HORNS.

Without saying anything that would be a discredit to the other beef breeds, the Short-horns were one of the most prominent features of the cattle display. This was due both to the numbers shown and the general excellence. To some there appeared to be less uniformity than in other of the beef exhibits, but this was more imaginary than real on account of the larger number of animals and the greater chance for varia-

Big Buggy Bargains

For 30 DAYS.

Speak quick, if you want to take advantage of the special bargain sale of Kalamazoo Carriages, Concord, and other styles, now going on. We guarantee positively the lowest prices ever made in the U. S. while these "jobs" last.

BUY DIRECT FROM FACTORY and get astonishingly big buggy values. We make the cut to push business "between seasons." 30 days free trial. Absolute high quality guaranteed. If you have a nose for a genuine bargain, here's your chance. Don't miss it! Write at once for special circular giving money saving list. Don't delay, or you will be too late.

Kalamazoo Carriage & Harness Co., Box 214, Kalamazoo, Mich.

tion. The work of placing proceeded slowly and lasted throughout the week. There were 166 competing animals and this meant full rings throughout. As many as twenty-two lined up in one or two. At times the whole west portion of the judging pavilion was monopolized by Short-horns and short leets were a necessity. Competition was active for winners, though some entries shown were below the usual Iowa standard. From the younger classes came the larger numbers of entries, and excellent quality and good type were evident in every ring. Good, useful breeding stock was more in evidence than extremely high conditioned stuff. Winners of last year's prizes were few, but conspicuous wherever they appeared. Twenty-two herds entered by Iowa breeders made up the greater part of the display and may be partly accounted for by the special Iowa prizes offered. Of these herds, Burge, Edwards and S. under were the most consistent winners. F. W. Harding showed in his usual style and with much success, securing a good share of the firsts, also supplying the champion male and female. Tomson brought out a quartet of red females in the get of sire class that for even, deep covering and type would be difficult to duplicate anywhere. Part of his herd was at a disadvantage for a lack of high fitting. J. H. Miller, of Peru, Ind., judged throughout the show. Breeders' herds represented were: J. B. Brown, Solon, Iowa (9 head); G. H. Burge, Mt. Vernon, Iowa (11 head); C. L. Drake, Kelly, Iowa (1 head); F. A. Edwards, Webster City, Iowa (8 head); F. W. Harding, Waukesha, Wis. (17 head); J. S. Hardin, Indianola, Iowa (5 head); C. A. Saunders, Manilla, Iowa (6 head); T. K. Tomson & Sons, Dover, Kan. (11 head); Ardmore Stock Company, Holstein, Iowa (6 head); L. W. Barnhart, South English, Iowa (12 head); Bellows Bros., Maryville, Mo. (8 head); J. T. Judge, Carroll, Iowa (1 head); H. D. Parsons, Newton, Iowa (14 head); J. H. Moyer, Newton, Iowa (4 head); E. R. Silliman, Colo, Iowa (2 head); T. J. Wornall & Son, West Liberty, Mo. (10 head); C. S. Barclay, West Liberty, Iowa (11 head); C. W. Dows & Son, Harlan, Iowa (4 head); W. E. Graham, Prairie City, Iowa (4 head); A. F. Graves, King City, Mo. (1 head); G. H. White, Emerson, Iowa (5 head); F. W. Akers, Laurel, Iowa (1 head); H. C. Livingstone, Marne, Iowa (2 head); C. W. Westfall, Toledo, Iowa (2 head).

AWARDS.

Aged Bull—First, F. W. Harding, on Whitehall Marshall 209776; second, G. H. Burge, on Money Musk 196542; third, F. A. Edwards, on Secret Viscount 212705; fourth, C. A. Saunders, on King Cumberland 110620; fifth, T. K. Tomson & Sons, on Silvery Knight 206653; sixth, J. H. Brown, on Royal Victor 243013. The first two winners in this class are too well known to need much comment, further than to say that Whitehall Marshall has acquired a more rounded form, and came back this year a mature bull and was an easy winner, even though he was showing against Money Musk, on older bull that won first in the Iowa special class last year and still carries a good show form. Third choice was a stylish, attractive bull, but of less scale and massiveness than those preceding him.

Bull Two Years Old—First, Bellows Bros., on Good Choice 227352; second, Ardmore Stock Company, on Superhus 224710; third, J. T. Judge, on Clear the Way 231482; fourth, T. J. Wornall & Son, on The Conqueror 215051; fifth, H. D. Parsons, on Scottish Champion 224435; sixth, E. R. Silliman, on Baron Fox Glove 231479. This contest was quite drawn out among those after first place, which went to a roan that would be a strong rival in any company, a son of the great Choice Goods and a decided credit to his sire.

Yearling Bull—First, A. F. Graves, on Champion of Lyndale, Vol. 63; second, T. J. Wornall & Son, on Careless Conqueror 241515; third, E. R. Silliman, on Cloverhurn's Ideal 247812; fourth, C. R. Warren, on Banner's Victor 242584; fifth, T. K. Tomson & Sons, on Hopeful Knight 244229; sixth, G. H. White, on Contractor's Banner Bearer 250894. The two bulls from Missouri carried off the best ribbons on their type and condition, although competition was not close, due to absence of animals from some of the herds that had been taking the blue and red. The Silliman bull, however, had friends who favored a higher rating for him.

Senior Bull Calf—First, F. W. Harding, on Anoka Sultan; second, C. W. Daws & Son, on King 262929; third, F. W. Harding, on Gloster Marshall; fourth, Bellows Bros., on Nonpareil Abbotshurn, Vol. 63; fifth, F. W. Harding, on Sultor; sixth, F. W. Akers, on American Leader. Twenty-two youngsters made this a long lineup and brought out some very smooth red and roans.

Junior Bull Calf—First, F. W. Harding, on The Goods; second, L. W. Barnhart, on Golden Crown 263863.

Aged Cow—First, F. W. Harding, on Princess Flora 2d; second, T. K. Tomson & Sons, on 3d Elder Lawn Victoria, Vol. 57; third, T. J. Wornall & Son, on Glosterina; fourth, F. W. Harding, on Money Fluffie Maid; fifth, F. A. Edwards, on Fennimore Princess, Vol. 60; sixth, F. A. Edwards, on Golden Duchess of Gloster, Vol. 52. With fourteen deep, full-made cows for places in this contest, Judge Miller proceeded carefully. Princess Flora 2d, a thick-fleshed cow in perfect form was easily first. In second place was a beautiful red matron, not as smooth and evenly covered as Princess Flora, but thick fleshed and near the ground. These two were out-

standing winners among some of the plainer animals following. Any one of the six winners was a credit to the ring.

Heifer Two Years Old—First, F. W. Harding, on Anoka Broadhooks; second, T. K. Tomson & Sons, on Cherry Lass, Vol. 60; third, C. A. Saunders, on Volvot Eyes, Vol. 61; fourth, T. J. Wornall & Son, on Choice Violet 2d; fifth, T. K. Tomson & Sons, on Thorny Bud, Vol. 63; sixth, F. A. Edwards, on Hoather Bell, Vol. 64.

Yearling Heifer—First, F. W. Harding, on Missie of Browndale; second, F. W. Harding, on Clara Belle; third, C. A. Saunders, on Independence Lady 3d, Vol. 67; fourth, Ardmore Stock Company, on Manor Lady of Ardmore, Vol. 64; fifth, F. W. Harding, on Fancy Lovell; sixth, C. R. Warner, on Hampton's Lady Cupbearer. A score of yearling heifers made a large showing. However, competition was limited to a few out of the many that were hardly in as good show form as they might have been.

Senior Heifer Calf—First, F. W. Harding, on Anoka Gloster 2d; second, Bellows Bros., on Hampton's Tea Rose, Vol. 68; third, N. A. Lind, on Victoria Countess; fourth, Ardmore Stock Company, on Duchess of Lancaster 16th; fifth, F. W. Harding, on Broadhooks Sultan; sixth, F. W. Harding, on Claret. Victoria Countess is a growthy-looking heifer, but is not as refined in her general bearing as the two above her, which show very smooth, symmetrical shapes.

Junior Heifer Class—First, Bellows Bros., on Parkdale Queen of Beauty 2d, Vol. 63; second, C. A. Saunders, on Cumberland's Countess, Vol. 67; third, Bellows Bros., on Model Rose, Vol. 63; fourth, H. D. Parsons, on Dora 5th; fifth, T. K. Tomson & Sons, on Rose Archer; sixth, F. W. Harding, on Ramsden Flower. This group among twice their number in the class presented some very nice character and bid fair to make useful animals.

Exhibitor's Herd—First, F. W. Harding; second, T. K. Tomson & Sons; third, T. J. Wornall & Son; fourth, C. A. Saunders; fifth, G. H. Burge; sixth, F. A. Edwards. T. K. Tomson & Sons have been steadily breeding for merit and in this class they made a splendid showing beside a hard competitor.

Breeder's Young Herd—First, F. W. Harding; second, N. A. Lind; third, T. K. Tomson & Sons; fourth, Bellows Bros.; fifth, J. B. Brown; sixth, L. W. Barnhart. Some surprise was occasioned here by the second choice, which, while being a very useful group, did not present the finish that many in this class showed. Judge Miller, however, did his work carefully and his decision met with general favor.

Calf Herd—First, F. W. Harding; second, Bellows Bros.; third, H. D. Parsons; fourth, L. W. Barnhart; fifth, G. H. Burge. The herd for second place was very uniform and had the bull been of a stronger type his group would have stood first place. He had a well covered hack, especially over the ribs, which caught favor from all. Among the heifers of the first herd there was considerable difference in size, which placed them at a slight disadvantage, although they presented good, strong lines and types.

Get of Sire—First, T. K. Tomson & Sons, on get of Gallant Knight; second, F. W. Harding, on get of Whitehall Sultan; third, Bellows Bros., on get of Hampton's Best; fourth, N. A. Lind, on get of Fanny's Pride; fifth, Ardmore Stock Company, on get of Imp. Scottish Pride. In the first choice of this class was a group of red females, deep fleshed and symmetrical all through. Their fine style, beautiful heads and similarity in type made them a group of beauties. Whitehall Sultan's get was not as uniform, but showed plenty of scale and quality, especially on the bull. The four young roans of third place were at a slight disadvantage for age. However, they were a very uniform, attractive lot. The fourth choice showed three extra good cows and a heifer.

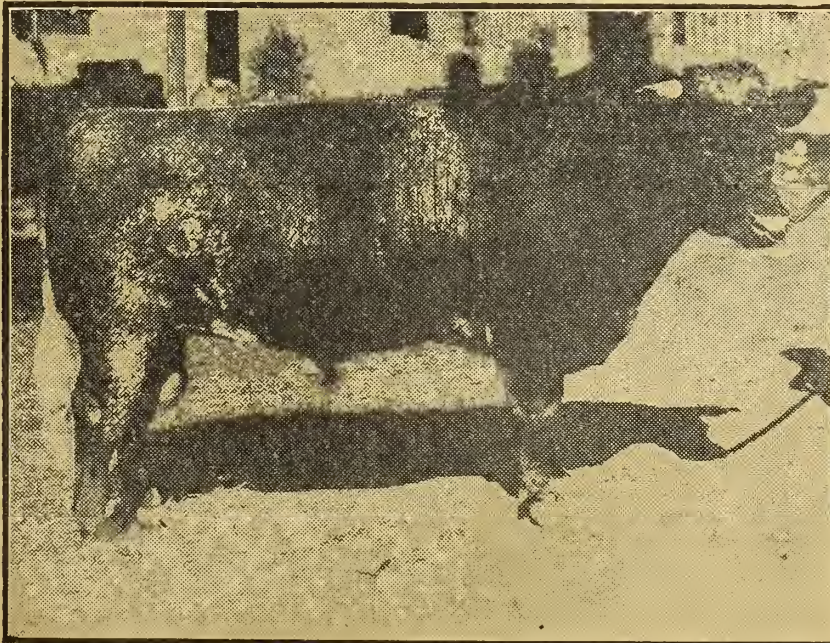

Produce of Cow—First, F. W. Harding, on produce of Shenstone Princess; second, F. W. Harding, on produce of Clara 58th; third, G. H. Burge, on produce of Flora Dell; fourth, H. D. Parsons, on produce of Scottish Queen; fifth, L. W. Barnhart, on produce of Miss Rosebud 2d. Harding's roans and reds were easy winners in this lineup, presenting more of refinement and in higher condition than those following.

Champion Bull—F. W. Harding's Whitehall Marshall.

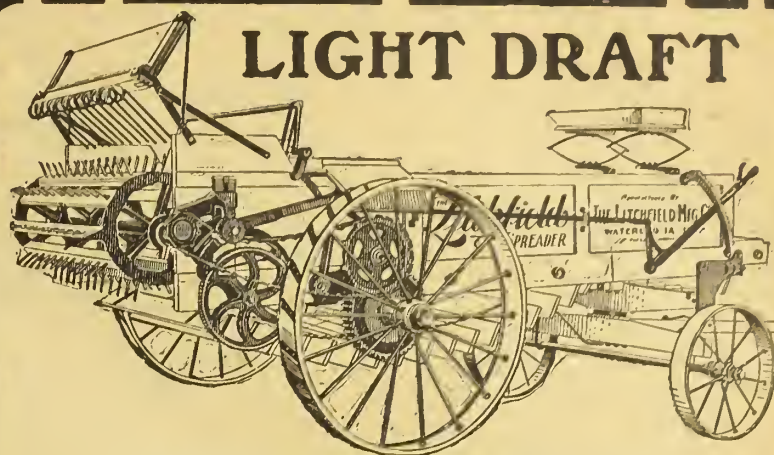

Champion Cow—F. W. Harding's Princess Flora 2d.

HEREFORDS.

The Herefords made a very presentable showing for the first display of the season.

First Prize Two-year-old Short-horn Bull, Good Choice, Owned by Bellows Bros., Maryville, Missouri.

LIGHT DRAFT

MEANS MUCH IN A SPREADER.

IT IS indeed amusing to note the extremes to which some people go, along entirely incorrect lines, for securing light draft on Manure Spreaders.

Light draft in a farm wagon means simply proper lines of hitch with proper wheel construction and smooth running bearings. This also applies to Manure Spreaders when hauling the load to the field, but the most important point to consider on a spreader is the draft due to the working of the machinery when discharging the load.

Here again we find extremely ludicrous efforts to reduce friction in taking up the insignificant part of the draft by putting a large number of rollers under the conveyor and allowing the most important draft question (fully 80 per cent) at the heater wheel, to go without attention.

A very slight, uncalled for pressure on a thrashing machine cylinder will quickly choke down a big engine; also, a very slight improvement on this cylinder at its friction surface will enable a much lighter engine to operate the machine. In other words, an "ounce of cure" at the ends of the beater wheel teeth is worth five pounds of cure on the conveyor friction. So we go first with our cure where it is most needed, that is, to the beater wheel and the business end of the machine.

We have an entirely new design of beater wheel on the Litchfield Spreader, which in itself does, according to the judgment of the best experts, reduce the draft from 15 to 20 per cent on the team. Besides this, we have a new design of Spreader body at the rear which is almost as much of a draft saver as the beater wheel. Taking these two together, we are safe in assuring our trade that this improvement will give us from 20 to 25 per cent saving in draft over the earlier makes of Litchfield machine or any other machine that is now on the market.

We furnish the Litchfield Spreader with the adjustable pole when desired, so that three horses can be used if the horses are light or the roads heavy, although one team alone is used very largely on these machines. The same general care and perfection of detail that produces the light draft in these Spreaders also puts this machine up to a standard where it can be backed by a five year guarantee. What other machine can you buy with such a contract behind it? Give us your opinion if you are interested.

Try This Fence 30 Days Free

Buy Advance Fence direct from factory and you can try it 30 days free, and pay us factory prices if you decide to keep it. If it doesn't prove satisfactory to you in every way, you can return it and we will pay all freight. Advance Fence has the continuous

ADVANCE FENCE CO., 3486 Old Street, PEORIA, ILLINOIS

stay wire—the stay is one piece, running continuously up and down for many rods without an end. This distinctive feature makes Advance the strongest fence. Our catalogue tells all about it, and gives wholesale delivered prices. Ask for it.

Among the older herds of the fair circuit were some unusually strong animals, and while there was some stock that fell below the standard for a fair of Des Moines' rating, these were found in the hands of less experienced showmen. Though nearly all of the firsts fell to one herd, it was no indication that competition was lacking, for in the aged bull class five animals of very good quality made a difficult bunch to place. A number of very fine young things were brought out. The champion bull and cow were furnished by the herd from Wisconsin, which was in fine condition, and will be watched closely throughout the season. Judge Ed. Taylor, of Fremont, Mich., gave general satisfaction by his fair-minded decisions, although there was some difference of opinion among the ringside talent in the placing of the aged bulls and two heifer classes. The eighty-eight animals shown were distributed among ten herds, viz.: Cargill & McMillan, LaCrosse, Wis. (21 head); Carrothers Bros., Ryan, Iowa (5 head); Edmonds, Shade & Co., Kingsley, Iowa (14

COILED SPRING FENCE

Closely Woven. Can not Sag. Every wire and every twist is a brace to all other wires and twists full height of the fence. Horse-high, Bull-strong, Pig-tight. FENCE Strongest Made

Made of High Carbon coiled wire. We have no agents. Sell direct to user at factory prices on 30 days free trial. We pay all freight. Catalog shows 37 styles and heights of farm and poultry fence. It's free. Buy direct. Write today. COILED SPRING FENCE CO. Box 20, WINCHESTER, INDIANA.

head); D. W. Ohl, Iowa City, Iowa (8 head); Hugh Whiteford, Guilford, Mo. (5 head); W. S. Van Natta & Son, Fowler, Ind. (13 head); G. W. Way & Son, New Sharon, Iowa (11 head); S. L. Brock, Macon, Mo. (9 head); Sheridan Henry, Ridgeway, Mo. (2 head).

AWARDS.

Aged Bulls—First, Cargill & McMillan, on Princeps 4th 143394; second, Hugh Whiteford, on Kensington (Imp.) 111886; third, Carrothers Bros., on Emancipator 156682; fourth, Edmonds, Shade & Co., on King Edward 165604; fifth, David W. Ohl, on Rustler's 7th 161631. Princeps for his excellent style and finish was an easy first, but for next place there was close competition and Kensington won for his great depth and massive front.

Bull Two Years Old—First, W. S. Van Natta & Son, on Prime Lad 3d 197954; second, Cargill & McMillan, on Privater 2d 132133; third, G. W. Way & Son, on Beau Brummel 4th 194318; fourth, Edmonds, Shade & Co., on Sir Albany 9th 180123; fifth, Carrothers Bros., on Field Marshall 208313; sixth, Carrothers Bros., on Admiral Togo 205503. This was the only first that Cargill & McMillan lost. Prime Lad is a bull of good type and smoothness of form. The Way bull was not highly fitted, but pushed his competitors hard.

Yearling Bull—First, Cargill & McMillan, on Bonnie Brae 3d 203317; second, W. S. Van Natta & Son, on Prime Lad 9th 213963; third, S. L. Brock, on Discoverer 212281; fourth,

25c

SMITH AND DAVIS
Box 2 Ames, Ia.

W. S. Van Natta, on Prime Lad 16th 213369; fifth, Edmonds, Shade & Co., on Passport Prize 216944; sixth, Sheridan Henry, on Missouri Boy 234568.

Senior Bull Calf—First, Cargill & McMillan, on Fullfiller 5th 230510; second, Cargill & McMillan, on Fullfiller 3d 230508; third, W. S. Van Natta & Son, on Prime Lad 25th 234343; fourth, David W. Ohl, on Woodland Chief 233394; fifth, Edmonds, Shade & Co., on Sir Edward 232986; sixth, David W. Ohl, on Berlia 235973. First and second in this class were outstanding winners, as Van Natta's bull was not up to the usual standard in form and finish, though his scale and quality were good.

Junior Bull Calf—First, Cargill & McMillan, on Fullfiller 7th 230512; second, W. S. Van Natta & Son, on Prime Lad 30th 234348; third, Edmonds, Shade & Co., on Shadeland King 232982; fourth, G. W. Way & Son, on Beau Brummel 10th 238386; fifth, G. W. Way & Son, on Beau Brummel 7th 238383. Uniformity of width and finish was prominent in the winner, while the last ones were lacking in scale on account of not being highly fitted, but they were a sappy bunch.

Aged Cow—First, Cargill & McMillan, on Heliotrope 159451; second, Cargill & McMillan, on Twilight 167464; third, W. S. Van Natta & Son, on Rosebud 169015; fourth, D. W. Ohl, on Dora Thorne 118061; fifth, G. W. Way & Son, on Kiowa 163892; sixth, G. W. Way & Son, on Kappie 163891. The winner here was a cow of the wide, deep sort, which combined with her splendid fitting gave her an easy place. Her half sister, Twilight, full sister to Principleps 4th, was a lower set type than those following and better covered. All through, the class was a good one.

Heifer, Two Years Old—First, Cargill & McMillan, on Miss Donald 17th 184573; second, Cargill & McMillan, on Golden Lassie 182126; third, W. S. Van Natta & Son, on Princess 197988; fourth, Edmonds, Shade & Co., on Columbus Lassie 2d 183956; fifth, Edmonds, Shade & Co., on Delight 3d 183991; sixth, G. W. Way & Son, on Gwendoline 4th 179900. The two first in this class were Beau

W. S. Van Natta & Son, on Margaret 234336; fourth, S. L. Brock, on Lady Elfin 233127; fifth, S. L. Brock, on Lady Welmora 233131; sixth, Cargill & McMillan, on Miss Filler 4th 230516. An excellent class of thirteen typical calves made a pleasing lineup here, and the blocky type and smooth-covered backs were emphasized in the winners.

Junior Heifer Calf—First, Cargill & McMillan, on Miss Filler 6th 239659; second, S. L. Brock, on Lady Belinda 238028; third, W. S. Van Natta & Son, on Lassie 234333; fourth, Cargill & McMillan, on Miss Filler 5th 230517; fifth, Edmonds, Shade & Co., on Edward's Lassie 232978; sixth, G. W. Way & Son, on Beau Anna 238380. A prize apiece in this class and the success of Fulfiller as a sire of good stock was again demonstrated in the sweet character of the first prize. The third place was coveted for a time by Miss Filler, but Lassie proved a little too strong.

Exhibitor's Herd—First and second, Cargill & McMillan; third, W. S. Van Natta & Son; fourth, Edmonds, Shade & Co.; fifth, D. W. Ohl; sixth, G. W. Way & Son. Principleps 4th and Privateer 2d headed the Wisconsin herds in the order they won, and received but little competition. Van Natta's herd was headed by Prime Lad 3d, a splendid bull with a good following of females. It would be a difficult matter to excel the herds at the head of the list in uniformity of type and quality of finish.

Breeder's Young Herd—First, Cargill & McMillan; second, S. L. Brock; third, W. S. Van Natta & Son; fourth, Edmonds, Shade & Co. The second prize herd was a good collection, but not up to the uniform standard of type of the first choice. Van Natta was a close rival for second.

Calf Herd—First, S. L. Brock; second, Cargill & McMillan; third, W. S. Van Natta & Son; fourth, G. W. Way & Son.

Get of Sire—First, S. L. Brock, on get of Disturber; second, W. S. Van Natta & Son, on get of Prime Lad; third, Cargill & McMillan, on get of Fullfiller; fourth, Cargill & McMillan, on get of Principleps; fifth, Edmonds, Shade & Co., on get of Columbus

YOU CAN GET THIS CAN OF

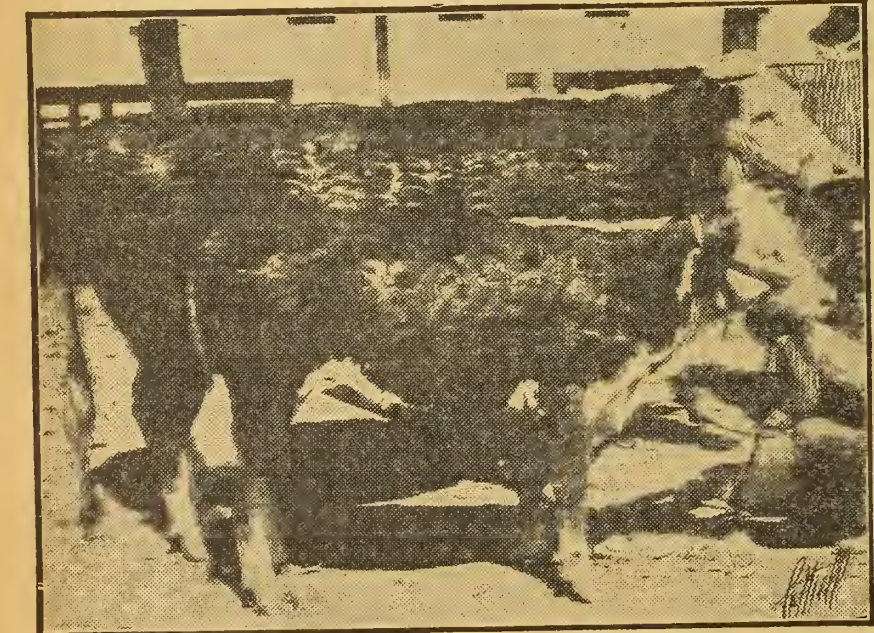

Dipolene

on 30 days trial. We don't ask you to pay for it unless it does the work. We don't ask you to take a single chance or a bit of risk on this proposition. We know what Dipolene will do—we want you to know by testing it thoroughly. That's why we are willing to send it

ON A MONEY-BACK 30 Days Trial

You can try it on hogs, cattle, sheep, horses—give it as severe a test as you please, it cannot do them any harm, and if it fails to do them any good, send it back at our expense and we will refund your money. You'll only be out the stamp it costs to mail us your order if it does not do what we claim for it. We want every farmer and stock-raiser in the United States to know by personal test how good a dip Dipolene is. We want him to know what it will do, and why it will pay him to use it in preference to all others. We make some pretty broad claims for Dipolene but we prove them with the dip. This is how we do it. We will send any quantity of Dipolene over two gallons on 30 days trial, to any farmer and stock-raiser who will write for it agreeing to use it according to directions, and refund his money in full if it proves unsatisfactory. Write for our introductory prices and we will mail you free a booklet stating specifically what Dipolene is good for and just how to use it to the best advantage. This offer is well worth accepting today—it may save you many dollars. Address,

MARSHALL OIL COMPANY, Dept. Y, MARSHALLTOWN, IOWA.

A Pair of White Faces Shown by G. W. Way & Son, New Sharon, Iowa.

Donald heifers and presented blocky, compact forms with nice finish. The third animal lacked a bit too much in scale and finish to crowd those above her.

Yearling Heifer—First, Cargill & McMillan, on Ethel 2d 203170; second, S. L. Brock, on Lady Ann 204805; third, W. S. Van Natta, on Prairie Queen 213961; fourth, S. L. Brock, on Lady Lucy 212289; fifth, Edmonds, Shade & Co., on Lady Albany 207790; sixth, S. L. Brock, on Lady Ruth 217109. Seventeen entered for prizes in this contest and gave Mr. Taylor some careful work. Ethel 2d, the first choice, was followed by a heifer of good finish and type, yet lacking the great smoothness and even covering seen in Jimmy Price's feeding. Those following were of first-class quality.

Senior Heifer Calf—First, Cargill & McMillan, on Miss Filler 230513; second, S. L. Brock, on Disturber's Lassie 233124; third,

35th. The first choice in this ring presented a remarkably even lot and one hard to defeat, although the get of Prime Lad showed great uniformity of type.

Produce of Cow—First, Cargill & McMillan, on Belle Donald 20th; second, Cargill & McMillan, on Tidy 12th; third, Cargill & McMillan; fourth, W. S. Van Natta & Son, on Lenora; fifth, Carrothers Bros., on Happiness.

Champion Bull—Principleps 4th 143394 is a bull got by Principleps 66683 out of Tidy 12th. To put it mildly, he is a great beast, deep, wide and aside from a heavy brisket, he carries a great amount of flesh in the right place.

Champion Cow—Heliotrope, an easy winner, was very much of the type of the champion bull.

ABERDEEN-ANGUS.

The Aberdeen Angus display as a whole was not up to the standard that the supporters of this breed would have desired. Excellence was too exclusive and confined to a few herds, while the presence of many small herds cut down the size of the totals. The absence of several of last year's best herds made a noticeable difference in the competition, as was most evidenced in the aged and herd classes. The work of judging proceeded rapidly and Professor Kennedy found the winners without much trouble in most of the rings. In the aged bull class A. C. Binnie was able to win with Jim Delaney, a bull presenting a stylish carriage and smooth covering of flesh. Champion also went to this bull as a sire. The champion cow came from the herd of J. H. Donohue in the two-year-old heifer, Eileen Lass. In the yearling heifer class competition was close and interesting and there was a considerable difference of opinion in the minds of some as to whether the type exhibited by the winner was superior enough to place her over the type and superior finish of second choice. A list of the breeders, also size of herd, is as follows: A. C. Binnie, Alta, Iowa (11 head); W. A. McHenry, Denison, Iowa (8 head); A. B. Puterbaugh, Milledgeville, Ill. (11 head); Rosenfeld & Siverly, Kelly, Iowa (2 head); P. J. Donohue, Holbrook, Iowa (9 head); B. F. Fantz, Nevada, Iowa (5 head); H. J. Hess, Waterloo, Iowa (11 head); W. J. Miller, Newton, Iowa (25 head); Louie Aillaud, Newton, Iowa (1 head); Sunnyside Stock Farm, Altoona, Iowa (4 head); Chas. Off, Peoria, Ill. (6 head); F. L. Sullivan, Afton, Iowa (5 head). Awards are as follows:

AWARDS.

Delaney 62767; second, W. A. McHenry, on Baden Lad 61883; third, A. B. Puterbaugh, on Broadus Rex 46067.

Bull Two Years Old—First, P. J. Donohue, on Morning Star 2d 75716; second, W. J. Miller, on McDonald's Lad 66952; third, B. F. Fantz, on Captain King 80093; fourth, H. J. Hess, on Birtley of Quietdale 71646; fifth, A. B. Puterbaugh, on Lucile's Prince 72328.

Yearling Bull—First, P. J. Donohue, on Glenfold Thickset 2d 88142; second, Louie Aillaud, on Newton King Dodo 81608; third, W. A. McHenry, on Star of Denison 82426; fourth, A. C. Binnie, on Elmar Lad 84122; fifth, W. J. Miller, on King Donald 80599; sixth, Rosenfeld & Siverly, on Inland Dandy 79664. Twelve animals made this the largest of the bull classes. Until Professor Kennedy selected the likely winners there was little difficulty, but among these competition was quite interesting. However, it did not take long to decide on the low, blocky Glenfold Thickset 2d for first, while second choice was a larger and less refined bull. Star of Denison is a bit too long as yet to satisfy the critics.

Senior Bull Calf—First, W. A. McHenry, on Prince Pico 93306; second, Chas. J. Off, on Quaint Fellow 94277; third, A. B. Puterbaugh, on Lucile's Prince 3d; fourth, H. J. Hess, on Buttress of Quietdale 94107; fifth, F. L. Sullivan, on Beau Ito 9417.

Junior Bull Calf—First, W. J. Miller, on Erica Prince 3d; second, A. C. Binnie, on Even Lad; third, B. F. Fantz, on Quinrod of the Oaks 93236. The Erica calf won over Even Lad for his style and a trifle better quality.

Aged Cow—First, W. J. Miller, on Snowflake 2d of Kirkbridge 46016; second, A. C. Binnie, on Gussie of Kirkbridge 64008; third, W. A. McHenry, on Glenfold Rose 63489; fourth, P. J. Donohue, on Blackbird Lassie 2d 59234; fifth, A. B. Puterbaugh, on Erica of Oaklawn 46848; sixth, W. J. Miller, on Metz Ogarta 60992. Eight females strove for honors in this lineup. The first and second choice were much alike in type, but the difference of a year in favor of Mr. Miller's cow gave her some advantage in smoothness and bloom. Both cows were sired by the bull, Lotterer.

Heifer Two Years Old—First, P. J. Donohue, on Elteen Lass 73102; second, A. C. Binnie, on Mina of Alta 5th 73111; third, W. A. McHenry, on Barbara McHenry 18th 71677; fourth, P. J. Donohue, on Pride of Clover Leaf 73969; fifth, W. J. Miller, on Metz Ogarta 2d 72550; sixth, H. J. Hess, on Pride of Fashion 68592. The first two animals in this class were sired by Heather Lad of Emerson 2d, demonstrating the ability of that bull in a forcible way.

Heifer One Year Old—First, W. A. McHenry, on Abess McHenry 6th 82418; second, A. C. Binnie, on Coquette Lass of Alta 83367; third, A. C. Binnie, on Blackbird Lassie of Alta 83368; fourth, P. J. Donohue, on Brookside Pride 4th 93254; fifth, W. A. McHenry, on Pride McHenry 45th 82421; sixth, F. L. Sullivan, on Fay Ito 80350. Nineteen individuals made this a full class, including some excellent animals, as well as ordinary ones. The most attention was given to first and second places, where a pair of beautiful heifers were rivals for first honors. Some would have reversed the decision for the first two, favoring the smooth, rich-fleshed heifer of Mr. Binnie's to the large, blocky one of the McHenry herd.

Senior Heifer Calf—First, P. J. Donohue,

STILL COLLEGE OF OSTEOPATHY, DES MOINES, IOWA.

EXPERIENCED INSTRUCTORS. LARGEST OSTEOPATHIC CLINIC IN THE WORLD. Three years' course. OSTEOPATHIC INFIRMARY IN CONNECTION. Send for catalog J. This college is thoroughly reliable and is recommended by all the leading citizens of Des Moines. We are in position to take care of patients of all classes. Infirmary will be open all summer. The best of everything. C. E. Thompson, A. M., D. O., president; William E. D. Rummel, A. M., L. I. B., Secretary and General Manager, 1422 Locust Street.

CHAMPION HAY PRESS

4 Horse Mounted Power or Gasoline Engine. 6 strokes of plunger to one round of horses. Side and end hitch, 2 to 3 tons per hour. Self feed. Automatic Block Dropper and Scale. Full line of belt power presses. FAMOUS MFG. CO., 77 CHICAGO AVE., EAST CHICAGO, IND.

on Brookside Rose 2d 93255; second, W. A. McHenry, on Abess McHenry 7th 93307; third, P. J. Donohue, on Brookside Pride 5th 93258; fourth, A. C. Binnie, on Coquette Lass of Alta 2d; fifth, H. J. Hess, on Alicia of Quietdale 9th 94108; sixth, A. C. Binnie, on Enna Lassie 2d. In this showing the quality and type of first choice made her a rival hard to defeat. Second choice was larger for her age, but a bit less refined.

Junior Heifer Calf—First, W. A. McHenry, on Blackbird McHenry 66th 93314; second, A. C. Binnie, on Queen Lassie of Alta 3d; third, H. J. Hess, on Heatherbloom 5th of Quietdale 94112; fourth, A. C. Binnie, on Proud Lassie of Alta; fifth, W. J. Miller, on Snowflake's Queen; sixth, A. B. Puterbaugh, on Lady Kathleen. First and second choice were but two days apart in age. However, there was enough difference in size and frame to place Queen Lassie of Alta at somewhat of a disadvantage.

Exhibitor's Herd—First, A. C. Binnie; second, P. J. Donohue; third, W. A. McHenry; fourth, W. J. Miller; fifth, H. J. Hess. In the herd classes Mr. Binnie was able to take the most firsts, and while this was not true of his individual offerings, the uniformity of his stock merited what it won in these classes.

Breeder's Young Herd—First, A. C. Binnie; second, W. A. McHenry; third, W. J. Miller.

Calf Herd—First, A. C. Binnie; second, W. A. McHenry; third, W. J. Miller; fourth, A. B. Puterbaugh.

Get of Sire—First, A. C. Binnie, on get of Heather Lad of Emerson; second, P. J. Donohue, on get of Blackwood Lawn; third, W. J. Miller, on get of Black Knight of Estill; fourth, A. B. Puterbaugh, on get of Proud Duke; fifth, H. J. Hess, on get of Pabno.

Produce of Cow—First, W. A. McHenry; second, W. J. Miller; third, W. A. McHenry. Champion Bull—Jim Delaney 62767. Champion Cow—Eileen Lass 73102.

GALLOWAYS.

But four herds were shown in this competition and the placing of ribbons proceeded rapidly. Allen Thompson, of Nashua, Mo.,

Chandice & Chandice, Patent Attorneys,
956 F. Street, Washington, D. C.

made the awards in a very agreeable manner, although there was a chance for some contention in the herd classes, where it was a question of choosing types. In some of the young heifer classes the difficulty was in balancing scale against type and quality. The champion bull, Pat Ryan of Red Cloud (20038), as well as the champion cow, Lady Charlotte 24814, a two-year-old, were bred on this side of the water and were of the smooth, thick-fleshed kind admired by breeders. A total of forty-four animals were well shown by the following breeders: A. F. Craymer, Morris, Ill. (12 head); G. W. Lindsey, Red Cloud, Neb. (11 head); J. E. Bales & Son, Stockport, Iowa (11 head); C. S. Hechtner, Princeton, Ill. (10 head).

AWARDS.

Aged Bulls—First, G. W. Lindsey on Pat Ryan of Red Cloud 20038; second, A. F. Craymer, on Scottish Sanson 23542.

Two-Year-Olds—First, J. E. Bales & Son, on Cauty Lad; second, G. W. Lindsey, on Ned of Red Cloud 26253.

Yearlings—First, C. S. Hechtner, on Standard Favorite 26550; second, C. S. Hechtner, on Starlight of Maples 26224; third, A. F. Craymer, on Protector of Rivers 27193; fourth, G. W. Lindsey, on Nume of Red Cloud 27588.

Senior Bull Calf—First, J. E. Bales & Son, on Dorothea's Prince 28813; second, C. S. Hechtner, on Careful's Druid; third, J. E. Bales & Son, on Bonnie McDougal 28812; fourth, A. F. Craymer, on Flagman of Rivers 28456.

Junior Bull Calf—A. F. Craymer won the first three prizes with no competitors, in the following order: First, Grandee of Rivers 28774; second, Irish Lad of Rivers 28772; third, Milverton of Rivers 28773.

Aged Cows—First, G. W. Lindsey, on Favorite 16th of Lochenkit, Imp., 21205; second, J. E. Bales & Son, on Graefel 3d of Garliestown 19297; third, A. F. Craymer, on Princess Mable 23484.

Heifers Two Years Old—First, G. W. Lindsey, on Lady Charlotte 24814; second, J. E. Bales & Son, on Annie David's 5th 26977; third, A. F. Craymer, on Prudie of Rivers 25413.

Yearling Heifers—First, J. E. Bales & Son, on Hawkeye Lady 27121; second, C. S. Hechtner, on Louisa of Maples 26218; third, C. S. Hechtner, on Druid's Lora 26219; fourth, A. F. Craymer, on Standard Pet 27190; fifth, A. F. Craymer, on Mischievous of Rivers 27191; sixth, G. W. Lindsey, on Nettie D. of Red Cloud 27584. Judge Thomson found his hardest work in this class. For type, Hawkeye Lady was the favorite and finally won over the scale shown in Louisa of Maples. The uniformity in the nine animals shown was quite pleasing.

Senior Heifer Calf—First, G. W. Lindsey, on Nora D. of Red Cloud 27580; second, J. E. Bales & Son, on Annie David's 6th 28780; third, A. F. Craymer, on Darletta of Rivers 28762; fourth, J. E. Bales & Son, on Lady Ruth 28782.

Junior Heifer Calf—First, G. W. Lindsey, on Lady Elgin; second, J. E. Bales & Son, on Princess Graceful 28781; third, C. S. Hechtner, on Druid's Louisa; fourth, J. E. Bales & Son, on Lady Graceful 28783; fifth, A. F. Craymer, on Defender's Pet 28761.

Exhibitor's Herd—First, G. W. Lindsey; second, J. E. Bales & Son; third, A. F. Craymer.

Breeder's Young Herd—First, J. E. Bales & Son; second, A. F. Craymer; third, G. W. Lindsey.

Calf Herd—First, J. E. Bales & Son. Get of Sire—This ring brought out some good, uniform groups of different types. J. E. Bales & Son won first with the get of McDougal 4th of Tarbreoch; second, C. S. Hechtner, with get of Druid of Castleman; third, A. F. Craymer, with get of Defender of Rivers; fourth, G. W. Lindsey, with get

of Pat Ryan of Red Cloud; fifth, J. E. Bales & Son.

Produce of Cow—First, J. E. Bales & Son; second, C. S. Hechtner; third, G. W. Lindsey; fourth, A. F. Craymer; fifth, A. F. Craymer.

POLLED DURHAMS.

With a new exhibitor and more animals over last year's show came increased interest and competition for the supporters of this breed. Young stock of good quality and finish comprised the greater part of the exhibits. In the aged and herd classes no competition prevailed. Considering that this breed is just coming into prominence in the state, the rings were very satisfactory. There were many inquiries from farmers for young hulls. E. T. Davis, the Angus breeder, placed the ribbons. Iowa was represented by three herds, Shaver and Deuker, Kalona (10 head); Ardmore Stock Company, Holstein (3 head); and F. F. Fallor, Newton (4 head). A. C. Woods & Sons, Pendleton, Ind., showed 9 head.

AWARDS.

Aged Bulls—Golden Victor 251100, the only animal shown, was given the blue ribbon; owned by F. F. Fallor.

Two-Year-Olds—The first here was given to Roan Hero 3613, a splendid young hull shown by Shaver & Deuker; second, F. F. Fallor, on Goldsmith 250852.

Yearling Bulls—First, A. C. Woods & Sons, on Lancaster Hero 4655; second, A. C. Woods & Sons, on Orange Knight; third, Shaver & Deuker, on Colonel Perry, Vol. 3.

Bulls Under One Year—First, Shaver & Deuker, on Arcadia Duke 3d 5026; second, A. C. Woods & Sons, on Golden Gem; third, A. C. Woods & Sons, on Hallie's Hero.

Aged Cows—Shaver & Deuker, on Royal Flora.

Heifers Two Years Old—First, Shaver & Deuker, on Scottish Belle 3d; second, Shaver & Deuker, on Polled Lady Jane.

Yearlings—First, A. C. Woods & Sons, on Victoria Lady; second, Shaver & Deuker, on Scottish Belle 4th; third, A. C. Woods & Sons, on Hero Maid 2d.

Calves—First, A. C. Woods & Sons, on Christine; second, A. C. Woods & Sons, on Hero Maid 3d; third, Ardmore Stock Company, on Rosalie.

Exhibitor's Herd—Roan Hero, owned by Shaver & Deuker, headed the only herd in this class.

Breeder's Young Herd—Won by A. C. Woods & Sons, with Lancaster Hero 4655 at the head.

Get of Sire—Only one entry by A. C. Woods & Sons.

Produce of Cow—First, A. C. Woods & Sons, on Pride of Maplewood; second, Shaver & Deuker, on Scottish Belle 3d.

Champion Bull—Shaver & Deuker, on Roan Hero 3613.

Champion Cow—Shaver & Deuker, on Royal Flora.

RED POLLS.

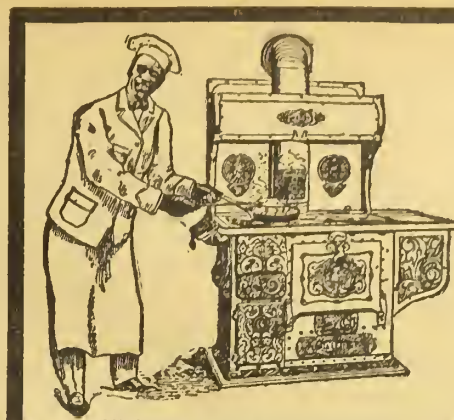

In numbers and excellence of breeding this dual-purpose breed surpassed all expectations, and with five exhibitors and sixty-six animals this part of the cattle display was a prominent feature of the show. Although the best ribbons went to two breeders, all classes with the exception of the two-year-old hulls were well filled and presented difficult work for the judge. In the aged cow class there were ten animals, the winners showing splendid type. Many other classes were as well filled. Some of the young stock inclined too much to beef type to be desirable, although the winners throughout were useful animals and very good models of the type demanded. Professor Dinsmore, of Ames, was very careful and deliberate in his decisions and made a good impression on the showmen. Home exhibitors were Adolph P. Arp, Eldridge (15 head); G. W. Coleman, Webster City (13 head); and B. A. Samuelson, Kiron (12 head). Also G. B. Buck & Son, Orion, Ill. (13 head); and W. S. Hill, Alexandria, S. Dak. (13 head). Awards were as follows:

Aged Bulls—First, G. W. Coleman, on Irwin 8253; second, Adolph P. Arp, on Nailer 7396; third, Geo. B. Buck & Son, on Money-maker 11944; fourth, B. A. Samuelson, on Protector 8597.

Two-Year-Olds—First, W. S. Hill, on Protection 12095.

Yearling Bulls—First, G. W. Coleman, on Logan 13500; second, B. A. Samuelson, on Pleasant Hill Advance 14565; third, G. W. Coleman, on Duroek 14573; fourth, W. S. Hill, on Nelson 14070; fifth, G. W. Coleman, on Royal 14575; sixth, Adolph P. Arp, on Emery 15141. This ring comprised a low-set lot, with considerable quality and smoothness.

Calves Under One Year—First, W. S. Hill,

Champion Bull—G. W. Coleman, on Irwin 8253.

Champion Cow—G. W. Coleman, on Saucy.

HOLSTEINS.

The small number of exhibitors in this breed was more than counterbalanced by the large herds that were brought out. Old showmen divided honors this year with a new breeder, who showed some individuals of splendid quality and dairy type. Classes were large and close enough to make Mr. F. H. Scribner, of Rosendale, Wis., some interesting work. The five prizes offered were quite evenly divided, although C. F. Stone took the most firsts on the fine form and type of his offerings. The breeders and number of animals in each herd were as follows: W. B. Barney, Hampton, Iowa (12 head); McKay Bros., Buckingham, Iowa (15

Champion Bull—W. B. Barney & Co., on Jewel of Home Farm.

Champion Cow—C. F. Stone, on Maryke 3d Gerben 4th 54935.

JERSEYS.

From the nature of the Jersey showing it would appear that Iowa breeders had not as yet the proper appreciation of the value of an exhibit at the Des Moines fair. The display was conspicuous for quality rather than for size, which was a most commendable feature. Neat heads and "Jersey" expression, fine bone and hair and roomy animals characterized the exhibits. The most interest centered about the herd of Hunter & Smith, of Beatrice, Neb., who had a large herd that took most of the best ribbons and supplied the champion male and female. F. H. Scribner, of Rosendale, Wis., did the judging, and his work was most creditably done, pleasing both exhibitors and spectators. The following were the exhibitors: Dixon & Deane, Brandon, Wis. (12 head); Hunter & Smith, Beatrice, Neb. (10 head); G. S. Redhead,

Mgr., Des Moines, Iowa (5 head); Mrs. S. B. Thomas, St. Joseph, Mo. (1 head).

AWARDS.

Aged Bull—First, Hunter & Smith, on Belmont's Champion Lad 68479; second, Dixon & Deane, on Zelaya's Fancy Lad 65883; third, Geo. S. Redhead, Mgr., on Guenon's Golden Lad 62168.

Bull Two Years Old—First, Hunter & Smith, on Victoria's Champion Lad 2d 71849. Yearling Bull—First, Hunter & Smith, on Catillon's Bachelor 73605; second, Dixon & Deane, on Bugler's Golden Lad; third, Geo. S. Redhead, Mgr., on Lanseer's Lad.

Bull Calf Under One Year—First, Hunter & Smith, on Guenon's Champion Lad 73619; second, Dixon & Deane, on Spinetta's Golden Lad; third, Geo. S. Redhead, Mgr., on Trustee LeRoy.

Aged Cow—First, Hunter & Smith, on Jersey Dairymaid, Imp., 140946; second, Dixon & Deane, on Morey's Golden Lass 168471; third, Mrs. S. B. Thomas, on Guenon's Lad Lost Time 165613; fourth, Hunter & Smith, on Pink's Pride; fifth, Dixon & Deane, on Fancy's Golden Lady 180344. Females of deep, roomy middles and well-developed udders, indicative of great performance, were a feature of this class.

Heifer Two Years Old—First, Hunter & Smith, on Silver Stella 182973; second, Dixon & Deane, on Beachfield's Francie 192133; third, Geo. S. Redhead, Mgr., on Trustee's Lizette 2d 190158.

Yearling Heifer—First, Dixon & Deane, on Bessie's Golden Lady 190874; second, Dixon & Deane, on Guenon's Ara Arawana 195286; third, Hunter & Smith, on Victoria's Golden Fairy 194605.

Heifer Calf Under One Year—First, Hunter & Smith, on Guenon's Victoria; second, Dixon & Deane, on Silver's Golden Lady; third, Hunter & Smith, on Victoria's Fairy; fourth, Dixon & Deane, on Linda's Golden Lady.

Exhibitor's Herd—First, Hunter & Smith; second, Dixon & Deane.

Breeders' Young Herd—First, Hunter & Smith; second, Dixon & Deane.

Get of Sire—First, Dixon & Deane; second, Hunter & Smith.

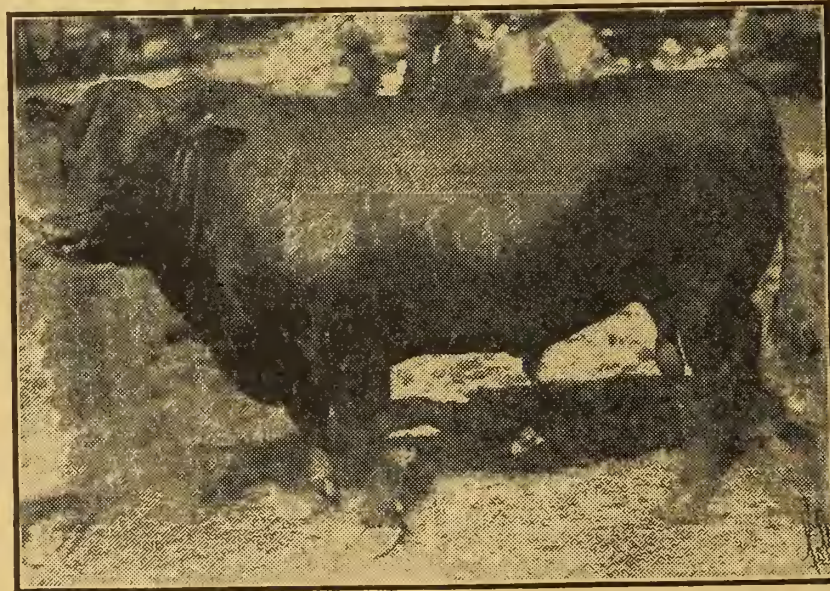

Produce of Cow—First, Dixon & Deane; second, Hunter & Smith; third, Geo. S. Redhead, Mgr.

Champion Bull—Hunter & Smith, on Belmont's Champion Lad 68479.

Champion Cow—Hunter & Smith, on Jersey Dairymaid, Imp., 140946.

HORSES.

Prof. C. F. Curtiss, the notable live stock judge, was placed in charge of the horse department after his appointment as a director of the state fair. Since that date this department has taken on new life, one result of which was that the supply of stalls ran out long before all the animals were cared for. It necessitated the building of temporary structures and this experience

Sweepstakes Angus Bull Jim Delaney. Owned by A. C. Binnie, Alta, Iowa.

suggests the wisdom of providing more room for this department in the immediate future. There was a good showing of all breeds of horses and no feature of the fair was more attractive than the program carried out each afternoon in the horse ring. Thousands of people watched the placing of the ribbons every day, and the interest was sustained to the very last. Unfortunately, the sickness of the judge, Mr. Ogilvie, delayed part of the judging. One gratifying feature of the horse show was the number of home-bred animals entered, mares, stallions and colts. What the horse department needs now is a pavilion to be devoted solely to the judging of horses, so that all the awards may be made early in the week.

BELGIANS.

The Belgian show was not up to the standard set by the Percherons or the Clydes, nor even to that of the Shires. Competition between breeders was confined to the stallion classes, the female entries being all made by Lefebure & Son, of Fairfax. There were some heavy, coarse-boned animals, very much predisposed to unsoundness in a few of the classes. Mr. Ogilvie was selected as judge for this class also, but his illness compelled him to keep his room, so his place was filled by Messrs. Truman and Galbraith. Exhibitors were: McLaughlin Bros., Columbus, Ohio; Frank Iams, St. Paul, Neb.; Henry Lefebure, Fairfax, Iowa; W. L. De Clow, Cedar Rapids, Iowa; Finch Bros., Verona and Joliet, Ill., and W. W. Garner, Des Moines, Iowa.

AWARDS.

Aged Stallion—First, McLaughlin Bros., on Forton de Smeerbhebb 2212; second, McLaughlin Bros., on Marmot de Pursouls 2187; third, Henry Lefebure, Ravachol 1987.

Quality, with good feet and legs won for

go over the classes Thursday on account of illness, and was replaced by Messrs. J. G. Truman, of Bushnell, Ill., and Mr. Galbraith & Son, Janesville, Wis. All the exhibitors seemed well pleased with the awards, and satisfaction marked the Clyde show throughout the fair.

AWARDS.

Aged Stallion (Over Four Years of Age)—First, A. G. Soderberg, on Clau Stewart (11658); second, McLay Bros., on Prince Punctual 9644; third, W. W. Garner, on Captor 12027.

First place was awarded to Mr. Soderberg on type and cleanliness of limb, with lots of quality throughout, while the second prize winner was not quite the type, and a little coarse. A Barou's Pride stallion was awarded the third money, but was not up to the really high class of the get of that sire. Fourteen entries appeared in this ring.

Three-Year-Old Stallion—First, A. G. Soderberg, on Ethelbert 12025; second, A. G. Soderberg, on Tartau 12024; third, McLay Bros., on St. Columbia 1142.

General symmetry of form, with a full-made body, and strong bone, and large feet won first for Ethelbert in a class of six. Second place went to a stallion not quite so good in type as the winner, but deeper-bodied and more massive of frame than the third one, St. Columbia.

Two-Year-Old Stallion—First, A. G. Soderberg, on Black Douglass (Vol. XXIX.); second, A. G. Soderberg, on Black Acme (12855); third, McLay Bros., on Gold Anchor 12564. An easy class, first being won on style, and the round-ribbed, symmetrical type, with lots of quality, which marks the Clyde. There were only four entries.

Yearling Stallion—First, McLay Bros., on Cavalier 12561; second, McLay Bros., on Golden Prince 12346; third, Shekleton, on William McKinley 12372.

Cavalier went to the head of a rather common class of four young ones without much deliberation on Mr. Ogilvie's part.

Horse Foal—First, T. D. Tice & Son, on Reciprocity; second A. G. Soderberg, on Osco Captor.

Three-Year-Old or Over, Bred by Exhibitor—First, McLay Bros., on Prince Punctual 9314; second W. V. Hixson, on Rosemack 10406; third, August Post, on Wayside Douglass.

A sort of strawberry roan with white feet is Prince Punctual who won first in a class of six on massiveness of build, and high quality of feet, the good sound kind which the Scotchman likes to see so well in the Clydes.

Stallion Under Three, Bred by Exhibitor—First, Jas. Pedley, Algona, unnamed entry; second, McLay Bros., on Golden Prince; third, A. G. Soderberg, on Byron's Prince.

Mare Over Four Years—First, McLay Bros., on Princess Goodwin 9849; second Queen of the Clydes 10934; third, A. G. Soderberg, on Osco Queen 10649.

Princess Goodwin is a bay of good quality, standing strongly on good feet, with good slope of pastern, and massive of build. She won without trouble over five competitors.

Three-Year-Old Filly—First, McLay Bros., on Lady Graceful 11118; second, A. G. Soderberg, on Osco Sweetness 11117; third, A. G. Soderberg, on Osco Kerney 11209.

Two-Year-Old Filly—First, McLay Bros., on Point Lace 11586; second, A. G. Soderberg, on Osco Bloss 12056; third, McLay Bros., on Thorncliffe Queen 12456.

Mare Foal—First, W. V. Hixson, on Peach Blossom; second McLay Bros., unnamed entry.

Peach Blossom is a good, growthy colt, with lots of promise.

Mare Over Three, Bred by Exhibitor—First, McLay Bros., on Princess Goodwin; second,

Jas. Pedley, on Queen of the Clydes; third, McLay Bros., on Lady Graceful.

The winners here were winners in the open classes, the first two winning in the aged class and the third in the three-year-old class.

Mare Under Three, Bred by Exhibitor—First, McLay Bros., on Point Lace 11586; second, W. V. Hixson, on Palmerston's Darling; third, W. V. Hixson, on Peach Blossom.

These mares were the winners in their respective classes, Point Lace in the two-year-old class, Palmerston's Darling in yearling class and Peach Blossom in foal class; style, quality and more desirable feet and legs won for McLay Bros.' protegee, Peach Blossom is a beautiful little foal with all kinds of quality.

Get of Stallion—First, A. G. Soderberg, on get of Hard Times 115, the sire of nearly all of his show herd; second, W. V. Hixson, on get of Palmerston (10389).

Produce of Mare—First, McLay Bros., on pair out of Gold Leaf; W. V. Hixson, on produce of Princess Rose by Cedric; third, A. G. Soderberg, on produce of Osco Gorey.

Best Four Animals, Bred by Exhibitor—First, McLay Bros.; second, W. V. Hixson; third, A. G. Soderberg.

Best Group of Five, Owned by Exhibitor—McLay Bros. won, being only entry. Champion American Bred Stallion, Any Age—McLay Bros., on Prince Punctual.

PERCHERONS.

Supporters of the Percheron breed of horses have reason to be proud of the showing made by the representatives of this breed at Des Moines. Since it was the opening fair of the season, only a medium show was expected, but the hopes of the few who had this section in charge were more than realized when 140 head had to be supplied stall room. The barns were taxed to their full capacity. A great deal better showing was made than last year, both as to numbers and quality. The stallion classes brought out a number of well-fitted entries from the McLaughlin stables, the other breeders not having so high a finish on their horses as this firm. However, that did not prevent the outsiders from breaking into the money, as usefulness carries more weight in judging than does finish. In the mare classes very breedy females were the order all through, no highly pampered stuff being present in these classes. McLaughlin Bros. had some newly imported winners from France that made the competition very interesting in the aged, the three-year-old, and two-year-old stallion classes. Lakewood farm deserves special mention for the high class of their females and young stock by Calypso. The old champion has proved a most excellent getter and is one more of the show winners that have helped disprove the statement that "show stock are not good breeders." The large number of entries made good classes, and the task of picking the winners was no easy one. Professor Kennedy, however, made the awards to the satisfaction of all concerned. The following firms had entries: McLaughlin Bros., Columbus, Ohio; H. G. McMillan, Rock Rapids, Iowa; S. B. Frey, Ames, Iowa; Lew W. Cochran, Crawfordville, Ind.; C. A. Saunders, Manila, Iowa; Frank Iams, St. Paul, Neb.; W. W. Garner, Des Moines, Iowa; Maasdam & Wheeler, Fairfield, Iowa; J. A. Mason, Carlisle, Iowa; J. P. Wilson, Indianola, Iowa; F. O. Nutting & Son, Indianola, Iowa; J. P. Huff, Stockport, Iowa; W. L. De Clow, Cedar Rapids, Iowa; Finch Bros., Verona and Joliet, Ill.; and John Ogle, Ames, Iowa.

AWARDS.

Aged Stallions—First, McLaughlin Bros.; second, H. G. McMillan & Co.; third, S. B. Frey.

Etraderant 40553, an imported horse never shown before in America, won over the winner at last year's International. He has a good record behind him of winnings in France, and is a great horse. He won over Olbert 42815, the large dappled gray, on his style and quality and a little more symmetrical build. Olbert has lots of substance, the right kind of timber under him, and goes with clean stride. Montelle 25223 is a home bred horse, of good substance and style, but not so smoothly made as the first and second winners. Montelle moves fairly straight away, and is supported on good, clean limbs, with sound feet.

Three-Year-Old Stallion—First, McLaughlin Bros.; second, F. D. Nutting & Son; third, Frank Iams.

Dimitri 41289, a dark iron gray with lots of flash and vigor in his going, took first over an iron gray, Coco 35856, of most solid build. The first winner had a little too much

quality all through, and especially his limbs, the limbs of a drafter. His action at the walk was straight away and he picked up cleanly, while at the trot he showed all the flash and show one could desire in a Percheron. Coco is a solidly-built fellow, strongly made all through, the kind with a good body, and good at both ends. He is a little trimmer than Harrison (56902), Iams' horse, a horse of good type, being the low-down, blocky sort, a "character" which stood him in good stead here, as it was the one thing more than all else that gave him the place over the two or three other good ones that followed next in line. This class had several good ones in it, and to pick the winner out of the twenty-one entries required much time and deliberation on Judge Kennedy's part.

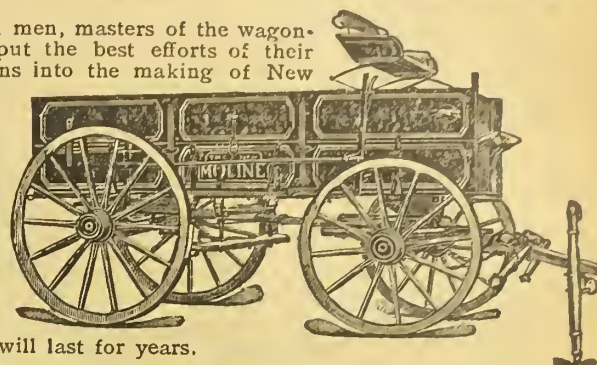

Two-Year-Old Stallion—First, C. O. Saunders; second, McLaughlin Bros.; third, McMillan.

Lerido 2d, a home-bred horse, won over Yousouf 41303 in a close competition, there being again twenty-one entries shown. Be-

THE NEW MOLINE THE IRONCLAD WAGON!!

Five hundred men, masters of the wagon-maker's craft, put the best efforts of their hands and brains into the making of New Moline Wagons.

With its gearing of select Hickory and tough White Oak and its box with Yellow Pine Bottom, grooved and matched, the New Moline Wagon has a foundation that will last for years.

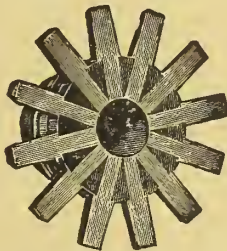

It's so strongly reinforced with extra heavy iron throughout, that farmers call it the "Ironclad" Wagon.

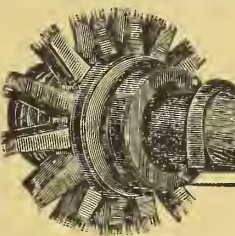

Pole, doubletrees, singletrees, gearing and box are so thoroughly protected and strongly braced with heavy ironing that its solidity and durability defy the test of time.

Its dust-proof skeins keep out every particle of dust and dirt.

Lightest Running Wagon in the World

Section Hub and Spokes. Practically One Solid Piece.

Note Dust-Proof Skein.

The New Moline is built right, from the ground up. It's a light-running Wagon, and the longer you use it the better you'll like it, for it's got more up-to-date features, and gives more years of satisfactory service than any ordinary wagon. We've been perfecting this wagon since 1854.

We fully guarantee every New Moline Wagon that leaves our works.

The demand for New Molines is enormous—taxing the full capacity of our immense factories.

GET THIS BOOK! We want every farmer to have a copy of our wonderful Wagon Book. It don't make any difference whether you are thinking of buying, or not—send for it anyway! It tells just how the genuine "Ironclad" Wagons are made. Shows all the parts SEPARATELY; and you can SEE how they are IRONED and BRACED and DOUBLY REINFORCED, making THE NEW MOLINE the most durable as well as the lightest-running wagon on earth. The book tells you more about a wagon than any other Wagon Book in existence. It is FREE, postage prepaid by us.

WINTER Wheat, 60 bushels per acre. Catalog and samples free. John A. Sulzer Seed Co., La Crosse, Wis.

tween the first two the decision rested on small points. Yousouf is a very stylish fellow when viewed from front, and somewhat the same from the side, but scarcely stands examination from the ends so well. Lerido 2d had him bested there, and with a good symmetrical type, made up for the lack in style when moved. Renvier 45552, a Calypso colt, is solid and snugly turned, with good type, but is a little dull and lazy when on the go. However, his excellent muscling on fore arm and gaskin, his good, trim legs and extra feet, and general type, were enough to win over those that stood below him.

Yearling Stallion—First, Lew Cochran; second, McLaughlin Bros.; third, McMillan.

Amerigo 41266 stood first in a class of eight over Vapoureux 41343, a good-looking black, more massive than Amerigo, but lacking in that all important horse requirement—good, strong backs. Amerigo is smaller by perhaps 150 or 200 pounds, but is strongly made all over, and shows it while mov-

AGENTS WANTED

MONEY CAN BE MADE selling our F. C. Quick Relief (Invaluable specific for Cholera, Diarrhoea, Dysentery, Colic and Pain in the Stomach) to family trade. Address, The Francis Cropper Co., 166 Michigan street, Chicago.

HOW To Make Your Own Way Through College. Sent postpaid for fifty cents. J. H. Anderson, 25th and Grand, Des Moines, Iowa.

\$80 per month, expenses advanced. Men to travel, advertise, post signs and leave samples. Saunders Co., Dept. 7, Jackson Blv'd, Chicago.

ing. Vapoureux is wide at the hocks, and has too much of a tendency to weakness, so much so that the third yearling, Diaz 45550, another Calypso colt, might have beaten him, even though not nearly up to his massive-ness.

Horse Foal—First, S. B. Frey; second, J. P. Huff; third, Maasdam & Wheeler.

Stallion Over Three, Bred by Exhibitor—First, S. B. Frey; second, McMillan; third, Maasdam & Wheeler.

Montelle, third winner in the general class, was an easy first here over Parsifal, McMillan & Co.'s entry. Agricola 41318 had third easily.

Stallion Under Three, Bred by Exhibitor—First, C. A. Saunders; second, Lew Cochran; third, McMillan & Co.

Lerido 2d had it all his own in this class, being followed by McDuff 41257, a young yearling of good quality and build. Renvier 45552, winner of third in same open class as Lerida 2d, was third.

Aged Mare—First, L. W. Cochran, on Lady Montrose 40048; second, F. O. Nutting & Son, on Kate Dewey; third, Maasdam & Wheeler, on Fanchette 44029.

Three-Year-Old Mare—First, McMillan & Co., on Iolanthe 40825; second, L. W. Coch-

on Lucia 45551; third, Albert Harlan, on Victoria.

Stronger pasterns and more heavily-muscled legs, supporting a blockier frame, won over Lucia, who is a little on the over-fine type, and not so rugged as Merchants' Princess.

Mare Foal—First, S. B. Frey, on Charlotte; second, L. W. Cochran, on Mishap 41258; third, F. F. Failor, on May Queen.

Mare Over Three, Bred by Exhibitor—First, H. G. McMillan, on Iolanthe; second, L. W. Cochran, on Lady of Quality; third, L. W. Cochran, on Lady Montrose.

Mare Under Three, Bred by Exhibitor—First, H. G. McMillan, on Adrienne; second, L. W. Cochran, on Arabella; third, H. G. McMillan, on Rosamond.

Get of Stallion—First, H. G. McMillan, on get of Calypso; second, L. W. Cochran, on get of Salvano; third, S. B. Frey, on Montelle's get.

McMillan had a wonderfully promising lot of youngsters by old Calypso in this ring, and they won easily by virtue of their uniformity and general breedy appearance.

Produce of Mare—First, S. B. Frey, Ames, Iowa, second, L. W. Cochran, on produce

Champion Jersey Cow. Owned by J. B. Smith, Beatrice, Nebraska.

ran, on Her Majesty 41265; third, McMillan & Co., on Antoinette 40925.

Iolanthe won by virtue of her stronger hocks, with more slope of shoulder and pastern, the second entry being inclined to a little straightness of pastern and not so strongly coupled. The third winner was inclined to go a little off on her ankles. First, and third were by Calypso.

Two-Year-Old Filly—First, McMillan & Co., on Adrienne 45555; second, L. W. Cochran, on Arbella 41260; third, McMillan & Co., on Rosamond 45547.

First money went to a Calypso colt of good type and action, a little more smoothly and strongly built than Arbella. Rosamond is a good filly, but a little green and unused to the show ring.

Yearling Filly—First, W. W. Garner, on Merchants' Princess; second, H. G. McMillan, of Black Beauty; third, H. G. McMillan, on produce of Norma.

Mr. Frey's entries, the dam of which was unnamed, were a beautiful pair, of good type and excellent quality, which had little trouble in winning over the second two. The Norma colts are an uneven pair, but good ones.

Grand Display, Four Animals Bred by Exhibitor—First, H. G. McMillan; second, L. W. Cochran; third, S. B. Frey.

Special Championships Offered by Percheron Society of America:

Champion Stallion, Any Age—Oibert, owned by McMillan & Co.

Champion Stallion, Any Age, American Bred—Montelle, owned by S. B. Frey.

Champion Mare, Any Age, American Bred—Won by McMillan & Co.

FREE Monarch Cook Book

THE Monarch Cook Book was prepared for us by Helen Mar Thomson, widely recognized as one of the highest authorities on Domestic Science.

It contains 588 recipes, many of which were prepared exclusively for this Book. All of them are simple, easily made and inexpensive. It also contains practical menus for the whole year, and valuable hints on marketing.

We want everyone who intends to buy a range within a year to have this book. 20 pages of it are devoted to showing and telling how Monarch Malleable Ranges are made, and why they are better and save you money.

144 Pages.
Board Cover.
Cloth Bound.
Size 5x6½ ins.
Handsomely
Printed on High-
Grade Paper. 588
Recipes—all Simple
and Practical.

The Monarch is made of Wellsville polished steel and Malleable Iron.

Malleable Iron is tough—strong—hammerable and immensely durable.

All the frames in the Monarch are made of Malleable Iron.

And the steel of the body is riveted to all these Malleable Iron frames tightly and solidly to stay so.

Consequently no seams open—no outside cold air leaks in, and there is no fuel waste in the Monarch.

How To Get This Book

If you intend to purchase a Range within a year, write us, stating as nearly as possible when (naming the month if you can) you intend to buy, and the book will be furnished to you without any cost whatever.

Do not expect the book unless you comply with these conditions.

The Malleable Iron Range Company

FARM BUILDINGS OF
DOANE COGSWELL,
HAVERHILL, MASS.
COVERED WITH REX FLINTKOTE
ROOFING

Profit by
the Verdict

Thousands of farmers are using Rex Flintkote Roofing. They all attest its worth for all farm buildings. One is especially pleased because it won't "buckle up" and let in the rain. Another writes enthusiastically about its fire-retardant powers. A Nebraska man says it stays, despite all wind. A poultryman declares its non-porous qualities protect his chickens from all dampness. One tells us how easily his farm-hands laid it, while yet another says we can't sell him any more—because his Flintkote Roofing seems to have everlasting wearing powers.

Rex Flintkote Roofing

has eliminated old roofing troubles for others, and can do as much for you. It's made of chemically treated, long-fibre wool with an under-coat of flint. It will make good where other roofs fail. Here's one proof:

"My Rex Flintkote Roofing looks just exactly like it did when the job of putting it on was completed; although the four extra squares of another brand that were used to complete the roof are already somewhat 'buckled up.' I believe that among the many good qualities of your roofing is its firmness. Will embrace any opportunity to heartily recommend it to anyone wanting a good roof."

Yours truly, (Signed) Chas. E. Gleckler,
Dairy, Fruit and Poultry Farm, Albuquerque, N. M."

Artistic effects can be obtained with our new red paint adapted to Flintkote Roofing.

Let us send you free sample for red-hot coal test, and also free booklet on roofing points. Our valuable booklet, "How to Make Poultry Pay," is yours for 4 cents in stamps.

ENGLISH SHIRES.

Some fifty head of English Shires were on exhibition in the big barns. Among this number were some good, drafty horses of quality and of the right breeding sort. Classes were not very full and the judging was a comparatively easy task. R. B. Ogilvie was unable to go through the whole breed and Mr. Galbraith finished for him. As a rule the horses shown were of the leggy kind, and lacked substance, although some few were shown of good, massive type. Exhibitors: Finch Bros., Verona and Joliet, Ill.; Trumans' Pioneer Stud Farm, Bushnell, Ill.; Lew W. Cochran, Crawfordsville, Ind.; M. O. Traylor, Marne, Iowa; A. G. Soderberg, Osco, Ill.

AWARDS.

Aged Stallion—First, Trumans' Pioneer Stud Farm, on Highland Laddie (22976); second, Trumans' Pioneer Stud Farm, on Ethelred III. (21407); third, Trumans' Pioneer Stud Farm, on Duke Albert (20439). All three prizes were Trumans', the wearer of the blue being a black of good bottom, and better on hoof than any in his class of eight stallions. His action was not quite so smooth as Duke Albert's, but the Duke was a little leggy, and not enough draftiness of type. Ethelred is a light brown, of fair build, but a little slack on moving, not showing vigor and lacking a little in style.

Three-Year-Old Stallion—First, Trumans' Pioneer Stud Farm, on Norman Emperor (23554); second, M. O. Traylor, on Northolme Gipsy Queen (22639); third, Finch Bros., on Barnfield All Fours 7609.

Two-Year-Old Stallion—First, Trumans' Pioneer Stud Farm, on Galety Banker 7714; second, Lew W. Cochran, on John D. 8421; third, Finch Bros., on Verona Bounder 7897. Galety Banker won with comparative ease in this class, the close placing being between second and third. John D. is a stallion with a good middle and lots of massiveness for a two-year-old, is stronger coupled and a better goer than Verona Bounder.

Yearling Stallion—First, A. G. Soderberg, on Noble King; second, Finch Bros., on Finch's Bounder; third, Finch Bros., on Finch's Buster Brown. Noble King is a smoothly-turned youngster of much promise.

Stallion Foal—First, Finch Bros., on Algonic Champion; second, L. W. Cochran, on Zero.

Stallion Over Three Years, Bred by Exhibitor—First, Finch Bros., on Cyclone.

Stallion Under Three Years, Bred by Ex-

hibitor—First, Finch Bros., on Galety Banker; second, A. G. Soderberg, on Noble King; third, Finch Bros., on Finch's Buster Brown. Galety Banker is a two-year-old of much merit, and gives promise of growing into a great stallion.

Aged Mare—First, Trumans' Pioneer Stud Farm, on Trumans' Ponders Bridge Daisy (45964); second, A. G. Soderberg, on Osco Rose; third, Trumans' Pioneer Stud Farm, on Trumans' Oakham Lydia (48938). Only four mares entered the ring, but they made a good, drafty lot and made a much better showing than the stallions with a larger class. A lighter-built mare, yet possessing more quality and cleaner limbs than the other three, Trumans' Daisy, won first. Her action was evenly balanced and straight-away. Osco Rose is only a fair mover, but has good feet with a massive form. Trumans' Lydia is a little on the light order and not a very steady goer, but has excellent quality.

Three-Year-Old Filly—First, Trumans' Pioneer Stud Farm, on Trumans' Oakham Madge (48939); second, Finch Bros., on Bay Girl 8304.

Yearling Filly—First, Lew W. Cochran, on Minnehaha; second, Finch Bros., on Verona Belle II.

Mare Over Three, Bred by Exhibitor—First, A. G. Soderberg, on Osco Rose.

Mare Under Three, Bred by Exhibitor—First, L. W. Cochran, on Favorite 8419; second, A. G. Soderberg, on Osco Sylvia 8206; third, L. W. Cochran, on Minnehaha 8422.

Get of Stallion, Four Animals—First, L. W. Cochran, on get of Buckskin 5110; second, Finch Bros., on get of Dunsmore Justice.

Produce of Mare—First, L. W. Cochran, on produce of Lanahan Beauty; second, A. G. Soderberg, on produce of Duchess; third, Finch Bros., on produce of Mahomet Belle.

Grand Display, Four Animals Bred by Exhibitor—First, L. W. Cochran; second, Finch Bros.

COACHERS.

The French and German coaches were classed together, there being then only two divisions, one for stallions over four and one for three-year-olds. Some good actors were brought out, but the classes throughout were not so well filled as in former years. There were some good ones, just the same. Exhibitors were: McLaughlin Bros., Columbus, Ohio; Frank Iams, St. Paul, Neb.; Peter Frohling, Webster City, Iowa, and Alexander Calder, Fremont, Neb.

AWARDS.

Stallion Over Four Years—First McLaughlin Bros., on Crossville 4055; second, McLaughlin Bros., on Cassie Tete 4101; third, Frank Iams, on Lublin's Chief (336).

Three-Year-Old Stallion—First, McLaughlin Bros., on Dactyle 4125; second, McLaugh-

lin Bros., on Diamant 4121; third, Frank Iams, on Lubbin's Favorite (338).

ENGLISH COACH BREEDS, CLEVELAND BAY AND HACKNEY.

Trumans' Pioneer Stud Farm, Bushnell, Ill., were the only exhibitors and were awarded the blue ribbon in each of four classes. They had a string of good ones, and their stalls were the center of attraction during the week.

DRAFT GELDINGS OR MARES.

Iowa has never been able to support very many entries in the draft gelding and mare class, and this year proved no exception to the rule. Armour & Co., of Chicago, entered individuals from their six-horse team and naturally won some premiums. Other exhibitors in these classes were H. G. McMillan, of Rock Rapids, Iowa; Lew Cochran, of Crawfordville, Ind.; the Truman Pioneer Stud Farm, of Bushnell, Ill., and J. F. McKee, of Indianapolis, Iowa. In the single mare or gelding class over 1,750 pounds Armour won first, Cochran second, McKee third; pair of mares or geldings under 3,500 pounds, Truman won first, Cochran second and McKee third; pair of mares or geldings over 3,500 pounds, Armour won first, Cochran second. Cochran won the four-horse team premium, there being no other entry.

SHETLAND PONIES.

Shetlands are always popular, and were this year more than ever. The large tent, just west of the judging pavilion, sheltered seventy tiny ones, which proved their popularity by the way with which the tent was crowded at all times of the day by women and children. In the judging ring the little fellows made a most attractive showing when ponies in harness were passed on, and many good specimens of this diminutive breed appeared in this class. Many sales were made in the tent and prices realized more than recompensed the owners. J. I. Gibson, of Des Moines, was judge. The following herds were represented: W. W. Garner, Des Moines, Iowa; John Donhowe, Story City, Iowa; Cassidy & Thompson, Jamaica, Iowa; C. H. Stone, Muscatine, Iowa; W. T. Roberts, Luther, Iowa; H. L. Anderson, Des Moines, Iowa; J. B. Brown, Guthrie Center, Iowa.

AWARDS.

Stallion Three Years or Over—First, W. W. Garner, on Peter the Great; second, John Donhowe, on Black Bantam; third, John Donhowe, on Anton.

Stallion Foal—First, John Donhowe, on Fox; second, W. T. Roberts, on Tommy Britton; third, Cassidy & Thompson, on Pedro.

Mare Three Years or Over—First, W. W. Garner, on Maudie; second, John Donhowe, on Nellie Grey; third, Cassidy & Thompson, on Mattie.

Mare Foal—First, Cassidy & Thompson, on Gladys; second, W. T. Roberts, on Sprite; third, Cassidy & Thompson, on Lucille.

Shetland Stallion and Four of His Get—First, Cassidy & Thompson; second, John Donhowe.

Shetland Pony in Harness—First, W. W. Garner, on Peter the Great; third, Cassidy & Thompson, on Mattie 4754.

Pair Shetlands in Harness—First, W. W. Garner, on Peter the Great and Trixy; second, John Donhowe, on Black Bantam and Dot; third, W. T. Roberts, on Topsy and Pearl.

Tandem Team Shetlands—First, W. W. Garner, on Peter the Great and Trixy; second, John Donhowe, on Black Bantam and Dot; third, W. T. Roberts, on Topsy and Pearl.

Shetland Pony Under Saddle—First, H. L. Anderson, on Folly; second, John Donhowe, on Beauty; third, W. W. Garner, on Peter the Great.

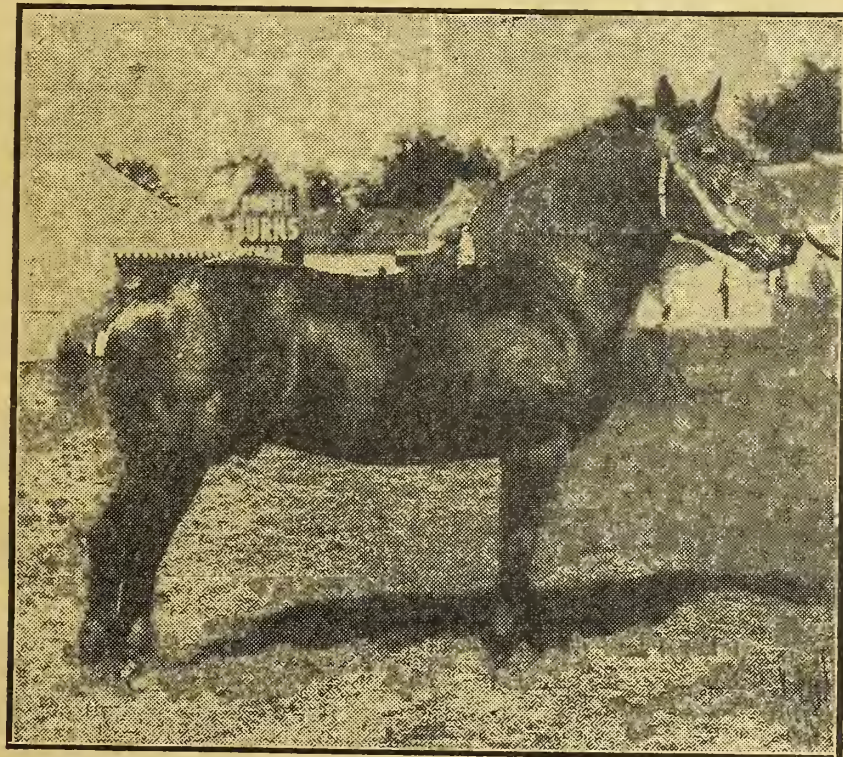

SWINE.

The bringing together of practically 3,000 pure-bred hogs is an event in itself of unusual interest, and as that number were on exhibition at the Iowa State Fair grounds last week it is not a matter of surprise that the hog department held its own with all others in maintaining throughout the week the interest of fair visitors. Superintendent Johnson, of that department, had an exceedingly difficult task on his hands, because there were hundreds of pens applied for that could not possibly be supplied. Almost every hole and corner where a pen could be erected were utilized, and necessarily some exhibitors were disappointed in the quarters furnished them. This is the fault of neither Mr. Johnson nor the board of directors of the fair, because the state of Iowa has refused up to date to appropriate funds for the erection of suitable quarters for the swine exhibit. The fact that the weather was perfect throughout the week contributed much to the comfort of exhibitors. A similar fair in had weather would be unendurable, and we sincerely hope that the next legislature will be liberal-handed enough to supply the needed improvements for this department. The swine industry of the state is so large that anything but the best equipment at the state fair for this class is false economy. The opportunity which is afforded visitors for seeing the prize animals in the ring at present is inhuman, and when the weather is hot it is dangerous to show the heavy fat hogs in the sun. We doubt if a single argument can be advanced for neglecting this department any longer.

DUROC JERSEYS.

The Duroc hog show at the Iowa State

Fair this year, as was expected, was a very large one. Possibly there were not quite as many numbers entered as last year, but it was generally conceded by all who looked them over that the offering was better in every respect. Messrs. L. H. Roberts, of Paton, Iowa, and W. Z. Swallow, of Booneville, Iowa, both experienced swine breeders, were the judges. They did their work in a conscientious manner and pleased practically all exhibitors, so far as possible. Something over 1,000 Durocs were on the grounds. The number of exhibitors from Iowa and surrounding states amounted to some eighty-five. An exceptionally strong class was the two-year-old or over boar offering, there being twenty shown. Messrs. Johnston Bros. & Newkirk and C. W. & Wm. Reed, of Rose Hill, Iowa, owners of the boar, Advancer, won first in this class, while Manley & Co., of Lyons, Neb., took second on Junior Jim by Chitwood. It was no easy matter to judge this class, as was noted by the time taken by the judges in placing the ribbons, practically two hours being devoted to this class alone. In the under six months boar class there were not as many shown this year as last, there being 110 head last year, while this year only sixty-one head were entered. Breeders, however, were satisfied that this was enough to afford strong competition. First prize was also won by Johnston Bros. & Newkirk and C. W. & Wm. Reed on pig by Model Chief out of dam known as Bessie D. The champion sweepstakes boar of any age was awarded to H. S. Allen, of Russell, Iowa, on Crimson Wonder Again. This again shows that good blood tells, as the sire of Crimson Wonder Again, Crimson Wonder I Am, won sweepstakes at the Iowa fair in 1905. The champion boar bred by exhibitor was awarded to Johnston Bros. & Newkirk and C. W. & Wm. Reed on Advancer. Edmonds, Shade & Co., of Kingsley, Iowa, took the sweepstakes champion on sow, also champion on sow bred by exhibitor, Royal Blossom 5th by American Royal. There were four entries in this class. F. E. Garrett, of Lohrville, Iowa, has a decidedly good individual in Ruberta by a half brother of Crimson Wonder. Many Duroc breeders had practically decided that she would be the winning champion sow any age, and it was indeed hard to decide just who would secure this honor. Messrs. Roberts and Swallow in judging did not act hastily, but gave every class

First Prize Aged Percheron Stallion, Etragedant, Owned by McLaughlin Bros., Columbus, Ohio.

its own good time, and general satisfaction was accorded.

The following herds were represented: Hanson Bros., Dean, Iowa (8 head); F. M. Smith, Panama, Iowa (10 head); E. J. Compton, Newell, Iowa (13 head); O. L. Mossman, Polk City, Iowa (13 head); W. A. Rankin, Carson, Iowa (7 head); Geo. Kopf, Farrar, Iowa (9 head); Otis & Clayton, Orient, Iowa (1 head); B. C. Marts, Polk City, Iowa (12 head); G. W. Champion Sow, Any Age, (4 in class)—Edmonds, Shade & Co., on Royal Blossom 5th by American Royal.

Champion Sow, Bred by Exhibitor—Edmonds, Shade & Co., on Royal Blossom 5th.

CHESTER WHITES.

There were twenty-two exhibitors of Chester Whites at the Iowa State Fair, these showing 462 animals. Taking it all in all, there were many visitors on the grounds who claimed that the Chester showing excelled all former records in the matter of quality. Messrs. Humbert & White, of Nashua, Iowa, made a showing that would stand high in any company, and the number of blue ribbons, as indicated by an examination of the prize list, which this firm won is a fair index as to the merit of their herd. Mr. L. C. Reese, of Prescott, Iowa, came in for a share of ribbons, and succeeded in capturing the champion prize for the best Chester boar on the grounds, though the firm of Humbert & White landed the champion premium on the best sow. Mr. W. Z. Swallow placed the ribbons and did it in his usual painstaking and conscientious manner. Following are the awards:

The following breeders were present with their herds: C. C. Beeler & Son, Liberty, Ind. (22 head); P. B. Lake, Moscow, Iowa (36 head); E. L. Nagle & Son, Deep River, Iowa (25 head); G. P. Clark, Pella, Iowa (6 head); E. J. Brouhard, Colo, Iowa (29 head); Geo. W. Lawshe, Harlan, Iowa (23 head); Clark Richardson, Pella, Iowa (1 head); J. L. Barber, Harlan, Iowa (24 head); B. M. Boyer, Farmington, Iowa (26 head); L. C. Reese, Prescott, Iowa (21 head); W. N. Whitted, Monroe, Iowa (15 head); E. L. Leavens, Shell Rock, Iowa (40 head); B. M. Eastburn & Son, Hillsboro, Iowa (30 head);

That part of the world sheltered by Amalite is under a roof that will endure.

Its mineral surface gives it a durability and weather resistance that no other roofing can equal. The layers of pitch make it absolutely waterproof. The layers of wool felt make strong sheets of it so that it can be handled without tearing and won't be ripped off the roof by a wind. And the combination of these is the most durable and waterproof roofing on the market.

Now, of course, we can't make you believe all this by just saying so. We've got to have your request for a free sample. When you get the sample, you can see for yourself what Amalite is made of.

You can find out all about the stuff that is in it.

Another important thing is the fact that Amalite, having a mineral surface, never requires coating or painting. The mineral surface is more durable than any liquid coating could possibly be. The work is all done when the roof is once laid. No attention is required afterward.

SEND FOR A FREE SAMPLE to the nearest office of BARRETT MANUFACTURING COMPANY, AMALITE DEPARTMENT, New York, Chicago, Cleveland, Allegheny, Kansas City, St. Louis, Minneapolis, Philadelphia, New Orleans, Cincinnati, and Boston.

Humbert & White, Nashua, Iowa (29 head); J. H. Mahanna, North English, Iowa (25 head); E. W. Harman, Rhodes, Iowa (14 head); Will Michael, Selma, Iowa (31 head); M. A. Ranck, Illinois (11 head); W. F. Hemmerling, Dike, Iowa (2 head); A. J. Johnson, Brighton, Iowa (19 head); J. W. Hollowell, Fairfield, Iowa (18 head); Allen Bros., Russell, Iowa (15 head).

AWARDS.

W. Z. Swallow, judge.

Boar Two Years or Over (12 in class)—First, L. C. Reese, on Prescott Boy; second, C. C. Beeler & Son, on General DeWitt; third, C. C. Beeler & Son, on Lawson; fourth, E. L. Leavens, on Joe; fifth, Geo. H. Lawshe, on Monarch Junior; highly commendable, Humbert & White, on Joker; commendable, Will Michael, on Captain Sheaf.

Boar Eighteen Months and Under Two Years (3 in class)—First, Humbert & White, on Humbert's Choice; second, W. F. Hemmerling, on W. F.'s Model; third, P. B. Lake, on Royal Junior.

Boar One Year and Under Eighteen Months (14 in class)—First, Humbert & White, on Harry; second, J. W. Hollowell, on Steadfast; third, E. J. Brouhard; fourth, C. C. Beeler & Son, on Lawson II.; fifth, L. C. Reese; highly commendable, Nagel & Son, on Advancer; commendable, Will Michael, on Captain Sheaf.

Boar Six Months and Under One Year (12 in class)—First, Humbert & White, on Modler; second, L. C. Reese, on Young Press; third, Nagel & Son, on Neponset Henry; fourth, G. L. Lawshe, on George II.; fifth, P. B. Lake; highly commendable, Humbert & White; commendable, Nagel & Son, on King William.

Boar Under Six Months (27 in class)—First, J. H. Mahanna, on Highscore; second, Humbert & White; third, E. L. Leavens; fourth, A. J. Johnson; fifth, Humbert & White; highly commendable, P. B. Lake; commendable, E. J. Brouhard.

Sow Two Years or Over (11 in class)—First, Humbert & White, on Sweet Marie; second, J. L. Barber, on Miss Hanna; third, E. J. Brouhard, on Iowa Belle; fourth, Humbert & White, on Judge's Choice; fifth, L. C. Reese, on Mary; highly commendable, C. C. Beeler & Son, on Indian Majd 9th; commendable, George H. Lawshe, on Cassie.

Sow Eighteen Months and Under Two Years (6 in class)—First, Humbert & White; second, C. C. Beeler & Son, on Indiana Beauty; third, E. J. Brouhard; fourth, C. C. Beeler & Son, on Queen's Model; fifth, L. C. Reese, on Fancy Win; highly commendable, C. C. Beeler & Son, on Fashion's Perfection.

Sow One Year and Under Eighteen Months (16 in class)—First, L. C. Reese, on Marie No. 1; second, Humbert & White, on Ohio Gem; third, Humbert & White; fourth, E. J. Brouhard, on Hazel; fifth, W. F. Hemmerling, on Sweet Dreams; highly commendable, J. H. Mahanna, on Gem O. K.; commendable, J. L. Barber, on Morning Star.

Sow Six Months and Under One Year (23 in class)—First, Humbert & White, on Cora B.; second, John Barber, on Proud Lady; third, P. B. Lake; fourth, L. C. Reese; fifth, E. J. Brouhard; highly commendable, C. C. Beeler & Son, on Pet Girl 2d; commendable, George H. Lawshe, on Dumping.

Sow Under Six Months—First, J. H. Mahanna, on Gem O. K. 5th; second, Humbert & White, on May 5th; third, Humbert & White, on May 6th; fourth, M. A. Ranck, on Rosy Model 3d; fifth, W. W. Whitted; highly commendable, E. J. Brouhard; commendable, E. J. Brouhard.

Boar and Three Sows Under One Year (8 in class)—First, L. C. Reese, on Prescott Boy; second, Humbert & White; third, C. C. SPECIAL PREMIUMS BY AMERICAN CHESTER WHITE RECORD ASSOCIATION.

Boar Under Six Months—J. H. Mahanna, on High Score.

Sow Under Six Months—J. H. Mahanna, on Gem O. K. 5th.

Five Pigs Under Six Months—Humbert & White.

Pair of Pigs Under One Year—Humbert & White.

Boar and Three Sows Any Age—L. C. Reese.

BERKSHIRES.

Although there were but 170 Berkshires on exhibition, these being shown by eight exhibitors, yet this breed attracted much attention. The prize-winning animals were notable for length of body and for feeding qualities. The exhibit demonstrated that it is possible to get the long side, the heavy ham and at the same time keep the back strong and the face reasonably short. Although less in numbers than the Poles, Durocs and Chesters, the show of Berkshires lost nothing by comparison with any breed, as they were a select lot throughout. The awards follow:

The following herds were represented: Etzler & Moses, Decatur, Ind. (22 head); Houghton & Braman, Marshalltown, Iowa (25 head); Harris & McMahon, Lamine, Mo. (18 head); J. M. McPherson & Son, Stuart, Iowa (8 head); C. D. Johnson, Nashua, Iowa (17 head); W. D. Becker, Ft. Atkinson, Wis. (24 head); W. O. Knapp, Guthrie Center, Iowa (22 head); Miller & Dietrich, Menlo, Iowa (31 head); total 167 head.

AWARDS.

Boar Two Years and Over (3 in class)—First, W. D. Becker, on Colonel Lee; second, Houghton & Braman, on Royal High Clear; third, Houghton & Braman, on Repeater.

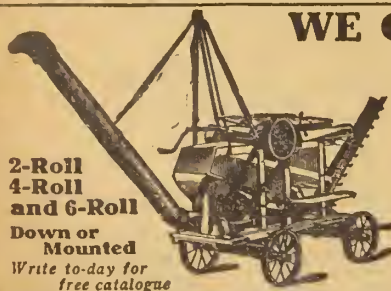

Boar Eighteen Months and Under Two Years (2 in class)—First, Harris & McMahon, on Sunnyside Duke XV.; second, W. D. Becker, on King Durbur.

Boar One Year and Under Eighteen Months (6 in class)—First, Harris & McMahon, on Lord Robin; second, C. D. Johnson, on Yung Starlight; third, J. M. McPherson, on General Logan; highly commendable, Miller & Dietrich, on Menlo's Lord Lee; commendable, Houghton & Braman, on Champion Duke.

Boar Six Months and Under One Year (9 in class)—First, Harris & McMahon, on Handsome Duke III.; second, C. D. Johnson; third, Etzler & Moses, on Starlight Premier; highly commendable, Harris & McMahon, on Handsome Duke IV.; commendable, C. D. Johnson.

Boar Under Six Months (12 in class)—First, Etzler & Moses; second, Miller & Dietrich; third, Etzler & Moses; highly commendable, Etzler & Moses; commendable, Miller & Dietrich.

Sow Two Years and Over (5 in class)—First, Etzler & Moses, on Starlight Queen; second, C. D. Johnson, on Lady Vic XV.; third, Houghton & Braman, on Daisy Hillsdale; highly commendable, W. D. Becker, on

Champion Boar Any Age—Harris & McMahan, on Lord Robin.

Champion Boar Any Age, Bred by Exhibitor—Harris & McMahan, on Lord Robin.

Champion Sow Any Age—Harris & McMahan, on Handsome Duchess X.

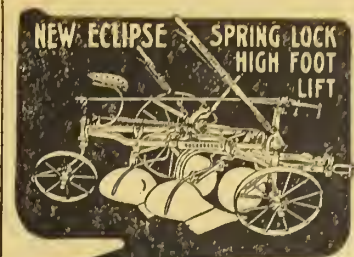

Champion Sow Any Age, Bred by Exhibitor—Harris & McMahan, on Handsome Duchess X.

POLAND CHINAS.

The Poland Chinas headed the list this year in the number of animals on the grounds, there being a total of 1,150 in the pens. This was a little over 100 pigs more than were on the grounds last year. To say that the exhibit was a grand one throughout is putting the matter mildly. Even the pigs that were there for sale, but not entered for exhibition, were in most instances above the average, and judging by the number of sales made during the week we apprehend that a large number of corn-belt farmers started off with something good, while scores were made happy over the purchase of herd leaders. Poland China breeders have every reason to feel gratified over the continued popularity of this breed, and especially concerning the excellent showing made. Apparently, the question of bone is being emphasized more than formerly because practically all the winning hogs carried their great weight without showing the least sign of breaking down. In the matter of type, the medium-sized animals of superior quality won out this year against those of more scale, but with less quality. Judges Klever and Spicer adhered throughout to the matter of type and gave general satisfaction. Of course there were instances where exhibitors took lower places than they anticipated, but this will always occur. Ring-siders as well as exhibitors were impressed by the fact that all decisions were not only honestly, but intelligently, placed. Breeders outside the state won many of the blue ribbons, a fact that should stimulate Iowa swine men to purchase the best blood that is obtainable to improve their herds. Following is a list of the awards:

The following Poland China herds were represented: Harvey Johnson, Logan, Iowa (22 head); Wm. Kirk, Logan, Iowa, (8 head); F. P. Bishop, Whitewater, Wis., (17 head); G. F. Marshall, Monroe, Iowa (17 head); Wm. Pedrick & Son, Ottumwa, Iowa (18 head); J. S. Fawcett & Son, Springdale, Iowa (16 head); B. F. Ishmael, Laredo, Mo. (6 head); James Jensen, Newell, Iowa (10 head); D. F. Shannon & Book Bros., Storm Lake, Iowa (9 head); A. J. Podendorf, Logan, Iowa (12 head); J. I. Davis, Mt. Hamill,

Iowa (17 head); L. Maasdam & Sons, Fairfield, Iowa (2 head); S. P. Chiles, Fairfield, Iowa (16 head); B. L. Gosick, Fairfield, Iowa (10 head); M. A. Dolling, Nowton, Iowa (14 head); Hall & Sons, Iowa City, Iowa (13 head); E. O. Buck & Son, Oxford, Iowa (1 head); Haunsen, Black & Gaffey, Holbrook, Iowa (17 head); H. B. Jones, Wapello, Iowa (3 head); W. Z. Swallow, Booneville, Iowa (41 head); F. M. Orr & Sons, Albia, Iowa (24 head); Mr. Mason, Des Moines, Iowa (7 head); Frank Wohlgemuth, Elgin, Ill. (10 head); A. W. Holland, New London, Iowa (6 head); Geo. M. Reynolds, Utica, Ill. (1 head); E. A. Sebea, Sigourney, Iowa (19 head); W. C. Lookingbill, Sac City, Iowa (16 head); F. D. Sanders, Sigourney, Iowa (12 head); E. Alphonso, Sigourney, Iowa (34 head); N. F. Miller, Knoxville, Iowa (14 head); Winn & Chambers, Knoxville, Iowa (9 head); C. L. Karr, Webster City, Iowa (4 head); F. L. Brumback, Clisna Park, Ill. (2 head); J. H. Fawcett, Woodstock, Iowa (8 head); I. PLOW WITH A FULLER & JOHNSON NEW ECLIPSE GANG

and save yourself and your team most of the hard work.

It's the Easiest Running Plow Made

because all weight is carried on the wheels and there's no land side or bottom pressure. Strong, responsive spring on locking device holds the plow down in hard soil, or if preferred, spring can be set loose to have "Stone Dodger" effect in rough land. These features alone make the New Eclipse superior to any other sulky or gang plows in the market. Unequalled foot lift makes it easy to throw plow high when it's in the furrow.

Share extra heavy double shinned, made of the best soft center steel, and both share and moldboard highly tempered and extra hardened, and will scour in any soil. There is a lifetime of the best service in this leader of the

Fuller & Johnson Line of Farm Implements.

Investigate their various styles of Walking Plows, Sulky and Gang Plows, their time and labor saving Bemis Transplanter, their Harrows and Disc Harrows, Corn Planters and Cultivators, Manure Loaders and Frost Proof Gasoline Engines.

The Fuller & Johnson name plate on any of these articles is a guaranty of the Standard of Excellence.

Don't experiment—buy a Fuller & Johnson and get first quality of material, latest

FULLER & JOHNSON MFG. CO.,

improvements, perfect workmanship and a guaranty of satisfaction.

Valuable Book FREE:

"Modern Methods in Soil Cultivation."

It tells how to plow under different conditions, what style of plow to use, when and how to harrow, list, plant and cultivate. It is FREE for the asking. You'll keep it as a ready reference. Address,

STEEL FRAME PITLESS SCALE

30 DAYS FREE TRIAL

Best all steel, ball-bearing pitless scale made. Made of structural steel throughout—no gas pipe or other inferior material used. Very rigid and firm. Scale sets on ground—no expensive pit to dig. No costly repairing to be done on account of decayed timbers, etc. Cost of installation is only about \$5-\$30 to \$40 less than for old style, unreliable pit scales. Possesses numerous advantages over all other scales—is accurate, reliable, strong and durable. Will give a lifetime of constant service and still retain its accuracy. Weighs only 1200 pounds—can be easily loaded on wagon and moved from place to place as desired. Saves time, trouble and expense of unnecessary hauling to and from scales. Made in four and five ton capacity. No better scale on the market.

GUARANTEED FOR FIVE YEARS

Shipped anywhere in the United States on 30 days free trial, complete and ready to set up except flooring lumber.

Champion Sow Any Age, Bred by Exhibitor—Francis & Son, on Correct Perfection.

YORKSHIRES.

There were but two exhibitors in the Yorkshire classes, but these made an unusually good showing. Thos. H. Canfield, of Lake Park, Minn., exhibited thirty head and practically filled all classes. Many of his animals were descendants of winners at the St. Louis Exposition, and his pens attracted much attention from fair attendants. Mr. Canfield is the largest breeder of Yorkshire hogs in America, and has undoubtedly done more to bring this breed before the public than any other breeder. The other exhibitor in the Yorkshire class was Mr. B. F. Davidson, of Menlo, Iowa. Mr. Davidson exhibited eighteen good ones. They were in excellent show condition, being in a somewhat higher degree of flesh than Mr. Canfield's though for the bacon hog the Canfield stuff was in excellent shape. Prof. Thos. Shaw, formerly of the Minnesota Agricultural College, did the judging in a most satisfactory manner. His task was not an easy one, owing to the somewhat different types of hogs represented in the various rings. Judging by the number of sales made by these Yorkshire breeders it may be expected that there will be a larger turnout next year. Many who purchased foundation stock expressed their determination to exhibit in the future.

AWARDS.

The following premiums were won by Mr. Canfield: First on aged boar, first on boar under eighteen months, first on boar under six months, first on boar under one year, first and second on aged sows, first and second on sow under eighteen months, first and second on sow under one year, second and third on sow under six months, first on boar and three sows over one year, first on boar and three sows over one year bred by exhibitor, first and third on boar and three sows under one year bred by exhibitor, first and second on four pigs get of same boar, second and third on four pigs under six

SHEEP.

The interest in sheep still grows in Iowa and there never has been so many good sheep on the state fair grounds as were there this year. The price of mutton and wool has created a demand for sheep that has not been equalled heretofore. The excellent exhibit this year, as well as the large crowds of interested onlookers while the judging was going on, indicate a most healthy interest in this important class of farm animals. Much improvement has been effected since last year in the way of providing suitable quarters for the sheep and shepherds. The provision for a suitable place for making awards has been provided in a temporary way, and sheep exhibitors look forward to a time when a permanent judging ring will be provided which cannot be accomplished until more ground has been added, which probably will occur in the near future. As usual, the Shropshires show that they are the leading breed and appear in the largest numbers. The usual line of exhibitors were at the Iowa fair, except Messrs. Fritchman, Wineland and Allen, who were absent. Some of the comparatively new exhibitors are making headway and are getting a large share of the prizes. In this class may be

Let Me Prove to You, at My Expense That a CHATHAM Fanning Mill Makes Your Grain Crop Worth More Money

To prove that the Chatham Fanning Mill will get you full value for every sound kernel of grain you raise, we will allow you to use one a month FREE.

Send at once for our little book "How to Make Dollars Out of Wind." We will forward it by return mail, postpaid, and quote you a special price on a Chatham Fanning Mill.

Then—when you are through wondering how we can sell so good a machine for so little money—send us an order for a FREE test.

We will ship you a Mill, all charges prepaid, and you can use it a month on your own farm to see what it will do.

And, if you are not thoroughly convinced that it is exactly as represented, you can send it back at our expense, and the test won't cost you anything.

We have had 25 years experience making Fanning Mills and own two of the largest factories in America.

Our offer is made in good faith and any Commercial Agency or any Bank in Detroit will tell you of our responsibility.

Send at once for our liberal proposition and get a Chatham Fanning Mill to saving for you as quickly as possible.

It will grade all your grain so you can get "first price" for it.

It will take all the chaff, weed-seed and if you live west of the Mississippi, write Topeka Office; if east, write Detroit, Mich.

THE MANSON CAMPBELL CO., Ltd.
Box 314, TOPEKA, KAS. 314 Wesson Ave., DETROIT, MICH.

withered kernels out of your grain. It will take cockle out of wheat, separate oats from wheat or any one kind of grain from all others.

If you own a Chatham Fanning Mill, you can sell seed-grain to other people instead of buying it yourself.

With "A Chatham" you can clean Corn, Rye, Barley, Wheat, Oats, Timothy, Clover, Millet, Flax, Rice, Peas, Beans, Kaffir Corn, Potatoes, Broom Corn, Alfalfa, Grass

Seed, Cotton Seed, Alsike, Blue Grass, Red Top, Buckwheat, Hungarian, Orchard Grass, Rape, Rye Grass and everything of this kind.

You do not get "mixed crops" nor "sow weeds" if your seed-grain is cleaned with a Chatham Fanning Mill.

But we haven't room here to tell you more about this mill that every farmer should own.

Send for our book at once and get the whole story with our FREE trial offer.

Let us tell you the many different ways a Chatham Fanning Mill puts dollars into your pocket. We ship from one of our nearest branch warehouses. We have one in all leading trade centers in the different states.

This gives prompt delivery. Write us today.

NO-TAR ROOFING MADE WITHOUT TAR, AS I MAKE MINE, WILL RESIST FIRE. LET ME TELL YOU WHY

I INVENTED many of the good asphalt roofs that are sold.

Five years ago I invented one of my own that resists fire and is better than any of the others.

Send me your name and address on a post card, and I will tell you all about this roof and how it secures lower insurance rates. I will also send you a sample of it to test, and a copy of my FREE book on how to lay roofing with no tools but a

sharp knife and a hammer. My book also tells why my "No-Tar" Roofing is the only roofing that is weather, water, acid and almost wear proof, as well as Fire Proof.

"No-Tar" won't crack in cold weather, won't melt in warm weather, and lasts as long as the building.

You ought to send for my book at once, if you have any roofs that need attention.

Write me a post card today. Do it before the matter has a chance to slip your mind.

O. A. Hoppes, Secretary, THE HOPPES CO., 2401 Fillmore St., Chicago.

Horse Owners! Use GOMBAULT'S Caustic Balsam

A Safe, Speedy, and Positive Cure
The safest, Best BLISTER ever used. Takes the place of all liniments for mild or severe action. Removes all Bunches or Blemishes from Horses and Cattle. SUPERSEDES ALL CAUTERY OR FIRING. Impossible to produce scar or blemish. Every bottle sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars.

POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

EGGS AS A FOOD.

In this day of pure food agitation and possible disease there are those who believe that more attention should be paid to such articles of food as cannot be adulterated in any way. Unfortunately there are but few food products that are beyond adulteration. One of these can be found in the egg. In order to get it in its purity it should be eaten raw, and the raw egg diet is gaining a great hold on New Yorkers, says March What-To-Eat. The advocates claim to obtain more immediate and material benefit from this food than any other. The healthfulness of the custom has been given additional emphasis by the declaration of pure food advocates in their recent New York convention that the only pure food known is the fresh egg. The raw egg eaters declare that the egg is spoiled by any kind of cooking, and its benefits can be obtained only when eaten raw. To back their conclusions, many researches have been made on the subject, and it has been found that tourists in unexplored tropical countries have been able to retain perfect health throughout the most trying exposures to heat and wet, by means of dieting on raw eggs. An instance is mentioned where all in a party of explorers became dangerously ill excepting one, who ate nothing but uncooked eggs. Believers in the new diet contend that the egg should be eaten as soon after it is laid as possible. Several different methods of serving eggs are in vogue, the most popular of which is with vinegar. A very little of the vinegar is required in a glass, merely to give a zest to the flavor of the egg. Its benefits would doubtless be greater without any of these accompaniments. When served with the vinegar, a drop of the liquid is first poured into an empty glass. Into this the egg is broken. Then the top is covered with another drop or two of vinegar, and a sprinkling of salt and pepper. The egg is then swallowed whole. Persons who have not tried the diet will be surprised at the ease with which the egg slips down the throat, as well as the pleasant taste it leaves in the mouth. It is declared that half of the benefit of the egg is lost when the yolk is broken in eating. The eggs should be eaten before meals, especially before breakfast, but not every day. An everyday diet is said to be dangerous, because of the superabundance of sulphur it would produce in the system. It is advisable to discontinue the diet for as much as one or two weeks at a time and then to keep it up steadily for a few days or a week again.

Of course if absolute purity is desired in a diet of this kind it will be necessary that the vinegar, pepper and salt be absolutely pure. In this day of adulteration, the vinegar is liable to be made of acids, the pepper half peas, and the salt—well, there are men who would adulterate salt if they could make gain by it.

MEAT FOR CHICKS.

In a recent report of an experiment in feeding chicks, the Rhode Island Experiment Station says: "The use of the proper proportions of animal food will pay a handsome profit through decreased mortality and increased weight of the chicks. In feeding, bear in mind that chicks in a state of nature spend practically all of their working hours in search of food, and that they do not fill their crops in ten minutes every two hours. Feeding should be, as far as the time of attendant renders profitable, a continuous process, but by no means a continuous gorge."

"The experiment which led up to this conclusion was with an incubator hatch

Swift's Digester Tankage

Clover-fed pork is cheap pork. If pigs on clover or alfalfa pasture are fed Swift's Digester Tankage daily, the quality of the pork will be improved and the cost greatly reduced.

It Brings Results

Swift's Digester Tankage will make summer hogs weigh better, ship better and Sell Better. Tankage-fed hogs nearly always top the market. We have printed a Little Book, "Protein for Profit." Let us send it to you.

Oil Cure for Cancer.

Dr. L. T. Leach, of Indianapolis, Ind., reports the discovery of a combination of soothing and balmy oils which readily cure all forms of cancer and tumor. He has cured many very bad cases without pain or disfigurement. His new book with full report sent free to the afflicted.

AN UP-TO-DATE COOK BOOK FREE.

Helen M. Thomson, the recognized authority on domestic science problems, has recently compiled a cook book containing 533 recipes. This book is now being handled by the Malleable Iron Range Company, of Beaver Dam, Wis., and is sent free to all persons who make application for same, providing a statement is furnished in which it is clearly shown that the purchase of a new range is contemplated. Twenty pages of this book are devoted to showing how Malleable Iron Ranges are made and how they save money for the purchaser every day they are used. The Monarch range is so well known that it needs no endorsement from us, but we take pleasure in suggesting to our readers who are in need of a new range that application be made for this "Monarch Cook Book," addressing the Malleable Iron Range Company, 302 Lake St., Beaver Dam, Wis.

LOS ANGELES AND SAN FRANCISCO.
From September 3d to 14th the Chicago Great Western Railway will sell round trip tickets to San Francisco and Los Angeles at rate of one fare for the round trip. Tickets have limit of October 31st to return and allow stop-overs west of the Missouri River in both directions. For full information apply to E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

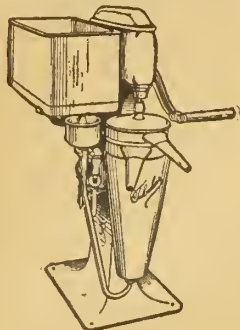

BOWEL TROUBLE.

"I wish to ask through your paper what to do for bowel trouble in young chicks. Will you kindly advise me?"
Imperial, Nebraska. W. S.

Bowel trouble is due to sloppy foods, some kinds of rich food, chills, cold, over-heating, fungus in food and many other known and unknown causes. Chicks often suffer from this trouble whether raised in a brooder or allowed

Because You Need The Money

It's your business and if you don't attend to it, who will? You cannot afford to keep cows for fun. That isn't business, and, furthermore, it isn't necessary. There is money in cow keeping if you go at it right, and besides there is more fun in going at it right than there is in staying wrong.

You need a Tubular Cream Separator because it will make money for you; because it saves labor; because it saves time; because it means all the difference between cow profits and cow losses.

Look into this matter; see what a Tubular will do for you and buy one because you need it.

How would you like our book "Business Dairying" and our catalog B. 124 both free. Write for them.

The Sharples Separator Co.
West Chester, Pa.
Toronto, Can. Chicago, Ill.

OUR DAIRY DEPARTMENT

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

WHEN BEEF CALVES SHOULD BE DROPPED.

It is not possible to lay down any hard and fast rules about the most profitable time to have pure-bred beef calves dropped. Mr. E. B. Mitchel, formerly manager of the Tebo Lawn Cattle Company, at Clinton, Mo., in an address before the Missouri Stock Breeders' Association some time ago, expressed his views on this subject as follows:

I prefer having as large a per cent of calves as possible during the fall and winter months, beginning as soon after September 1st as possible (as you are well aware a show man never has any calves dropped prior to September 1st). Our early calves coming in September and October are allowed to stay with their dams in pasture the first three weeks of their lives, not, however, with the herd, but in a small pasture with the herd, coming to nurse morning and night, and in the pasture used for nursing calves we keep a trough low enough to the ground so that almost the smallest calf can reach and feed in this trough at all times. It is surprising how soon a little calf will learn to lick a little feed of bran and ground oats. As soon as the weather becomes stormy the calves are brought to the barn into what we call the calf pen, a covered shed twenty by fifty feet, with the upper half of the south wall open, which is never closed. These calves are given the run of a yard of about a half acre every day in the winter, with plenty of fresh water and feed before them all the time.

The dams are brought to the barn evenings and kept in at night, allowing the calves to nurse night and morning, and the cows going to pasture every day in winter as in summer.

At three months of age all the bull calves are removed to other quarters, similarly constructed, and banded the same way.

On the approach of grass, say April 1st, we select a warm day and every animal on the farm is put through the dipping tank to eliminate lice or any skin trouble that may exist. The cattle are then all classified as to ages and go to their respective pastures, yearling heifers in one pasture, two-year-olds in another, dry cows in another, the nursing heifer calves to another pasture, the nursing bull calves to still another, and the dams of each separated in different pastures, coming to the respective yard to nurse. We continue feeding the calves on grass, so that by the time they are ready to wean they never notice it, but go right on with their growth, entering the second winter in fine condition and, in fact, what a great many men would call fat. During this winter every good day these heifers go right out to their pasture, coming in at night to a yard with a shed open to the south, and are fed about four quarts each night and morning of a ration consisting of two parts bran, two parts ground oats, and one part ground corn by measure, with all the good timothy or clover hay they care to run to. During the winter and the following spring all of the bulls of this crop of calves should be sold, and the following summer the heifers are fed once a day in the pasture about one gallon of such feed as above described. By the following fall, or by January 1st, all of these heifers should be bred and in calf, and are kept right out in pasture all winter with timber for shelter and fed twice a day with plenty of good hay for roughness.

Those who are familiar with Mr. Mitchel's success in fitting cattle for the show ring appreciate the fact that there are few men more competent to speak authoritatively on this subject. By following the plan outlined, he has been able to keep the whole breeding herd in what might be called high flesh and yet at the same time maintain breeding qualities unimpaired.

It will be noticed that Mr. Mitchel advocates the feeding of mixed grain at all seasons. This means essentially a balanced ration and contributes not only to the keeping up of the constitutional powers, but to the greatest possible extent to the maintenance of size or scale. Even though the end in view in Mr. Mitchel's case was the making of show cattle in many cases, yet that is usually the way to make good cattle. The spring calf has to pass through the fly season as well as the hot weather, at a time when growth is apt to be impaired, while in the case of the fall calf there is such a start before the warm weather that no setback is likely to occur. Of course the fall-dropped calf must be liberally fed and must have comfortable quarters, but if these are supplied it is just possible that size combined with quality can rather more easily be obtained than in the case of the spring calf.

NEW CORN FOR DAIRY COWS.

At no time can better use be made of corn in the dairy herd than during the next few weeks. This crop if fed whole, that is, leaf, stalk and ear, makes a highly palatable ration and one that contributes to a large milk flow.

Where pastures or lanes join the

Every Farmer Knows That The DE LAVAL CREAM SEPARATORS

are in a class by themselves as the best separators. But many have the mistaken idea, which competitors help to magnify, that they are "expensive," and that something "cheaper" will do in their stead.

The Facts Are That The DE LAVAL CREAM SEPARATORS

are not only the best but at the same time by far the cheapest—in proportion to the actual capacity and the actual life of the machine.

These are simple facts easily capable of proof to any buyer who will take the trouble to get at them and who need only apply to the nearest DE-LAVAL agent or send for a catalog to do so.

How's Your Separator?

WE will take your old separator in exchange on purchases of either new or second hand machines. We also sell you direct, a good as new second hand, or a new separator, any make, cash or time and save you money. Write for list and prices.

Richmond Cream Separator Co.
Richmond, Missouri

BUTTER-BRED Holstein bull calves, 6 to 8 months old, sired by Prince Inka, (18 A. R. O. daughters), and out of A. R. O. dams, \$50 each. No females now for sale. G. C. Mosher, 605 Bryant Bldg., Kansas City, Mo.

corn fields it requires but little labor to feed the few rows that are nearest the fence, and our experience is that it pays to take the time to supply the dairy cows with this fodder. If the grain reaches maturity the ration is then a little rich in fat-forming constituents, but when the leaves are green the milk flow indicates that they supply protein abundantly.

If cows are gradually accustomed to the green fodder there is practically no danger from bloating. It will require several days to get animals to that point where a full ration of green fodder may be fed. Good corn fodder not only increases the milk flow, but cows on this ration will usually flesh up to some extent and this is a good thing before they go into winter quarters.

OUR HOME DEPARTMENT

All communications intended for this department should be addressed to Post Office Drawer 1127, Kansas City, Missouri.

AMONG OURSELVES.

Was it not too bad that I did not know sooner that I would visit the Iowa State Fair, at Des Moines? I am so sorry. At this writing I do not know just how sorry. It will depend on how many of the friends I meet, and how much pleasure the meeting yields. The fair will be over as these words reach the circle, but it will be another week before I can speak of my visit in the past tense.

There has been so much excitement Among Ourselves over the question of women working in the fields that some other matters have been neglected. I fear John's Wife is thinking she is not being well treated. Her patience is about to be rewarded. Iowa and Colorado have both arrived in response to her call. Mrs. Rom, of the latter, will be followed by Mrs. Howard, of the former:

I was touched by the appeal for help from the farm couple who had raised six children and wanted advice about whether to leave the farm and go to the city to give the last two a college education. That would be a hard question to decide, but it seems to me they would better keep the farm, or a few acres at least, for a home in old age, as they can never be really happy in the city if they are "bred in bone" farmers. It is a serious matter to allow young folks of sixteen and eighteen years to go to college without any home influence around them, for the temptations are many. If no relative or close friend lives near enough to the college for the children to stay with, it might be possible to hire a good foreman to run the farm and the owner could spend vacations there and also visit a few days occasionally, between times. If a farm or children must be sacrificed, let it be the farm, by all means, but "at a distance" I can see no need to sacrifice either. Many farms of from sixty to several hundred acres here in Colorado are managed entirely by hired help, the owner only visiting occasionally, and are run at a good profit.

I would like to add my mite to the no doubt numerous responses "John's Wife" will receive to her request. While I may be young to be giving advice on such a subject, it seems to me the only thing for them to do is to stay on their homestead where they have spent such a well-rewarded life. I would spend the rest of my life there in any way most convenient for me. Perhaps the tenant plan is the best and would give them the most leisure. Another thing I could not help but think of was, what an eloquent plea her letter was for a generous-sized family. Think how full her life has been. Don't you think she has seen many days just as full as those Mrs. Larsen tells us about? And don't you think she has perhaps even "filled the water pail" for "John" to bathe his hot and dusty face? Yes, all this and even more, and now she is reaping her reward. Her children's interests are hers and while watching them make their way in the world she and John are only living over again their own young days. That is the

reward we reap for all our labors for our little ones.

Aunt Belle, of Nebraska, who is about to take the floor, has also a word for John's Wife, but before she rises, let me ask Mrs. Howard if it is quite fair to quote John's Wife as she does? No one objects to "generous-sized" families, and six was not a large family in the days of large families—where parents are able to rear them well, as these evidently were. Personally, I should be sorry if our discussion along this line discouraged parents so situated that they could do justice by half a dozen or more children. All that is sought is the stirring up of healthy sentiment so that the size of the family shall be the result of conscientious choice. And now, Aunt Belle:

I, for one, am going to do as Mrs. W. suggests—sit right down by a window, pen and pad in hand, and say what I think along several lines. Mrs. Larsen does about again as much work as an ordinary woman should do. It leaves her too little time to cultivate the talents given by an Allwise Creator to every woman. Now, my home is not a mansion, but it is covered by vines (wild cucumbers) surrounded by a little fenced-in flower garden and sheltered by trees planted by the "man" the spring before we were married. We have too large a yard to be kept nicely, but the mower keeps it in pretty fair shape. I do not desire a large farm home—it would be such a care. I do no outdoor chores unless husband is sick or gone from home. I do work in the garden some, because I like to, but a horse and a small plow keep our garden in fine shape. I raise chickens and ducks, but not on a large scale. I sold three fries at fifty cents each this morning—that gives me church and pin money until I sell a few more. Have sold vegetables to my personal friends in the nearby village. Belong to woman's club and church societies, have a good library, good papers and magazines, have a pretty good husband (wouldn't trade with anyone) and three healthy, mischief-loving children, fair health and a mind at ease. I agree with Aunt Ruth "a man respects a woman who respects herself." I love nature and get much restful pleasure from the ever-changing colors of even a flat prairie country—though I do love hills better. I derive great pleasure from my correspondents who are scattered from New York to California. Women suffer most (mentally) who drop into a rut, so to speak. Reading rests me when I am tired physically. This Home Department is a pretty good place to visit, too. Pardon such a long chat, but let me advise John's Wife to rent that farm and make a home for James and Nellie in a college town, at the same time renewing their youth among the college young people.

In thus replying to Mrs. Larsen, Aunt Belle gives us a charming picture. What a beautiful world this would be if all women were as happily situated as she—to have love and work and health—what more can a woman ask? Perhaps there should be a qualifying word or two in connection with work. Upon second thought, I incline to think so. Mrs. Nebraska also rises to the question stated by Mrs. Larsen:

Dear friends, I have never written before and have wanted to answer lots of the letters. I have read the Home Department for years. I think as Mrs. Belle Larsen, that we can do much toward beautifying our homes, and why shouldn't we? Isn't it our home, as well as our husband's, and don't he work all the time for us? I hope there won't many follow Aunt Ruth's advice. It is no disgrace to milk a cow or make hay, either. I don't think it is a woman's place to make hay and don't think many are expected to, but if the men get in a pinch and need help, go out and help them, and most men are just as willing to come in the house and wash dishes or churn or anything they can do if they are asked and not ordered. I have lived on a farm for eighteen years and have raked hay, run the harvester and milked cows, when necessary, and never felt I was a slave, either. I have always had a horse and buggy to go when I wanted to. I have five children and my girls play the piano and help papa and mama lots, too. I say if we are home makers let us do what we can to make a home what it should be, and work together and for each other.

The note sounded by Mrs. Nebraska in closing is the motive of a genuine home love song written for us by Mrs. Juanita, of Arizona:

What different ideas people have of what home is! I do not think it should be thought of as a place where people of one family just stay, but as a place where each one tries to do all they can for the benefit and comfort of each other. In a rush or a time when help is scarce, how could it hurt a daughter to go out and help her father and brother in the field? As she belongs to the family, does not the success of the harvest benefit her as much as the rest of the family? And if she associates with her father and brothers in the house, then why not in the field? Are they not all one family working together for the good of all? I believe myself that outdoor exercise is more healthful for girls than all indoor work. Then in place of lawn tennis, basket ball or any other athletic sport, why not help father and brother? Of course, circumstances change things. If there is an abundance of money in the family and help can be hired, or the daughter's health is not good, then it should not be expected of them. And the lover who would not think more of a daughter for doing all she could to make her father happy is not much of a lover. "If there are not men enough to do these chores, then let them go undone." Oh, my! If I am one and my husband another, then we are not one, and why are

How and Where to Buy a Washer.

The market is flooded with poor washing machines, free offers, premiums, etc. That is not the cheapest way to get a thoroughly reliable washer. Most of them are expensive and provoking in the long run. Get a guaranteed washer, made by the reliable manufacturer. That's what we want to say to you about the

O. K. WASHER.

It's the easiest washer to operate, the simplest to understand. Our guarantee is tucked inside of every machine. The O. K. Washer will handle your biggest washing and do it so much better that you cannot afford not to have one. A beautiful machine, too, painted in maroon and fitted with gilded hoops. No warping because the lumber is Louisiana Red Cypress. The lid is steam proof.

SEND US YOUR NAME TODAY.

Also the name and address of your dealer. We'll tell you where and how to get the O. K. washer, and full particulars. Address the factory.

**H. F. BRAMMER MFG. COMPANY,
1455 Rockingham Road, Davenport, Iowa.**

WE WANT NAMES.

WE want YOU to send us the names and addresses of from ten to twenty-five farmers living in the United States, having a few head of stock (cows, horses, pigs). You can send us the names from any number of different post-offices. If you will send us these names we will send you **TWO BEAUTIFUL COLORED PICTURES FREE.** These pictures are reproductions of the most celebrated paintings in the world, and they are of high quality, and we know that you will be pleased and delighted with them; no pictures will be given for a list of less than ten farmers. We want to send a sample copy of the **RURAL HOME** to a lot of farmers who are not now taking our paper, and for that reason we want these names. Send us immediately a list of at least ten farmers and we will send you, postpaid, **ABSOLUTELY FREE, TWO REPRODUCTIONS OF THE WORLD'S FAMOUS PICTURES**, in beautiful colors, size 15x20 inches. Address **THE RURAL HOME**, 22 North William St., New York, N. Y.

we there? This drawing a dividing line in a family I think the cause of many divorces. I am speaking from experience. I have lived in a city in a house with all modern conveniences. I did not have to do my own washing, and part of the time not all my own housework. We kept a horse and buggy. Every evening we had a drive. We enjoyed all our comforts together. Then when we moved on our ranch and help was scarce, I have helped pitch hay, I have helped bale hay, I have milked cows, I have rode out on the range after cattle, and taken care of calves. I have enjoyed my ranch life just as much as I have my city life, and my health is as good. And if you love your husband, how in the name of all common sense can it be any worse for you to wait on him with a basin of warm water than to have his dinner cooked and on the table? It seems a difference without a difference. I always did those things, and when he came in tired I always had a glass of lemonade or some other nice thing for him between meals. Try it, Aunt Ruth, and just let your hand rest around his neck a minute and say, "Are you very tired, dear?" The fullness of the cup is not always in receiving, but in giving. Now, we all know that housework is tiring, but I have tried both indoor and outdoor work and I know when a man plows all day he must be tired. Then why not let sister go for fresh water for brother? Then more than likely brother will think of some kindness to do for sister. But when you stand on your dignity and demand things as your due, it is too much like buying and selling among strangers. Home is love and love is made up of little kindnesses, of consideration for each other.

Isn't that a song—a beautiful song, although it is written in plain prose, undorned by poetic imagery? One thing struck me as I listened to its music. It was that Mrs. Juanita is fortunate in her husband and that her husband has a wife who knows the secret of making a happy home. And as I thought on this involuntarily the thought came: "What a changed world this would be if the spirit of love filled every crevice in the hearts of husbands and wives and found expression in forbearance, consideration and mutual helpfulness." Meantime things are not as they should be—too often the man is exacting—too often the woman is unwise, and to complicate matters, economic conditions are such that the question of whether or not women shall work in the fields is actually one for practical discussion. Last week we had a daughter plead for the right to help her father, this week we have another girl, this one urging her right to help her brother:

Taking courage from the warm welcome given some of the new writers "Among Ourselves," and acting on the suggestion made in the issue of August 2d, I have at last concluded "to step in and have my say." Aunt Ruth, I think you are a little hard hearted. For why should not we sisters show our brothers some of the kindness we expect of them? I am one sister, who is the "house-keeper and maid of all work in a farm home, and during the busy season I always make it a point to have warm wash water and fresh drinking water when father and

brother come from the field, but I am never "ordered" to have those things. Perhaps the brother "Aunt Ruth" had in mind when she wrote the article did not always keep a supply of wood and water on hand during the winter months or rainy weather, get the wash water and light the fires in winter, and even keep house for a day or two, as my brother does for me. To such a one I deem it only fair that I repay the kindness in any way I can. As for country women working in the fields, I think the majority who do "work out" do so from choice, rather than because they are compelled to do so. I know that such is the case in our neighborhood. Then I do not think it lowers the dignity of anyone of our sex to help milk the cows occasionally if father is tired out, or to skim the milk and carry it to the calves or the slop barrel. You say men would never expect us to do these things if we did not learn how. Perhaps not, but they would accept the situation as gracefully as we would, were we obliged to do with last summer's hat.

Like Mrs. Juanita, Sister Anna is to be congratulated upon her male relatives. When you find a wife, daughter, sister, eager to assist husband, father, brother; when you find her quick to resent any imputation as to the goodness of men, quick to defend them when they are attacked, you may be sure that woman has personal reasons to think well of men or else personal reasons to conceal the fact that she does not think well of them. Of course it is right for Sister Anna to help brother and to meet him with a basin of water, if, as would seem, she gets a new hat every summer. A girl so treated is no drudge—a little work in the hay field is fun to her. But suppose she marries a man who takes it as right that she should work in the fields? What then? "A Willing Worker" has, unconsciously, perhaps, thought along this line, although individual circumstances have not made it necessary:

I am sorry, indeed, to write this and cause Aunt Ruth to blush so deeply, for she will feel much pity for me, the unaccomplished and degenerated person who has worked in the field. I wish to say her sorrow for me cannot be any more than mine for her, who must wash dishes, churn and stand over a stove just baking herself all day. I have tried both and I do indeed pity her. I am not sorry, but proud, to say that I have hoed the garden and worked many a day in the field. I have saved a good many dollars that would have been paid to hired help, and enjoyed many a nice dress or other luxury that perhaps I would not have had. Aunt Ruth asked, "Do any women enjoy it?" Truthfully I do, and I know I am better for it than playing the piano, all the time, or lying on the lounge reading a love story. I have seen too much of that. As far as your husbands and brothers loving and respecting you more, I dare her to find a brother who loves his sister more than mine does me. Now, I do not wish to be understood that such has been my life work, but when it is necessary I can do it without blushing. I do agree with her most sincerely in not waiting on the men. I will be a slave for no man. I have seen the kind of a man that she has reference to, and took my lesson. My husband is good and kind and never

expects such things from me; he would be disappointed if he did.

Now suppose we change the subject. Mrs. Ed Streeter, of Oklahoma, who has not met with us for a long, long time, is here today prepared to talk. Like Mrs. McKelvie, she has some questions to ask the men:

I started a letter to our Home Department the other morning and now I am glad I didn't send it, as it was surely a "blue" letter, as I read it now. We've had so much rain and things in general had seemed to go wrong; but by chance I saw this verse in a back number of "Little Helps by the Way." "For darkness passes; storms shall not abide. A little patience, and the fog is past." And sure enough, we've had almost a week of dry weather and work has progressed wonderfully. But as rains are not the only "storms" in life, I have faith that the rest will come out of the "fog" in good time. I would like some of the gentlemen friends to answer me these questions: Why do men pretend to have contempt for women, just because they are women? And why is it they hate to go to church, as a general thing? And why do they "growl" if we want them to clean their boots of mud when coming into a clean kitchen, and find fault if we complain of their leaving old clothes, hats or boots lying anywhere for us to pick up? Wouldn't you scold if we went to the barn and left the harness, feed cans and other things scattered around in any old place for you to put away? I see that "Celeste's" boy has been doing some thinking of his own. I remember "Celeste" very well, also "Happy Wife," and thought it was a shame the way they pitched into her because she curled her hair and wore a clean collar every day. In closing, I wish to say that our department is getting better all the time, and I hope it will continue so.

Will the men themselves please answer these questions?

So many of the friends write that they think the Home grows more enjoyable all the time, that I hope it really does. I hope that it does, although I confess that sometimes I think it lacks only one thing. Next week we shall have a novelty program—something different from anything we have ever had—something which I hope will not only be enjoyed, but lead to enjoyment through weeks and months and years to come. Now guess.

HOME AND HOME MAKING.

If any little love of mine
May make a life the sweeter,
If any little love of mine
May make a friend's the fleetier,
If any lift of mine may ease
The burden of another,
God give me love, and care and strength,
To help my toiling brother!
—Philip James Bailey.

Touch my heart, O God, with thoughts of Thy love.—Hold me up this day above the mists of passion, of selfishness, of earthliness. Give strength to my higher, my better self, against my lower nature.—J. D.

FRECKLES.

There is nothing that equals fresh buttermilk for removing freckles or sunburn. It has the great advantage that it does not injure the skin, but renders it soft. Take a soft cloth or sponge, and bathe the face thoroughly with buttermilk before retiring for the night; then wipe off the drops lightly.

A Genasco Roof protects for years.

Real asphalt is the natural fighter of all weathers—rain, snow, hail, heat, cold and sun. Coal-tar and other substitutes may keep off the wet for awhile, but they soon dry-out, become brittle, and go to pieces.

Genasco Ready Roofing is made of asphalt from Trinidad Pitch Lake, put through a process perfected by our twenty-five years' study and use of asphalt. Genasco roofs keep the fighting qualities of natural asphalt for years.

Mineral and smooth surface, several weights.

ly. In the morning wash it well off and wipe dry with a rough towel. A few such baths will take off all tan or freckles. The following is a very good recipe: One ounce of lemon juice, a quarter of a dram of powdered borax, and half a dram of sugar; mix, and let them stand a few days in a glass bottle till the liquor is fit for use.

LAUNDRY HINTS FOR OVERWORKED WOMEN.

After drying, fold and smooth the knit underwear, stockings and Turkish towels and put them away—they need no ironing.

Sheets (this will shock some housekeepers, but we cannot help it) and the everyday towels may be treated in the same manner, and the earth will continue in its revolution around the sun, and everybody be as happy as if a tired woman had spent several hours in running a hot iron over them and then he cross to her husband and children afterwards because of it. Some consider the sheets more sanitary if taken from the pure outside air and sun and put away without ironing.

One busy mother has adopted a quick method of smoothing her short towels, and baby's napkins. She folds them smoothly in a pile, then begins at the top and presses out each one, removing them one at a time with her left hand, while her right hand holds the iron.

Night dresses do very well if the ruffles and front are ironed. In order to have the irons at the proper degree of heat for the different kinds of clothes, do not try to iron all of one kind at once; that is, when the iron is very hot take something that requires a hot iron; when the iron becomes cooler iron something that is starched. By mixing the starched and unstarched clothes there will be little need of sitting down to wait until an iron cools or gets hot. Embroideries should, of course, be ironed on the wrong side and heavy embroideries should have a pad of cloth beneath them in order to give the embroidery a chance to stand out.

FOR THE COOK.

Stuffed Eggs—A variation of stuffed eggs, so delightful for picnic luncheons, is made with deviled chicken or game. Boil the eggs and mash the yolk, afterwards mixing with the chicken and a little mayonnaise. Return to the white halves and serve with mayonnaise in a nest of lettuce leaves.

Potato Border with Turnip—To one pint of left-over mashed potato add one teaspoonful minced parsley, enough grated onion to cover a nickle, one-fourth teaspoonful paprika, yolks of two eggs, and three tablespoonfuls of cream or milk. Work this mixture until smooth, pack into a buttered mold, then carefully unmold on a buttered plate and heat in the oven. Just before removing from the oven, brush over with egg yolk, diluted with a little cream, and brown in a hot oven. Have a little left-over turnip warming and when ready to dish up, heap it in the center of the browned potato. If no border mold is had mold in a hasin and heap the mashed turnip on top.

Creole Dish—Two cupfuls of well-cooked and seasoned rice, two cupfuls of tomato sauce, half a pound of raw ham minced and browned in butter; mix all together, add a dash of cayenne pepper, turn into well buttered pan and bake.

Medley Salad—Take one head of crisp lettuce, slice three tomatoes, one fresh peeled cucumber and one small onion. Lay all in cold water for twenty minutes (this before slicing the vegetables). Shred the lettuce, cucumber and onion and pour over all a mayonnaise dressing.

TOMATOES FOR WINTER USE.

Shirley Sauce—Wash, peel and slice two dozen ripe tomatoes, four large onions and four medium-sized green peppers, add four tablespoons brown sugar and one pint best cider vinegar. Boil the tomatoes and onions first until tender, then boil all slowly until done. Put into jars and seal.

Chutney Sauce—Chop finely one quart each of green tomatoes and apples and one onion. Sprinkle with salt and let stand for two hours. Then drain in a colander, and add one tablespoonful each of finely chopped mint and nasturtium seeds, one pound seeded and chopped raisins, two cups sugar, one pint vinegar, one cup lemon juice, one teaspoonful cayenne pepper and one tablespoonful each of ground ginger, mustard and grated horseradish.

Chowchow Recipe—I will send my recipe for chowchow, which I know to be good. I gather my green tomatoes before frost and cut tomatoes, cabbage, onions, green peppers all, and grind them through a sausage mill, then salt them well and put in a jar and let stand over night; next morning strain all the juice out, then put in my spices and some hot mustard seed. Then stir all up well, put in a jar and pour vinegar over it. Put a plate or something over it to weigh it down; then if you keep it covered with vinegar it will keep all the year.—Mrs. M. S. Mitchell, Era, Okla.

Dressmaking and Millinery—No. 532.

Sylvia Silverthorne, Muscatine, Iowa.

[All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.]

A window display that is attracting general attention is of various cloths draped to show each to the best effect, and while these are at least a dozen in number they are all in some shade of red, some showing the shadow plaid that has been mentioned as a leading feature in the fall materials; others in small checks, while still a greater number are in the solid color. These range through all the shades of deep reds, including scarlet and crimson, as well as ruby shades. Trimmings displayed with these are largely of velvet, but there are also various braids, to be put on in the form of bandings and again in patterns or designs. Velvet ribbon applied in rows in the color of the gown material is a leading trimming feature, while collars, cuffs, vests, etc., will be cut from piece velvet in harmonizing or in contrasting color as one may choose. These piece velvet decorations, however, should always har-

10 WEEKS FOR 10c

The Oldest and Best Known Agricultural Weekly Paper in the West.

The Journal of Agriculture

Established 1866.

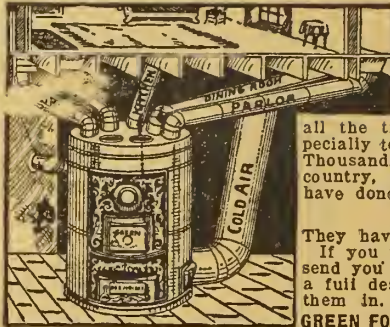

THE JOURNAL OF AGRICULTURE is a weekly journal that every farmer, every gardener, every stock raiser, every man and woman interested in poultry or the products of the soil, will need and read from cover to cover. No dry rot, no long-winded articles by city farmers who do not know the difference between a "pumpkin tree" and "watermelon bush," but short, meaty, interesting, useful, reliable and seasonable matter in all departments throughout. Besides illustrations, timely cartoons, terse comment on live topics, condensed form, handsome departments concerning the care and handling of all kinds of farm stock, floriculture and gardening, cooking, hints about the house, veterinary department, poultry, dairying, bees, young people's department, correspondence columns and the LATEST ACCURATE MARKET REPORTS giving the prices of Live Stock, Grain, Seeds, Vegetables and Produce in the leading markets, thus keeping its readers well posted as to what their products are worth and enabling them to get the top price for them.

To introduce THE JOURNAL OF AGRICULTURE into thousands of new homes, we will send it every week for TEN WEEKS FOR 10c. Address Journal of Agriculture, 19 Journal Bldg., St. Louis, Mo

monize with the applied trimmings of whatever color.

While on the subject of trimmings it may be well to mention that the strap and tab trimmings will be very much in vogue, as well as piped bias bands and overlapping folds of the garment fabric. These are used in numbers, that is, several tabs are used together.

[5441 Jumper Waist with Gumppe, 32 to 40 Bust.]

er, each succeeding one shorter than the one beneath it, all stitched, then applied to the garment as desired. This is not a new mode of trimming, but simply the revival of an old one.

The jumper waist pictured in No. 5441 is one of the season's novelties and therefore quite a favorite. It consists of a fancy over-waist that is to be worn over a gumppe which serves as a separate lining, and on which the chemisette is arranged. The various designs show how each part is made. The over-waist has no opening at either back or front, but is slipped on over the head. Then it is adjusted at the bottom in any preferred manner. Both back and front have side pleats or tucks that extend out over the shoulders, these being stitched to the waist line at the back, but only to yoke depth at the front. The outline of the opening is trimmed with velvet and with braid applied in a design, but other modes of finish will suggest themselves to suit the individual fancy as well as the purpose of the garment,

which may be a separate waist or a part of a costume. The sleeves of the gumppe are in elbow length, while those of the waist are in fancy shape and merely form caps, but if preferred the sleeves may be like the waist itself, and may be lengthened to suit. Pattern No. 5441 is cut in sizes for a 32, 34, 36, 38 and 40 inch bust measure.

The little square yoke dress shown in No. 5445 needs no description, as it is an old

[5445 Child's Square Yoke Dress, 1 to 6 Years.]

favorite modified in the cutting out of the yoke and the short puff sleeves. The pattern provides for a high neck and long sleeves when these are desired. Pattern No. 5445 is cut in sizes for children of one, two, four and six years.

Send eleven cents in money (not stamps) for any pattern wanted, these or others. Address all orders to Sylvia Silverthorne, Muscatine, Iowa.

PLEASANT FIELDS OF HOLY WRIT

SAVE for my daily range
Among the pleasant fields of Holy Writ
I might despair.
—Tennyson.

The International Sunday-School Lesson.

Third Quarter. Lesson XI. Matt. XXI, 1-17. September 9, 1906.

Jesus Enters Jerusalem in Triumph.

A great multitude of people fills all the street: and riding on an ass Comes one of noble aspect, like a King! The people spread their garments in the way And scatter branches of the palm-trees!

—“The Divine Tragedy.” Longfellow.

Jesus left the hospitable villa of His friends to join the pilgrim caravan on its way to the festivities of the Pass-over week. He was enthusiastically welcomed. These Galilean travelers had a local pride in the wonder-working prophet of Nazareth. They felt it to be an honor to be His escort to Jerusalem.

Jesus sent two of His disciples ahead to bring the beast on which He should ride. They would find it tethered at a certain point. Mention of His name and need would be all that was necessary to secure it. This comparatively insignificant incident, the request for the beast in the well-known name of the Nazarene, hastily reported from mouth to mouth along the crowded thoroughfare, would serve notice (as it was designed to do) of Jesus' approach. Up from a thousand pilgrims' booths on the slopes of Olivet came an eager throng, out from the city gate came pouring an ever-augmenting multitude of those who were only awaiting a signal of Jesus' approach.

Jesus was mounted now, and so in plain view of the largest possible number. He rode a beast considered appropriate for a sacred function—one never ridden before. As only an ox that had never worn the yoke was esteemed fit for the altar, so this foal that had never been saddled was meet for the Master's use.

Such a transport of admiring loyalty seized that mighty throng as made all former ebullitions seem faint in comparison. The palm-trees were stripped to provide the emblems of victory. Ten thousand abbas were proffered to carpet the highway with. A litter—a mattress of twigs and green grass—was formed so that the King's beast might tread softly beneath Him.

And now the multitude bursts forth in a noble psalm of welcome, the rear guard responding antiphonally to the van.

The first glimpse of the city is the

signal for a salvo of joy and praise. David's city is called to welcome David's Son. When from the crest of Olivet the city and temple lay at the pilgrims' feet, they raised such a shout that it penetrated to the star-chamber of the Sanhedrin and keyed to its highest pitch the murderous jealousy of the rulers of Israel as they exclaimed, criminating each other: “Perceive ye how ye prevail nothing? Behold, the world has gone after Him!”

The crowd looked and shouted. Jesus looked and wept. His patriotic heart is stirred as He sees the fate impending over the city, which knows not the things which belong to her peace.

Some forward Pharisee, with ominous glance at the Tower Antonio, exhorts Jesus to suppress this demonstration. But Jesus puts the seal of His approval upon this festal spectacle, in the declaration that the very rocks would find tongues to welcome, if the people did not.

So the Messenger of Malachi came suddenly to the temple. But a venal hierarchy could not abide the day of His coming. He calmly looked about as the Divine proprietor of all. But his presence was like refiners' fire and fullers' soap to the dross and filth of the ecclesiastical establishment.

Analysis and Key.

1. The triumphal entry. No mere incident. Event of large degree. Not accidental, but designed. Consistent with His plan. Presents Himself for acceptance or rejection.

2. Contrast with other triumphs. Meekness, lowly equipage. Absence of captives and spoils. Accorded by common people. Not church or state. Yet most significant triumph of history.

3. Evanescence of popular ovations.

4. Lasting enthusiasm for Jesus. How produced. What channels it can take.

The Teacher's Lantern.

The triumphal entry was not a mere passing incident or accident of Jesus' approach. It was a very large event.

Jesus deliberately planned this entry and made it as effective as possible. He was not captured by the multitude; He captured it, and used it for His purpose. The orderly precision of all His movements indicates this. The royal entry was an integral part of the history of Christ, which would not be complete nor thoroughly consistent without it.

He openly came to His own. The issue was pressed. They must now accept or reject. The test was not made in any dark corner, either. Nothing could have been more conspicuous.

Was it mere coincidence that the Lamb of God came to Jerusalem on the very day on which the paschal lamb was selected and set aside for sacrifice? It was the 10th of Nisan. The admiring joy of the people also marked Him as fit and worthy.

A triumphal entry, true! But how many points of contrast it presents to all other “triumphs” the world is familiar with! Meekness of victor, lowliness of equipage, absence of captives and spoils—a triumph accorded not by chiefs of church or state, but by common people. Yet even Pompey's triumph pales in comparison. No similar spectacle was ever fraught with such significance to the whole race.

TOOLS IN THE HOME.

Everyone knows in a general way the usefulness of tools, but few seem to realize how much expense and inconvenience can be saved by having a tool cabinet in the house. Repairs can be made at once, shelves put up, screens made with but little practice or experience, and the price of the cabinet can be saved dozens of times over.

The main requirement for good work is that the tools be good tools.

Keen Kutter Tool Cabinets are made to fill adequately the needs of the householder. They contain various assort-

YOU WANT THIS FREE BOOK

Here is a book—yours for the asking—which should be in the hands of every progressive farmer in America. From cover to cover it is brim-full of facts of vital importance to you. It comes from the greatest independent telephone house in the world—the house that has been most instrumental in bringing the blessings of the telephone to hundreds of thousands of farm houses all over the land. It shows you how simple and easy and inexpensive it is to own a

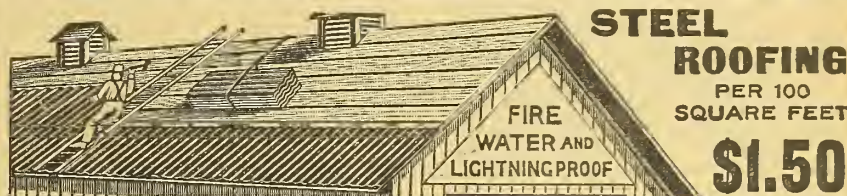

Stromberg-Carlson Telephone

system—a system that is a money-saver every hour in the day—a convenience and comfort you shouldn't even try to do without, and a protection against sickness, robbery, danger and fire that pays back its trifling cost over and over and over again. You owe it to your business and your family to get this book at once and read every line in it. Your letters will get personal attention and you'll have the help of experts from this great factory in every move you make toward owning a telephone. Sit right down now and say: “Send me your 52 page booklet G12” How the Telephone Helps the Farmer.”

STEEL ROOFING
PER 100 SQUARE FEET
\$1.50

Most economical and durable roof covering known. Easy to put on; requires no tools but a hatchet or a hammer. With ordinary care will outlast any other kind. Thousands of satisfied customers everywhere have proven its virtues. Suitable for covering any building. Also best for ceiling and siding. Fire-proof and water-proof. Cheaper and more lasting than shingles. Will not rot, rain-water, makes your building cooler in summer and warmer in winter. Absolutely perfect, brand new, painted red two sides. \$1.50 is our price for our No. 15 grade of Flat Semi-Hardened steel roofing and siding, each sheet 24 inches wide and 24 inches long. Our price on the corrugated, like illustration; sheets 22 inches wide x 24 inches long \$1.60. At 25 cents per square additional we will furnish sheets 6 and 8 feet long. Steel pressed brick siding, per square \$2.00. Fine Steel Beaded Ceiling, per square \$2.00. Can also furnish standing seam or “V” crimped Roofing.

WE PAY THE FREIGHT TO ALL POINTS EAST OF COLORADO except Oklahoma, Texas and Indian Territory. Quotations to other points on application.

Satisfaction guaranteed or money refunded. We will send this roofing to any one answering this advertisement C. O. D., with privilege of examination if you will send us 25 per cent of the amount of your order in cash; balance to be paid after material reaches your Station. If not found as represented, you do not have to take the shipment and we will cheerfully refund your deposit. Ask for Catalog No. W-600. Lowest prices on Roofing, Fire Trough, Wire, Pipe, Fencing, Plumblings, Doors, Household Goods and everything needed on the Farm or in the Home. We buy our goods at sheriff's and receiver's sales.

CHICAGO HOUSE WRECKING CO., 35TH & IRON STREETS, CHICAGO

Marlin

The Marlin 16 gauge is the only light-weight repeating shotgun in the world and is the handiest gun made for all sorts of game up to geese and foxes.

The Marlin 16 is an exact miniature of the famous Marlin 12 gauge—built in all the working parts of drop-forged steel; barrel of “Special Smokeless Steel,” bored for both black and smokeless powders; stock and fore-end of sound, handsome walnut, and all put together by expert experienced gunmakers.

If you are a shooter of quail, woodcock, grouse, teal, mallards, squirrels or rabbits, you need this gun.

Send six cents in stamps for catalogue describing in detail the whole Marlin line of shotguns and rifles.

The Marlin Firearms Co.,
135 Willow St., New Haven, Conn.

ments of tools, every one belonging to the famous Keen Kutter brand.

These cabinets are beautifully finished, and are fitted with racks and hooks for every tool, keeping them from knocking against and damaging one another. They are well supplied with drawers, which contain numberless little helps that you would rarely find in the ordinary home kit.

Keen Kutter Cabinets come in different sizes and prices from \$7.50 to \$100, according to the number of tools in the set, and may be found at the leading hardware stores. The smallest contains just the tools that are absolutely indispensable, and the largest a complete set, sufficient for any kind of work.

They all contain, however, in varying numbers and varieties, saws, brace, bits, chisels, drills, gimlets, brad awls, scratch-

awls, planes, hammers, hatchet, files, pliers, drawing-knife, screw-drivers, wrenches, nail sets, reamers, rules, squares, tape, level and many accessories.

The Keen Kutter Tool Cabinet Booklet will be sent free to anyone writing for it to Simmons Hardware Company, St. Louis and New York, U. S. A.

WATERLOO AND RETURN \$1.50.

On Friday, September 7th, the Chicago Great Western Railway will have a special train, leaving Des Moines 6:10 a. m., to Waterloo, at rate of \$1.50 for the round trip. The Thomas Orchestra will give one of their grand concerts at Chautauqua Park, Waterloo, on that date, and special will leave Waterloo, returning after the concert. For further information apply to E. J. Sawyer, City Ticket Agent, 514 Walnut St., Des Moines, Iowa.

NEW ENGLAND AND CANADIAN POINTS.
The Chicago Great Western Railway will sell round-trip tickets to the above points at very low rates on certain dates this summer. It will pay you to call on city ticket agent, 514 Walnut St., Des Moines, Iowa.

DIRECT FROM MILLS TO YOU

WE PAY THE FREIGHT

Have you ever stopped to consider when you buy a tin roof from your dealer, that you are charged three profits: first, the profit the jobber gets when he sells to the dealer; second, the dealer's profit on the tin; third, the dealer's profit on the tinner's labor?

But do you get a satisfactory roof even after you have paid the three profits and the job is completed? Or do you often have to send for the tinner again in a short time to patch up a leak?

BEACON-ITE is a long wool fibre roofing that you can buy direct from the mills, thereby saving the jobber's and dealer's profit. You put it on yourself and again cut down the expense. BEACON-ITE LONG LIFE ROOFING will never rot or rust.

We want to send you FREE samples of this roofing for your examination and also quote you mill prices. You'll be surprised at the quality and the price.

BEACON-ITE MILLS, 1105 N. 2nd Str., St. Louis

VETERINARY MATTERS

PROFESSIONAL veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of \$1.00. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

SYMPTOMS AND TREATMENT.

FISTULOUS WOUND.

I have a mare which was hooked by a cow several months ago. I did not do anything for it, supposing that it would soon heal up. It did not, however, and a running sore formed, which has been discharging ever since. The wound is just back of the right shoulder. What, if anything, can be done for it?

Hair or some other foreign body has been carried into the wound and will have to be removed by enlarging the wound and scraping, etc. Then syringe out daily with peroxid of hydrogen. In some cases diseased rib bone is present and must be removed. A veterinarian will have to be employed to treat the case intelligently.

FAIL TO BREED.

I have four half-blood Ayrshire heifers that were fresh last spring, but all have so far failed to come in heat. One of them had a premature birth at seven months. The others were regular in that respect. Have given them no treatment as yet. What can I do for them?

As one heifer had a premature birth it is possible that all have become infected with the germs of contagious abortion and on that score all should be treated by yeast injections as so often advised here. Separate the heifer that aborted and use disinfectants freely about the stables used by all of the cows.

SUMMER ITCH.

I have a black mare three years old that has an irritation of the skin. Small pimples raise on legs or breast and a few on sides of body. They seem dry and have small scabs on them. I have not noticed that any substance exudes from these pimples, but they apparently itch, and when the mare gets warm and sweats they are worse. These pimples came since the flies came, and her skin seems very tender so that the flies annoy her worse than they do the other horses. She is in good condition and has been fed corn, oats, timothy hay and grass. The mare's dam was troubled in the same way during fly time in the summer. Is there anything I can do for the mare?

This skin disease is liable to return year after year during hot weather. By clipping in spring and avoiding heavy feeding of grain, especially corn, during summer, it is possible to alleviate the trouble or even prevent it. To further lessen the irritation or liability to the disease see that stable is kept clean and well ventilated and is screened and darkened to lessen fly torment. Allow a little water often during working hours and twice a week feed a bran mash containing one dram of saltpeter. In bad cases we mix in the feed once or twice daily or several times a week according to necessity a tablespoonful of a mixture of two parts powdered wood charcoal, one part flowers of sulphur and one-half part each of powdered nux vomica and saltpeter. Itching may be lessened by sponging affected parts with a lotion composed of one dram each of carbolic acid and sulphuric acid in a pint of water.

A "light draft" of air, in a mustard poultice, or on your bank account is

Lump Jaw

The first remedy to cure Lump Jaw was
Fleming's Lump Jaw Cure
and it remains today the standard treatment, with years of success back of it, known to be a cure and guaranteed to cure. Don't experiment with substitutes or imitations. Use it, no matter how old or bad the case or what else you may have tried—your money back if Fleming's Lump Jaw Cure ever fails. Our fair plan of selling, together with exhaustive information on Lump Jaw and its treatment, is given in Fleming's Vest-Pocket Veterinary Adviser. Most complete veterinary book ever printed to be given away. Durable bound, indexed and illustrated. Write us for a free copy.

LANDS AND HOMES FOR SALE

You Will Prosper in the Southwest

If you purchase a farm in the Southwest now, while the land is cheap, you will soon see grow up around you a community of prosperous, energetic men, who like yourself, have seen the possibilities of the Southwestern farmer, and have taken advantage of them. This very condition which is rapidly forming all over the Southwest, makes the value of land increase rapidly, to the certain profit of those who own it. The Southwest will be as well settled in a few short years as the older states are to-day, and those who see this condition now will have cause to rejoice then.

Now is Your Opportunity!

You can sell your present farm—pay off the mortgage and have enough left to buy a big farm in the Southwest that will make you independent in a few short years.

The "Coming Country" Free!

The "Coming Country" is a very interesting paper published monthly and devoted to the Southwest. It will post you on conditions in the Southwest better than anything that you could read. I'll be glad to have the publisher place your name on the mailing list and send you a free copy of the paper regularly for one year. Write now to

S. G. LANGSTON, Sec'y., M. K. & T. Land Bureau, 306 Wainwright Bldg., St. Louis, Mo.

MISSOURI LAND

IS BETTER at present prices than a gold mine. Come and we will take pleasure in showing you. 509 acres well improved, all kinds of fruit and the best of water, and the low price of \$40 per acre buys it. 220 acres three-fourths of mile to Kirksville. A good prairie and as you will find in Missouri. Fair improvements. This is an ideal lying farm and \$65 per acre buys it. 80 acres, 2 miles from Kirksville, nice improvement, a lovely small home at the slaughter price of \$60 per acre. 82 acres, one-fourth mile to Kirksville, good improvements and as near an ideal home in every respect as can be found, and we are only asking \$90 per acre for it. 132 acres one-half mile to Kirksville, good improvements, all kinds of fruit, no better land in the state, every foot can be farmed with any kind of machinery. This looks good to anybody, but it is better than it looks and we are putting the low price of \$80 on this ideal home. 180 acres, 90 rods to Kirksville, good building, good fence, all kinds of fruit, the best of water and worlds of it, cistern in house, in fact, everything is right. No better or finer lying land in the state. \$70 per acre will buy this home.

ISAAC A. NOVINGER & SONS, KIRKSVILLE, ADAIR COUNTY, MO.

P. S. We are not real estate dealers, we own the land herein described and furthermore our home is not for sale. We simply have more than we can handle.

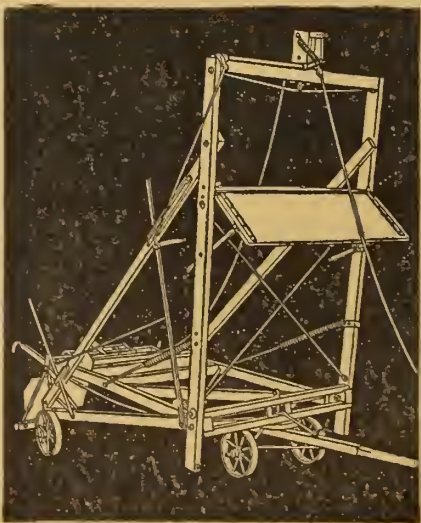

CANADA WHEAT LANDS.

PARADISE Valley, Northern Alberta, the finest farming country in the world; wheat runs 50 bus., oats 100 bus. to the acre; cattle shipped last month averaged 1,600 lbs., fattened on grass; beautiful park country with clumps of trees, mostly open prairie, gently rolling; lakes of good water, ample rainfall; deep black loam topsoil, clay subsoil; a few good agents wanted; \$8 to \$12 per acre, easy payments. Write for maps and route to **W. T. Stevens, Mgr. Paradise Valley Land Co., 220 Endicott Bldg., St. Paul, Minn.**

all important, but a light draft means much more in a manure spreader. Turn to page 5 and see what the Litchfield Mfg. Co. have to say in regard to the subject.

A TIME AND LABOR SAVING DEVICE.

If the farmers and stock raisers of the country do not make the most intelligent and profitable use of manure, it will not be the fault of our inventors and manufacturers. There are plenty of modern devices for the proper handling of the stable and barn yard manure, so there is no longer any excuse for letting even a part of this valuable by-product of farming go to waste. One of the latest and most efficient devices of this kind to come under our notice is a manure loader patented and manufactured by the Fuller & Johnson Mfg. Co., of Madison, Wis. The illustration of it which we show herewith gives an idea of its simplicity of construction and yet it couldn't do the work better if it had double the parts and was twice as expensive. One team does all the work with

a small boy to drive and a man to guide the gathering fork. Perfect work is assured under conditions where the manure is packed down and where it is difficult to load with the ordinary hand forks. After setting the fork in place, the horse pulls same with its load onto the chute, after which you pull a lever and the load swings up and is dumped into the wagon or spreader. Then the chute swings down again, ready for another load. The principle of operation is very simple, and as the operator becomes familiar with the work, it is an easy matter to load a large machine or spreader in a remarkably short space of time. There is nothing to get out of order and there is no reason why such a machine should ever wear out. Write the Fuller & Johnson Company for a complete description of this manure loader. It is an article worthy of careful investigation.

Missouri Farms

I have a large list of farms for sale in Vernon, Bates and adjoining counties at \$30 to \$50 per acre; nice lying country; just as good as Iowa or Illinois; good climate; good water. Am a farmer, born in Fulton County, Illinois, and lived 38 years near Prairie City, Iowa. Come to my house and I will show you my list of bargains free, and will sell you land at owners' prices. Can show you as big corn all over this country as you ever saw grown in Illinois or Iowa. Can show you more hay in a half day's drive from Statesbury than you ever saw before in the same territory. Lots of fruit of all kinds. Think of it; only 80 or 90 miles from Kansas City. If you don't receive prompt replies send registered letter at my expense. For price lists, maps and particulars, write,

A. F. Wilson, Statesbury, Mo.

Look! Look!

WE now offer for sale our 320 acre farm located most favorably between the two main railroads between St. Paul, Minneapolis and Duluth, Superior and Ashland. An excellent opportunity. Also one section of wild land especially adapted for stock raising at a bargain price. Write,

Lohrbauer Land & Immigration Co.,
Bank Bldg., 6th and Jackson, St. Paul, Minn.

IOWA FARMS. Send for our new illustrated list of improved Iowa farms. Is the finest list we have ever issued and gives full descriptions with good pictures of improvements, with map.

COLORADO, ROUTT COUNTY, IRRIGATED RANCHES. B. L. Dart, Yampa, Col.

Buy a Farm at Our Risk 50% Profit Guaranteed You By Us

That's the kind of proposition you never had before, but it is our special offer in selling farms in Western Canada. Our proposition is made in the form of a **guarantee bond** to the effect that every acre we sell you we will buy back at the end of five years at an advance of 50% if you want it. That the bond we give is absolutely good beyond all question can easily be proved to your entire satisfaction by best of bank references.

"A strong statement"—you say. So it is—but we know our farms are **bargains at the prices we ask for them,** or we could not make you such an offer.

GREAT PROFITS FOR YOU

Our lands are located in Halbrite District—right in the heart of Saskatchewan—the Great Wheat Region of Western Canada.

Wheat raising is today the great money-making enterprise for the farmer, and Saskatchewan is known as the most productive wheat region in the world, where more bushels to the acre are raised than in any part of the world.

We can prove this to your satisfaction by official facts and figures—by the actual experiences of farmers who have come to Saskatchewan and made money.

And because we have this proof we are willing to sell you land at our own risk and guarantee you a big profit on every acre.

SOIL YIELDS MONEY

Saskatchewan has the climate, the soil and the markets—everything that means money to the farmer.

It is famous for its unlimited agricultural possibilities. Here crops are unfailing—here your labors are most highly rewarded—here everything serves to promote the farmer's prosperity. There is no clearing to be done—no costly preparation to be made.

The land produces enormous crops of all kinds of grain and produce. The yields of fruit—large and small—are immense. Stock is raised with the least expense and largest profits. Poultry thrives as nowhere else in the world. And

SASKATCHEWAN REALTY & IMPROVEMENT CO.

(Capital, \$250,000.00)

312 Jackson St., ST. PAUL, MINN. Regina, Saskatchewan, CANADA.
NOTE—We also have large tracts, embracing one or more sections, suitable for ranching and other extensive agricultural operations. Full details on request.

HOMES AND FORTUNES

are both to be had in the fertile Panhandle of Texas. There is no better climate or soil to be found on the face of the earth than that of the Panhandle. You can raise just as large crops on its fertile acres as you can in Iowa or Illinois, and you can get better prices for them. There is no better place to live—water is good and plentiful, winters are mild, and everything works to the success of the farmer and stock raiser.

A few years ago land in your locality was selling at half, or less than half, what it is bringing today, and many people you know have made fortunes by their investments in land.

Those same opportunities are now to be had in the Panhandle of Northern Texas. If you buy here at once for investment you are sure of doubling your money in the next two or three years, for the immigration coming here now is bound to bring prices to much higher levels.

Satisfy yourself that the panhandle is the garden spot of the earth by seeing it, but first write for our literature which tells you how to see it to the best advantage and at the least possible expense.

We don't want you to buy our lands until you are satisfied, because a well-satisfied customer is the best advertisement we have. We can offer you your choice from 100,000 acres in the very Garden Spot of the Panhandle at attractive prices and terms. Write for pamphlet to

THE NORTH TEXAS LAND COMPANY, 100 Market St., Texline, Texas

FOR SALE.

240 ACRES only four miles from Anita, Iowa, right in one of the best corn belts in Iowa. This farm has a large square house with basement and summer house, fine water, deep well, windmill and tanks, fine barns, haysheds, hog house, double cribs and is one of the best farms in the country. Owner wants to go west and will take \$70 per acre. 200 acres three and one-half miles from Anita with a good five room house, new barn and richest kind of corn land that has to be sold to divide up a partnership deal. Central Missouri Farms

IN Callaway county. Best values in state found in my catalog. It is free, write for it. Address,

W. Ed. Jameson, - - Fulton, Mo.

FARMS

In western Kansas at owners' prices.

Dodge City Realty Co., Dodge City, Kan.

dairying offers exceptional opportunities. Whatever the product of your farm may be, you have a big unfailing market at good prices in which to dispose of it.

HAPPY HOMES

In addition to the great money-making opportunities that Saskatchewan offers to farmers, it also has all the features that go to make home life attractive, comfortable and happy.

The climate is unequaled for healthfulness; the water pure and abundant; fuel plentiful and cheap. There are fine schools for your children—hundreds of churches for family worship—while the class of intelligent farmers makes the social life of the region most agreeable.

GREAT OPPORTUNITY

Our offer to sell farms in this Great Saskatchewan Region at our own risk, and to guarantee a profit on every acre, places them within easy reach of every progressive farmer who seeks greater money-making opportunities—of every young man who wishes to establish a permanent home—of all who have become discouraged by worn-out lands and poor crops and who desire to better their condition.

HERE IS OUR OFFER

We will sell you a fertile farm of 160 acres either for cash or on easy payments, and we will give you a **Guarantee Bond**, stipulating that if at the end of five years you are dissatisfied we will buy back the land at an advance of 50% over the purchase price.

For every dollar you pay us we will give you back a dollar and a half, and so on up.

ACT QUICKLY

Our lands are selling so rapidly that prompt action on your part is necessary if you would take advantage of this offer.

The price of Saskatchewan lands is constantly going up, and therefore the time to buy is now.

Write for complete information and descriptive matter "F" and do it before the choicest tracts are taken.

SASKATCHEWAN REALTY & IMPROVEMENT CO.

(Capital, \$250,000.00)

312 Jackson St., ST. PAUL, MINN. Regina, Saskatchewan, CANADA.

\$250,000. wanted everywhere.

FARM FOR SALE

A SPLENDID INVESTMENT.

202 ACRES, half mile north of court house, Marshfield, Webster Co., Mo.; three-fourths mile to depot. Express office and fine graded school, seven teachers. One of the best improved and productive farms in the county. Fine for dairy, blooded stock, grass, grain and fruits. Abundance of never-failing, pure spring water. Good buildings. Great bargain at \$36 an acre. Reason: old age. For particulars, address **WEBSTER** owner, **Matthew Long, Marshfield, COUNTY, Mo.**

FOR SALE.

Splendid Stock and Grain Farm of 360 Acres. 20 MILES from the Twin Cities, at \$42.50 per acre. Best of soil; land equal to Ia. or Ill., except in price. Fine buildings and improvements. Vicinity enjoys R. F. D., farmers' phone, creameries and railroad market towns. This farm is one of the best bargains in Minn. and must be sold by Nov. 1st. No commission to be paid. \$5,000 cash will handle it. No trades. If you mean business write for particulars or call upon the owner.
Room 601, Minn. Loan & Trust Building, Minneapolis, Minn.

LAND. LAND. LAND.
FINE Buffalo County farm of 720 acres for sale, on account of owner wishing to engage in other business. This is one of the finest farms in the state. All A No. 1 farm, wheat and alfalfa land. There are over 40,000 worth of improvements upon this land; 500 acres under cultivation, 80 acres in alfalfa, balance in pasture and wild grass meadow; located 1 mile from school, in one of the best neighborhoods in the county; 12 miles from Kearney, 5 miles from two stations. This land will pay 25 per cent on the investment. Will sell 560 acres in case purchase; does not want the entire tract. Price, \$60 per acre, good terms. Also a little home of 20 acres, good improvements, located only 3 miles from Kearney; the finest truck and garden land in the world. Price, \$2,000. For above land address owner, **W. H. GRASSMEYER, RIVERDALE, NEB.**

COME WHERE CROPS NEVER FAIL.

FREE information about irrigated land in the Gridley Colonies, Butte Co., California. No crop failures on irrigated land. Five to six crops alfalfa every season. Dairying and stock raising highly profitable. Peaches, grapes, figs and English walnuts give big profits. Abundant water for irrigation at low rates. A fertile and prosperous section, with good schools, churches and good roads. Two railroads. Good market. One hundred families have settled at Gridley the last year. Many more coming. Write for free printed matter. **Chas F. O'Brien, Gen'l Mgr., 1109 Post St., San Francisco, Cal.**

THE CHEAPEST LANDS

 Nov. 9, Northwest Breeding Company, Emmetsburg, Iowa.
SHORT-HORNS AND ABERDEEN ANGUS.
 Feb. 7-8, W. C. McGavock, Mgr., Springfield, Ill., at Chicago, Ill.

FIELD NOTES.

Some good Short-horn bulls are offered for sale by Mr. W. E. Cutler, of Corydon, Iowa.
 Some good Poland China boars are offered for sale by Messrs. Sandquist Bros., of Oakland, Neb.
 Mr. Albert Bell, of Lake City, Iowa, offers a splendid lot of Duroc Jersey boars and sows for sale.
 Mr. S. G. Collicott, of Lake City, Iowa, changes his claim date from January 15th to January 16th. Duroc Breeders take notice.
 The date of Wednesday, December 19th, is named as that on which Mr. E. R. Morgan, of Blue Rapids, Kan., will hold his next annual sale of Hereford cattle.
 Mr. J. C. Danner, of Yale, Iowa, a Duroc breeder, claims October 8th for his fall boar sale. Announcements will appear later. Thirty head are to go, by royal-blooded sires.
 Mr. John Hughes, of Belle Plaine, Iowa, announces a public sale of Short-horn cattle to take place October 6th. The offering will consist of about forty head of well-bred cattle.
 The Northern Iowa Land Company, of Independence, Iowa, wants farms in exchange for income property, residences, hotels, elevators, etc. Their advertisement appears on page 20.
 Mr. Claude Huffman, of Scranton, Iowa, claims January 29th for his spring brood sow sale. Duroc breeders will find the offering a good one, as Mr. Huffman knows how to raise good ones.
 If you desire to purchase a good Iowa farm write the Northern Iowa Land Company, of Independence, Iowa, for their new illustrated list of improved Iowa farms as per their advertisement on page 20.
 Mr. Wm. Beal, of Fairbanks, Iowa, is offering the Fountain Stock Farm, located four and one-half miles from Readlyn, Bremer county, for sale in his advertisement appearing on page 20 of this issue.
 We call to the attention of Duroc breeders that the claim date of Mr. W. C. Wicks, of Manilla, Iowa, has been cancelled for his sale, and Mr. John Weighton, of Auduhon, Iowa, will take his date, January 22d.
 We desire to call final attention to the combination sale of pure-bred cattle and hogs which is announced to take place at Algona, September 14th, during the Kossuth County Fair. The offering of cattle will include representatives of the Angus, Short-horn, Red Polled and Hereford breeds; the hogs will be of the Poland China and Duroc Jersey breeds. They are contributed from the leading herds of the county and will include many prize winners and the produce of prize winners. For catalog address Mr. C. T.

Chubbs, Algona, Iowa, after reading the advertisement on page 30.

A nice, growthy lot of Durocs to go under the hammer at Lorimer, Iowa, on September 20th. See the sale announcement of Mr. A. W. H. Orr, on page 26. Send for a catalog. Bids sent will be honorably handled.
 A good young Scotch bull is offered for sale by Mr. Delmar McCann, of Kennard, Neb. He also has a number of good, useful Scotch-topped bulls for sale. It will pay anyone wanting a bull to call and see these.
 Mr. John Justice, of Ankeny, Iowa, will hold a spring brood sow sale on February 15th. He had a number at the Iowa State Fair this past week, and while not there for premiums especially, Duroc fanciers found them good individually.
 Mr. J. A. Russell, of Cornlng, Iowa, the owner of the great Duroc Jersey boar, Tip Top Notcher, Jr., will sell two dandy litters sired by Proud Advance in his sale which will take place on October 27th. His advertisement appears on page 26 of this issue.
 Messrs. A. L. & U. S. G. Lynch, of Mt. Ayr, Iowa, bought of Messrs. Manley & Co. the fall boar, son of Orion and out of a Red Chief I Am sow, to head their herd. They will use him on Proud Advance and Ohio Chief stuff and he should add materially to their herd.
 Mr. D. W. Nickerson, of Marble Rock, Iowa, is offering registered Collies for sale in his advertisement on page 26. He states that Prairie View Hope, at the head of his stud, is a son of the famous champion, Wellesbourne Hope. If wanting to purchase a good registered Collie, write Mr. Nickerson.
 Mr. O. Osborn, of Maxwell, Iowa, known by breeders of Durocs over Iowa and other states, claims February 8th for his spring sow sale. Mr. Osborn sells thirty-five head. The following breeding represents the offering: Perfection, King, O. West by Royal Wonder; also a number by Long Tom pigs.
 Mr. A. L. Mossman, of Radcliffe, Iowa, proprietor of the Prairie Glen herd of Duroc Jerseys, will hold a boar sale on September 25th. About thirty-five head will go under the hammer. Boars sired by Tientzin, A. L.'s Advance, A. L.'s Chief and J. Wonder. The sale advertisement will appear soon. Watch for it.
 Mr. W. H. Rager of Crookston, Minn., offers to Homestead readers a well-cultivated 163-acre farm situated within one and one-half miles of that city. The farm is nearly all fenced, with 130 acres under cultivation, the balance being in timber pasture, with five acres of hog pasture. For further particulars write Mr. Rager.
 Mr. O. R. Phelps, of Taintor, Iowa, has a nice bunch of fall and spring stuff to go. He raises Poland Chinas exclusively and keeps them coming all the time. He has some fifty or sixty head ready to be placed in his fall sale October 18th, besides other good ones to go now. Better look over his card on page 26 and write for prices.
 Mr. S. P. Freed, of Ames, Iowa, the owner of Woodland herd of Duroc Jerseys, has an advertisement on page 26 that will be of interest to those desiring well-bred boars of exceptional quality. Mr. Freed has a number of boars that are full brothers to the first-prize junior yearling sow, Ruberta, ready to go. Better write him for prices. Always good stock to be had from this herd.
 A few good Duroc boars sired by a son of Malcom's Model and a son of Crimson Wonder I Am are offered for sale by Mr. Wm. Malcom, of Worthington, Minn. The latter boar is a full brother to the Allen boar that won first and sweepstakes at the Iowa State Fair last week. An order sent to Mr. Malcom will be the means of you getting just what you ask for and you can depend on it.
 A splendid stock and grain farm containing 360 acres and located twenty miles from St. Paul and Minneapolis is offered for sale on page 21 of this issue of The Homestead. The farm is considered one of the best bargains in Minnesota and must be sold by November 1st. For further particulars, read the advertisement the address of which is Room 601, Minnesota Loan & Trust Bldg., Minneapolis, Minn.
 We take space here to rectify a slight error in regard to the field note in last week's paper referring to the herd header used by Mr. F. M. Huff, of Afton, Iowa. It was stated that an Ohio Chief boar was the herd boar used. This should have read a Perfection Chief pig, a son of Perfection 23367, second at St. Louis in 1904 and first in eighteen months class at Iowa State Fair last year. Mr. Huff will start his card in these columns soon.
 Mr. S. S. McKibben, of DeSoto, Iowa, in furnishing copy for his advertisement on page 15 of this issue, writes: "Having decided to close out my flock of hornless goats, will sell does and bucks in lots to suit purchasers. Have bred the poll goats for over nine years and have bought some of the best bucks that could be found in the United States of that breed; but will offer them at prices that will close them out quickly. Oregon Joe, that heads my flock now, is large and very good, and is also for sale. Write me."
 Mr. U. G. Davidson, of Manson, Iowa, was smiling all over at the Iowa State Fair last week because Crimson Wonder Again, a son of his old sweepstakes boar, won first and sweepstakes at the state fair. Crimson Wonder I Am 2d, another son, won third in same class. Mr. Davidson has a nice bunch of pigs by the same sire which will be ready for the trade in October, and a few of these bid fair to equal anything he has ever raised. He has for sale a son of Orion that is sire of the dam of the sweepstakes boar.
 In our issue of August 30th, on page 11, if the reader will take the trouble to refer to it, will be seen the advertisement of "The Paint Man," Mr. O. L. Chase, 701 I Olive St., St. Louis, Mo. Mr. Chase will send two gallons of paint free to try. This paint man sells paint in a new way and in such a way that his customers are satisfied. His paints are not ready made, so to speak, but in one can is the pigment and in another the real old-fashioned oil, and the paint can be mixed fresh when needed. Any person who contemplates painting will do well to refer to this advertisement and see what Mr. Chase will do. Information about paints and painting in an economical way will be

furnished by writing Mr. Chase at the above address, mentioning The Homestead.

About twenty-five choice Duroc Jersey boars pigs are offered for sale by Messrs. Jos. Skinner & Son, of Bedford, Iowa. They are very reasonable in their prices and have good stock.

Mr. A. Latimer Wilson, of Creston, Iowa, writes that he has landed safely with his importation of Percheron, Shire and Belgum horses, and that he is still offering a choice at \$1,000.

Mr. Charlie Daws, of Harlan, Iowa, offers two good young Short-horn bulls for sale sired by Nonpareil King, the noted sweepstakes bull. These are red in color and are herd headers. He has a few others for sale, also some good Poland China boars.

Don't fail to attend the A. W. H. Orr Duroc sale, at Lorimer, Iowa, on Thursday, September 20th. Every individual a good one; some will make excellent herd headers. Send for catalog at once. Breeding given will please Duroc breeders. See sale announcement on page 26.

Mr. H. S. Allen, of Russell, Iowa, owner of the sweepstakes boar at the Iowa State Fair, starts his advertisement this week. If you want a Duroc Jersey boar sired by the greatest son of Crimson Wonder I Am, you will have to write for him at once. Mr. Allen has some good ones.

Mr. R. E. Williams, of Oakland, Iowa, will make a public sale of forty head of good, useful Short-horn cattle, at Oakland, on October 8th. It will include nineteen cows with calf at foot by his present herd bull, Grand Champion 151483, besides a good lot of yearling and two and three-year-old heifers. There will also be eight head of young bulls in the sale.

Messrs. J. W. Knowles & Son, of Craig, Neb., offer eight fat boars, two yearling boars and fifty spring pigs for sale. These are sired by Klever's Gay Lad, one of the best sons of the famous old boar, Thickset. The above firm have some of the best Tecumseh sows in the West and they also have one of the best Poland China herds. Try them with an order.

Messrs. White Bros., Perry, Iowa, offer some grandly-bred yearling Angus bulls for sale at very reasonable prices. One of these is a Blackbird, one a Trojan Erica, another is a double-bred K. Pride and one Queen Mother. They are all sired by Prince of Pilsen, a son of the \$2,000 bull, Cranewood Black Knight. Anyone wanting an Angus bull can get a bargain if they go after these at once.

Mr. Fred Ruehush, breeder of Chester White swine, of Good Hope, Ill., writes: "My herd is doing fine and I am having fine sales. I have several extra good September and October boars for sale yet, also a choice lot of February, March and April male pigs, weighing from 100 to 150 pounds. They have good bone, length, etc., and have been fed for breeding purposes, consequently will be of good service. I could also fit up several young herds of April and May gilts. Pedigrees furnished free. Prices reasonable."

Nearly every farmer is interested in guns. They are so handy on a farm and become an article of real necessity. The best is none too good and for that reason we direct the attention of our readers to the advertisement of the Marlin Firearms Company, 135 Willow St., New Haven, Conn., found on page 19. Every son goes through the gun-hunger period, and he is all the better off by being taught how to handle a good gun. No farm is complete without a gun as a protection against marauding animals. Send for booklet of information about these guns.

Everybody is interested in the shoe business, an interest that leads us to want the best. The price is an item in the purchase of shoes and when factory made shoes can be bought at factory prices direct it is an item that is worth looking after. On page 17 will be found the advertisement of Mr. W. L. Douglas, Department G, Brockton, Mass., which should have the perusal of all who are interested in good shoes. No matter where you live you will be interested in them and if your dealer does not have them, insist on being shown before making a purchase.

On page 10 will be found the advertisement of the Rex Flintkote Roofing, manufactured and sold by J. A. & W. Bird & Co., 86 India St., Boston, Mass., and 222 East Lake St., Chicago, which will interest all who are contemplating building or repairing. This roofing is one that gives satisfaction wherever it is introduced and is easily put on, is durable, economical and seems to just fill the bill. It requires but a moment to compute the economy in this roof when one knows how extremely high shingles are. If you are interested in roofing send for a free sample of this roofing and give it a close examination.

The telephone on the farm has come to stay and farmers are interested in getting the best. On page 19 will be found the advertisement of the Stromberg-Carlson Telephone Manufacturing Company, G-12, Chicago, Ill., who will send any person interested in telephones a book which should be in the hands of every progressive farmer in America. This book will contain all the information needed about telephones and it comes from the greatest independent house engaged in the business. The machines put out by this firm are well constructed, durable and economical and will be found money savers. Sit right down now and write, "Send me your fifty-two-page booklet, 'How the Telephone Helps the Farmer,'" using the above address.

We take pleasure in calling the attention of Homestead readers to the Duroc Jersey advertisement of Mr. W. J. Prather, of Russell, Iowa, which begins with this week's issue. Mr. Prather has a good herd, and a well-bred herd, and he always prices his pigs within reach of everyone. He writes as follows regarding his present crop: "The pigs I am offering are by such boars as Prather's Top Notcher, Leather Stockings 2d, Tom Davis, Top Notcher Again and Proud Advance. The last two boars need no introduction, but I wish to say a word about my herd boar, Tom Davis. He is a son of the noted Iowa State Fair winner, Ben Davis, and is out of an Ohio Chip dam, and I think he is as large for his age as any hog of any breed that ever trod on Lucas county soil. He has a nice head and ear, prominent eye, good color, bone and back, and is an

all round good hog. I have a splendid lot of young boars that I will price within reason and I will also sell some choice young gilts."

Messrs. Isaac A. Novinger & Sons, of Kirksville, Mo., are certainly offering some good bargains in land. If interested look up the advertisement on page 20 and write them today.

Mr. Samuel Farnsworth, of Middletown, Ohio, for six cents will send a forty-eight-page catalog about 15,000 ferrets that he is advertising for sale on page 15. These animals are good rat exterminators and can be used to good advantage in hunting rabbits.

Mr. C. Hutchens, of Amoret, Mo., in his advertisement on page 20 makes the assertion that Bates county, Missouri, is the best county in the state for corn, clover and wheat; that it is also a fine fruit country, with short winters. He has farms for sale. If interested write him for description.

A very attractive proposition in a half section of North Dakota land is that presented to The Homestead readers in the advertisement of Mr. Paul S. Stearns, of Westhope, N. D., which appears on page 20 of this issue. For further particulars read the advertisement and address Mr. Stearns as above.

Mr. B. G. Stark, of Livermore, Iowa, one of the oldest Short-horn breeders in the state, will make a sale of fifty head of Short-horns on October 16th. The females will be mostly of the Young Phyllis, Young Mary and Arabella tribes and will have from three to five Scotch tops on them. He will sell about ten young bulls in the sale.

On page 4 will be found the advertisement of the Kalamazoo Carriage & Harness Co., Box 214, Kalamazoo, Mich., manufacturers of buggies and harness. This firm are just now offering some special bargains in buggies and harness that it will pay to investigate. By dealing with them one buys direct from the factory. Write immediately for special prices and booklet of information.

Mr. August Sonneland, of Harlan, Iowa, and Mr. August Voeg, of Portsmouth, Iowa, bought Kruger's Lad, winner of first in his class at the Iowa State Fair last week. They purchased him of Mr. Ira Jackson before the show and he was the greatest pick-up on the grounds. He has every reason to be one of the greatest next year and he will certainly make a reputation for these two herds.

Mr. Thos. D. Hubbard, of Kimball, Kan., will furnish to Homestead readers map and printed information in regard to some rich Kansas farms which he has for sale in southeastern Kansas, 113 miles south of Kansas City and thirty miles west of the Missouri line. In his advertisement on page 21 of this issue of The Homestead Mr. Hubbard states that he will make prices away below their value.

If the reader of this note is afflicted with asthma, or if he has a friend to whom he could impart the information given in the advertisement of Dr. R. Schiffmann, of St. Paul, Minn., on page 7 of this issue, he would, in sending stamp for a free sample of Dr. Schiffmann's asthma cure, do himself or his friend a great kindness. This cure is used by inhalation and its action is immediate, direct and certain, and a cure is promised in all curable cases.

Mr. Samuel Bone, of Montezuma, Iowa, breeder of Chester White swine, starts his season's advertising in this issue of The Homestead. In furnishing copy Mr. Bone writes: "My hogs are in the best of health and doing fine. I have a nice lot of April pigs to offer to Homestead readers. Our Barred Plymouth Rocks are coming on in fine shape. I have some real beauties ready to sell at bargain prices." See his advertisement on page 26.

Mr. Reuben E. Sanders, well and favorably known all over the state as the proprietor of the Full Moon herd of Poland China swine, aims to satisfy his customers. Mr. R. D. Kelley, of Chatfield, Minn., a breeder of Poland China swine for a number of years, in sending to Mr. Sanders for an individual, gives the following testimonial: "Mr. Sanders, Dear Sir:—The pig came through O. K. He suits me all right and is just what I wanted; in fact, he ought to satisfy anybody, and I am very thankful to you for your good judgment and fair dealing." Breeders in need of Poland Chinas will do well to correspond with Mr. Sanders, stating just what kind of pigs they desire. Look up the advertisement appearing on page 23 of this issue.

Investors in real estate as a usual thing rely strictly upon their own judgment as to what future profits in their ventures will be. Large fortunes have been made in the West from such investments, however. There is an opportunity afforded to every Homestead reader now to make his money earn 50 per cent in five years if he takes advantage of the offer made by the Saskatchewan Realty & Improvement Co., of St. Paul, Minn., on page 21 of this issue. They make an unusual proposition in western Canada lands in the form of a guaranty bond to the effect that every acre they sell they will buy back at the end of five years at an advance of 50 per cent if the purchaser so desires. These lands are located right in the heart of the Saskatchewan country, the great wheat region of western Canada, and it can be proved by official facts and figures, so the advertisers aver, that this is the most productive wheat region

in the world, and that more bushels to the acre are raised than anywhere else. These lands produce good crops of all kinds of grain, and stock can be raised at the least expense, while the opportunities in dairying are exceptional. The climate is healthful, the water pure, and fuel plentiful and cheap. After reading the advertisement above referred to, if interested or contemplating purchasing lands anywhere, write the company for their complete information and "descriptive matter F."

Mr. B. R. Burt, breeder of Chester White swine, of Coggon, Iowa, writes: "I will be at the Linn County Fair, Central City, Iowa, on September 11th, 12th, 13th and 14th, with some of the representatives of the King B. herd of Chesters. If any reader of The Homestead is in need of anything in this line I would be pleased to have them call around and see my stock, or, if that is not convenient, write." Mr. Burt's advertisement appears on page 27 of this issue.

Mr. Ilarman Gruver, of Brewster, Minn., has a grand lot of Duroc Jersey boars for sale sired by Gruver's Orion. This boar is one of the best we have seen in Minnesota and he is the sire of the barrow that won first at the International and also the barrow that won first and second on dressed carcass. Mr. Gruver has some exceptionally good pigs and he is pricing these very low. Write him about a pig at once and you will be sure to get one of the best he has.

Mr. J. T. Scarff, breeder of Chester White swine, of Salem, Iowa, writes us as follows in regard to his stock: "I am on the market once more with some fine O. I. C. pigs, as good as I ever raised, and will depend on your paper for an outlet for them. They are extra good in bone and length and I will fill the description given to the best of my judgment and if the purchaser is not satisfied on arrival of pig I will satisfy him if he comes back. I expect the farmers' trade and will sell for the next thirty days at \$15 each, and they are better than I have had shipped from large breeders at \$30 to \$50 each."

Messrs. J. W. Pfander & Son, of Gravity, Iowa, will make a public sale of Poland China hogs at the above place on September 26th, and we want to say that there will be very few sales this fall that will be able to show as good a lot of stuff as they will offer. In this sale they will sell a daughter of Mr. Fred Rood's famous old sow, Giantess, and she will have a litter in the sale that have been considered by breeders one of the best that has been seen this year. The offering throughout is a high-class one and to those who are looking for size with quality we can recommend this sale as among the good ones of the year. Write for their catalog at once, so you will be sure to get one. Kindly mention The Homestead when doing so.

Mr. W. H. Jones, of Quimby, Iowa, will make a public sale of Aberdeen Angus cattle at his farm adjoining town on Thursday, October 18th, at which time he will sell forty-five head of cattle. There will be thirty-five females and ten bulls in the sale. Among the females there are three Blackbirds, two of them with calves at foot; two Ericas; four Prides, three of them with calves at foot; two Heatherblooms, with calves at foot; nine Janetts, four of them with calves at foot, and balance of the noted families. The calves are sired by Cherokee Blackhawk 59521 and Imp. Edward R. 61744. Cows and heifers of breeding age will be bred to Cherokee Blackhawk 59521 and Edwale 5748, sired by Imp. Edward R. 61744, dam Eline of Balmoral 61747, a Trojan Erica bull of rare quality and breeding.

On page 15 will be found the announcement of Mr. John Graham, of Eldora, Iowa, announcing for sale some unusually heavy-boned, large-framed, Oxford Down rams and ram lambs. Mr. Graham exhibited at the Iowa State Fair last week, winning third on two-year-old ram, first on pen of four lambs, the get of one sire; third on ram lamb, third on ewe. The above was all won in the open class. In the Iowa class he won first on two-year-old ram, first and second on yearling ram, first and second on ram lamb, first and second on ewe lamb, championship on ram and first on pen of four lambs, the get of one sire, Variety First. Mr. Graham has for sale some of the above-described stock that will be priced right to Homestead readers. We examined his stock and find that he has some exceptionally well-shaped sheep.

Messrs. Isaac A. Novinger & Sons, of Kirksville, Mo., write: "We are having some nice letters from parties who are looking for homes. They speak of rent being very high, which is true. Also others want to get close to a good market, good schools and churches, in fact, a live, up-to-date town. The land we are advertising is not only good, but very good, and lies right up against just such a town. The place is Kirksville, the Athens of North America. The people are prosperous and happy and they have a right to be, as such a thing as crop failure is unknown. Of course some years are better than others, but bear in mind the good old county of Adair has never gone begging. Now, please remember if you want to live in Missouri in a good county and right up close to a nice little city, just come over to see us. We will take pleasure in showing you these land bargains we are offering with no expense to you whatever. Also remember we own these lands and you need not pay all down if you don't want to. If interested

The lamp is yet to be made for which I haven't made a chimney that fits.

MACBETH on lamp-chimneys means fit and freedom from all chimney troubles.

A MACBETH chimney doesn't break from heat.

My Index gives a fuller explanation of these things, and may be had for the asking.

Address, MACBETH, Pittsburgh.

please write us and we will take pleasure in answering anything you wish to know in regard to these farms, and should you drop in town, just call us up and we will come right in after you. If you want to know anything about us we have four banks in our town. Just call in and ask them about us. When writing please state the paper you saw our advertisement in." See advertisement on page 20.

Mr. C. A. Steele, proprietor of the Rhine Valley herd of Poland Chinas, of Ogden, Iowa, is offering the herd boar, Defender 98447, for sale in his advertisement appearing on page 26 of this issue. Mr. Steele says: "Defender is for sale because I cannot use him longer. His sire, Corrector 26466, is too well known to need any comment, and his dam, Margaret 71726, was sweepstakes sow at Des Moines in 1901 and was one of the best sows in Messrs. Wynn & Maston's sale." Mr. Steele also has for sale or exchange a yearling by L's Keep On, also spring boars by Defender out of well-bred dams. They are lengthy, broad-backed, heavy-boned fellows, and the prices at which they can be purchased are named in the advertisement above referred to.

Mr. W. H. Grassmeyer, of Riverdale, Neb., has decided to sell his 720-acre farm, located within five miles of that city, which is only five miles from Kearney. Kearney is in the heart of the best farming district in that state and this farm is all fine, level land, with deep black loam and clay subsoil. The improvements on the farm amount to over \$10,000, there being a new eleven-room house, two large new barns, granary room for 15,000 bushels of grain, corn cribs for 10,000 bushels of corn, two chicken houses, two large hog houses, and a good feed yard. Mr. Grassmeyer's advertisement appears on page 21, from which further information can be obtained. Mr. Grassmeyer also has for sale twenty acres which have good improvements. He reports that this is one of the finest garden and little truck farms in the state.

We wish to call our readers attention to the advertisement of the Only Manufacturing Company, of Hawarden, Iowa, on page 3 of this issue of The Homestead. The patentee of the Only, Mr. Case Noteboom, is one of the largest hog raisers in northwestern Iowa and has repeatedly performed the feat of raising 1,000 hogs a year. In his booklet, "How I Raise 1,000 Hogs a Year" by a man who does it, he endeavors to sum up his experience in such a way that it will be a benefit to all interested in hog raising. Ten cents in stamps brings the booklet by return mail. The Only is the product of twenty-five years' experience in hog raising and is the simplest, most durable and most reliable hog and sheep waterer on the market and is guaranteed to run in winter, a feature possessed by no other waterer. Write for circulars, mentioning The Homestead.

Mr. A. F. Wilson, of Statesbury, Mo., is advertising Missouri farms (located in Vernon, Bates and adjoining counties) for sale on page 20 of this issue of The Homestead. Mr. Wilson lived for a number of years in Iowa and reports that he likes the Missouri country better in every respect than he did Iowa. He states that it is well watered, and for corn and tame grass the world cannot beat it; that it is also a fine fruit and vegetable country, with plenty of wood, and coal selling at \$1.25 per ton. Mr. Wilson spent time and money looking for a location farther south before he located at Statesbury, but concluded that it was the best all-round country he could find. He can refer The Homestead readers to Iowa men who have located there and who are well pleased. If any of our readers are thinking of buying farm lands in Missouri we would advise them to write Mr. Wilson for his list and any other information they wish. He will reply promptly and will send maps and particulars free. BUY LAND IN THE "PANHANDLE OF TEXAS."

No better time than now to buy in the "Panhandle of Texas," while the price of land is still low. The U. S. Immigration Company, of Kansas City, Mo., whose advertisement you will find on page 21, can give you valuable information as to land in Texas that is sure to increase in value within a few months. Excursion rates the first and third Wednesdays of each month. If you wish to learn about the opportunities for you in the "Panhandle of Texas" write to the above named firm, at the same time mentioning this paper.

HUNTER & SMITH'S JERSEY CATTLE.

Messrs. Hunter & Smith, the well-known breeders of A. J. C. C. Jersey cattle at Beatrice, Neb., are rapidly establishing a reputation as having one of the great herds of America. They breed from the best imported and home-bred stock, and are successful at the leading shows of the West. The only time they have ventured east of the Mississippi river was last winter at the national show at Chicago, and their cattle were winners in every class they were shown in. This year they are out at the great Iowa State Fair and at Hamline, Minn., and after their return home a review of the prizes won will appear in these columns. Just now this firm is offering young bulls

MOUNTAIN SECRET.

Red, calved Oct. 10, 1905. Bred and owned by A. C. Berry, Unionville, Mo.
Dams.
Sires.
Got by Imp. Mutineer
Sally 9th Prince Favorite
Imp. Sally Mountain Archer
Sally 6th Topsman
Sally 3d Romeo
Sally 2d Robinhood
Sally Darnlee

Mountain Secret, whose breeding appears above, is one of those thick, meaty Scotch bulls offered by Mr. A. C. Berry, of Unionville, Mo. Imp. Mutineer is undoubtedly one of the richest-bred Marr Missie bulls in America. This young bull promises good, he being an unusually well-balanced fellow, even in all his lines and has a head and horn that denote prepotency. Mr. Berry has other Scotch bulls got by Imp. Mutineer and all are the low-down, thick, meaty kind so much in demand. See page 29 for Mr. Berry's advertisement.

got by their champion show bull, Emanon and out of imported and St. Lambert cows. These are the butter-hed kind, are from heavy milking dams and Emanon is a sire that is known as a getter of heavy milking and high-testing females. It wanting a Jersey bull that is bred right and from stock that is noted for the production of high-class milkers Messrs. Hunter & Smith can supply your wants. See page 26 for their advertisement and when writing them kindly mention this paper.

A NOTED BOAR DEAD.

Messrs. Manlove Bros. & Norris, of Bowen, Ill., well-known breeders of Duroc Jerseys, have just had the misfortune to lose their principal herd boar, Big I Am. This boar was first at Illinois State Fair in 1904 and was being fitted for show this year. Big I Am was a breeding boar of unusual merit and much of his progeny has been picked up readily by best breeders. In losing Big I Am Messrs. Manlove Bros. & Norris have suffered a severe loss and have the sympathy of the Duroc fraternity.

HOMESEEKERS, ATTENTION!

Farmers looking for cheap lands, either for new homes or for investment, should not fail to communicate with Messrs. H. S. Crouse & Co., of Kansas City, Mo., who make a specialty of handling lands in the Panhandle of Texas. Cheap lands in Texas will not last long. A few hundred dollars will buy a good farm. You cannot afford to overlook the great bargains if you are interested in Texas lands. Read the advertisement of the above named company on page 7, and when writing kindly mention The Homestead.

ED HOLMES CLOSING OUT POLAND CHINAS.

On Thursday, September 27th, at his farm near Bedford, Iowa, will take place the closing out sale of Mr. Ed Holmes, one of the best-known breeders in southern Iowa. He goes to Canada and hence the dispersion of his herd. Everything goes—herd boars, brood sows and spring gilts and boars. His two herd boars, Mo. Perfection and Big Shamrock, will be included, also his interest in R's Cloud. It will be one of the opportunities of the year to get something good, as he is selling stuff in this sale that he has never priced before. Write him for catalog at once.

OHIO SUNSHINE BOARS.

With this issue begins the Poland China advertisement of Messrs. Wm. Ube & Sons, of South Omaha, Neb. This old, reliable firm have been breeding Poland for the past twenty-five years and have always produced the very best. At the head of their herd stands the splendid boar, Ohio Sunshine 2d 26447, a son of the great Ohio Sunshine, and they have a good lot of pigs sired by him. He is assisted by Fancy Perfection 28439 and it is hard to find two better boars in one herd. They have about seventy-five pigs sired by these two boars, out of a splendid lot of brood sows and no one need hesitate sending them an order. A representative of The Homestead has seen these pigs and can say to our readers that they are not only good, but the price is very reasonable. Those who may want a Sunshine or a Perfection boar had better write the above firm at once. Kindly mention The Homestead when writing. SAVE \$100 TO \$300 IN THE COST OF YOUR FUEL IN THE NEXT THREE TO FIVE YEARS.

This great saving will furnish two or three rooms in your home in elegant style. It will repaint and repair your house or barn or build an addition to either. It will buy the best piano made or send your son or daughter to college for a year. Fuel costs more each year and is getting to be a serious problem. Let us send you a copy of our free pamphlet, "Scientific Combustion" which will solve it for you for all time to come. It will teach you in one short lesson how to heat your home twice as comfortably at one-half the present cost. The truth of our claims will be guaranteed by your best home dealer, a man you know personally. Write us today asking for this valuable pamphlet. It is absolutely free. Address Cole Manufacturing Company, 3234-3244 South Western Ave., Chicago, Ill.

SHROPSHIRE RAMS AND EWES FOR SALE.

On page 26 of this week's Homestead will be found the Shropshire advertisement of Messrs. Daniel Leonard & Son, of Corning, Iowa, who offer a very choice lot of yearling rams and ewes for sale. They have imported and home-bred rams for sale suitable for flock headers. They have just received their Canadian importation of ewes and they are as good as have ever crossed the border. These were selected by Mr. W. H. Beattie, of Canada, the well-known judge who officiated at the great St. Louis show, the International, Toronto and Syracuse. These ewes are decidedly strong in quality and are what American breeders are now looking for. They also have three Buttar rams, selected from an importation of seventy head, and they will certainly add much strength and quality to the Leonard flock. If any of our readers want an imported or a home-bred ram or registered or unregistered ewes, they had better write Messrs. Leonard & Sons at once. Kindly mention The Homestead when doing so.

A. F. RUSSELL'S SALE OF DUROCS.

On Thursday, September 20th, at his farm five miles from Savannah, Mo., Mr. A. F. Russell, of Savannah, Mo., will sell seventy-five head of Duroc Jerseys, the tops of his 1906 crop of 140 head. Mr. Russell and his Duroc Jerseys need no introduction to the breeding fraternity and about all that is necessary is to say that he has the goods and will be prepared to deliver them on September 20th. A strong array of herd boars appear as sires, chief among these being Tip Top Notcher, the World's Fair champion; the \$2,000 Ohio Chief; Buddy K. IV., champion of Illinois State Fair last year. Lot 1 of the catalog is a yearling daughter of this boar that should sell up in the three figures. She is a show sow and is listed as an attraction. A litter of fall pigs got by Lafollette and out of S. E.'s Model will furnish some great material for breeders. Two are boars and four are gilts. S. E.'s Model, their dam, is a litter sister to the \$1,000 sow sold at Messrs. Sheldou & Sons' sale last spring. Other litters are by Russell's Duroc, Iowa King, Iowa Gem and other good sires. Mr. Russell says in his cat-

alog that this will be the best offering to go through a sale ring in the West this season, and that he wants you to come to the sale and see. Catalogs are ready and will be mailed for the asking. See page 25 and when writing kindly mention The Homestead.

BAXTER'S DUROCS.

Mr. Ed A. Baxter, of Pawnee, Ill., proprietor of the Pawnee herd of Duroc Jerseys, is offering a number of good spring and fall boars for sale sired by Buddy K. IV., the champion boar at Illinois State Fair 1905; Tip Top Notcher, grand champion boar World's Fair 1904, and other noted sires of the breed. Write him for prices, kindly mentioning this paper, as per the announcement on page 30 of this issue.

FREE SAMPLE OF AMATITE ROOFING.

If you have an Amatite roof you don't need to climb up every year and touch it up with paint, or give it a complete coating to prevent leaks. Amatite has a mineral surface that takes the place of the paint on the ordinary roofing. So your Amatite roof will take care of itself year after year without any worry or expense on your part. If you have never seen this roofing, send to the makers for the sample, which they are always glad to send on request. Anyone can lay it. Address the nearest office of the Barrett Manufacturing Company, Amatite Dept., New York, Chicago, Cleveland, Allegheny, Kansas City, St. Louis, Minneapolis, Philadelphia, New Orleans, Boston and Cincinnati.

SECKMAN'S CLOSING OUT SALE.

Breeders and farmers throughout the middle West should not overlook the advertisement of Mr. Geo. W. Seckman, of Ripley, Ill., which appears on page 31 of this issue. Mr. Seckman is one of the leading Duroc breeders of the country and the dispersion of his famous Gold Dust herd is one of the most important events of the season. The recent sale of Tip Top Notcher, the grand champion boar at World's Fair in St. Louis, to Messrs. Thomas & Hogsett, of Golden, Ill., and Fagan, Browning & McCabe, of Hersman, Ill., for \$5,000, and the fact that a number of his get, in fact, the bulk of the entire offering being by Tip Top Notcher, makes this one of the most important sales of the year. Write Mr. Seckman for catalogs and other information, kindly mentioning this paper.

TWO YEARLING DUROC JERSEY BOARS FOR SALE.

Where is the breeder that is looking for a herd boar? Two good ones are offered for sale by Mr. W. W. Wheeler, of Harlan, Iowa. One of these is Carmine Wonder and the other is Scarlet Wonder. One is sired by the great Tolstoy, the sire of Crimson Wonder, and also the grandsire of the sweepstakes boar at the Iowa State Fair this year; the other is sired by Pericles, a son of Orion and out of a Tolstoy sow. Mr. John Blain, the well-known Poland China breeder, while visiting Mr. Wheeler a few weeks ago, remarked that these two boars were the two best Duroc boars he had ever seen. Who wants them? The man that buys them will have to move quick, as they are good enough to not remain unsold very long.

THE PETERSON CLOSING OUT SHORT-HORN SALE.

One of the most important Short-horn sales that will be held in southern Iowa this year will be the closing out sale of Messrs. Peterson Bros., at Lamoni, on September 27th. They will sell sixty head and twenty-eight cows will have calf at foot. There will be quite a number of Scotch cattle in this sale and some imported cows. They are selling some cows in this sale that have sold for thousands of dollars when Short-horns were selling high a number of years ago. One of these is Imp. Crescent 8th and another is Imp. Princess Fame. There will be two Scotch heifers in the sale out of these cows, besides a number of others. The most of their cattle are well Scotch-topped, but they are also selling a number of absolutely pure Bates cows and one pure Bates bull. There will be several young bulls and their three-year-old herd bull, Gay Hampton 212202, a son of the great Hampton's Best. The sale is made necessary, owing to one of the brothers disposing of his farm, and here will be an excellent opportunity to get some good cattle. There will be a number of young bulls in the sale and some of these are of serviceable age. Kindly write for catalog and mention this paper. Watch our next issue for further particulars.

LAST CALL FOR THE HORNING SALE.

The real bargains in way of Duroc sows and spring pigs will be the dispersion sale at Liberty, Neb., on September 12th. Mr. Horning will offer the entire herd and we believe this sale will be one of the best to be offered in the state of Nebraska this fall. The opportunity to get a few royally-bred matured sows that have proven their worth is now on. These same sows will have litters by side on sale day. You will not lose out on them not farrowing or losing the litter, as they will have the produce in sight. Large, roomy spring gilts and boars are also noticeable. A few fall boars and gilts bred in the cream will also be offered. The real bargain of the sale will be found in Challenger by Duroc Challenger. Mr. Horning would not think of offering this grand hog were it not for his change of location. It is very hard to find a good hog to go at the head of your herd. You have tried several and have not been as well satisfied as you would like to be. This hog offered has his produce to show for him and he will do well on the most work and is more reliable. In looking over the lot of sows we find those representing the blood of such noted boars as Improver 2d, Crimson Wonder, Tip Top Notcher, Duroc Challenger and others as well bred. Some of the matured sows are such as would be very much noticed if taken to the fairs in condition. We do not know of a stronger offering when we summon the entire lot together. You get the same sows that have been watched for some time and have proven themselves strong enough to avoid the culling pens. Mr. Geo. Horning has always been very careful in this department and the consequence shows a herd of well-balanced hogs with as much royally-bred things as you will see. Two very strong fall boars are going to be offered, one sired by Ripley's Top Notcher. The sale will be held at farm and all breeders from a distance will be taken care of. The auctioneers

PILES NO MONEY TILL CURED.

FISTULA, Fissure, Contraction, Ulceration and all Rectal Diseases treated on a positive guarantee of permanent cure.—Established 29 Years.—See thousands of prominent names with statements that they paid nothing till satisfied of a cure in our free 352-page illustrated treatise, also our 132-page illus. book for women; both sent free and postpaid.
DRS. THORNTON & MINOR, 3969 Olive St., St. Louis, Mo., and 1010 Oak St., Kansas City, Mo.

for this sale will be Cols. F. E. Kinney and Jas. Spearman. Any bids sent to these gentlemen or to Mr. G. W. Segrist, representing The Homestead, will be honorably handled.

McWILLIAMS' DUROCS.

With this week's issue we begin the advertisement of Mr. M. A. McWilliams, Wall Lake, Iowa, owner of the well-known Sunnyside Farm. In writing about his herd he says: "I never had a better lot of boars and gilts on the farm than I have this year. I have an extra fine litter of three bears and four sows, sired by my \$200 herd boar, Orion J., and these are out of a full sister to Crimson Wonder. I will not hold a fall sale this year, but will have a grand lot of sows to offer the boys in my February sale. In the meantime I will be pleased to price March and April boars sired by Orion J., Crimson Wonder Jr. and Gilbert's King. I am also offering a very choice young Short-horn bull for sale."

TREATMENT FOR HOG CHOLERA.

The Zenner Disinfectant Company, of Detroit, Mich., announce that they have been carrying on an extensive series of experiments for the purpose of finding out some remedy for hog cholera. They have ascertained that rectal injections of 2 per cent Zenoleum solution will destroy all germs of disease in the intestines and thus allay the inflammation that has been set up. By separating hogs that apparently are attacked with this much-dreaded disease and treating in this way its spread throughout the herd is at once checked and even the sick animals, if taken in time, are saved. It is advised in addition to this that all hogs be dipped or sprayed with a 3 per cent solution of Zenoleum and that their quarters be thoroughly disinfected with solution of similar strength. The cost of this treatment is very slight, and in view of the fact that cholera is breaking out here and there in various parts of the corn belt we have no hesitation in advising our readers to take the matter up with this company. It has been known for years that Zenoleum is a most excellent disinfectant—one that is deadly to germs, but harmless to animal tissue, skin or hair.

A GOOD DIP ON TRIAL.

There never was a time in the corn belt when there was a greater necessity for using a good dip around live stock quarters than at present. Nearly all live stock diseases are due to the presence of a germ, and it stands to reason that any disinfectant that will kill the germ without injuring the animal will be a sensible thing to use. In this connection we have no hesitation in recommending Dipolene, manufactured by the Marshall Oil Company, of Marshalltown, Iowa. This company offer to refund the purchase price of two gallons of dip if it fails after thirty days' trial to do just what is claimed for it. Dipolene kills lice and mange, and contributes to healthfulness of both skin and hair of all farm animals. It destroys germs of every description, including those that cause cholera and swine plague. Its free use around wallows and hog quarters and a little of it occasionally in the swill will make any herd practically cholera and swine plague proof. Our readers are taking no chances in ordering two gallons of this dip, because, as said before, money will be refunded after it is given a thorough trial if not found satisfactory in every way. The advertisement will be found on page 6. Address Marshall Oil Company, Dept. Y, Marshalltown, Iowa.

PRAIRIE FARM DUROCS.

We wish to call the attention of our readers to the forthcoming Duroc Jersey sale of Messrs. E. M. Castle & Son, of Joy, Ill. Messrs. Castle have been breeding thoroughbred stock for a number of years and have taken special pains to secure the best breeding stock obtainable when making selections for their herd. During the past year some valuable additions have been made to the herd. At the present time the herd boars in service are DeSoto's Model 35131 by DeSoto 15155, dam Kansas Beauty 66200, sired by Loudens Jumbo by Jumbo Red. About one-half of the spring pigs are sired by this boar, and several of them will be included in the October sale. Another boar which has done good work in this herd is Prairie Acrobat 46685, he by Acrobat 37675 by None Such, the sire of the noted boar, Hanley, first at Ohio and Indiana State Fairs in 1905, and the sire of many good pigs in the herd of Messrs. McNeil Bros., of Bowen, Ill. The dam of Prairie Acrobat is Sarah Muller 96594 by Sam Jones, a boar formerly owned by Messrs. T. W. Stoner & Son, of Henry, Ill. Iowa Plummer 30357 by Royal Plummer 21015, dam Clover Belle 60750 by American Royal, is a boar which has been used in the herd with success. A very good litter by DeSoto's Model is out of the sow called Stoner's Girl 116326, she by Top Notcher's Rival by Top Notcher. This sow was top sow in sale of Messrs. T. W. Stoner & Son last fall, and raised a fine litter of three boars and four sows, some of which will go into fall sale. Another very good litter is out of Roycroft Interstate 45453 and by DeSoto's Model. This sow was sired by Roycroft Interstate, he by Sensation, and has proven himself one of the best breeders to be found. A fall boar and a few fall sows which are reserved for fall sale are out of Prairie Winner 93434, she by Indiana 20763, dam Miss Garnett II. 34873. The litter is by Iowa Plummer, the boar mentioned above. A good litter of seven, five boars and two sows, is out of Prairie Top Notcher 116332 by Tip Top Notcher, dam Goldie O. 40th. The litter is sired by Champion Paul, one of the best sons of Oom Paul.

A litter by Proud Advance and out of Coral Queen 116828, she by Parnell Banner, will attract attention sale day. Litters by Tip Top Notcher and other good sires will be found in the offering. If you are not on Mr. Castle's mailing list write at once for catalog which will be furnished as soon as printed. Kindly mention this paper when writing and watch these columns for further particulars.

CHESTER WHITES AND SHORT-HORNS.

Mr. A. A. Rogers, of Inwood, Iowa, the well-known Chester White and Short-horn cattle breeder, writes: "There are over fifty Chester White boars now on the farm and the largest number of good herd headers that can be found in one place in the Northwest. A bunch of these will be at Sioux City Interstate fair where I will be pleased to meet all of my patrons. The herd is in best of health and general condition. The herd boars, Seducator and Rising Sun, have not been overladen with fat for show, but will be on deck at the Interstate in their everyday clothes. Bacon Bess, the aged sow, farrowed thirteen pigs April 4th and raised and nursed eight big, strong fellows. She therefore is not in as high show finish, but for strength of back, spring and length of rib, good feet and legs, evenness of body throughout, old Bess is hard to equal. I also have a fine herd of Short-horn cattle. The Scotch families represented are the Mysle, Victoria, Imp. Empress, Augusta and Imp. Generosity. The American families are Arabella, Mazurka, Rosemary and Strawberry. I now have on hand one Scotch and three Scotch-topped bulls for sale. Would like to see or hear from Homestead readers." Kindly write him and mention The Homestead.

W. T. GARRETT & SONS TO SELL A GREAT LOT OF POLAND CHINAS.

A representative of this paper has just visited the herd of Poland Chinas owned by Messrs. W. T. Garrett & Sons, of Maryville, Mo. We inspected the offering for their September 25th sale and when we say that on this date Messrs. Garrett & Sons will sell the greatest lot of Poland Chinas (boars and sows) that we have ever seen go through a sale ring, we do so believing that all who come to the sale will agree with us. Messrs. Garrett & Sons have listed sixty-one head for the sale. Twenty-one are spring boars, four are fall boars, fifteen are fall gilts—stick a pin here, Mr. Breeder—twenty spring gilts, and last, but not least, comes the full sister to Blain's Tecumseh, the boar that did so much for Mr. John Blain, of Pawnee City, Neb. That Messrs. Garrett & Sons are able to make such an offering is not through luck, but because Mr. Garrett, senior, has for better than thirty-five years bred for a type, using every precaution to keep out defects and yet maintain size and quality. Twenty years ago—and this may seem a long time to the younger breeders—Mr. Garrett bought Doyle's Tecumseh and Allerton, two boars that became noted from coast to coast. From these boars a line of sows were raised, herd boars were produced and today we find that the Allerton-Tecumseh sows are among the grandest producers Mr. Garrett has. Later boars and the sires represented in the sale stuff have proven fully as good breeding propositions as did Allerton and Doyle's Tecumseh. Of these and their get more will be said next week when Messrs. Garrett & Sons' advertising starts.

MANLEY & CO.'S FALL DUROC JERSEY SALE.

Or September 18th, at Lyons, Neb., Messrs. Manley & Co. will make a fall sale of Duroc Jersey boars and sows and this promises to be one of the leading sales of the fall season. They are selling thirty-five head, among which will be thirteen sows. The rest will all be boars, and they are including some of the best things they have in the herd. They will be sired by Young John, the boar they lost a few weeks ago and a boar that was one of the best they have ever used in their herd. Some of the best sows they have out in their show herd this year are sired by him. Others will be sired by their famous old Orion and this is about the last chance to get any of his get, as he has crossed over to the yonder side. There will be a number in the sale sired by Belle's King, a son of the great Nebraska Belle, and a litter brother to the noted boar, Proud Advance. The sows that they are selling in this sale were selected because of their individuality and they are bred to the two noted boars, Proud Advance and Junior Jim. The latter boar was second at Des Moines last week in what is considered the strongest aged class that was ever shown in this country. By many he was placed first over the boar that got it, but he was that it may, he is one of the great boars of the year. He has the size and the stretch that so many like, and he is one of the toppest boars seen at the shows this year. A sow bred to him will not be out of place in any herd, and the time and place to get one will be at the Manley sale. Some of the sows will be bred to Proud Advance, considered one of the greatest boars of the breed, and as a sow getter he has no equal in the Duroc Jersey breed today. Several sows in the sale are by Orion, and here are the blood lines that produced the great sweepstakes sow, Alix II., and numerous other good ones. An Orion sow bred to Proud Advance produced pigs that topped ten sales last winter. The brother to Proud Advance that goes into this sale is a good proposition for some breeder who is looking for a herd boar. In some respects he is as good as his brother, and he

is a good breeder. There will be another good boar in this sale out of Nancy, the sweepstakes sow, and he weighs 373 pounds at eleven months. There will be about eight Orion boars in the sale. It is a good offering throughout. Write for a catalog. It is now ready for distribution and will be sent on application. Kindly mention The Homestead when writing.

THE ZALIA STOCK FARM DUROC SALE, SEPTEMBER 20TH.

On September 20th, at Lorimer, Iowa, Mr. A. W. H. Orr, proprietor of the Zalia Stock Farm, where good Duroc Jersey swine may be had at all seasons of the year, will hold his annual fall sale. Mr. Orr will take out a draft of thirty nice boars from his herd and give the breeders an opportunity to buy some good blood at their own prices. There will be three fall boars go under the hammer, sired by Pilot Onward 2241. The dam of these three individuals is known as Glossie J. 54042, she by Sheldon's Prince and out of Queen Olive 44394. These are very large, heavy-boned pigs and come out of a litter of ten. There will also be two fall boars, sired by Pilot Onward and out of Surprise Again 104178. These also come from a prolific family, being taken from a litter of sixteen. There is one choice boar, sired by King Fox 32263 and out of an Orion-bred sow, which will make a good herd header for some progressive breeder. Mr. Orr will also sell a number of spring boars—the large, growthy kind, having practically the same breeding as the fall boars mentioned above. Two of these spring pigs, which will go under the hammer, are sired by Perfection Advance 41429 and out of a Princess Perfection sow. At the same time about a dozen sows with either litter at foot or safe with pig will go. The number of sows included will not be many, but they will all be good individuals, two of them being yearling sows and the balance fall gilts. A representative of The Homestead recently inspected Mr. Orr's herd and found them to be prolific individuals. The breeders who attend this sale will not be dissatisfied. Look up the sale announcement, which appears on page 26 of this issue, and send for catalog which describes them fully. When writing kindly mention The Homestead.

THE LAST CALL FOR THE WHITE-METZGER POLAND CHINA SALE.

The opening sale of the season and one of the very best of the year, will be that of Messrs. Geo. H. White, of Emerson, Iowa, and E. M. Metzger, of Fairfield, Iowa, at Council Bluffs, Iowa, on September 15th. Twenty-five head will be cataloged from each of these two great herds and they will be among the very best they have including many of their show winners. Mr. White will sell his yearling boar, Contractor, fourth-prize hog at the Iowa State Fair in 1906, and he is one of the good things in the sale. He also sells Standard Perfection, third-prize boar at Des Moines in 1905. He puts in a good under year boar in Correct Tecumseh, a son of Proud Corrector and a litter sister called Correct Lady. These are out of a Chief Tecumseh 2d dam and are extra good. Perfection I Know 3d is the March pig that he won fourth on at Des Moines last week and he also goes into this sale. He puts in a grand lot of sows and gilts that were either winners themselves or are descendants of winners and his offering is one of the best he has ever put up for sale. A large per cent of Mr. Metzger's offering will be sired by his sweepstakes boar, Winning Dude, now considered the best son of old Nemo L's Dude. Mr. Metzger never brought out any better stuff than he is offering this year. The Nemo L's Dude-Winning Dude stuff have the reputation of being very toppy, with plenty of size, and he will have the get of both of these great boars in this sale. One of his best boars in the sale will be Dude's Winner. He headed the yearling herd at Lincoln last week and he should go to head some good herd. A full sister of his goes into the sale, called Dude's Darling, and Mr. Metzger says she is one of the best he has ever had in his herd. Dude's Fashion is a good yearling sow and Sensation Queen is a great brood sow and is the dam of four of the best pigs he raised this year. He sells a very choice litter by Nemo L's Dude in this sale and another litter by Winning Dude that is hard to beat. The White-Metzger sale will have some of the good things of the year in the sale and Poland China breeders can well afford to attend the sale. Write for catalogs to either of the consignors and please mention The Homestead.

W. A. MERRYMAN'S DISPERSION SALE OF PURE-BRED AND HIGH-GRADE HEREFORDS AND WELL-BRED HORSES.

With this issue we start the advertisement of the dispersion sale of Mr. W. A. Merryman, of Laredo, Mo. Hereford cattle, both pure-bred and high-grade, have been bred by Mr. Merryman for about fifteen years, and his herds today are as representative herds as one finds, both from the standpoint of individual excellence and breeding. The herds have been the source of much profit and pleasure to Mr. Merryman, but his increasing business interests in the growing town of Laredo require so much of his time that he cannot devote the time necessary to maintain the herds to their present high standard; hence, the dispersion. The herd of pure-bred cattle consists of forty-five head, eight bulls and thirty-seven females, headed by the bull, Prince, got by the prize-winning Prince Rupert, that made the circuit of 1905, he by Beau Donald. The dam of Prince was a daughter of Beau Donald. Thus it may be seen that Mr. Merryman's herd bull is bred right and as an individual and a sire he is not found wanting. The seven younger bulls are yearlings past, and were got by Kruger, Mr. Merryman's former herd bull. Kruger was got by Improver out of a daughter of Corrector. Few better-bred bulls are found, and Kruger got many good things for Mr. Merryman that would, had they been fitted for show, made such a showing as would have been a credit to their sire and the herd from which they came. These young bulls show that they come by their individual excellence through inheritance, and the man hunting Hereford bulls of the head-bred sort should not fail to be with Mr. Merryman on sale day. In females he has a very superior lot of breeding matrons as is shown by the seventeen calves that sell with dams. These are the get

of Kruger and show that he was a breeding bull of unusual merit. The cows not having calves at foot are soon due to calve and practically all are rebred to Prince, thus giving buyers an opportunity to buy three head as one lot. Mr. Merryman has not listed an inferior animal or a shy breeder. All such have always been sent to the feed lot, as Mr. Merryman takes much pride in showing the visitor that no drones are allowed in the herd. More will be said of the pure-bred herd in later issues, at which time we hope to have a catalog. The herd of high grades consists of thirty breeding cows, thirty yearlings, eighteen steers and twelve heifers, and thirty calves. Right here is where the producer of beef should stick a pin, as these cattle are the result of fifteen years' experience and work. The best pure-bred bulls have done service here, and the passer-by thinks when seeing this grade herd that he is looking at one of as fine herds of pure-bred Herefords as is found in Missouri. The brood cows are the even-fleshed, broad-backed kind and every one has individual merit. All are well along in calf and the man who buys of these will find he has the right kind. The yearlings will make car lots that will top most any market, as have the car lots from this herd for the past six years at Chicago. This alone is recommendation enough for the herd. The thirty calves are a grand lot; in fact, Mr. Merryman does not think he has ever produced their equal. They have quality and substance and should not lack for buyers. The horse end of the auction consists of ten head, all well-bred drafters and drivers except the saddle pony, which is undoubtedly one of the greatest saddle ponies in northern Missouri, being well broke for ladies or children. Individually he is near perfect. The high-grade cattle and horses will be sold in the forenoon, the afternoon being devoted to the pure-bred cattle. See page 30 for advertisement and write today for a catalog, mentioning this paper.

CLYDESDALE STALLIONS AND MARES, SHORT-HORN CATTLE AND DUROC JERSEY SWINE.

On Tuesday, September 11th, Mr. O. V. Perry, of Riceville, Iowa, will disperse his entire holdings in the above class of registered horses, cattle and swine. The Clydesdale stallions and mares represent the very best blood on either continent. The herd of horses was founded on the best imported stock ever brought to this country by that veteran breeder and importer, Mr. N. P. Clarke, of St. Cloud, Minn. From these Mr. Perry has propagated a herd of some seventeen head, recognized as the best Clydesdales in Iowa, but owing to misfortunes beyond his control he now finds himself placed in the situation where he must release all labors and cares. The loss of his wife, coupled with his own continued sickness, makes this course imperative. There will be an opportunity to buy a class of stock at this sale that is seldom offered, in fact never offered except in dispersion sales of this character. Hence the wise farmer and breeder who contemplates the purchase of stock of any of the above breeds in the near future will certainly do well to keep this sale in mind. It is conceded by those who are best acquainted with Mr. Perry and his operations that his stock is not only the best in his locality, but second to none anywhere. The Short-horn cattle that he is offering number some fifty head and are of the practical, useful farmers' sort. It is an all-red herd, without a drone or barren cow in the lot. The milking qualities of this herd have been carefully observed and the young bulls have all been taken at a tender age by farmers and breeders who wish to strengthen the milking qualities of their herd. The Short-horn contingent is exceedingly valuable from this standpoint and that of individual excellence, the latter being the motto of Mr. Perry in all his live stock undertakings. The herd is exceedingly valuable by virtue of its being such a working herd. There will be sixteen calves at foot by sale day and the remainder of the cows will drop calves by January 1st. Of the Duroc Jersey swine little need be said other than the fact that there will be eighty head sold, all of the pigs by Advance Boy, a son of the world's great Duroc Jersey boar, Advance. In the catalog Mr. Perry has abbreviated much in the way of pedigrees. This is particularly true of the Short-horn cattle and Duroc Jersey swine. Nevertheless, every animal to be sold is registered or eligible to registration. The Clydesdale stallion that heads the herd of horses is one that could not be purchased at any price were Mr. Perry continuing in the business. We refer to Heir of Fame, a bay stallion seven years old, imported by Mr. N. P. Clarke. He is a son of the world's greatest Clydesdale stallion, Baron's Pride. He is considered from a Clydesdale standpoint a perfect horse and as a sire of high-class colts he stands without a peer. All of the mares in this sale are bred to him or have foals by him. The Duroc Jerseys will be sold in the forenoon, the horses and cattle after dinner. Riceville is on the Chicago Great Western Railroad, between Oelwein and St. Paul. Mr. Perry earnestly desires parties to come the day before the sale and look over the stock carefully, being his guests at the Burke Hotel, which by the way, is one of the newest, most modern and up-to-date hotels in northern Iowa. Its genial proprietor, Mr. Burke, is a great admirer of live stock and will entertain visitors in a whole-souled manner. We trust none of our readers will forget the date, September 11th, and if they have not already done so, will send for a catalog at once, mentioning The Homestead when making application.

THE WISNER SHORT-HORN SALE.

One of the most useful lots of Short-horns that will be sold this year in the West will be included in the combination sale to be held at Wisner, Neb., on September 20th. The cattle that go into this sale will be from the herds of Messrs. S. S. Hall, Pender, Neb.; J. R. Manifold & Sons, Theodore Serck and J. O'Kane, of Wisner, Neb. There will be forty-nine head in the sale and fifteen of these will be bulls, including Merry Lad, a son of Imp. Merry Hampton. Mr. Hall is the largest contributor to the sale. He is selling thirty head, all cows and heifers except one young bull. He will sell fifteen cows with calf at foot by Oliver Gloster, a former herd bull, and the most of his females will be bred to his present Scotch bull, Morning Star 243730. The most of his

offering belong to the Young Phyllis, Adelaide, Ired Rose and Caroline families and they are an excellent lot of broad-backed, deep-fleshed and easy-keeping Short-horns. The fact that he will have fifteen calves at foot demonstrates he has a breedy lot of cattle. Some of these have several good Scotch tops on them, and the offering as a whole will compare with that of any other sale held elsewhere. Messrs. J. R. Manifold & Son sell eight very choice young bulls, all sired by Nonpareil King. Their offering of bulls are not only good, but they show up exceedingly well for Nonpareil King as a sire. One of the best bulls in their offering is Nonpareil Count. He is sired by Nonpareil King and is out of a Baron Victor 18th dam. He is a rich red in color, as are all the rest in their consignment, and we have seen many poorer bulls in show herds this year. He is one of the good things in the sale. The rest of their bulls are much the same breeding and are well developed for their age. Mr. Serck sells his herd bull, Merry Lad, and two young bulls sired by him. This five-year-old son of Merry Hampton has done good service in the Serck herd, also in the herd of Messrs. L. Mason & Son, formerly of Pierce, Neb. We have known this bull ever since he came to Nebraska and we know him to be a good sire. Mr. Serck sells seven females altogether and some of them will have calf at foot by Merry Lad. Mr. O'Kane sells one young bull. He is a son of the Scotch-topped bull, Merger, and was bred by that old-time breeder, Mr. James Gregg, of Seneca, Kan. He was considered one of the good bull calves in the closing out sale of Mr. Gregg. The entire offering that goes into this sale will be of a very useful character and there will be plenty of good females and a lot of good bulls. Kindly write any of the breeders for catalogs and please mention The Homestead.

VON SEGGERN'S HEREFORD SALE.

On Friday, September 21st, at Wisner, Neb., will occur the Hereford sale of Mr. J. G. Von Seggern. He will dispose of forty head. Of these thirteen head will be bulls, ranging in age from eight to twenty-four months. Eight cows will have calf by his present herd bull, Columbus 25th, considered by many the best son of old Columbus. Nearly all the cows that go into the sale will be bred to him, and he will be the sire of one young bull and one heifer that will be sold. The offering as a whole is a very representative one and consists of such well-known strains as the Lamplighter, Hesiod, Grove 3d and Anxiety 4th well up at the top. The cattle will be in nice condition, but not fat, as they have been given full sway in the Von Seggern pastures this summer. They are money makers, however, and no one need be afraid to buy. Mr. Von Seggern is one of the best and most reliable Hereford breeders in the Elkhorn valley and he is selling a lot of useful Herefords. Kindly send for a catalog and mention The Homestead.

DR. PRITCHARD'S BIG POLANDS.

On Saturday, September 22d, is when Dr. Pritchard sells big Poland at Wisner, Neb. Fifteen fall gilts and fifteen fall boars sired by Big Tom 2d, one of the largest boars in Nebraska and the West, and by Wisner Chief, a son of Chief Tecumseh 3d, go into this sale. He also sells fifteen fall gilts sired by Perfection Keep On, and we will say that they are a most useful lot of up-to-date Poland. The doctor has bred for size and quality and has both. As a reliable breeder, none stand higher in the estimation of western breeders than Dr. Pritchard, and he has been breeding the type of hog that they all want. Write him for a catalog and see what he is offering. Kindly mention The Homestead when doing so.

W. W. ANDREWS' DISPERSION SALE OF ANGUS.

When Mr. W. W. Andrews, of Maryville, Mo., disperses his herd of Angus on Monday, September 17th, one of the best herds of Angus cattle in the country will be dispersed. These are good individually and inherit their qualities from ancestors that have been and are now in popular favor. Included in the sale is a good consignment of ten head from the herd of Messrs. C. D. Hooker & Son, two bulls and eight females. Mr. Andrews' herd consists of seven bulls and twenty-three females. His herd bull, Black Magic of Homedale 2d, to which all females of breeding age are bred, will be found one of the desirable bulls to be sold this year. He is a double Blackbird, being got by Black King of Woodlawn and out of Broadus Blackwood by Clarion. His sire is a uterine brother to the champion and champion sire, Black Woodlawn, that was sire of the champion heifer at the International in 1902. Black Magic of Homedale 2d is now sixteen months old, weighs nearly 1,700 pounds, is an evenly-balanced bull, deep and thick. Over back and loin he is good and his head shows the necessary force of character so essential in a bull. He should please some good breeder. Eddie Pride, calved April 25, 1905, will be found a desirable youngster. He was got by Elder Erica. His dam, Pride of Heatherton 12th, was by Juha of Morlich, a champion show bull. Disappointments will not follow this youngster, as he has the conformation, the style and is a strong-constituted fellow and backed by ancestors of reputation. A fashionably-bred fellow and a bull that pleases all who see him is the nine-months-old Blackbird Ento, got by Elder Erica and out of Woodlawn Blackbird Pride got by the great Prince Ito. Woodlawn Blackbird Pride is a full sister to the \$1,000 calf sold in the Pierce dispersion. Few better young bulls are found than is Blackbird Ento and he should find an appreciative buyer. Other good bulls are listed and bull buyers will find much to please them in this sale. The females in Mr. Andrews' herd are a working lot and are nicely bred. Among the Blackbirds are three daughters of the great Prince Ito. These are very scarce and but few, if any, are offered for sale. Nine Queen Mothers are found in the herd and all are good. Of the twenty-three females, seven are coming two-year-olds and a very desirable lot of heifers. The matrons are regular producers and are cows that Mr. Andrews would not part with were it not necessary for him to seek a change of climate in hopes of bettering his health. The consignment of ten head from the herd of Messrs. C. D. Hooker & Son will be found a very desirable lot, they having selected a representative lot from their good herd. Some of the best families and most popular lines of breeding are represented. The females are bred either to their great breeding bull, Eraste, or their young show bull,

A. F. RUSSELL'S SALE of Duroc Jerseys

AT SAVANNAH, MO.

Thursday, Sept. 20

75 Head. 30 Boars, 45 Sows

THEY carry the blood of Tip Top Notcher, the world's fair champion, Ohio Chief and Buddy K IV, champion at Illinois state fair in '05. These are as popular and as well known sires as are found in the breed. The stuff listed for the sale are the top selections of 140 head. Parties from distance are requested to stop at the Michell hotel. Free conveyance from Savannah to the farm. Write today for catalog.

A. F. Russell, Savannah, Mo.
Col. Jud McGowan, Auctioneer.

Blackbird Benton, that won second in class at the American Royal in 1905. Two bulls are included in Messrs. Hooker & Son's consignment, both being sons of their great breeding bull, Eraste. Breeders wanting desirable breeding stock will find this one of the good opportunities of the year. Catalogs are being mailed to all who write for same. See page 26 for advertisement and when writing kindly mention this paper.

A GREAT EVENT.

The American Royal Live Stock Shows furnish an annual home gathering of stockmen and farmers that is both pleasant and profitable. An important event in this great exhibition of 1906 is the Short-horn sale to be held Wednesday, October 10th, at 1 p. m. These cattle have been carefully selected from the best herds in the states tributary to Kansas City and are the produce of noted bulls. The following herds will be represented in the sale: C. E. Leonard & Son, N. H. Gentry, H. C. Duncan, F. W. Harding, D. R. Hanna, T. K. Tomson & Sons, Harriman Bros., George Bothwell, H. K. Givens, Thomas, Jameson & Mitchell, W. A. Betttridge, H. M. Hill, Morse & Sons, F. L. Hackler, H. E. Hayes, Joseph McConnell, A. F. Graves and others. If you want choice herd bulls or excellent cows they can be found in this sale. For catalogs write B. O. Cowan, assistant secretary, 17 Exchange avenue, Chicago, Ill.

FEMALES IN M. L. LOGAN'S SALE OF SHORT-HORNS.

Last week attention was called to the bulls that go in Mr. M. L. Logan's sale of Short-horns, to be held at his farm near Lineville, Iowa, on Tuesday, September 18th. This week we wish to call attention to the females, of which there are thirty-eight head. The first of these, and perhaps as good a cow as is often found in a sale, is the red Cruickshank cow, Victoria of Meadow Farm 4th, a seven-year-old cow that sells with red bull calf at foot got by the herd bull, Victor Knight. Mr. Logan would not part with this cow, but he feels that he must offer such stock as will be appreciated by breeders, hence she is included with several others that are listed as attractions. She was got by Baron Goldust 3d by the Duchess of Gloster bull, Baron Gloster. Her dam, Victoria of Meadow Farm, was by Lord of Linwood, a Harris-bred bull got by Imp. Baron Victor, a noted Cruickshank-bred bull. For more of her breeding see advertisement on page 32 of this issue. Individually she is among the good cows of the breed and her yearling son shows how she produces. Critical buyers should look after her, as she is among the best cows to be sold this year. The Aconite cow, Double Aconite, listed as Lot 4, will probably be found among the bargains, as she is suckling a big, strong bull calf and is a trifle thin in flesh, but is nevertheless a great cow. She is one of Mr. Logan's best producers. Her sire, Aconite Boy, was bred by Mr. F. Bellows. Her dam, Young Aconite, was by Vice Royal; second dam, Aconite of Silver Springs, was by 2d Earl of Aberdeen; third dam Imp. Aconite by Pride of the Isles. Her two-year-old daughter, listed as Lot 5, was got by the herd bull, Victor Knight, and is one of the desirable young cows of the sale. Some critical buyer should look to her. The Marr-Emma cow, Scottish Emma, will be found one of the good things to buy, she being a desirable individual and a good brood cow got by Baron Dudding and out of Emma 21st by Prairie View by Scottish Champion; then follow such sires as Luverne, Imp. King of Aberdeen, Imp. Antiquary, etc. Lot 7, Lady Bud, coming two years old, is a heifer of great character, an even fleshier with two good ends and a middle to match them. She was got by Victor Knight and out of Shakespeare, a well-bred Scotch bull got by Clansman. To see her is to want her. Lots 8 and 9, Bashful Beauty 3d and Bashful Lass, are a pair of young Scotch heifers that will grow into useful brood cows. Both are daughters of the herd bull, Victor Knight, one is out of a daughter of Marshall's Cruickshank, the other out of a daughter of Chief Mason, otherwise their breeding is alike. Following these are found such sires as Imp. Red Emperor, Lord Glamis, etc. The most fashionably-bred cow in the offering is Cherry Volumnia 2d, whose pedigree will be found in the advertising. While this cow is ten years old, yet she is well preserved and is well along in calf and the man who buys her will find no difficulty in selling her calf for more than the cow will cost him. Her last calf, a heifer, is retained by Mr. Logan. In Scotch-topped females Mr. Logan is selling a very superior lot. They are all the easy-keeping sort that produce and reproduce stock of much merit. Nearly all are reds and are well grown, as Mr. Logan is one of those men who realize that in order to be good, an animal must be properly grown out. Catalogs are being mailed and we urge all our readers who are interested in good Short-horns to write for one and arrange to be with Mr. Logan's sale day, as we are sure the cattle will please you. Colonels Bellows and Graham do the selling. See advertisement and kindly mention this paper when writing.

MANLEY & CO'S GREAT FALL DUROC JERSEY SALE

LYONS, NEB., SEPTEMBER 18, 1906.

CLYDE, SHIRE, BELGIAN, PERCHERON, FRENCH DRAFT, GERMAN COACH AND STANDARD BRED STALLIONS.

WE have always on hand a good selection of the above named breeds. We give the most liberal guarantee of any firm doing business. Our horses are all of the best in their class. Colors, all bays, blacks and dark grays. No old, worn out pickups. We make a specialty of organizing farm companies and know how to do it and give satisfaction. We can't sell you cheap ones for the reason that we don't handle them. Greeley is the great stallion center of Iowa where you can see more top horses than any other place in America. Write.

Greeley Horse Importing Co.

DISPERSION SALE OF THE ELM GROVE HEREFORD CATTLE

AT LAREDO, MO., FRIDAY, SEPTEMBER 28, 1906.

45 Head of Recorded Herefords 45

::::

90 Head of High Grade Herefords 90

THE PURE GRADE CATTLE.

8 BULLS My herd bull, Prince 182194 got by the prize winning Prince Rupert that made circuit in 1905, and seven Short-horn yearlings. These are of the herd-heading sort.

37 FEMALES Twenty-four cows, seventeen with calves at foot, seven two-year-old heifers and six yearling heifers. All females of breeding age will be bred to Prince or will have calves at foot. Many of these are rehed. Several of show-yard character. Twenty-four head of the offering were got by Kruger, he by Improver and out of a daughter of Corrector. Others are rich in the blood of Beau Brummel through Beau Donald, Gentry Briton 6th, Wilton Anxiety, Pablo and other noted sires. Many of the cows were bred by such breeders as Overton Harris, C. G. Comstock & Son, Cornish & Patton and W. H. Curtis. The individuality of the entire herd will compare favorably with any lot to be sold this year. Not a shy breeder or an inferior animal is cataloged.

HORSES

Consist of ten head well bred and a useful lot. Two draft brood mares, seven and eight years old. One family driving horse seven years old. One high-class driving mare five years old. Three two-year-old high-grade colts and one eight-year-old saddle pony; no better saddle and cattle pony in northern Missouri. These horses are in good market condition, sound and well broken, excepting the two-year-olds.

THE GRADE CATTLE

Are the fruits of fifteen years' experience in breeding up a set of brood cows, the product of which have been market toppers for the last six years on the Chicago market.

30 BREEDING COWS That look like pure heds, with good backs and individual merit. Every one a prolific breeder.

30 YEARLINGS Eighteen head of steers and twelve head of heifers that will make car lots of show stuff.

30 CALVES All like "peas in a pod," and with quality unsurpassed.

This sale is the final wind-up of my fifteen years as a breeder of both registered and high-grade Herefords. I would not part with them, but my business interests in town compel me to leave the farm. My entire herds of pure bred and high-grade Herefords go, and at your price. You are cordially invited to be with me sale day. The sale will be held under cover. For catalog address

W. A. MERRYMAN, LAREDO, MO.

COL. HARRY W. GRAHAM, SALE MGR.

BELLOWS AND GRAHAM, ASSISTED BY CARPENTER AND BAILEY, AUCTIONEERS.

HOMES again and find 143 spring pigs, the best Duroc Jerseys I ever saw. 5 fall boars for sale. Bred gilts all sold. Write for prices, mentioning Homestead.

MINNESOTA'S HERD OF DUROCS

FOR SALE—One yearling sow bred to farrow Aug. 30. I also have some fine yearling and spring boars—head runners among them. Let me hear from you. Harmon Gruver, Brewster, Minn.

Duroc

Bred sows that carry the blood of Gold Dust Jim, Improver II, 2d Surprise, Red Chief I Am, Glendale Critic. Remember our guarantee. Dice & Garber, Beaver Crossing, Neb.

Fashion Improver Jr. at Head of Herd.

I HAVE several choice spring male pigs that will be priced to sell. I sell at private sale and these must go. Sired by Fashion Improver, winner at Nebraska State Fair, '05. Will make good price on young gilts as well. Write today. F. A. Kruse, Waco, Neb.

DUROC GILTS

BRED for fall farrow. Choice individuals, breeding second to none. Satisfaction guaranteed. W. S. Penn, East Linn Farm, Springfield, Linn County, Iowa.

A FINEST 28069 for sale. The best pig ever sired by Tip Top Notcher. He was 4th prize boar at Nebraska as well as siring 3d prize sow at same show in 1905. "The best Tip Top Notcher pig I ever saw," J. L. Harding. "He should have borne a fine ribbon," S. R. McKelvie, Twentieth Century Farmer. Price \$1,000. A. Wilson, Bethany, Neb.

KRASCHEL'S DUROC JERSEYS

150 SPRING pigs by Mayor Jr., first prize winner Illinois State Fair, 1905, and Gold Cloud, first and sweepstakes boar Illinois State Fair, 1904, for sale at reasonable prices.
FRED KRASCHEL & SON, MACON, ILL.

200 CHOICE DUROC JERSEY PIGS.

SIRE by Wonder C. 32393 (half brother to Crimson Wonder), Lott's Top Notcher, Wendt 2d, and Wendt's Choice. A grand lot of boars and sows for sale. Prices always right.
W. J. WENDT, MARCUS, IOWA.

BARGAINS IN DUROC BRED SOWS

I HAVE several sows bred for September farrow. Two are two-year-olds and balance yearlings; in good condition, but not hog fat. Cheap, if taken at once. Also several spring pigs sired by Ham's Challenger and Theodore 2d. Address:
F. A. HAM, SARONVILLE, NEB.

CHOICE OFFERING OF DUROC PIGS

I AM making very good prices on my spring pigs and full sows. Very strong lot of boars and gilts. Good color, strong in bone, with neat head and ears. Pigs sired by Red Renben and others.
CHAS. VAN PATTEN, SUTTON, NEB.

Peek & Putman's Durocs, Tecumseh, Neb.

OUR pigs carry the blood of Ohio Chief, Tip Top Notcher, Hanley, Crimson Jim, University Russell, Edd's Improver, Gifford's Orion, Chicago Kid. Fall sale Sep. 26th. Watch this ad. It will keep you posted.

I PURCHASED the highest priced Duroc sow sold in Kansas. Have litter of pigs by her. Litters by Bezdek (1st prize boar Nebraska Fair, 3d prize winner St. Louis). Others represented, Higgin's Model, Jumbo Perf., Improver 2d, Belle's Echo, etc. Pigs are very growtily. Will price right.
W. J. East & Son, Clay Center, Neb.

CHOICE, YOUNG DUROC JERSEY HOGS

OF BOTH SEXES at reasonable prices. Address W. J. S. Taylor, Hunceton, Iowa.

DUROC JERSEY HOGS.

Dispersion of the Famous Gold Dust Herd of Durocs.

HAVING decided to close out my Gold Dust herd of prize winning Duroc Jerseys, I now offer to the public, at private treaty, my entire crop of spring boars. They are sired by Tip Top Notcher, grand champion at World's Fair, acknowledged by most competent judges to be the best Duroc boar in America, and sold at the record breaking price of \$5,000; Ohio Chief II, one of the best sons of Ohio Chief; Champion Paul, a son of the noted Oom Paul; and Fancy Orion, an exceptionally good son of the World's Fair winner, Orion Chief. I am keeping my sows and spring gilts for closing out sale on October 24. I am keeping nothing back and my entire herd will be disposed of at private and public sale. Write for prices and descriptions at once if you want a herd boar from Gold Dust herd. Address,
GEO. W. SECKMAN, RIPLEY, ILLINOIS.

40 DUROC-JERSEY BOARS 40

SILED BY JUNIOR JIM, 1st prize yearling boar at the Nebraska State Fair.

LONG ALIX, 1st prize yearling boar at the Iowa-Nebraska State Fair.
GLENDAL CRITIC, 2d prize yearling boar at Iowa-Nebraska State Fair.

Pigs by other well-known boars. If you want a herd-boar, write me.
AUSTIN RENSCHAW, BLAIR, NEB.

TWO CHOICE OHIO CHIEF LITTERS FOR SALE.

70 Head of the Toppiest Duroc Jersey Pigs.

I AM offering for sale two very choice Ohio Chief litters out of a granddaughter of Echo King and Ak-Sar-Ben 4th. I also have pigs by Crimson Wonder Jr., Orion 2d and Leather Stockings, out of daughters and granddaughters of Nebraska Belle, Echo King and other noted sows and boars. I have the best blood lines known to the breed and I have a grand good lot of pigs. If you are looking for a herd header write or come and see me. I also breed Shire Horses and Aberdeen Angus Cattle. Young stock for sale at all times. Address

W. D. PITTMAN

LAKE CITY IOWA.

125 Duroc Spring Pigs For Sale Cheap

I AM making very reasonable prices on our crop of spring pigs. The pigs are very thrifty and represent the blood of the great Gold Dust Jim, Belle's Echo by Echo King and out of the great Nebraska Belle. Others sired by Iled Knight, first and sweepstakes boar at Neb. '05. The pigs will be sold at prices to suit the purchaser. We have the blood lines as well as the strong individual points. Our aim has always been toward the best obtainable. We will hold our sale of brood sows in February. Remember we are advertising to sell. Write us your wants and we will do the rest.

O. E. MICKEY,

OSCEOLA, NEB.

NEBRASKA'S GREAT THREE-DAY SALE

IN THE NEW SALE PAVILION

Wisner, Nebraska, September 20-21-22, 1906

Short-horns, Herefords, Poland Chinas

The Greatest Three-Day Sale Ever Held In Nebraska.

50 Head Short-horn Cattle 50

Thursday, Sept. 20th.

From the Herds of

S. S. Hall, Pender, Neb.
J. O' Kane, Bancroft, Neb.
Theo. H. Serck, Pender, Neb.
J. R. Mansfield & Son, Wisner, Neb.

14 BULLS. 36 COWS AND HEIFERS.

MR. S. S. HALL, of "Hall's Haven" Stock Farm, Pender, Neb., will sell 30 head; all of which are females, except one young bull. These cows are the large, table-backed kind, with lots of scale and are good individuals. A great many will have calf at foot by Oliver Gloster, and nearly all will be bred back to his present Scotch bull, Morning Star 43730.

THEO. H. SERCK sells 11 head; 4 bulls, including his great breeding bull, Merry Lad 160921, by Imp. Merry Hampton, out of a daughter of Lavender Lad; 7 females, some of which will have calf at foot by Merry Lad.

J. R. MANSFIELD & SONS will sell 8 splendid young bulls, all sired by the noted Nonpareil King.

J. O' KANE sells one good yearling bull.

CATALOG now ready. Address any of the above breeders, or

Col. Geo. P. Bel- S. S. Hall, Mgr., PENDER, WISNER,
lows, Auctioneer. IOWA, NEB.

40 Head Hereford Cattle 40

Friday, Sept. 21st.

From the Herd of

J. G. Von Seggern, Wisner, Neb.

THE blood of the Grove 3d, Anxiety 4th, Hesiod 29th, Lamplighter, Anxiety, Monarch and other great bulls represented.

13 BULLS. 27 COWS AND HEIFERS.

THERE will be sons and daughters of the great bull Columbus 25th 100912, considered the greatest son of old Columbus, in the sale. Twelve cows in the sale will be bred to him, and eight cows will have calf at foot by him.

A LARGE per cent of the offering will be grandsons and granddaughters of the great bull Lamplighter and Hesiod 29th and will be one of the most representative lots ever sold in the West.

THE BULLS range in age from 8 to 34 months and are a representative lot, and are bred along the most popular lines.

THE COWS AND HEIFERS are as good as has ever been sold in the West. All females old enough will have calf at foot or will be bred and well along in calf.

WRITE for catalog and come to the sale.
Address,

(PLEASE MENTION THE IOWA HOMESTEAD WHEN WRITING FOR CATALOG.)

VOL. LI. NO. 37.

DES MOINES IOWA SEPTEMBER 13, 1906.

WHOLE NO. 2565

COMMON SENSE IN THE ANIMAL'S RATION.

Disease germs are responsible for many of the ills which animal flesh is heir to. There are many forms of ailment, however, due to germs that might be ward off if common sense were a larger ingredient in the ration.

The subject is called to mind at this time by a recent experience of an extensive swine breeder. This individual had a bunch of 200 growing pigs that were being taken through the summer largely on grass, together with a small amount of mill feed daily. After a time he grew tired of continually paying out money for mill feed, and decided that his corn was ready to feed. He therefore turned into one of his fields and snapped out a large-sized load of corn and shoveled it over the fence into the pasture where the hogs were running. The next day a similar dose was given, and this was kept up for some time afterwards.

What was the result? In this instance it cost the man practically his entire herd. The new corn threw their blood out of condition, thus laying the best possible foundation for disease germs to get in their work. There was cholera in the neighborhood, but as this was an especially thrifty bunch before they were corned it was not feared in this instance. Many of the pigs were afflicted at first with a high fever, and later on genuine cholera started in and did its deadly work. They were too young and too lean to market, so that the healthy animals could not be disposed of, and the bunch today numbers less than ten.

In the opinion of this breeder the new corn was the cause of all the trouble. It is not a matter of surprise that green corn does not stand very high in the esteem of the average swine breeder, but we are frank to say that it has been its abuse more than its use that has brought it into disfavor. As sudden a change of food as the one described above, no matter of what it is composed, is enough to throw any farm animal out of condition. Corn is naturally somewhat heating and is possibly a little more liable to do damage than foods richer in flesh-forming constituents; but, as stated before, any food supplied in this sudden manner would do harm. It would have paid this individual handsomely to have taken ten days or two weeks to accustom these hogs to green corn. If they were worked up gradually there would be little danger from putting them on a full feed after a month or five weeks of feeding. If the hogs referred to had never been "heated up," as was the case by this sudden supplying of corn, the probabilities are that the cholera germ would never have been propagated in the herd. We do not say that the healthy, vigorous animal will not take cholera, but we do

say that the disease is not so liable to break out in a healthy herd as it is in one that is fed spasmodically, as was the case in this instance.

What is true in the case of hogs is also true with cattle and even horses. Low feeding is much better than high feeding in this instance, although at all times this paper is an exponent of liberal feeding. Even should one escape disease at the end of one or two months' feeding, much better results will be brought about if a few weeks are taken to get the animals on feed than if they are suddenly put on a new and heavy ration. The time lost in the start will be more than made up in the end, and there is the additional advantage of not running the same risk of propagating a contagious disease in the herd.

DIGGING AND STORING POTATOES.

Men differ in their opinion as to when potatoes should be dug, whether just as soon as the tops have died or just before freezing weather begins. This subject has recently been discussed in the Orange Judd Farmer, by Mr. L. E. Scott, of Wisconsin, who says:

I have always held that it is better to delay digging—if potatoes are well covered in hill, till the last of September or first of October. Recent experiments at Cornell University prove that there is less loss from rot where the potatoes are not dug till the vines are thoroughly dry.

It is the live spore from the green vine that causes the tuber to rot and the potato that lies close to the surface is the one that catches that spore washed down by the rains. The potato lying deeper or better covered with earth will oftentimes remain perfectly sound. But if dug early when the weather is warm and the shallow and deep lying are mixed all are liable to rot if blight spores are present.

It is therefore better to wait till the infection has ceased. If there are still affected tubers, I would store for a few days in an out building till thoroughly dry, then sort and store the sound ones in a good cellar.

With this treatment I would almost warrant them to keep.

In digging, the small grower will get on fairly well with a regular six-tined potato fork. The tines should be round and a little shorter and heavier than is found in the ordinary manure fork. But the big grower in these days of high-priced labor had better get a big elevator digger and put on four good horses. Don't be fooled with the two-horse idea.

By all means use crates for picking and hauling to the cellar or a short distance to market. Cut good pine lath, or better, a wider thin slat eighteen and one-half inches long and nail to the ends and bottom sides of twelve-inch end boards cut thirteen and one-quarter inches long. Make good, roomy hand holes in each board near the top. This will give you a crate that will hold a heaped bushel, level full so that you may stack one on top of another.

Other advantages are that they are of convenient length to handle and being a little wider than deep, you can place one endwise in the second by placing the third, bottom up, over it you have a neat nest of three empties, which will take less room in storing. By grasping a nest in each hand a small boy can easily carry six, making distribution in the field very simple.

Always have a thermometer in the cellar and keep the mercury as low as 35 degrees from fall till as late in spring as possible. For table use, potatoes left on the earth floor in the corner next the wall will keep the longest, while for seed the treatment outlined above is best.

Our experience leads us to strongly recommend the practice of digging the potatoes as late as possible in the fall. Of course one may make a mistake in this regard if the weather should be unusually wet, because in that case it would be better to have the potatoes in the cellar. In the corn belt, however, potatoes may safely be left in the ground during the first half of October.

The ordinary stirring plow is much to be preferred to the potato fork in these times of high-priced labor. By running the plow just below the potatoes and a little to one side of the row 90 per cent of them will show up on the surface, while the harrow will usually reveal the

balance. This may seem a little slipshod, but it saves much labor and that is the important thing these days. Of course the "digger" is the thing where a large acreage is grown.

DEPTH OF FALL PLOWING.

An Iowa subscriber submits the following inquiry:

In a recent issue of your paper you advise plowing stubble as soon as possible after harvest, claiming that this practice was much better for the soil, in addition to the fact that it hurried the weeds before they were mature enough to germinate. I believe your advice is good, but many in our locality have not been able to get the work done up to the present time.

There is a difference of opinion here as to how deep soil should be plowed in the fall. I know of men who just skim over their stubble fields, plowing not more than three or four inches. They have been doing this for years. Others put considerably more horse power and plow the soil to a depth of seven or eight inches. Many of us here would be glad to have your opinion on the subject. The soil in this locality is a rich black loam.

While the nature of the soil to some extent regulates the depth of plowing, it may be said that on general principles fall plowing should be done fairly deep. In the case of sandy soils and sandy loams we would hesitate before plowing more than four or five inches deep, for the reason that on such soils it is better to keep them firm below, and as far as possible keep the vegetable matter and manurial constituents near the surface. There are certain light soils in the corn belt, though the area is small, that would be more productive if they were never plowed, though of course the preparation of a seed bed necessitates plowing from time to time. If, however, the disk or some surface-cutting implement could be utilized to prepare the seed bed it would, in our opinion, increase production.

However, on average corn-belt land the proposition is entirely different, because there is not much danger of fertility leaching away, while there seems to be considerable advantage in having a good depth of friable soil. We have in mind a field that was plowed to a depth of about eight inches in the fall of 1905 and put to corn this year. The soil was a rich black loam with a somewhat stiff subsoil. The corn at present writing on this field gives every appearance of reaching a yield of eighty or ninety bushels per acre, while the adjoining field, plowed somewhat shallow, has a much less thrifty appearance, though the soil is identical. In the case of the deeply plowed soil the fodder has been of a dark green color until the husks began to turn, and as a result nearly all the ears that formed were fully developed. In the other field the fodder took on a somewhat yellowish appearance when the corn was in the milk stage and at present the ears, many of them, have the appearance of being

MISSOURI MONARCH No. 224427

All females of breeding age to go in the W. R. Turner & Sons sale, to be held at Shelby, Mo., Sept. 20th, are either in calf to this great young breeding bull or have calves at foot by him. See field notes.

a little small. The theory of deep plowing is that it brings a certain amount of inert soil to the surface, where it is weathered, thus bringing about the liberation of fertility that would otherwise remain inert. It may require more work in the spring to prepare a seed bed on a deeply plowed soil than where it is plowed shallow, because it always pays to make the seed bed firm. However, we believe that in the case of the deep plowing the increase in the crop where corn is grown will much more than pay for the labor.

The only precaution that we would advise would be that depth of plowing should be increased gradually. If a soil has not been plowed to a depth of not more than four inches we would not advise increasing the depth more than one inch at a time, because if more inert material than the extra inch is brought to the surface liberation of fertility may be so slow the first year as to interfere with maximum production. By going an inch deeper each time until the soil is stirred seven or eight inches deep one may reasonably expect good results.

HOURS ON THE FARM.

The subject of the long hours on the farm was discussed in these columns some time ago, and since that date a number of communications have been received in which a variety of views are expressed on this subject. The following communication has been received from Mr. W. C. Baldwin, of McPherson county, Kansas:

I notice that Mr. H. L. Kelley, of Bremer county, Iowa, takes exception to your utterances on the question of long hours on the farm. He thinks that no man could be successful nowadays who has his work done up in the evening by 6:30 o'clock. Now, as I am one of those 6:30 fellows I want to have my say.

As our boys and girls are leaving the farm and taking up other lines, we as farmers are mightily interested in the hired help question. Mr. Kelley's ideas about working until 8 or 9 o'clock every evening are more applicable to former times when muscle counted for more than brains, than to the present. I notice in this county that our 6:30 men are at the head of nearly all public enterprises. It was this class of men that built our churches and not those who are always dragged out with long hours. It was the 6:30 men who circulated petitions bringing about the introduction of rural delivery, and the same may be said about the building of telephone lines. It is the 6:30 man who keeps the highway in front of his farm free from weeds, and not the man who works fifteen and sixteen hours every day; it is the 6:30 man who has his boys and girls with him after they are grown to manhood and womanhood. I conclude, therefore, that Mr. Kelley is wrong when he states that it is impossible to get along these days unless one works from 4 o'clock in the morning until 8 or 9 o'clock in the evening.

On this same subject Mr. T. E. Burton, of Page county, Iowa, expresses the following views:

I am somewhat interested in the discussion that is going on in your paper over the question of hours on the farm. Mr. Kelley, of Bremer county, Iowa, expresses my views on this subject. I do not think it good policy or good business to have the chores done by 6:30 o'clock. It would be very unpleasant for me to milk cows or feed pigs and hogs when the sun is one and a half or two hours high. Furthermore, I do not think it is good for the stock. I think it is much better during the summer months to do your chores after the sun is down. The man who buys land in the corn belt these days and pays for it cannot quit work early in the evening, neither can the renter on these high-priced lands. From 5 a. m. to 8:30 p. m., with one and a half to two hours at noon, is not going to hurt any sound-minded, able-bodied man. The fact is, if we had longer hours and less idle time we would be better off. This would be especially true in the case of men in the cities. I think you make a great mistake when you advocate the short day for farm work.

We are entering upon that season of the year when work days are of necessity shorter than when this discussion began, but the principle of the thing remains the same. We believe that our policy is sound when we advise men to plan their affairs, if possible, so that work hours shall not be too long. We have said before that where one starts in the morning at 5 o'clock all forms of labor should be finished up between 6 and 7 o'clock in the evening. Where teams are being used every day in the field they can do all that they ought to do in nine or ten hours. In other words, if worked sensibly this length of time their full labor capacity will be reached, providing, of course, the aim is to keep them in good flesh.

The same holds good with men. If a man knows that he has to work until 8 or 9 o'clock in the evening there will not be the same snap in him that will be shown if his work is to be finished up in reasonably good time.

We realize that men will continue to differ in their opinions on this subject, but as we view it the very necessity of the case, if help is to be obtained on the farm in the future, demands that the hours of labor be regulated to some ex-

tent. Not that it is possible to work by rule, as is the case in the cities, but rather, that we should tend in that di-

rection; otherwise it will be with the greatest difficulty that hired men are induced to leave cities and go to the farm.

Cottonseed Meal For Swine.

By Prof. F. R. Marshall, Texas Agricultural College.

On April 1, 1905, the Texas station began an experiment to test the efficacy of the fermentation method of feeding swine on cottonseed meal. Ten hogs were fed for forty-three days on a light ration consisting of two-thirds corn chops and one-third cottonseed meal, the mixture being thoroughly fermented. During the next forty days a heavier ration was fed. One hog died and another was unfit for marketing. In another lot fed similarly, except that their ration was one-half cottonseed meal, there were four deaths.

The summary of a recent bulletin contains this statement:

A comparison of the results of this experiment with those of other stations at which cottonseed meal was fed in the ordinary (unfermented) way indicates that cottonseed meal may be used in larger quantities and for longer periods when fermented and fed in a slop than when fed without being fermented.

On February 1st of this year, a second experiment was commenced on a plan similar to that of 1905. This time, however, next to the lot receiving fermented corn chops and cottonseed meal, another lot was fed exactly the same except that their feed was not fermented.

In this experiment there were six lots of ten hogs each, fed as follows:

Lot I.—Corn chops.
Lot II.—Corn chops, two-thirds; cottonseed meal, one-third; unfermented.
Lot III.—Corn chops, two-thirds; cottonseed meal, one-third; fermented.
Lot IV.—Corn chops; cottonseed meal; molasses.

Lot V.—Corn chops, four-fifths; cottonseed meal, one-fifth; unfermented.
Lot VI.—Corn chops, two-thirds; cottonseed meal, one-third; unfermented; green feed.

This feed was continued for fifty-seven days and the effect of the various rations upon the amount and cost of gains is shown as follows:

On March 30th, the cottonseed meal was taken away from all but Lot VI. There were no deaths or sickness among the corn-fed hogs, Lot I. There were two deaths in Lot II.—two-thirds corn chops and one-third cottonseed meal; unfermented—one on March 29th, and the other on April 2d. The meal was withdrawn March 30th.

In Lot III, receiving the fermented mixture, there were six deaths between March 20th and 29th.

In Lot IV, fed molasses in addition to corn and meal, six animals died between March 16th and 26th. The molasses appeared to fatten them very rapidly, and the trouble commenced earlier than in the other lots.

In Lot V, four-fifths corn chops and one-fifth cottonseed meal, there was one death on March 30th.

Lot VI, were pastured on a heavy growth of bur clover until March 16th. It was necessary to keep the lot eating nearly the same ration as Lots II and III, and they did not eat the rape very eagerly for some time. This lot ate cottonseed meal until March 31st, at which time there was one sow off feed, but there had been no deaths. The gains were no longer satisfactory, however, and it was evident that longer feeding of cottonseed meal would be unprofitable if it did not cause deaths. This lot ate practically the same feed as Lots II and III, in which there were two and six deaths respectively, indicating that good, green pasture does, in a material measure, offset the injurious effects of cottonseed meal. The cost of gain was the lowest of all the lots. For green feed this lot grazed from February 1st to March 16th, on six-sevenths of an acre of bur clover. The clover was still in good shape at the end of that time, but a piece (three-fourths of an acre) of rape that had been planted for this lot was becoming so large that it was necessary to turn in on it; even then it was several days before they were eating any considerable amount of it and on March 29th, when taken out, the crop was considerably larger than when the hogs were turned in. From the two lots of green pasture—one and a quarter acres—which these hogs ran on, not more than one-third of the forage was consumed. There was a return, however, on these ten animals of \$4.00, which would have been greater had it not been necessary to feed this lot heavily on grain to compare with the other

lots. From twelve to fifteen dollars per acre can be secured from such crops used for this purpose, and with animals eating less corn and cottonseed meal and more pasture, the time through which it would be safe to feed the meal would be longer.

The teachings of these experiments are not at variance with the expressions of many of the intelligent Texas farmers who have been loud in their praises of fermented cottonseed meal for swine. Other experimenters, notably Dr. Dinwiddie, of Arkansas, have shown that a 100-pound hog can safely eat one-half a pound of cottonseed meal daily for an indefinite length of time. Their experiments, and ours, show that under some conditions heavy feeding can be continued for more than forty days. The facts just stated have not been properly appreciated by those who claim to have proven fermented cottonseed meal to be safe feed for hogs. No one, to my knowledge, has yet fed cottonseed meal as heavily or as long as we have without experiencing similar results. The addition of cottonseed meal costing \$30 per ton to a ration of fifty-cent corn is very profitable if discontinued in time. No one familiar with the subject can fail to appreciate the excellent effect of cottonseed meal upon the gains and appearance, and therefore value, of corn-fed hogs. It is to be hoped that the time will come when hogs may be finished on cottonseed meal with no unusual risk. The grounds for faith in such a hope are, however, to those unbiased on the question, very small.

We will continue this particular line of work with a view to: First, accumulating facts that will aid in the discovery of the cause of death among hogs fed cottonseed meal and second, to show how far and under what conditions careful feeders can utilize the good qualities of cottonseed meal in feeding swine.

THE DRY FARMING PROPOSITION.

A bulletin has recently been published by the department of agriculture in which the subject of dry farming is discussed at length. According to this bulletin the experience gained during the last thirty or forty years and the results of the recent work in this connection carried on by several experiment stations and other agencies, indicate that, by means of special methods of cultivation requiring, in some instances, special tools and implements, and by the use of drought-resistant crops and varieties, arid farming may be placed on a much safer basis than heretofore.

The Utah Experiment Station points out that the two main problems in dry farming are: First, the absorption and retention of moisture by the soil, and second, the culture of crops which make satisfactory growth and reach maturity with very little water. The soils of Utah, generally very deep and quite uniform to great depths in chemical and physical properties, are well adapted to dry farming on account of their great moisture-retaining capacity. The station estimates that under ordinary conditions the average annual rainfall of twelve inches can be held in three and one-quarter feet of soil of this description. In this method of farming, therefore, the soil should be treated to facilitate the absorption and retention of as much as possible of the moisture that falls upon it.

Data secured by that station indicate that on the dry farms of the state 750 pounds of water are required to produce one pound of dry matter in the plant, while experiments conducted in this country and in Europe show that under humid conditions only about 500 pounds are sufficient for the same purpose. A rainfall of twelve inches amounts to 1,361 tons of water per acre, or a quantity sufficient, if entirely used by the crop, to produce twenty-seven bushels of grain, even on semi-arid lands.

Utah recently established six experimental farms in different sections and placed them under the direction of the experiment station for further investigations on dry-farm practices. The first year's work on these farms was carried on in 1904. The land was plowed about eight inches deep and brought to

a fine tilth with disk and smoothing harrow. No summer fallow preceded these crops, and hence only one year's precipitation was used in their production. The rainfall records for the year show a precipitation of more than ten inches on all the farms, and an average of 12.5 inches.

The highest yield of winter wheat recorded at any of the farms was 23.83 bushels, and marconi spring wheat, 21.25 bushels. Of several varieties of oats, Sixty-Day gave the best general results, the yields ranging from 3.75 to 36.01 bushels per acre. The highest yields of barley and rye recorded at 34.9 and 14.04 bushels per acre, respectively. Emmer was grown on two of the farms, and yielded 23.55 bushels on the one and 17.68 bushels per acre on the other.

The main purpose of summer fallow on dry farms is to store the water of two or more seasons in the soil for the production of a crop, and hence this is practiced more frequently where the rainfall is limited than where it is heavier. The Colorado station gives the following directions for this practice:

After the snows of winter have melted in the spring plow the ground at least seven to eight inches deep. Level this down with the harrow and packer, following this process with a smoothing harrow forming an earth mulch to check evaporation. This mulch should not be too fine, as the winds of the plains will tend to lift the soil or blow the earth mulch entirely away. If possible, stir the surface soil two to four inches every ten to fifteen days throughout the summer. Allow no crust to form after summer showers, as this will increase the evaporation of the soil moisture. Keep the ground clean, free from weeds.

In addition to the crops grown in the tests noted above, kafir corn, sorghum, millet, field peas, brome grass, meadow fescue and western wheat grass have given good results on the plains. As regards the quantity of water required for maturity the common field crops are placed in the following (ascending) order by the Colorado station: Corn, potatoes, wheat, barley, field peas, oats, alfalfa, and red clover.

GOVERNOR'S DAY AT MISSOURI STATE FAIR.

In a conference recently between Secretary Rippey, of the Missouri State Fair, and Governor Folk, with reference to arrangements for "Governor's Day," Oct. 2 at the fair, it was decided to extend a formal invitation to Gov. A. B. Cummins, of Iowa, to be Missouri's guest on that occasion. The invitation will include the officers and members of the Iowa State Fair board. When Missouri's fair board visited the Iowa State Fair at Des Moines this year, they received the tentative promise of their Iowa co-workers to reciprocate the visit.

Should Governor Cummins consent to come he will be urged to remain over to Wednesday, "Fraternal Day" at the fair, to deliver an address, and a reunion of former Iowans will be held on the fair grounds. Those in a position to know assert that 25,000 Iowans have located in Missouri during the past ten years—a "rally day" for those people would be almost as enjoyable as a visit to their former homes.

DAN PATCH BREAKS RECORD.

The famous pacing stallion, Dan Patch, owned by the International Stock Food Co., of Minneapolis, succeeded last week at the Minnesota State Fair in breaking the world's pacing record which was established last year in Kentucky by himself, lowering the time in this instance to 1:55. A number of unofficial watches, held by eye-witnesses, caught the time a quarter of a second lower than this. This famous son of Joe Patchen is the best-known horse in America today, and his greatness consists not only in his ability as a speed machine, but also as a sire of fast pacers. He has sired several that have a mark considerably below 2:10.

We still have a few more Indian Pictures. "What does this mean?" Turn to page 5 and see the Simplicity advertisement.

Farm Furrows

Turned by a Practical Farmer.

Sam says all of Rockefeller's money is tainted. He says: "Tain't yours and 'tain't mine," which is evidently so.

The self-feeder on a thrashing machine is one of the best inventions to date. That and the blower keep many a man out of a dirty place.

Poultry experts tell us that the only cure for roup in fowls is what is known as the hatchet cure. In aggravated cases I believe this is about correct.

One of the ways to let neighbors know what you have to sell or what you wish to buy is to place the same on a bulletin board in front of your place of residence.

Mr. Fawcett, of Cedar county, got the \$50 prize for the best ear of corn at the Iowa State Fair. He also captured the prize for the best ten ears. Quite a feather in his cap.

Many a small boy got on the outside of too many green apples which grew on the trees inside the Iowa State Fair grounds, and they immediately pronounced the fair a failure.

I saw a steam plow at the Iowa fair and now the long-looked-for has arrived. I learned of a number of farmers who are now plowing by steam. This old world is certainly on the move.

King Corn and Jack Frost are having the usual race for supremacy. The king is about a dozen laps ahead at this writing, and it is to be hoped Jack will have to "go away back and sit down."

Ask the average man what air is, and he can't tell, for he can't see it. Ask him what mud is and he will tell you. Mud is water in excess of the absorption of one soil. Mud will make bricks, but it is no good for crops.

An agent is in the land selling ginseng plants which are claimed to be prolific. A Missouri woman bought some of them and when she attempted to sell her first product it was found to be the product of Culver's root (*Veronica virginica*.)

Fresh meat in summer is not the problem it once was. Up-to-date farmers know how to provide it. The man who works hard needs more meat than the man who does not work, hence the necessity of meat and fresh meat at that.

At one time when barbed wire first came into use the galvanized wire was considered better and cost more per pound than the black wire. At that time I put up some of both kinds of fence. Both are in a good state of preservation and the galvanized wire seems to have but little advantage over the black wire. Later I put up some woven fence and the galvanized (?) wire has rusted

even more than the black wire did of the 70's. I can't understand a phenomenon that will cause this difference in the lease of life.

Where I live there has been no prairie hay for almost twenty years. Not long since I had the pleasure of visiting a country where almost all of the hay is prairie hay, and it seemed peculiar to see haying time come in the fall instead of in the summer.

The Furrows man enjoyed a delightful week at the Iowa State Fair and met many thousand readers of this paper there. He meets them from week to week in these columns, but there is a feeling of genuine brotherly affection when he can take them by the hand. Come again.

Friends of the seedless apple are now trying to make a claim that it was the seedless apple that was growing in the garden of Eden when man was tempted and fell. I'm glad it was not a Ben Davis, for he has troubles of his own without laying this great crime against him.

There are many foul weed seeds that cannot be taken out of clover seed by ordinary methods. When an extra effort is not made to get the seed clean it will be sure to grow all kinds of plants not wanted. It will not pay to drift into neglect in this way and slip one cog backward.

An Indiana man is experimenting with what he is pleased to term atmospheric irrigation. He simply places tile in his land, not to lead off the water, but to supply the soil with air and thereby increases his crops. He claims it works well, for on a hitherto poor, clay farm he is able to produce large crops of corn.

It begins to look as if there is to be a scarcity of feeding lambs. The sheep raiser has been unable to raise as many lambs as the buyers and feeders demand, and that is the reason for it. There is getting to be an almost exciting demand for old ewes. High prices have carried many ewes to the market which under other conditions would have remained to help produce the lamb crop.

When attending the state fair someone has to act the part of a walking encyclopedia, and a man is very wise who can answer all the questions asked. Sam was asked why the airship did not sail and he said he supposed it was because the aeronaut had run out of air (hot air). One lady said the airship looked like a large floating potato. Others thought that one of the prize Poland Chinas had escaped.

A farmer lad married a neighborhood school teacher, who was a town girl. She undertook to cook some rice after marriage, and filled the pot with rice. When it began to swell, she had to place it in two pots. Soon the swelling proceeded until all the cooking vessels she had were full of rice. She went out and flagged her husband to come to the house before the swelling rice would push out the kitchen windows.

Never in the history of improved agriculture did there exist such a necessity for choice clover seed as at this very time. More farms are seeded to fowl weeds by the introduction of really poor seed than in almost any other way. It will pay every man to buy a small magnifying glass and look at the seed he buys. He should buy the best and insist on getting it. Buy only a seed test. Buy seed like buying gold dust.

Working in the rain does not pay. It is barely possible that a saving can be often made by prolonging the labor in the rain, but there comes a day when one may have to balance his books against his health. I once owned a rubber coat and being young and vigorous I defied the rains and worked in the rain. That was the dearest coat I ever owned. It is all right to have a coat of that kind along when one gets caught in the rain.

It is funny that artists who wish to illustrate a farmer make a picture showing him with either a straw in his mouth, a fork or a rake in his hand or something of that kind, as if he were always carrying about with him the insignia of his profession. I observe, too, that they usually illustrate a team and a man plowing with both horses walking on the land and the man pushing the plow instead of allowing the horses to pull it.

GREAT STOVE OFFER

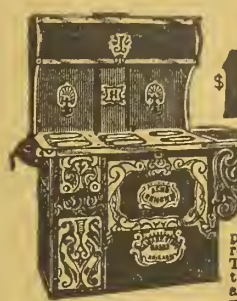

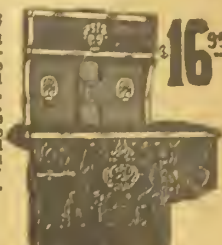

WONDERFUL REDUCTION IN PRICES

Steel Ranges Reduced to Prices Heretofore Unknown or Unthought of. **OUR BEST STEEL RANGE,** the Acme Triumph, reduced in price from \$5.37 to \$7.17, according to size. Wonderful reductions throughout the entire line of stoves, cast iron stoves and heaters. If you have one of our big catalogues, received by you before September 1st, and you are thinking of buying any kind of a stove, don't fail to write for our latest Big Free Stove Catalogue, showing all the big price reductions, marvelously low price quotations, many improvements, astonishing inducements. By the introduction of the very latest, new and modern steel range and stove making machinery, we have just now made a most

\$12.75 buys this big, handsome, new 1907 model, full nickel trimmed, full size, 6-hole steel range, exactly as illustrated, complete with big deep porcelain lined reservoir, high shelf, warming closet, etc. Very much lower prices if you do not need the reservoir, shelf or warming closet. All shown in our big, free, new, marvelously low priced Special Stove Catalogue.

\$16.95 buys the new, extra large, 1907 model, Improved ACME HUMMER Steel Range, exactly as illustrated: 6-hole top, deep porcelain lined reservoir, nickel trimmed, high shelf, back and closet, one of the best ranges made. All these great price offers, big reductions and big offers will be sent you on application in our latest Free Stove Catalogue.

\$18.87 buys this extra large, beautifully finished, nickel trimmed, heavy steel range, our ACME RENOWN, exactly as illustrated, complete with deep porcelain lined reservoir, high back, shelf, warming closet, etc. Very much lower prices if you do not need reservoir, shelf or oil set. This shows a great reduction in price from what appears in the big catalogue you have. Price reductions on stoves are shown in our big, free Special Stove Catalogue.

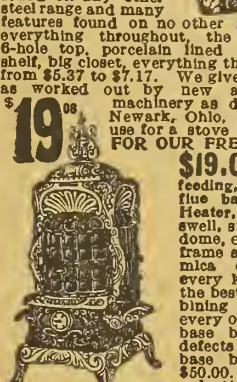

\$20.82 buys this big, heavy, enamel ACME REGAL steel range, exactly as illustrated, complete with deep porcelain lined reservoir, high back, shelf and closet, full nickel trimmed, made of heavier steel than is used in any other steel range made in the world, the equal of ranges that sell generally at double the price. The same range without reservoir or closet at greatly reduced prices. You will find by comparing this price with the price in our big catalogues that there has been an average reduction in the price of this range of more than five dollars. To get all the reductions, all the great price offerings, all our wonderful new inducements you should write for our Free Stove Catalogue.

\$22.58 buys this, our ACME TRIUMPH, the highest grade and best steel range made in the world, the equal of any range you can buy anywhere for \$50.00. Just reduced from \$27.95 to \$32.05 to the now heretofore unheard of and unthought of price of \$22.58; and remember this steel range carries every up to date feature found on any other steel range and many features found on no other ranges, the very best of everything throughout, the best money can buy: 6-hole top, porcelain lined reservoir, high back, high shelf, big closet, everything the best, and prices reduced from \$5.37 to \$7.17. We give you the price advantage as worked out by new automatic stove making machinery as developed only in our big Newark, Ohio, foundry. If you have any use for a stove DON'T FAIL TO WRITE FOR OUR FREE STOVE CATALOGUE.

69 CENTS buys this wonderful value, a high grade 1907 Model Airtight Sheet Iron Heating Stove. We also have a large assortment of other Airtight Heaters at correspondingly low prices, wonderful price reductions, astonishing offers in our new Special Stove Catalogue.

\$19.06 buys this extra large, extra heavy, self feeding, double heating, return flue base burner, Hard Coal Heater, the most elaborate, large, swell, silver nickel, ornamented dome, elaborate nickel base, rims, frame and other trimmings with malleable iron swing doors, every known up to date feature, the best base burner made, combining all the good qualities of every other extra big, high grade base burner made, with the defects of none, the equal of any base burner you can buy for \$50.00. Our new prices, the great reductions and wonderful offers are all in our latest Free Special Stove Catalogue. Don't fail to write for it.

\$1.89 buys this New, Big, 1907 Model, Rococo Pattern Oak Heating Stove, for coal or wood; has every up to date feature, perfect fire control, one of the very handsomest, strongest and best ovens made. Our new line, with the wonderful price reductions, the astonishing offer shown in our Free Stove Catalogue will astonish you. Don't fail to write for the book if you are interested in stoves.

Stove Catalogue. Don't fail to write for it.

OUR GREAT FREE OFFER. **CUT THIS AD. OUT** and send to us, or on a postal card or in a letter to us simply say, "Send me your free stove offer," and by return mail you will receive postpaid our very latest and best Special Stove Catalogue, the new one with the latest price reductions from \$5.37 to \$7.17, reductions in everything, offers never heard of before. It's the largest and most attractive Stove Catalogue ever issued. We have new propositions elsewhere until you get our latest Free Stove Catalogue, and please tell your friends about our Free Stove Catalogue and the wonderful price reductions we have just made and are just now appearing in the Big Book. Remember the Special Stove Catalogue is free to anyone. **REMEMBER** of valuable articles which we will send you free, and, by the way, they are all shown bigger, handsomer and more liberal than ever before, given in exchange for a less number of Profit Sharing Certificates, given free to our customers who buy stoves or other goods from us. These are all shown in our Free Stove Book. You can learn all about the valuable articles we send you free, you can learn all about it if you send for our Stove Catalogue. Address, **SEARS, ROEBUCK & CO., CHICAGO**

Then, they show a man sitting on the left side milking a cow. Any respectable cow would resent any such innovation.

Gold brick dealers are of the opinion that the farmer must get his money easily, for he appears to be very easy to work. This is not the case, for gold brick buyers are not all farmers. I happen to be in a position to know that many men outside of agricultural pursuits are continually asking to be "humbugged."

When it comes to the use of water pipes under ground I believe there is a decided advantage in putting in galvanized pipes or pipe that has been made water proof by some preparation made for that purpose. The life of one kind may be no longer than another, but the water seems to have a better taste from the galvanized pipe.

It has been said that potatoes should never be plowed when in bloom and some cannot understand why this is so. When potatoes bloom it is at a time when the tubers are setting on and it is a critical time in the production of this crop and the roots should not be interfered with at that time. Nourishment comes through the roots and they should not be disturbed. Sometimes when the soil is wet and the season wet plowing will open up the soil, let in the air and thus benefit the crop.

EACH TUESDAY THIS YEAR THE CHICAGO GREAT WESTERN RAILWAY will sell homeseekers tickets to points in Alberta, Manitoba, Minnesota, North Dakota, Saskatchewan, western Ontario and Wisconsin at rate of one fare plus two dollars for the round trip. Remember, THE CHICAGO GREAT WESTERN RAILWAY is the only line from this section which runs three solid trains daily to the Twin Cities. Also remember that on the return trip you can take any one of our four trains, making it certain that you will not have to wait but a short time for connection at St. Paul and Minneapolis. Shortest time, best equipment, best service and connections. Call on or write to E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

LOW EXCURSION RATES TO NEW ENGLAND AND CANADIAN POINTS VIA THE C. & N.-W. R.Y. Tickets on sale daily until June 30th; also on July 4th and 18th, August 8th and 22d and September 5th and 19th at one fare plus \$2 for fifteen-day tickets, or one fare plus \$4 for thirty-day tickets. Stopovers allowed at Detroit, Niagara Falls and other intermediate points. Full information at 401 Walnut St., or C. & N.-W. passenger station.

LOS ANGELES AND SAN FRANCISCO. From September 3d to 14th the Chicago Great Western Railway will sell round trip tickets to San Francisco and Los Angeles at rate of one fare for the round trip. Tickets have limit of October 31st to return and allow stopovers west of the Missouri River in both directions. For full information apply to E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

NEW ENGLAND AND CANADIAN POINTS. The Chicago Great Western Railway will sell round-trip tickets to the above points at very low rates on certain dates this summer. It will pay you to call on city ticket agent, 514 Walnut St., Des Moines, Iowa.

22 YEAR ROOF

BLACK DIAMOND Ready Roofing

The Black Diamond Roofing on this lumber shed was put there in 1884. That is a pretty good record for a "ready roofing." Most manufacturers talk about their roofings lasting eight years or ten years, but here is an example of 22 years of service.

We have other records like it. Yet the price is surprisingly low! Just let us send you the Black Diamond Booklet and a free Sample.

MINNESOTA STATE FAIR

THE NEW LIVE STOCK JUDGING PAVILION.

It would be difficult to conceive of a more magnificently planned exposition than the annual state fair held at St. Anthony Park, Minnesota. Six full days of sight-seeing, entertainment and instruction is the epitomized history of the fair held last week. It was thought that the climax was reached in 1905, but not so. In gate receipts, this year eclipsed all records, more than 300,000 tickets being purchased at the turnstiles. After paying all expenses, premiums, entertainment, etc., there was left over more than \$75,000 to be put back into improvements.

The feature of the fair of chief significance was the dedication of the live stock judging pavilion on opening day. If comparisons contribute to accuracy it may be said that it is the largest found on any state fair grounds in the union today. Its length is 359 and the width 200 feet, the arena alone being 120 by 270 feet. It seats comfortably 7,500 people. It cost a little better than \$100,000, but no visitor at the fair last week was heard to utter a word of censure directed toward the fair board because of extravagance. This structure of cement, steel and brick will be there for future generations, an emblem of today's wise generosity. This pavilion was dedicated to the cause of improved agriculture in an elegant address delivered by Mr. J. J. Hill, president of the Great Northern railway. He sounded a note of warning to the people of the West concerning their wastefulness, and especially as applied to soil fertility. Our soil, according to Mr. Hill, has already been reduced

in productive capacity more than would be the case with five centuries of sensible farming. In fifty years the United States will have a population of more than 200,000,000 people. In twenty years we cannot grow enough wheat for our own people's bread on our present wheat acreage, and at the present average yield. England and Belgium have greatly increased the yielding ability of their farming land during the last fifty years, and these principles of production must now be learned by the American farmer. Americans must learn how to farm, above all else.

In her live stock exhibits Minnesota's fair falls below some of her sister states, although the showing made this year was a creditable one. The new pavilion contributed much to the comfort of showing in this department, though there are improvements yet to be made. The placard system of numbering animals was notoriously lax in its enforcement this year, especially in the horse department. With catalogs in hand, thousands of visitors sat through many of the judging contests without an inkling as to the name and owner of the animals in front of them. A few dollars spent in printing with the placard rule enforced would change this whole situation and give to the people an unparalleled educational feature. Then again, more stock parades ought to be given. Judging was finished early in the week, but the prize-winners could only be found in their stalls, and in most cases blanketed. A state fair is not a secret organization, and the superintendents of the various departments should vie with each other, it seems to us, in the matter of bringing the exhibits before the people.

The home of Dan Patch should be a speed center, and such it is. With this noted son of Joe Patchen to lead off in these events, a week of unalloyed pleasure followed for those who indulge in the speed luxury. With the half-mile and mile track, Minnesota fair ground is equipped in a manner to stir the envy of fair managers in other states, because good speed programs always draw. Throughout the entertainment features were of a high order this year and happily there was lacking those questionable features that have held sway in the past. The segregation of side-show features is a step in advance, and the improvement in the character of those admitted to the ground makes it a matter over which the fair officials should be complimented. This paper has always held the opinion that a clean fair would pay, and now it has been proven true. Missouri began it, Iowa followed after and now Minnesota is doing likewise. Through it all, bear in mind the revenues have been increasing all the time. We pronounce the entertainment features on the Minnesota grounds this year as legitimate and proper in every way. We understand that a responsible company was contracted with for the week, and if this is the case, the experience was such as might well be imitated.

Minnesota fair has always been strong

along agricultural lines. In some respects former years were better than this, especially in the number of counties entered on a pro rata share of the \$1,250 prize. Of the seven entries, however, all were in the highest class in point of quality of products and beauty of design. Their order of merit as decided by Prof. C. P. Bull, of the agricultural college, were as follows: First, Olmsted; second, Blue Earth; third, Houston; fourth, Morrison; fifth, Goodhue; sixth, Stearns; seventh, Itaska.

The management of the International Exposition at Chicago have always been alive to the best interests of that big fair. They know that it is built upon the favor of the live stock breeder. In order to get near the situation the plan of sending a representative of the various state fairs to entertain exhibitors was put in operation a few years ago and has been continued since. This year on the grounds of Hamline their headquarters were even more popular than ever, furnishing as they did a most convenient meeting place for stockmen. As during the day and evening stockmen are necessarily scattered widely, the International tent has really become an important factor in holding up to high water mark the interest in improved live stock. The general manager of the exposition, Mr. W. E. Skinner, did not appear on the grounds at Hamline, though he had planned to spend the week there. His able lieutenant, Barney Heide, spent the week on the grounds and his presence did much to make the week a pleasurable one for stockmen. Incidentally, Mr. Heide says that the prospects were never better than they are now for a great exposition in Chicago the first week of December.

CATTLE.

SHORT-HORNS.

The showing of reds, whites and roans at the Minnesota State Fair was a very good one for several reasons. Competition was keen and at no time did interest lag in the classes. New exhibitors were there with a good showing for first appearance and classes were well filled. The state was well represented and many of the best ribbons will remain within its boundary. F. W. Harding met his first dangerous rival of the circuit here and lost to some excellent individuals in the herd of C. E. Clarke. This herd was well fitted for the competition and uniformity of type made consistent winnings, as would be indicated in the herd classes. Mr. Leslie Smith, who is responsible for the excellent condition of the Clarke herd, has been breeding and feeding consistently for years, and his work told mightily this year. W. J. Bernd made his first appearance with a fairly uniform lot of animals that, however, were not enough of the low-set, smooth kind nor in the necessary condition to show with success against the regular exhibitors. N. A. Lind met with about the same success as at Des Moines. In the national or open show the three-judge system was in operation. Messrs. E. K. Thomas, of North Middleton, Ky.; Frank Van Natta, Fowler, Ind., and Rankin Forbes, Henry, Ill., comprised the judging talent. Aside from the open competition was a show for Minnesota herds which brought many entries not shown in the open classes. Young stock was especially good and ten-month-old calves weighing 800 pounds were not uncommon, indicating growthy, vigorous offspring. A list of the breeders in the open classes are: N. A. Lind, Rolfe, Iowa (11 head); F. W. Harding, Waukesha,

Wis. (17 head); C. E. Clarke, St. Cloud, Minn. (12 head); W. J. Bernd, New Richmond, Wis. (11 head); D. B. Searle, St. Cloud, Minn. (8 head); O. F. Henkel, Kenyon, Minn. (6 head); D. J. McLean, Cakota, Minn. (4 head); Todd Bros., Altura, Minn. (2 head); J. B. Gillilan, Wayzata, Minn. (8 head); S. Fletcher, Matteson, N. Dak. (8 head); W. W. Brown, Amentia, N. Dak. (5 head); Arthur Cooper, St. Cloud, Minn. (13 head); Thos. Graham & Son, Howard Lake, Minn. (4 head).

AWARDS.

Aged Bull—First, F. W. Harding, on White Hall Marshall 209776; second, C. E. Clarke, on Bapton Favorite 231780; third, W. J. Bernd, on Archer Halstead 216334; fourth, Todd Bros., on Ajax of Elha 219483; fifth, L. J. Norris, on Lord Butterfly 206975.

Bull Two Years Old—First, W. W. Brown, on Bapton Chief 227581; second, D. J. McLean, on Golden Archer 242508; third, Todd Bros., on Queen's Pride 240129.

Senior Yearling—First, Samuel Fletcher, on Nonpareil Star 233402; second, D. B. Searle, on Gallant Knight 242912; third, J. B. Gillilan, on Columbia Chief 241254; fourth, McLean, on Goldendrop Boy 265902.

Junior Yearling—First, N. A. Lind, on Pride of Fashion 264007; second, Aarheck Bros., on Bloom's Best 263189; third, Clarke, on Crimson Knight 242725; fourth, C. F. Henkel, on Crimson Knight 242725; fifth, Gillilan, on Ben Avon Archer 264099; sixth, Bernd, on Choice Archer 242898. N. A. Lind's eighteen-month white bull won first quite easily in this lineup over the second choice, a red bull four months his junior.

Senior Bull Calf—First, F. W. Harding, on Anoka Sultan 264212; second, Clarke, on Choice Knight 253397; third, Harding, on Gloster Marshall 263130; fourth, Harding, on Sutor 263191; fifth, Thos. Harbarn, on Flower Knight 264126; sixth, Fletcher, on Mina's Ensign 263795; seventh, Bernd, on Winnie's Archer 262437; eighth, Henkel, on Mikado 263752. The latter end of this class was hardly in show condition and were easily out-classed by the first four. C. E. Clarke met his competitor with a smooth red roan which, although a bit higher and plainer appearing, was probably more symmetrical than even Anoka Sultan.

Junior Bull Calf—First, Clarke, on Knight Commander 263720; second, Harding, on Sultan Commander 263132; third, Searle, on Victorious Archer 264397; fourth, Bernd, on Roan Archer 262944; fifth, McLean, on Lavender Duke 263903. A promising red lad carried off first honors in this ring. For style he was not up to Sultan Chief, but as a good calf in lines and conformation he was quite attractive. Third choice furnished a nice type also.

Aged Cow—First, Clarke, on Welcome of Meadow Lawn 9th; second, Harding, on Princess Flora 2d; third, Bernd, on Lady Lovell 4th; fourth, Harding, on Money Pluffie Maid; fifth, Brown, on Mamie; sixth, Cooper, on Ruth Barrington 26th. Welcome of Meadow Lawn is a large, massive cow with a good amount of style and nice lines. While higher behind than desirable, she was not out of proportion. Opinion was divided as to her right to first place, as Princess Flora catches many an eye for her pleasing carriage of head and good qualities throughout.

Heifer Two Years Old—First, Clarke, on Duchess of Lancaster 13th; second, Harding, on Anoka Broadhorns; third, Brown, on Spring Grove Kirklevington 4th; fourth, Clarke, on Dorothea 2d, Vol. 64; fifth, Bernd, on Rose Jane. With seven months the advantage, the first choice in this class made a more mature, rounded-out appearance that won favor with the ringside and the judge. W. W. Brown showed a large breedy roan with considerable flesh and evenly placed.

Senior Yearling—First, Harding on Clara Belle; second, Clarke, on Lady Mysie 2d; third, Lind, on Lovely Belle; fourth, Lind, on Rose of Autumn; fifth, Brown, on Phylletta; sixth, Cooper, on Ollie Bly 35th. A close class at the top. However, Clara Belle has such an attractive front with a low, smoothly-finished quarter that it makes her a hard one to excel. The pair shown by Lind are more of the angular type and not as high in flesh as to show at their best, though they look to be growthy, vigorous heifers.

Junior Yearling—First, Harding, on Missie of Browdale 12th; second, Clarke, on Alice of Meadow Lawn; third, Harding, on Fancy

Direct From Factory

No Agents---No Middlemen.

See what it means---A regular \$18.00 Harness for only.....\$10.97

BRIDLE open 1/2 inch, lines 1 1/2 inch, breast collar 3 inch V shape, traces 1 1/2 inch, saddle 3 inch patent leather shaft, tugs 1 inch, belly band 2 inch, breeching 1 1/2 inch, 1/2 inch hip strap, 1/2 inch turn back. Made of No. 1 oak leather. With Davis rubber or nickel trimming, \$10.97; with genuine rubber trimming, \$12.23; with white celluloid trimming, \$13.23. Add 25c if you want blind bridle. Simply send us a money order and state kind of trimming wanted and we will send harness at once with the distinct guarantee that we will refund your money and pay freight both ways if after you get it, it isn't a better harness than you could buy anywhere for from \$3 to \$5 more money. Write for our harness catalog; it's free. Only harness factory in the United States selling direct to the farmer.

Minnesota

Lovell; fourth, Searle, on Winsome Lassie; fifth, Lind, on Beaver Creek Arabella; sixth, Searle, on Mina's Lily; seventh, Fletcher, on Miss Birdella; eighth, Fletcher, on Golden Moss Rose. In this ring were included some very vigorous, growthy-looking calves showing desirable types. The placing was close among the first five, although Missie of Browndale was the pick of that number, being a richly-covered, square-bodied roan, having age to her advantage.

Senior Heifer Calf—First, Clarke, on Lady Dorothea (Vol. 63); second, Harding, on Anoka Gloster 2d; third, Searle, on Violet Pearl; fourth, Searle, on Merry Maid; fifth, Searle, on Lustrous Lady; sixth, Lind, on Victoria Countess; seventh, Harding, on Broadhooks Sultan; eighth, Clarke, on Dorothea 3d. This was found to be a difficult class for adjudication, as there were fifteen members and no outstanding one for first place. The three first selections in the showing, contested for the blue ribbon for a long time and only after a consultation of the judges could the order be chosen. The three represented very similar types and it was necessary to consider some of the finer points of style and form.

Junior Heifer Calf—First, Clarke, on Molly 3d; second, Searle, on Scottish Belle (Vol. 63); third, Clarke, on Lady Dorothea 4th; fourth, Henkel, on Blue Bird 4th; fifth, Harding, on Ramsden Flower; sixth, Lind, on Sunset; seventh, Bernd, on Happy New Year; eighth, Fletcher, on Mina Irene 3d. Type and color were very uniform among these youngsters and some were at a disadvantage for lack of condition, most notably the fourth selection, which indicated the making of a good heifer. Molly 3d is a compactly-built calf, but does not show up as she might for having a trifle heavy coat.

Senior Sweepstakes Bull—Harding, on Whitehall Marshall 209776.

Junior Sweepstakes Bull—Fletcher, on Nonpareil Star.

Champion Bull Any Age—Harding, on Whitehall Sultan.

Champion Cow Any Age—Clarke, on Welcome of Meadow Lawn 9th.

Sweepstakes Heifer Under Two Years—Harding, on Clara Belle.

Aged Heifer—First, Clarke; second, Harding; third, Brown; fourth, Bernd.

Young Heifer—First, Clarke; second, Harding; third, Searle; fourth, Lind; fifth, Fletcher. In the young herd the first choice did not show the attractive uniformity of second placing, but had two exceptionally fine-bodied yearling heifers that wou favor.

Calf Herd—First, Clarke; second, Searle; third, Harding; fourth, Fletcher; fifth, Henkel.

Four Animals, Get of One Sire—First, Harding; second, Clarke; third, Searle, fourth, Lind; fifth, Harding.

HEREFORDS.

The Hereford show at Hamline was quite complete from a standpoint of quality, but classes were small, and while Mr. Thomas Clarke, of Beecher, Ill., worked carefully in making awards, he had little difficulty in making a satisfactory distribution of the ribbons. It was a contest in which every exhibitor was on foreign soil. Cargill & McMillan secured all the blue ribbons, but were not so fortunate in the second premiums. G. H. Hoxie had a herd of very good quality, but lacked the size and maturity to make a successful showing in such good company as was at the head of the lists. Stock was shown by Edmonds, Shade & Co.; Kingsley, Iowa (14 head); Cargill & McMillan, LaCrosse, Wis. (21 head); G. H. Hoxie, Thornton, Ill. (9 head); J. C. Andras, Manchester, Ill. (10 head).

AWARDS.

Aged Bull—First, Cargill & McMillan, on Principles 4th 146394; second, Edmonds, Shade & Co., on King Edward 165604.

Bull Two Years Old—First, Cargill & McMillan, on Privateer 2d 182133; second, Edmonds, Shade & Co., on Sir Albany 9th 180123; third, J. C. Andras, Jr., on Prosper 180981; fourth, Andras, on Haven's Protector 180981.

Yearling Bull—First, Cargill & McMillan, on Bonnie Brae 3d 203317; second, G. H. Hoxie, on General Manager 2d 305606; third, Andras, on Hummer 4th 200481; fourth, Edmonds, Shade & Co., on Passport Prize 216944; fifth, A. R. Haven, on Hummer 5th.

Bull Calf Under One Year—First, Cargill & McMillan, on Fulfiller 5th 230510; second, Hoxie, on Peerless Perfection 10th 235454; third, Cargill & McMillan, on Fulfiller 3d 230508; fourth, Edmonds, Shade & Co., on Sir Edward 232986.

Aged Cow—First, Cargill & McMillan, on Heliotrope 159451; second, Cargill & McMillan, on Twilight 167464; third, Edmonds, Shade & Co., on Francis 165603; fourth, Haven, on Oua 3d 91818; fifth, Andras, on Viola 159742. The first two are an elegant pair, though Heliotrope is somewhat more refined and shows greater finish.

Heifer Two Years Old—First, Cargill & McMillan, on Miss Donald 17th 184573; second, Cargill & McMillan, on Golden Lassie 182126; third, Edmonds, Shade & Co., on Delight 3d 183991; fourth, Edmonds, Shade & Co., on Columbus' Lassie 2d 183986; fifth, Andras, on Faith 184686. The third and fourth choices in this class, while being of a good type by themselves, are a trifle too far from the ground and lacking in weight to make successful competitors for those above them.

Yearling Heifer—First, Cargill & McMillan, on Ethel 2d 203170; second, Cargill & McMillan, on Magnonette 209514; third, Edmonds, Shade & Co., on Lady Albany 207790; fourth, Cargill & McMillan, on Crocus 2d 203169; fifth, Andras, on Lady Improver 6th 202908. Ten heifers, among which were some of the very low-set, blocky kind, would have made this one of the most interesting classes of the Hereford display, but for the fact that three of the best were from one herd. Lady Albany secured third place for her trim, neat form and stronger lines.

Heifer Calf Under One Year—First, Cargill & McMillan, on Miss Filler 2d 230514; second, Hoxie, on Belle Perfection 235447; third, Cargill & McMillan, on Miss Filler 6th 239656; fourth, Cargill & McMillan, on Miss Filler 5th 230517. Another class of ten with a number of good show animals. Belle Perfection secured her place for her full, rounded-out form, much neater about the rump than any of her rivals.

Get of Sire—First, Hoxie, on get of Perfection; second, Cargill & McMillan, on get of Principles; third, Cargill & McMillan; fourth, Edmonds, Shade & Co.

Produce of Cow—First, second and third, Cargill & McMillan; fourth, Andras.

Herd—First and second, Cargill & McMillan; third, Edmonds, Shade & Co.; fourth, Andras.

Young Heifer—First, Cargill & McMillan; second, Hoxie; third, Andras; fourth, Edmonds, Shade & Co.

ABERDEEN-ANGUS.

This beef breed was well represented in point of excellence. However, in numbers there was a noticeable shortage over past years. The competition in past seasons partly accounts for this, yet it would seem to be the best in the end for the supporters of any breed to make the best display possible, regardless of losing premium money. It was an Iowa display, practically a change of venue for the winners at Des Moines the week before. No change of importance was made in decisions. The judging in the hands of Mr. Thos. Clark, of Beecher, Ill., was precisely done to the satisfaction of all. Those who showed are: W. A. McHenry, Denison, Iowa (3 head); A. C. Binnie, Alta, Iowa (11 head); W. J. Miller, Newton, Iowa (18 head); P. J. Donohue, Holbrook, Iowa (9 head).

AWARDS.

Aged Bulls—First, Binnie, on Jim Delancey; second, McHenry, on Baden Lad 61833.

Two-Year-Old Bull—First, Donohue, on Morning Star 75716; second, Miller, on McDonald's Lad 66952.

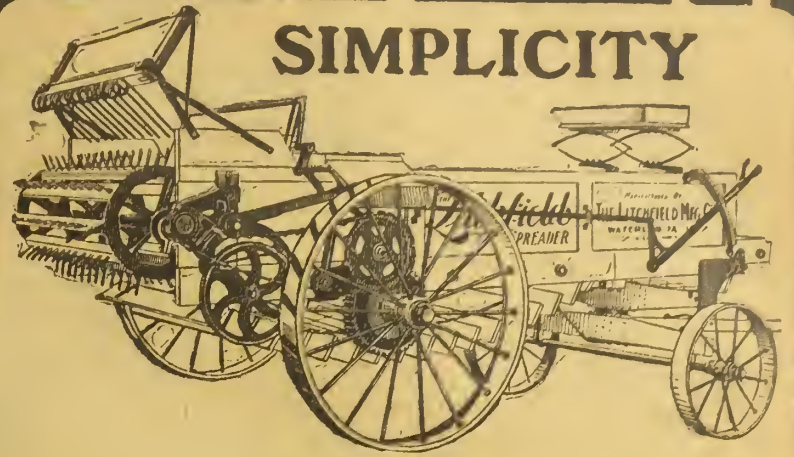

Yearling Bull—First, McHenry, on Star of Denison 82426; second, Donohue, on Glenfold Thickset 2d 83142; third, Binnie, on Elmer Lad.

Senior Bull Calf—First, McHenry, on Prince Pico 93306; second, Gelhack, on Badgerlawn Boy 94214.

Junior Bull Calf—First, Binnie; second, Miller, on Erica Prince M.

Aged Cow—First, Miller, on Snowflake of Kirkbridge 46016; second, McHenry, on Glenfold Rose 63489; third, Donohue, on Blackbird Favorite 2d 59234; fourth, Binnie, on Gussie of Kirkridge. The first choice in this class had the advantage in handling and had a great back, smooth covered and full at the crops. Some looked for a higher place for the third choice, she being a massive, blocky cow, but rather hard in her handling over the back and ribs, being a four-year-old last March.

Two-Year-Old Cows—First, McHenry, on Barbara McHenry 18th 71677; second, Donohue, on Pride of Clover Leaf 73969; third, Donohue, on Eileen Lass 73102. A close class,

WHAT DOES THIS MEAN?

DID OUR readers ever stop to think that in the past it has been the simplest of things that have proved to be the greatest? Our simple men have been our great men. It has been the simple, plain discovery of some element in nature and not the complicated mechanical device that has been successful. It is seldom we think of it in this way, but simplicity means perfection.

The Litchfield Spreader was at first built with more parts and pieces than now. This machine has grown rapidly and as it grows bigger in quality and reputation it grows smaller in parts and pieces. This Spreader was not invented in a day nor was it perfected alone by one man. It is the result of the skill and combined knowledge of the user and the successful factory experts.

The improvements on the Litchfield Spreader are designed and worked out at least a year ahead of their being placed on the market and this is a guarantee against experiments. This is why the guarantee for five years can be made and why we can make such a liberal agreement with our customers.

If it was possible to build a Spreader of but one piece, it would stand unlimited abuse and misuse and be practically indestructible. Not being possible to build in this way, this machine is constructed as near this line as it can be, by using the fewest parts and pieces that can be made to do the work successfully. This means lack of trouble, repairs and annoyance in the field and gives durability and long life in service. Two or more levers are not used where one will answer. One large gear wheel or sprocket wheel will stand more service than two small ones, and, likewise, all the way through on this machine, light complicated parts are eliminated and strength and durability take their place.

We do not claim that no machine can operate well without being simple in construction, but we do claim that any machine that is to be used by the average more or less careless hired man and the smaller boys must be with as few parts requiring mechanical attention as it is possible to build it, and this is what we offer in the Litchfield Spreader, the only machine guaranteed for five years. (Continued.)

THE LITCHFIELD MFG. CO. P. O. Box A388, WATERLOO, IOWA

but a very attractive, symmetrical form in first choice won favor with the judge.

Yearling Heifer—First, Binnie, on Blackbird Lassie; second, McHenry, on Pride McHenry 45th 82421; third, McHenry, on Abhess McHenry 6th 82418. Fully an hour was spent in deciding this class of eight, as they were a plump, uniform lot of pretty heifer types. Blackbird Lassie has a most captivating expression and carries her head and ears in a way that appeals to the most critical. The rest of her is correspondingly doddie and she presents just about an ideal type. A lighter heifer of good style and conformation followed, while ordinary lines and plain hearing detracted from a vigorous, blocky heifer chosen for third place.

Senior Heifer Calf—First, Donohue, on Brookside Pride 5th 93258; second, Donohue, on Brookside Rose 2d 93255; third, Binnie, on Anna Lass; fourth, McHenry, on Abhess McHenry 7th 93307.

Junior Heifer Calf—First, Binnie, on Queen Lass; second, McHenry, on Blackbird McHenry 66th 93314; third, Miller, on Snowflake's Queen; fourth, Binnie, on Proud Lass.

Aged Heifer—First, Binnie; second, McHenry; third, Donohue; fourth, Miller.

Young Heifer—First, McHenry; second, Binnie; third, Donohue.

Get of One Sire—First, Binnie; second, Miller.

Produce of One Cow—First and second, McHenry; third, Miller.

Champion Bull—Binnie, on Jim Delancey.

Champion Cow—Miller, on Snowflake of Kirkridge.

Junior Champion Bull—McHenry, on Prince Pico.

Junior Champion Heifer—Binnie, on Blackbird Lassie.

RED POLLS.

The Red Polls came out in numbers and merit that was gratifying to those believing in a great future for this breed in the central West. In many of the animals shown there was noticeable a well-developed mammary system with a very smooth, trim form that would do well on the block. Quality is quite marked in this dual-purpose breed, much more so than in some others, yet there is danger that with too much refinement in size and hardness will come a loss of favor with the general farmer who feeds much rough foods. Geo. B. Buck & Co. secured championship on a cow unplacced at Des Moines. A. L. Haeker acted as judge. The exhibitors were: Geo. B. Buck & Co., Orion, Ill. (13 head); J. H. Aultfather, Austin, Minn. (9 head); G. W. Coleman, Webster City, Iowa (13 head); A. W. Dopke, Milwaukee, Wis. (10 head); W. S. Hill, Alexandria, S. Dak. (13 head).

AWARDS.

Aged Bull—First, Coleman, on Irwin 8253; second, Aultfather, on Mikado 1276; third, Buck & Co., on Money Maker 11944; fourth, Dopke, on Juno 10542.

Two-Year-Old Bull—First, Hill, on Protection 12095; second, Dopke, on Village Boy 12731.

Yearling Bull—First, Coleman, on Logan 13500; second, Coleman, on Durock 14573; third, Buck & Co., on Trouhle 13958; fourth, Coleman, on Royal 14575.

Bull Calf Under One Year—First, Hill, on Ivanhoe 14372; second, Coleman, on Leader, Vol. 19; third, Buck & Co., on Ramhler 14607; fourth, Hill, on Dale 14832.

Aged Cow—First, Buck & Co., on Eva 2d 16529; second, Aultfather, on Mollie 18690; third, Coleman, on Saucy 14234; fourth, Hill, on Daisy Princess 13369. This was a large class and the first choice was a cow of strictly dairy conformation. Mollie, a six-year-old, had a strong title to first, being much the better performer at the pail from outward indications. Her test was claimed to be five and six-tenths.

Two-Year-Old Cow—First, Dopke, on Dora 21080; second, Hill, on Nellie 21746; third, Aultfather, on Charmer 22586; fourth, Buck & Co., on Dewdrop 4th 22494.

Yearling Heifer—First, Hill, on Inez 23477; second, Coleman, on Wild Rose 2d 23519; third, Buck & Co., on Maud's Baby 24114; fourth, Dopke, on Miss Chadwick 23229.

Heifer Calf—First, Hill, on Rosabelle 24680; second, Coleman, on Dolly, Vol. 19; third, Hill, on Roberta 24681; fourth, Coleman, on Queen Maid 24969.

Aged Heifer—First, Coleman; second, Buck & Co.; third, Hill; fourth, Aultfather.

Young Heifer—First, Coleman; second, Hill; third, Buck & Co.; fourth, Dopke.

Get of One Sire—First, Coleman; second, Buck & Co.; third, Hill; fourth, Dopke.

Produce of One Cow—First, Hill; second, Buck & Co.; third, Coleman.

Champion Bull—Buck & Co.

Champion Cow—Buck & Co.

Champion Junior Bull—Coleman.

Champion Junior Heifer—Hill.

GALLOWAYS.

Less than three dozen head of animals made up the showing in the Galloway division. But among these were some choice

INTERIOR VIEW OF JUDGING PAVILION.

stock, equal to those in any of the beef breeds. The herd of C. E. Clarke was very uniform and of the type that is fast becoming popular among the admirers of the curly coats. In the young stock there were some very low, blocky calf forms that show a decided improvement over that shown only a few years back, and without doubt this hardy breed will increase in popularity with each coming show season. Those who had herds were: A. F. Craymer, Morris, Ill. (12 head); J. E. Bales & Son, Stockport, Iowa (11 head); C. E. Clarke, St. Cloud, Minn. (10 head).

AWARDS.

Aged Bull—First, Craymer, on Scottish Samson 23542.
Two-Year-Old Bull—First, Bales & Son, on Canty Lad 24714.
Yearling Bull—First, Clarke, on Prince of Meadow Lawn 26843; second, Craymer, on Protector of Rivers 27193.
Senior Bull Calf—First, Clarke, on Victor of Meadow Lawn 28746; second, Bales & Son, on Dorothea's Prince 28813; third, Bales & Son, on Bonnie McDougall 28812.
Junior Bull Calf—First, Clarke, on Meadow Lawn Meadlist 28750; second, Craymer, on Grandee of Rivers 28774; third, Craymer, on Milverton of Rivers 28773.
Aged Cow—First, Clarke, on Nora of Durham Hill 21203; second, Bales & Son, on Graceful 3d of Gallestown 19297; third, Craymer, on Princess Mabel 23484.
Two-Year-Old Cow—First, Clarke, on Soney of Meadow Lawn 24818; second, Craymer, on Prudie of Rivers 25413; third, Bales & Son, on Annie Davids 5th 26977.
Yearling Heifer—First, Clarke, on Sadie of Meadow Lawn 26834; second, Clarke, on Cora of Meadow Lawn 26833; third, Craymer, on Standard Pet 27190.
Senior Heifer Calf—First, Clarke, on Lady Belle 4th 28740; second, Bales & Son, on Annie Davids 6th 28780; third, Craymer, on Doretta of Rivers 28762.
Junior Heifer Calf—First, Clarke, on Lady Douglas 3d 28745; second, Bales & Son, on Princess Graceful 28781; third, Bales & Son, on Lady Graceful 28783.
Exhibitor's Herd—First, Clarke; second, Bales & Son; third, Craymer.
Young Herd—First, Clarke; second, Bales & Son; third, Craymer.
Get of Sire—First, Clarke; second, Bales & Son; third, Craymer.
Produce of Cow—First, Clarke; second, Bales & Son; third, Craymer.
Champion Bull—Bales & Son.
Champion Cow—Clarke.

JERSEYS.

The Jersey exhibit was practically a repetition of what had happened at Des Moines the week previous. Minnesota's representation was limited to two entries by F. H. Peavey, Estate. Next year the exhibit should be better patronized. The other breeders were Dixon & Deane, Brandon, Wis., and Hunter & Smith, Beatrice, Neb., who divided ribbons in about the same way as they had at the Iowa fair. Mr. A. L. Haecker, of Lincoln, Neb., made the awards and reversed the former decision in the young herd in favor of Dixon & Deane.

AWARDS.

Aged Bull—First, Hunter & Smith, on Em-anon (Imp.) 52299; second, Dixon & Deane, on Zelaya's Fancy Lad 65833.
Bull Two Years Old—First, Dixon & Deane, on Victoria Champion Lad 2d 71849.
Yearling Bull—First, Hunter & Smith, on Catillon's Bachelor 73605; second, Dixon & Deane, on Bugler's Golden Lad.
Senior Yearling—First, Hunter & Smith, on Guenon's Champion Lad 73607; second, F. H. Peavey, Estate, on Highcroft Harry; third, Dixon & Deane, on Sphinxetta's Golden Lad 73699.
Aged Cow—First, Hunter & Smith, on Jersey Dairy Maid 140946; second, Hunter & Smith, on Golden Pink's Pride 168502; third, Hunter & Smith, on Lily's Jubilee Pogis.

IN BUSINESS AT MINNESOTA FAIR.

124596; fourth, F. H. Peavey, Estate, on Wayside 10143.

Heifer Two Years Old—First, Dixon & Deane, on Beechfield's Francie 192138; second, Dixon & Deane, on Carl's Grand Mei 181337; third, Hunter & Smith, on Silver Stella 182973.

Heifer One Year Old—First, Dixon & Deane, on Bessie's Golden Lady 190874; second, Hunter & Smith, on Guenon's Ava Avawana 195989; third, Hunter & Smith, on Victoria's Golden Fairy 194605.

Senior Heifer Calf—First, Hunter & Smith, on Guenon's Victoria; second, Dixon & Deane, on Linda's Golden Lady 191916; third, Hunter & Smith, on Victoria's Fairy; fourth, Dixon & Deane, on Silver's Golden Lady.

Young Herd—First, Dixon & Deane; second, Hunter & Smith.

Get of One Sire—First, Hunter & Smith; second, Dixon & Deane.

Produce of One Cow—First, Dixon & Deane; second, Hunter & Smith.

Herd—First, Hunter & Smith; second, Dixon & Deane.

Champion Bull—Hunter & Smith, on Em-anon 52299.

GUERNSEYS.

Mr. A. L. Haecker, of the Nebraska Agricultural College, acted as judge of this breed, which was in the hands of two Wisconsin breeders, Mr. J. G. Hickox, of White Fish Bay, and Mr. M. D. Cunningham, of Kansasville. Of the twenty-five animals shown the latter named breeder had fourteen and secured the best ribbons. This breed has not yet worked far into the western states, but from the interest showed and character of animals displayed it is likely that new herds will be established ere long in the corn belt states.

AWARDS.

Bull Three Years Old—First, Cunningham, on Robeanas Standard 7254; second, Cunningham, on Sorograf 8674.

Bull Two Years Old—First, Hickox, on Yon Yonson 9735.

Yearling Bull—First, Cunningham, on Hat-tie's Binnie 10300; second, Hickox, on Glen-

wood Chief of Cloverbrook; third, Cunningham, on Fanny's Standard 10302.

Bull Under One Year—First, Cunningham, on Coliseum 10925; second, Cunningham, on Elkhorn 10664; third, Hickox.

Cow Three Years Old or Over—First, Cunningham, on Do Fess 11218; second, Hickox, on Belle of Galloway 11575; third, Cunningham, on Fess Leip 10621; fourth, Hickox, on Irwin 3d 16739.

Heifer Two Years or Over—First, Cunningham, on Fess Leip's Luna 17233; second, Cunningham, on Sabura 17332; third, Hickox, on Derline 20764.

Yearling Heifer—First, Cunningham, on Queen Sanative 18574; second, Hickox, on Belle of Cloverbrook 20794; third, Cunningham, on Fess Do's Nymph 18573.

Heifer Calf Under One Year—First, Hickox; second, Cunningham, on Queen Dorando 19845; third, Hickox.

Young Herd—First, Cunningham.

Get of Sire—First, Cunningham; second, Hickox.

Produce of Cow—First, Cunningham; second, Hickox.

Herd—First, Cunningham; second, Hickox.

Champion Male—Cunningham.

Champion Female—Cunningham.

Junior Champion Male—Cunningham.

Junior Champion Female—Cunningham.

HOLSTEIN FRIESIANS.

Prof. A. L. Haecker, of Lincoln, Neb., made the awards for this breed. From Iowa came McKay Bros., Buckingham, with fifteen head, and W. B. Barney & Co., Hampton, with twelve head. Minnesota carried away a few good ribbons with the noted herd of John B. Irwin, of Minneapolis. Competition was much less active than it would have been had Kaan Jewell of Wood Lake 28725, the noted winner of past years, not been barred from the contest as the rules of the fair association require. McKay Bros. did better than at Des Moines and took first in the two aged classes, also the championship on male and female.

AWARDS.

Aged Bull—First, McKay Bros., on Alcarta Polkadot Corrector 30624; second, Barney & Co., on Prince Leila DeKol 29358; third, Geo. H. Comings.

Yearling Bull—First, Barney & Co., on Captain Wayne 40453; second, Irwin, on Sir Korndyke Henry DeKol 41266; third, Irwin, on Sir Jewel Parthena Doede 38639.

Bull Calf Under One Year—First, Irwin; second, McKay Bros., on Paul Pietertje Ah-bekirk 42490; third, Irwin.

Aged Cow—First, McKay Bros., on Inka Tritonia 38847; second, Barney & Co., on Parthena Hengerveld 46004; third, Irwin.

Heifer Two Years Old—First, McKay Bros., on Lady Arcula 71323; second, Irwin, on Virgo Beauty Canary 73077; third, Barney & Co., on Gerben Empress of Home Farm 3d 71978.

Yearling Heifer—First, Barney & Co., on Empress Gerben of Home Farm 3d 79243; second, Irwin, on Inka Mercedes Canary 78234; third, McKay Bros., on Leda Duchess Fohes 83900.

Heifer Calf—First and second, Irwin; third, McKay Bros., on Thicket 3d 81288.

Young Herd—First, Barney & Co.; second, Irwin; third, McKay Bros.

Get of One Sire—First, Irwin; second, Barney & Co.; third, McKay Bros.

Champion Male—McKay Bros.

Champion Female—McKay Bros.

Junior Champion Male—Barney & Co.

Junior Champion Female—Barney & Co.

BROWN SWISS.

The exhibit of this breed was confined to the herd of H. W. Ayres, Honey Creek, Wisconsin. Fourteen animals comprised the total of his herd, which attracted much attention from many who were not familiar with this dual-purpose breed of cattle, as well as those interested in their future. The herd bull, Richard Esmond 1342, is a large, angular animal, weighing 1,900 pounds, while the cows showed indications of being heavy milkers and able to use large quantities of coarse forage. This herd was not as smooth in form as some, as Mr. Ayres seeks a strong dairy conformation in his stock. As there was no competing herd, the awards were made as shown in the catalog.

HORSES.

PERCHERONS.

As a whole the Percheron display was undoubtedly the best ever seen at the Minnesota State Fair. Classes in both females and stallions were well patronized with entries, and Professor Humphrey found it a difficult task to place the winners, especially in the two aged stallion classes, on which Wednes-

ROOFING

The NEVERLEAK ROOFING

LAY IT YOURSELF

On any kind of roof, on any pitch of roof, in any climate, in any weather, Congo Roofing proves its merit. For sheer durability it out-ranks all rivals. If you need a new roof over the worn-out shingles, or the old ready roofing, don't buy till you see our goods.

A glance at a sample will convince you. We send same free.

BUCHANAN-FOSTER CO.,
442 CHESTNUT STREET,
PHILADELPHIA, PA.

day forenoon was solely spent. If any one individual was of outstanding merit it was Olbert, the last year's winner, now owned by H. G. McMillan, Rock Rapids, Iowa. The quartet of mares shown by the same breeder are generally considered the best ever seen on the Hamline grounds, and will attract much attention before the season closes. Burgess and Lukyn made a spectacular display with five recently imported stallions in the group class that were as nearly faultless as are found. Despite the fact that other draft breeds are seeking notice, breeders of the Percheron can feel assured that good representatives will always be recognized. The type that is popular in the central West on farms and in cities is not the extreme heavy horse, but a clean-limbed, active animal of medium weight. By far, the horse exhibit was the most popular with the onlookers and showy actors brought forth applause that indicated a proper appreciation of good equines. The list of exhibitors follows: H. A. Briggs, Elkhorn, Wis. (7 head); McLaughlin Bros., St. Paul, Minn. (16 head); L. W. Cochran, Crawfordville, Ind. (14 head); H. G. McMillan, Rock Rapids, Iowa (16 head); Burgess & Lukyn, Mankato, Minn. (7 head); Finch Bros., Verona, Ill. (6 head); Crandall & Danforth.

Aged Stallion—First, McMillan, on Olbert 42815; second, McLaughlin Bros., on Ristori 40657; third, H. A. Briggs, on Taupin 55341; fourth, McLaughlin Bros., on Mulzie; fifth, T. L. & J. L. Le Lancy. Twelve stallions competed in this ring for the five moneys and a difficult task they made for the judge. For some time it looked as if the great horse, Olbert, would be left at second place; however, his type was a bit higher, more stretchy than those about him, and his good size, combined with lots of quality and magnificent character won him his place. Each of the five were notable for good points and strong, straight underpinning was the rule.

Three Year Old—First, McLaughlin Bros., on Mouton 41202; second, McLaughlin Bros., on Distrat 41288; third, Briggs, on Siphon 57800; fourth, McLaughlin Bros., on Commissaire. This class brought out another good bunch with the exception of a few out of the nine that were too far from the ground and round in canon.

Two-Year-Old Stallion—First, Burgess & Lukyn, on Sultan; second, McLaughlin Bros., on Yousouf 41303; third, Briggs, on Blason 63550; fourth, McLaughlin Bros., on Esplegle 41302; fifth, Briggs, on Roitelet 64220. This was the largest class shown and Sultan won out in strong competition.

Yearling Stallion—First, Cochran, on MacDuff 45562; second, McMillan, on Diaz 45550; third, McLaughlin Bros., on Vapoureux 41343; fourth, Cochran, on Amerigo 45571. Cochran's MacDuff had some the advantage for his greater weight and maturity, being more showy than some of his class.

Aged Mare With Suckling Foal—First, Crandall & Danforth, on Peerless Baby 23819; second, Crandall & Danforth, on St. Elmo 32705.

Aged Mare—First, McMillan, on Iolanthe 40925; second, Crandall & Danforth, on Jeanne 40335; third, Briggs, on Bolime 58538; fourth, Cochran, on Lady of Quality 45560. Iolanthe is a 1,800-pound, active mare, somewhat closer coupled than her nearest rival, but too round in the cannons, which was a general criticism of the class.

Two-Year-Old Mare—First, McMillan, on Adrienne 45555; second, McMillan, on Rosamond 45547; third, Crandall & Danforth, on Trudie 41741; fourth, Cochran, on Arhella 45565.

Yearling Mare—First, Cochran, on Sweet Violet 45568; second, McMillan, on Lucia 45551; third, McMillan, on Columbine 45557; fourth, Cochran, on Sweet Marie 45566.

Sweepstakes Stallion, Any Age—McMillan, on Olbert.

Sweepstakes Mare or Filly—McMillan, on Iolanthe. The Percheron Society of America offered gold medals to recorded animals. Awards are as follows:

Champion Stallion—Cochran, on MacDuff. Champion Mare—McMillan, on Iolanthe. Best Five Stallions—This was won by a recent importation of Burgess & Lukyn and drew admiration from all. There was not a speck on them and an even, cleaner bunch is seldom gathered together.

Best Three Mares—McMillan, on three extra good ones. Champion Group of American Bred Ani-

Tool Book Free

KEEN KUTTER

QUALITY TOOLS

Ever buy a hatchet that would sharpen a pencil? If you did, it was a Keen Kutter, for every Keen Kutter edged tool is sharpened at the shop. On the other hand—did you ever buy a hatchet that you had to grind before using, and in grinding find a flaw or soft spot? That is the reason that most manufacturers do not give you a hand sharpened tool. They let you take the risk.

KEEN KUTTER

QUALITY TOOLS

are offered you with every risk of quality or temper removed. Edges are keen and perfect—temper and quality are tested and every tool is stamped with the name and trade mark for identification and guarantee. You don't need to be a tool expert to buy the best tool of any kind. Just ask for a Keen Kutter if you want a Saw, Chisel, Bit, Drill, Gimlet, Awl, Plane, Hammer, Hatchet, Axe, Drawing-knife, Pocket-knife, Screw-driver, File, Glass-cutter, Ice-pick, or any tool for bench, home, garden or farm.

Sold for 37 years under this mark and motto:

"The Recollection of Quality Remains Long After the Price is Forgotten." Trade Mark Registered.

If your dealer does not keep Keen Kutter Tools, write us. Tool Booklet on request.

SIMMONS HARDWARE COMPANY, St. Louis and New York, U. S. A.

males—First, McMillan; second, Cochran. The quality shown in these two latter groups speaks well for home bred animals. Much of the importance of the word "imported" would be lost with buyers of stallions could stock of this character be more commonly seen.

BELGIANS.

The show of Belgian horses brought out some exceptionally good stallions. There were only four classes in all, but to offset this, the number that competed for honors was a goodly one and required much careful effort on the part of Professor Humphrey to make the awards. From the array of animals shown, it begins to appear as if some of the better members of this breed were being introduced into the western country. While there were some stallions with the coarse, meaty bone and puffy backs, they were the exception. Good actors were not uncommon, either, and made the showing quite satisfactory. The display was composed for the most part of stallions, many of which were being sold at good prices. Those who showed were McLaughlin Bros., St. Paul, Minn. (4 head); T. L. & J. L. De Lancey, Northfield, Minn. (9 head); Finch Bros., Verona, Ill. (5 head); H. A. Briggs, Elkhorn, Wis. (5 head); Burgess & Lukyn, Mankato, Ill. (4 head).

Stallion Four Years or Over—First, H. A. Briggs; second, McLaughlin Bros., on Forten de Smeerhebbe 2212; third, Finch Bros., on Frazier; fourth, McLaughlin Bros., on Limier 1833; fifth, H. A. Briggs. Second choice in this class was first at Des Moines. In this ring he was placed below a stallion not as stylish, but with more substance and stronger, flatter bone.

Stallion Three Years Old—First and second, Briggs; third, Finch Bros., on Mephisto; fourth, McLaughlin Bros., on Vincinal de Connin 2215.

Mare Two Years Old—First, Finch Bros., on Pistache d'Alvoux.

Sweepstakes Mare—Finch Bros., on Pistache d'Alvoux.

Stallion Two Years Old—First, Burgess & Lukyn; second, DeCler; third, H. A. Briggs. Sweepstakes Stallion—Briggs.

ENGLISH SIRE.

Twenty-one representatives of this draft breed made the total showing, which consisted for the greater part of mature stock for breeding. It was generally considered a fair display of quality and size, although there were some crooked hocks and meaty cannons present. Classes were not large enough to take the three moneys after the two aged rings, where the most competition was in evidence. Professor Humphrey, of Madison, Wis., judged the classes. The list of exhibitors are: L. W. Cochran, Crawfordville, Ind. (4 head); Burgess & Lukyn, Mankato, Ill. (5 head); Finch Bros., Verona, Ill. (12 head).

AWARDS.

Stallion Four Years or Over—First, Burgess & Lukyn, on Delaneter Rectar; second, Burgess & Lukyn, on Hessary Conqueror; third, Burgess & Lukyn, on Northdown Conqueror; fourth, Finch Bros., on Stentney Bouncer.

Stallion Three Years Old—First, Finch Bros., on Barnfield's Offhorse; second, Burgess & Lukyn, on Medford Tom.

Stallion Two Years Old—First, L. W. Cochran, on John D. 8421; second, Finch Bros., on Finch's Justice; third, Finch Bros., on Sir Albert; fourth, Finch Bros., on Verona Bouncer.

Stallion, Foal of 1906—First, Cochran, on Zero 8432; second, Finch Bros., on Champion.

Mare Three Years Old—First, Cochran, on Bay Girl.

Mare Two Years Old and Under Three—First, Cochran, on Favorita 8419.

Mare One Year and Under Two—First, Cochran, on Minnehaha 8422; second, Finch Bros., on Verona Belle.

Champion Stallion—Finch Bros., on Barnfield's Offhorse.

Champion Mare—Finch Bros., on Mohamet Belle.

CLYDESDALES.

Prof. G. C. Humphrey, of Madison, Wis., placed the ribbons on this breed in a comparatively short time. C. E. Clarke, of St. Cloud, Minn., was the only exhibitor and his animals in general were of good character; useful stock of durable bone and desirable weight. Mr. Clarke could have held his own against strong competition.

SWINE.

The hog show at Minnesota State Fair exceeded the expectations of the management, as well as exhibitors. An increase of 30 per cent in numbers over the show of 1905 brings

it very close to the front in this particular department. Nine hundred and twenty-six representatives of the various breeds filled the pens to overflowing and the management found it necessary to build extra sheds to accommodate the exhibitors. These temporary sheds were erected just below the hog barn. These were chiefly used for Duroc Jerseys and Tamworths, besides a few Poland Chinas. The management regret very much the lack of space in the large barn and purpose making additions before another fair, that every exhibitor may have a favorable location. Exhibitors from two states more than ever appeared before brought out creditable herds, and their assistance in making the hog department a grand success was highly appreciated by the management. Herds in their respective classes were larger and better fitted, and with hardly a single exception combined quality with modern type. The hog raisers of Minnesota are up to date, and even in classes where competition was not large, the present-day type was exhibited. The breeds were arranged in sections and Prof. D. Gaumnitz, of the agricultural college, gave the matter his personal attention and to him the growing success of the show is largely due. During the five years of his management the show has tripled itself until circumstances demand that larger and better accommodation be provided. The absence of disease was especially significant. The management had made provision for this by having everything carefully disinfected before the show, and a sprinkler was passed up and down through the divisions and passages many times a day throughout the entire week. The individual exhibitor was carefully looked after and all possible conveniences arranged. A half dozen breeds from as many different states were represented this year, as follows: Yorkshires, 43; Tamworths, 36; Chester Whites, 111; Duroc Jerseys, 213; Poland Chinas, 396; total, 926.

DUROC JERSEYS.

This breed attracted much attention, and more enthusiasm was manifested at the ring-side, especially in aged classes and for championship. The classes were well filled with typical and modern animals. More Durocs appeared than was expected, almost every exhibitor having something for each class. There were 211 head exhibited, leaving out all small litters. The classes were strong in every particular, and Judge L. H. Roberts had a difficult task cut for him, but he proved himself to be an artist as a Duroc judge. Many sales were made the first three days of the show and good prices were realized. Choice animals came from Iowa, shipped direct from the Des Moines fair, others from Illinois and Wisconsin. The greater part were Minnesota breeders, these winning a good share of the best prizes. The Durocs throughout were strong in the back with the exception of a few young boars. In aged boar class the judge had three to select from eight; first went to Wm. Malcolm on Dale 35169, by Anon Prophet, and out of Lady Rickey, but when it came to championship, Iowa Notcher 37345, owned by Easton Bros., won the laurel. This is an exceptional boar, winning first at Des Moines. First in aged class and champion sow at Des Moines obtained the same honors at Hamline, Royal Blossom 5th, by American Royal 15453, and out of Violet Blossom 51236, bred and owned by Edmunds, Shade & Co. In yearling sow class Edmunds, Shade & Co. also won 1st on Lady Shadeland, sire Winged Boy 43607, and out of Shadeland Queen 109024. Young sow classes were well filled; many of these promise fair to appear next year. They were an exceptionally fine lot from which a brood sow could be selected. Best sow and litter of any land type, Darling 11 and litter, sire Malcolm Model 13879, dam Darling. This Duroc Jersey also won first as dam of largest number of best pigs of any breed or type. Herd prizes went, first Edmunds, Shade & Co.; second, Easton Bros. Easton Bros. won first on young herd. Champion boar, won by Malcolm, on Dale 35169. Sow any age, Edmunds, Shade & Co. on Royal Blossom 5th. The following were the exhibitors: T. E. Bly, Brewster, Minn.; Reed, Wright & Co., Whitewater, Wis.; Harmon Gruver, Brewster, Minn.; Wm. Malcolm, Bigelow, Minn.; Edmunds, Shade & Co., Kiugley, Iowa; J. E. Wehr, Portsmouth, Iowa; Riel & Cooper, Ferris, Ill.; P. B. Lake, Moscow, Ill. Messrs. D. J. Pollock, Thayer, Iowa, and F. Fowler & Son, Meulo, Iowa, made entries, but failed to appear. Judge L. H. Roberts, of Paton, Iowa, made awards as follows:

AWARDS.

Aged Boar—First, Malcolm, on Dale 35169, sire, Arion Prophet, dam Lady Rickey; second, Reed, Wright & Co., on Perfection Chief; third, Gruver, on Gruver's Orion, sire Ordway 9845, dam L. Z. 24145.

Boar One Year and Under Two—First, Easton Bros., on Iowa Notcher 37345, sire Ohio Notcher 28777, dam, Lucy Advance 57546; second, Reid, on Sensation Prince; third, Edmunds, Shade & Co., on American Royal Jr., sire American Royal 15453, dam Grove Belle 51252.

Boar, Six Months and Under One Year—First, Wehr; second, Edmunds, Shade & Co., sire by American Royal 15443, dam Albia 51242; third, Bly.

Boar Under Six Months—First, Reed, Wright & Co.; second, Reed; third, Bly.

Brood Sow, Two Years and Over—First, Edmunds, Shade & Co., on Royal Blossom 5th, sire American Royal 15453, dam Violet Blossom 51236; second, Sunshine Lena 94108, sire by Carrol Jumbo 18873, dam Lena 28814.

Breeding Sow, One Year and Under Two—First, Edmunds, Shade & Co., on Lady Shadeland, sire Winged Boy 43607, dam Shadeland Queen 109024; second, Reed, Whitewater, Wis., on Dorris Maid; third, Easton Bros., on Moss Rose 124048, sire Iowa Banker 29077, dam Rose Advance 70740.

Sow, Six Months and Under One Year—First, Reil & Cooper; second, Edmunds, Shade & Co.; third, Malcolm.

Sow, Under Six Months—First, Reil & Cooper; second, Reed; third, Malcolm.

Herd—First, Edmunds, Shade & Co., headed by American Royal Jr., Royal Blossom 5th, Belle Royal and Lady Shadeland; second, Easton Bros., headed by Iowa Notcher 37345, with Sunshine Lefa, Galva Lena & Moss Rose.

Young Herd—First, Easton Bros.; second, Reed; third, Reil & Cooper.

Boar, Any Age—Malcolm, on Dale 35169, sire Arion Prophet, dam Lady Rickey.

Sow, Any Age—Edmunds, Shade & Co., on

Wagon Box Manure Spreader

FITS ANY TRUCK

The Only Successful Wagon Box Spreader that Fits any Ordinary Farm Truck.

Sold direct from my factory to you.

That's the way I sell them.

Built on honor.

That's the way I build my spreaders.

Not how cheap but how good, is the principle on which I build the Galloway spreaders.

After I have made them as good as I can then I make the price as low as I can.

A spreader for \$59.50.

A spreader that I personally guarantee to work as well or better than any other spreader on the market today.

My guarantee is the broadest possible—and backed up by a \$25,000 legal bond, which as president of The William Galloway Company I stand right back of.

I just want you to try the Galloway spreader.

It's a wagon box spreader that I have so much confidence in that I want you to send for one, take it out in the field and use it, or abuse it if you want to, for 30 days, and if you don't find it worth more than the \$59.50 ask for it just take it back to the depot and ship it back to me. I will pay the freight both ways.

You can try it for nothing—and at no risk.

My free trial plan is such that you don't have to send me one cent in advance. You get my plan when you get my booklet.

I can save you over one half the price you would have to pay for any other spreader.

In other words I can save you \$70.00 on a spreader of a fifty bushel capacity. You would tie nearly that amount up in a spreader truck, useless eleven months in the year, if you bought the ordinary high priced spreader.

A feature of the Galloway Spreader, as important as its simplicity and low price, is its light draft. Just two horses needed to haul it.

Mr. Miller, a prosperous farmer of Waterloo, Iowa, gives all these points in his letter—just read it.

Just cut out this ad and send it to me with your name and address written on it plainly and I will send you my Spreader booklet by return mail—free, or a letter or postal will bring it.

Miller Testimonial Letter.

I have thoroughly tried your 2 horse spreader. Have hauled over 300 loads of manure of all kinds and it did the business to a queen's taste. It has caused no trouble whatever. My 13 year old boy took it out when we first got it and started it up and hauled 5 loads before I saw him and it didn't make any trouble. I feel safe in recommending it to my neighbors and friends. We wore out one spreader of another kind and it caused so much grief that we felt prejudiced against all spreaders—but will truthfully say I have changed my mind. LEWIS MILLER.

No spreader made a third as simple as the Galloway.

But one operating lever.

One other lever for regulating the speed of the beater.

Few cogs—and all working parts extra strong.

Its beater has a rotary outward motion—nothing just like it.

Its apron is simple and works perfectly—of the endless apron style.

We positively guarantee them to handle any kind of manure.

Sold direct to the buyer without one cent being paid to us in advance, and the freight paid to your station.

Now, friend, if you have taken the time to read my spreader advertisement clear through you certainly would not be doing me or yourself full justice unless you complete it by writing me at once and letting me send you without cost my complete Spreader Booklet. It tells all about my spreader and many things you want to know in regard to the future of your land in fertilization.

Don't forget the price, \$59.50 freight prepaid. Don't forget my "iron clad" guarantee.

The Galloway is the only spreader every farmer can afford to own.

I want every farmer to have one.

Write for my free spreader booklet today or send in your order now. Write me direct—

WILLIAM GALLOWAY, President,

WILLIAM GALLOWAY COMPANY,

109 Jefferson St., Waterloo, Iowa

William Galloway, Builder of the Only Wagon Box Spreader called the "Galloway."

BERKSHIRES.

The Berkshire exhibit at the Minnesota State Fair was a creditable one, although taking a third place in point of numbers. The quality of the exhibit brought it almost to the level with the Durocs and Poland Chinas. The sow classes were especially strong and with the exception of a few boars a little off type, the exhibit was indeed high class. W. D. Becker, Ft. Atkinson, Minn., and C. D. Johnson, Nashville, Iowa, came direct from Des Moines, winning a good share of the awards there, as well as at Hamline. Prof. J. J. Ferguson acted as judge and his efforts were well received. He naturally leans toward the bacon type of hog, but thoroughly appreciates the typical Berkshire characteristics as indicated by his awards. As with the Poland Chinas, the classes under one year had many entries. Classes over one year, both in boars and sows, were well filled. The absence of objectionable white markings was especially noticeable. Sales were good and prices realized were from 30 to 50 per cent above prices paid last year. Minnesota fair is doing good work in scattering good Berkshire blood throughout the state. The management was especially gratified in this particular, and have hopes that an annual sale may be conducted in connection with the show, similar to the annual cattle sale. In aged boars Colonel Lee 67899 won the blue, sire by Baron Lee 8th 48160 and out of Princess Belle 47778, owned by W. D. Becker. This hog was also first at Des Moines. He stands well on his legs, although they carry a tremendous weight. F. V. Briggs & Son won second on Premier Victor IV, 75504 by Premier Longfellow 2d 69000 and out of Queen Vic 21st. Becker also won first on yearling boar on King Durban 85221 by Durbin of Duchess and out of Sarah I. 55388. Some exception was taken to this decision by those less critical than the judge. Third went to Kelly, on Baron Pointer 4th, whose chief defect is a plain bead. Professor Ferguson wants them with good legs and good heads. Boars winning six months and under one year class were all sired by Merger Star 78435, owned by C. D. Johnson. The exhibitors were W. D. Becker, Ft. Atkinson, Wis.; C. D. Johnson, Nashville, Iowa; F. V. Briggs & Son, Stillwater, Minn.; Arthur Cooper, St. Cloud, Minn.; B. A. Imholt, Houlton, Wis.; G. E. Kelly, Mineral Point, Wis.; C. H. Murphy, Caledonia, Minn.; L. P. Martiny, Chippewa Falls, Wis.; G. F. Poor, Hastings, Minn.; The Farmer Farm, Farmington, Minn.; W. J. Martin, Darlington, Wis. Awards as follows:

AWARDS.

Aged Boar—First, Becker, on Colonel Lee 67899, sire Baron Lee 8th 48160, dam Princess Belle 47788; second, Briggs, on Premier Victor 4th 75504, sire Premier Longfellow 2d 69000, dam Queen Vic 21st.

Boar, One Year and Under Two—First,

Becker, on King Durbin 85221, sire Durbin of Duchess, dam Sarah I. 55388; second, Johnson, on King Starlight 86876, sire General Starlight 64940, dam Starlight Best 67371; third, Kelly, on Baron Pointer 4th, sire Baron Pointer 2d 84861, dam Pointer's Beauty 5th.

Boar Six Months and Under One Year—First, second and third, Johnson, on pigs by Merger Star 78435.

Boar Under Six Months—First, Farmer Farm; second, Martiny; third, Imholt.

Aged Breeding Sow—First, Johnson, on Lady Vick 15th 93431, sire Logan 3d 63607, dam Lady Vick III. 71331; second, Becker, on Belle E. 85220, sire Colonel Lee 67899, dam Oakland Belle 8th; third, Briggs, on Conqueror 1st, sire Conqueror 63378, dam Beulah 54865.

Breeding Sow One Year Old—First and second, Johnson, on Lady Vick 18th 93434 and Lady Vick 19th 93435, sire Merger Star 78435, dam Lady Vick 5th; third, Johnson.

Sow Six Months and Under One Year—First and second, Johnson, on sows by Merger Star 78435; third, Becker, on Belle B. 2d 93432, sire Colonel Lee 67899, dam Baron Duchess 10th 67968.

Sow Under Six Months—First, Farmer Farm; second, Kelly; third, Imholt.

Herd—First, Johnson, on herd headed by King Starlight 186876; second, Becker, on herd headed by Colonel Lee 67899; third, Briggs, on herd headed by Premier Victor 4th 75504.

Young Herd—First, Johnson; second, Farmer Farm; third, Becker.

Boar Any Age—First, Becker, on King Durbin 85221.

Sow Any Age—First, Johnson, on Lady Vick 15th 93431.

POLAND CHINAS.

Poland Chinas, as usual, out-numbered any other breed at Minnesota State Fair and never was there such uniform and high-class animals exhibited. L. H. Roberts, of Paton, Iowa, placed the awards and universal satisfaction was expressed. Some criticism regarding his type was heard, but this was not in the nature of a complaint. The animals in most cases were well fitted and each exhibitor coming out with the hogs he had entered, filling up the classes. There was entirely too many good ones for all of special merit to get a place, and for this reason those not well fitted had little opportunity to get inside the awards. In aged boars Henry Bros., of LeMars, Iowa, won the blue on Matchless Junior 109999, a boar of exceptional quality and smooth finish. Second fell to Pete Holm, sire by Jim's Perfection 73569 and out of Ida 2d 1963541, owned by L. Lam-berson, Warren, Minn. First on yearling boar went to Perfection 2d, owned by Jno. Francis & Sons, of New Lenox, Ill., and bred by Mr. Brumback, of Cissua Park, Ill. The two classes included under boars under one year old had ninety-two entries. Some of these, however, failed to appear. Eight aged sows came in together. Here the moth-

Four Burrs Grinding at Once

THE GREATEST CAPACITY.
LIGHTEST DRAFT.
MANY THOUSANDS IN USE.

FOUR burrs mill grinds 60 to 80 bushels per hour. Two horse mill grinds 25 to 50 bushels per hour. We also manufacture the famous Iowa No. 2 for \$12.50. Send for free catalog of mills, cookers and furnaces. Address,

BOVEE GRINDER & FURNACE WORKS,
WATERLOO, IOWA.

erly, useful types were found. The best award fell to Jno. Francis & Sons, on Cor-rector Perfection 250474. This sow also won sweepstakes here, as well as at Des Moines. Second award went to G. W. Wheeler, of Man-torville, Minn., on Best Perfection, sire Prince Perfection 623403 and out of Tecum-seh's Best 3d 196188. A yearling sow owned by Francis & Sons, F's Lady J. 6th 282520, won first, Wheeler winning second on Tecum-seh Girl 279106, sire Thickset Jr. 91839 and out of Tecumseh's Best 2d 174924. Classes comprising sows under one year had many entries, most of which appeared. G. W. Wheeler won first on aged herd, headed by Big Boned Victor 106617; second to Henry Bros., headed by Matchless Jr. Exhibitors: J. H. Aultfather, Austin, Minn.; C. F. Gum-mert, Renville, Minn.; L. P. Martiny, Chip-pewa Falls, Wis.; C. H. Murphy, Caledonia, Minn.; W. J. Brend, New Richmond, Wis.; Henry Bros., LeMars, Iowa; Geo. Martin, Darlington, Wis.; L. Lamberson, Warren, Minn.; O. F. Jones & Co., Madison, S. D.; E. J. Cowles, West Concord, Minn.; J. F. Stahlnecker, Darlington, Wis.; W. A. Hard-ing, Winnepago, Minn.; G. J. Trister, Rush-ford, Minn.; Jno. Francis & Sons, New Len-ox, Ill.; C. F. Johnson, North Branch, Minn. The complete awards were as follows:

AWARDS.

Aged Boar—First, Henry Bros., on Match-less Jr.; second, Lamberson, on Pete Holm; third, Martin, on Prince 87445.
Boar One Year Old—First, Francis & Sons, on Perfection Hart 2d; second, Wheeler, on Big Boned Victor 106617; third, Martin, on Prince.
Boar Six Months and Under One Year—First, Francis & Sons, on Chicago Boy; sec-ond, Francis & Sons, on Hummer; third, Henry Bros., on Matchless 3d.
Boar Under Six Months—First, Ferguson; second, Reed; third, Martin.
Aged Sow—First, Francis & Sons, on Cor-rector Perfection 150474; second, Wheeler, on Best Perfection; third, Bauer.
Yearling Sow—First, Francis & Sons, on F's Lady J. 6th 282520; second, Wheeler, on Tecumseh Girl 279106; third, Cowles, on Em-ma Jones 279908.
Sow Six Months and Under One Year—First, Henry Bros.; second, Martin; third, Bernd.
Sow Under Six Months—First, Wheeler; second, Ferguson; third, Cowles.
Aged Herd—First, Wheeler, on herd headed by Big Boned Victor 106617; second, Henry Bros., on herd headed by Matchless Jr.; third, Francis & Sons.
Young Herd—First, Francis & Sons, on herd headed by Hummer; second, Henry Bros., on herd headed by Matchless Boy; third, Martiny.
Boar Any Age—Francis & Sons, on Perfec-tion Hart 2d.
Sow Any Age—Francis & Sons, on Correc-tor Perfection 250474.

CHESTER WHITES.

This exhibit was larger than ever before, and the best showing this breed has ever made at Hamline. Owing to a lack of space this breed as well as the Durocs were placed in a temporary shed outside the main hog barn. The exhibitors: V. A. Ranck, Niota, Minn. (8 head); W. J. Martin, Darlington, Wis. (16 head); Humbert & White, Nashua, Iowa (25 head); C. H. Murphy, Caledonia, Minn. (8 head); Fred Luchsinger, Jr., New-ports, Minn. (17 head); P. B. Lake, Musca-tine, Iowa (30 head); W. J. Kelly, Edmund, Wis. (8 head). Many of these animals de-scended from noted herds, were well fitted and in classes competition was very keen. This is the only breed in which it may be said that one exhibitor captured the ma-jority of awards in strong competition. S. H. Roberts awarded the prizes, expressing his appreciation of the Chester exhibit. Some of these herds came direct from Des Moines. Humbert & White won nine firsts out of sixteen, and three sweepstakes out of four at that fair, also winning a good share here. The noted herd belonging to C. H. Murphy that won distinction at Portland, Ore., Exposition, 1905, at that time headed by the noted boar, White Chief 14962, were less fortunate here, yet exhibiting some typ-ical individuals worthy of a premium, though outclassed in most cases. Every exhibitor came prepared for good competition, though lack of fitting was noticeable in a few cases.

AWARDS.

The awards are as follows:
Aged Boar—First, Humbert & White, on Joker 112391, sire Combination 12313, dam Idealia 17608; second, Humbert & White; third, Martin, on Nogi 10863.
Boar One Year Old—First, Humbert & White, on Humbert's Choice; second, Luch-singer, Jr., on Star Boy 15933, sire Rough Rider, dam Maud 30298; third, Ranck, on Cap. M. 12641.
Boar Six Months and Under One Year—First, Humbert & White, on Modeller 13235, sire Nashua Boy 12563, dam Mae 17568; sec-ond, Lake; third, Humbert & White.
Boar Under Six Months—First and sec-ond, Humbert & White, on pig by Joker 112391; third, Luchsinger, Jr.
Aged Sow—First, Humbert & White, on Sweet Marie 19300, sire Combination 12313, dam

Belle IV. 17576; second and third, Humbert & White.
Sow One Year and Under Two—First, sec-ond and third, Humbert & White.
Sow Six Months and Under One Year—First, Humbert & White; second and third, Lake.
Sow Under Six Months—First and second, Humbert & White, on pig by Joker 112391.
Herd—First, Humbert & White, headed by Joker 112391; second, Humbert & White, headed by Humbert's Choice; third, Luch-singer, Jr., headed by Star Boy 15933.
Young Herd—First and third, Humbert & White; second, Lake.
Boar, Any Age—Humbert & White, on Joker 112391.
Sow, Any Age—Humbert & White, not named, by Combination 12313.

YORKSHIRES.

This large, growthy bacon type was well represented, not in point of number, but in quality of the animals exhibited. The en-tire lot numbered forty-three head, and only three exhibitors, both breeders in Minne-sota—Thos. Canfield, Lake Park (27 head); G. A. Forgeron, Rosemont (7 head); D. H. Poor, Hastings (9 head). Mr. Canfield's herd is worthy of special note. This herd ex-hibited at Des Moines and obtained there every first place where entry was made ex-cept two. It is a matter of regret that greater competition was not available at Minnesota State Fair, as Mr. Canfield came prepared for it. His animals are exception-ally well bred and combine uniformity in type with good fitting. His aged boar, Sum-mer Hill Perfection 4751, now at head of herd, bred by D. C. Platt & Son, Canada, was junior champion and grand champion at St. Louis. Mr. Canfield won champion-ship on exhibit of seven head of any breed owned and bred in Minnesota in 1905 and 1906. Summer Hill Topsy 5th 5396, which won second place in class, is litter sister to the grand champion sow at St. Louis. Other herds exhibited were good individual-ly, though lacking condition and modern type in some individuals. Prof. J. J. Fer-guson acted as judge and awarded as fol-lows: Mr. Canfield's winnings were first on aged boar; first on boar one year and un-der two; first on boar six months and un-der one year; first, second and third on boar under six months; first and second on aged sow; first and second on sow one year and under two; first, second and third on sow six months and under one year; first, sec-ond and third on sow under six months; first on herd; first, second and third on young herd; champion boar any age; cham-pion sow any age, and second, third and fourth on best pen of bacon hogs. Mr. G. A. Forgeron won second on aged boar, and second on boar one year and under two. Mr. D. H. Poor won first on best pen of bacon hogs.

TAMWORTHS.

Tamworths exhibited at Minnesota State Fair while in number the smallest, only thirty-six head, yet embraced some excellent bacon types. The exhibitors: A. N. Kelly, Mineral Point, Wis., and Frank Thornber, Carthage, Ill., the latter coming direct from Des Moines and capturing a large share of firsts there. Prof. J. J. Ferguson, in pass-ing judgment on these judged them strictly from a bacon type standpoint and made spe-cial mention, calling attention of the specia-tors to Carthage Maid 2778, owned by Mr. exhibitors, Thornber winning championship side, judging from the packer's standpoint. The awards were divided between the two exhibitors, Thornber winning championship on both male and female, and a majority of other firsts.

SHEEP.

The show of sheep at the Minnesota State Fair was one that its management has reason to be proud of, judging from the number of entries made, the quality of the exhibits shown and the liberal premiums offered. The importance of this feature of the Minnesota State Fair is highly appreciated, and under the present management undoubtedly larger barns will be necessary to accommodate the next exhibit. Every pen was filled and in many cases the pens were crowded. The whole fair was a spectacular educator and a mind improver and those who came ex-pecting to see a better exhibit of sheep than ever before at this state fair were not dis-appointed. Exhibitors were ready and armed to the teeth. In most cases competition was

the keenest, many royal winners again com-peting after a fight the previous week at Des Moines, Iowa, American-bred as well as im-portered appearing in their show-yard apparel. Those just from the Royal in most cases capture the best of the premiums, yet occa-sionally one could be found capturing a con-spicuous place there, placed fourth or even down and out. This was especially true with the Shropshires. The majority of exhibitors were Minnesota and Wisconsin breeders, yet some coming from Iowa, Illinois, South Da-kota and Indiana. A few entries failed to make their appearance, yet the disappoint-ments were very few. Before decisions were rendered almost every exhibitor felt hopeful of capturing his share of the premiums, but of course some were disappointed. Those who failed to do so took things philosophically by considering their efforts not entirely with-out results, as many sales were made and new acquaintances formed, besides each ob-taining from the other new and better ideas. The judges had no easy task in selecting the winners from the various classes. So close in many instances were the contestants in merit quite often judgment simmered down to a very critical point. In most cases judgment was satisfactory, yet here and there a re-porter would have poured into his ears the wrongs of the present methods of exhibiting, suggesting at times a partially shown in favor of some exhibitor.

COTSWOLDS.

The best types of this long-wooled breed ever exhibited in Minnesota were shown in open competition at Minnesota State Fair. The famous breeders, Lewis Bros., of Camp Point, Ill., were present and exhibited their usual heavy-bodied, deep-bodied types num-bering twelve head, winning first honors in aged class with a ram that was champion and grand champion at St. Louis Expo-sition. This ram has proven a noted sire and has been retained in their flock for this purpose; also an aged ewe winning champion and grand champion at St. Louis was placed second. This flock won eight firsts out of a possible fifteen at St. Louis. F. W. Harding, of Waukesha, Wis., exhibited twelve newly-imported sheep. These noted flocks coming together made strong competition and being the only exhibitors, and both well prepared, the absence of unfitted animals was always conspicuous in this ring. Judge W. A. Weaver, of Canton, Ill., officiated and in almost every class decision was only rendered after much careful handling. The points of decision were often critical. The amount of flesh carried by the two flocks did not vary much. Lewis Bros.' flock had a little more condition than the Harding flock. Either flock was nicely fitted and could easily have carried considerable more flesh. Lewis Bros. and F. H. Harding showed at Des Moines, and go from here to Milwaukee, Wis. The awards follow:

AWARDS.

Aged Ram—First, Lewis Bros.; second and third, F. W. Harding.

Ram One Year Old—First, Harding; sec-ond, Lewis Bros.; third, Harding.
Ram Lamb—First, Lewis Bros.; second, Harding; third, Lewis Bros.
Aged Ewe—First, Harding; second and third, Lewis Bros.
Ewe One Year Old—First, Lewis Bros.; second, Harding; third, Lewis Bros.
Ewe Lamb—First and second, Harding; third, Lewis Bros.
Flock—First, Harding; second, Lewis Bros.
Sweepstakes Ram Any Age—Lewis Bros.
Sweepstakes Ewe Any Age—Harding.

DELAINES.
